PUBLIC ACCOUNTABILITY AND REPORTING PROJECT – QUOTA MANAGEMENT AND MOVEMENT
Measures – August 15, 2018

Outcomes	***Establishing Baseline – January 1 – December 31, 2018 (report due to BCFIRB on June 1, 2019)***	***Annual Measure Going Forward June 1, 2020 and beyond***
1. Quota is managed in accord with legislation, regulations, agreements and FIRB decisions and directions.	• Commodity Board orders, policies, procedures and decisions are in accord with legislation, regulations, any agreements and BCFIRB decisions and directions.	• Annual statements of compliance • Outcome of quota-related appeals to BCFIRB
2. Strategic planning and sustainable industry development, supported by sound quota management over time that supports the board's vision and goals for the industry.[1]	1) <u>Definition of sustainable industry development.</u> • Long-term vision and goals for sector 2) <u>Industry structure in 2018 (Jan 1, 2018 to December 31, 2018)</u> • Total # of farm operations and total quota allocated and/or being produced in BC broken down by: o by new entrant and established producers o by type of quota – new entrant, specialty, organic, mainstream, etc. ▪ by size (small, medium, large as defined by board) ▪ by region (as defined by board) ▪ by product (e.g. organic, Asian bird)	<u>Industry Structure over Time</u> • Ongoing and updated definition of sustainable industry development. • Production distribution across BC by producer and production type in 2019 (January 1, 2019 to December 31, 2019), and in subsequent years.

[1] Please note that names of producers and farm operations are not being requested at this time. The data is intended to provide an indication of the evolution of each supply managed sector based on quota distribution and movement on an annual basis.

Outcomes	*Establishing Baseline – January 1 – December 31, 2018 (report due to BCFIRB on June 1, 2019)*	*Annual Measure Going Forward June 1, 2020 and beyond*
2. Strategic planning and sustainable industry development, supported by sound quota management over time that supports the board's vision and goals for the industry. ***Con't***	3) <u>Production</u> • Total volume of actual production by type of production, region, size of farm and by type of producer (new entrant or established). 4) <u>Growth</u> • Was growth quota allotted, and if so: o Total volume broken down by type of production, region, size of farm operation and type of producer (new entrant or established or other). o # of producers that turned down growth quota o # of producers not eligible to receive quota growth allocations in year due to transferring or selling quota in prior 12 months (by size, region, producer type and type of quota produced) 5) <u>Retraction</u> • Was quota retracted, and if so: o Total volume broken down by type of production, region, size of farm operation and type of producer (new entrant or established or other). 6) <u>Quota movement</u> • Total volume of quota that moved between producers broken down by quota type. • Type, size and location of operation, and type of producer (e.g., new entrant or established), that the quota moved from and to. • Total volume of quota that transferred under any transfer assessment exemption rules. • # and amount of any quota transfer assessments levied by commodity boards.	• Report on existing quota production in 2019 and for subsequent years. • Report on allocations of new growth quota or retractions in 2019 and in subsequent years. • Where is quota moving in BC in 2019 and in subsequent years.

Outcomes	*Establishing Baseline – January 1 – December 31, 2018 (report due to BCFIRB on June 1, 2019)*	*Annual Measure Going Forward June 1, 2020 and beyond*

2. Strategic planning and sustainable industry development, supported by sound quota management over time that supports the board's vision and goals for the industry.
 	
Con't
	7) <u>New entrants</u>
	• How entered (i.e. succession, new entrant program, purchased quota)
	
	8) <u>Small lot/permit production</u>
	• # of small lot/permit production broken down by:
	  ○ Region
	
	9) <u>Processing capacity</u>
	• # of processors and further processors by :
	  ○ Size
	  ○ By general product type/area of business
	  ○ Licence (federal/provincial)
	  ○ Region
	
	10) <u>Quota Price</u>
	• Price that producers are trading quota at between themselves where commodity board has involvement through running a quota exchange (BC Egg Marketing Board, BC Milk Marketing Board)
		• Quota price over time for the egg and milk sectors

3. Producer Engagement and Commitment to the Industry	• Average volume of quota leased as percentage of individual holdings (if leasing or other similar tools allowed) • # of new entrant exits within first 5 years of entering the industry • # of new entrant exits after 5 years and before 10 years • # of established producer exits (those in the industry 10 years or longer)	• On-going tracking of producing what is held. • # of industry exits and length of time each was in industry prior to exit

Outcomes	*Establishing Baseline – January 1 – December 31, 2018 (report due to BCFIRB on June 1, 2019)*	*Annual Measure Going Forward June 1, 2020 and beyond*

4. **Quota management supports delivery of Ministry Policy (Regulated Marketing Economic Policy 2004)**	• Description of specialty and niche markets being filled - quota & non-quota programs,
	  ○ Identification of emerging trends
	  ○ How board is responding to emerging markets
	• Provincial share of total national production compared to other provinces
	  ○ Conventional, speciality or other markets
	• Amount of product exported by commodity type, by market destination, if information available. If available, how many import volume supplementals were granted by the federal government this year?
		• Additional information for reports in subsequent years related to existing regulated marketing economic policy objectives set by Ministry in 2004.
