

Freshwater Atlas BCGW Key

This key contains brief descriptions of Freshwater Atlas (FWA) data available from the B.C. Geographic Warehouse (BCGW).

Point Data

BCGW Cryptic Name	Brief Description
 WHSE_BASEMAPPING.FWA_NAMED_POINT_FEATURES_SP	Named point features (both fresh and marine) such as points of land, etc. Point names included as an attribute.
 WHSE_BASEMAPPING.FWA_OBSTRUCTIONS_SP	Water obstacles (rapids, falls, etc).

Line Data

BCGW Cryptic Name	Brief Description
 WHSE_BASEMAPPING.FWA_LINEAR_BOUNDARIES_SP	All bank edges (of rivers, lakes, and wetlands), delimiter edges, glacier edges, and administrative boundary edges. These are the linear features that makeup the polygonal water bodies.
 WHSE_BASEMAPPING.FWA_WATERSHED_BOUNDARIES_SP	All principal and non-principal watershed boundary edges. These are the linear features that makeup the watershed polygons.
 WHSE_BASEMAPPING.FWA_COASTLINES_SP	Linear coastlines of BC, including mainland and marine islands. Lines are directionalized and connected. Attributes include a hierarchical key and route identifier.
 WHSE_BASEMAPPING.FWA_STREAM_NETWORKS_SP	Flow network arcs (observed, inferred and constructed). Contains no banks, coast or watershed boundary arcs. Directionalized and connected. Contains hierarchical key and route identifier.

Polygonal Data

BCGW Cryptic Name	Brief Description
<input checked="" type="checkbox"/> WHSE_BASEMAPPING.FWA_WATERSHEDS_POLY	All fundamental watershed polygons generated from watershed boundary lines, bank edges, delimiter edges, coastline edges, and administrative boundary edges.
<input checked="" type="checkbox"/> WHSE_BASEMAPPING.FWA_WETLANDS_POLY	All wetland polygons for the province.
<input checked="" type="checkbox"/> WHSE_BASEMAPPING.FWA_BAYS_AND_CHANNELS_POLY	Bay and Channel (fresh and marine) features and associated names.
<input checked="" type="checkbox"/> WHSE_BASEMAPPING.FWA_GLACIERS_POLY	Glaciers and ice masses for the province.
<input checked="" type="checkbox"/> WHSE_BASEMAPPING.FWA_NAMED_WATERSHEDS_POLY	All named watershed polygons.
<input checked="" type="checkbox"/> WHSE_BASEMAPPING.FWA_RIVERS_POLY	All double line river polygons for the province.
<input checked="" type="checkbox"/> WHSE_BASEMAPPING.FWA_ISLANDS_POLY	All island polygons. Islands may overlap as there are islands within islands.
<input checked="" type="checkbox"/> WHSE_BASEMAPPING.FWA_ASSESSMENTS_WATERSHEDS_POLY	Assessment Watersheds are mesoscale aquatic units designed to replace the 3rd order 1:50K watersheds. Assessment Watersheds are based on groupings of fundamental watersheds using FWA watershed code and local code, with a target size of between 2,000ha and 10,000ha.
<input checked="" type="checkbox"/> WHSE_BASEMAPPING.FWA_WATERSHED_GROUPS_POLY	Polygons delimiting the watershed group boundary, which is a collections of drainage areas. In-land groups will contain a single polygon, coastal groups may contain multiple polygons (one for each island).

BCGW Cryptic Name	Brief Description
 WHSE_BASEMAPPING.FWA_MANMADE_WATERBODIES_POLY	All manmade water bodies, including reservoirs and canals, for the province.
 WHSE_BASEMAPPING.FWA_LAKES_POLY	All lake polygons for the province.

Data Table

BCGW Cryptic Name	Brief Description
 WHSE_BASEMAPPING.FWA_EDGE_TYPE_CODES	Links the edge type codes used in the stream network layer with an English description used to categorize stream network features.
 WHSE_BASEMAPPING.FWA_WATERSHED_TYPE_CODES	Lookup table for watershed type codes
 WHSE_BASEMAPPING.FWA_STREAMS_20K_50K	Contains all primary and secondary matches between 1:20K and 1:50K stream edges. This attribute table links the new Freshwater Atlas watershed codes with the existing 1:50K Watershed Atlas watershed codes for cross reference purposes.
 WHSE_BASEMAPPING.FWA_WATERBODY_TYPE_CODES	Links the water body type codes used in the water body layers with an English description used to categorize water body features.
 WHSE_BASEMAPPING.FWA_WATERBODIES_20K_50K	Contains all primary and secondary matches between 1:20K and 1:50K water body polygons. This attribute table links the new Freshwater Atlas watershed codes with the existing 1:50K Watershed Atlas watershed codes for cross reference purposes.
