

BC Soil Information Finder Tool

This project is a collaborative effort between the British Columbia (BC) Ministry of Agriculture (AGRI) and the BC Ministry of Environment (MoE) with funding from *Growing Forward 2* (a federal-provincial-territorial initiative). The underlying soils maps and data were collected over past decades by the Government of Canada and the Province of British Columbia, and the data is being managed and updated by MoE as the BC soil data custodian. The following are key members of the project: Deepa Filatow (MoE), David Poon (AGRI), Geoff Hughes-Games (AGRI), Maija Finvers (MoE), Andy Muma (BC Ministry of Forests, Lands and Natural Resource Operations), Scott Smith (Agriculture and Agri-Food Canada), and CloverPoint Cartographics Ltd (Erin Philip and Elizabeth Kenney) under contract.
