

Borehole No.: 3419-MW-5  
 Location: See Figure 3  
 Date Drilled: April 16, 2008  
 Supervision: S. Buck

Drilling Method: Track-mounted Drill Rig

Sampling Method: N/A

depth (m)	Description	sample no. recovery Headspace	vapour probe details	Remarks
0	Firm/compact, damp, brown, SILT and SAND, some gravel, trace to some debris, occasional cobbles, wood debris from 2.0 to 2.1m (FILL)			Blank PVC
2.1	Compact, damp, brown, SAND and GRAVEL, trace to some silt and debris (FILL)			Bentonite
3.2	Soft, damp, black, organic SILT, some sand, wood debris, pine needles, organics (FILL)			
3.4				
3.7	WOOD CHIPS (FILL)			
4				
5.4	Mixed, firm/compact, moist, black, brown, and grey, SAND, some silt to silty, trace to some gravel and organics, occasional wood debris (FILL)			Cuttings
6				
7.0	Firm to stiff/compact, moist, grey, SILT and SAND, some gravel, trace of organics, and wood debris (FILL)			
7.6	Stiff, moist, grey, SILT and SAND, some gravel, occasional wood debris (FILL)			Bentonite
8				
10	Stiff, moist, grey, SILT and SAND, some gravel, occasional wood debris (FILL)			PVC Screen
12.6	Compact to dense, moist, grey, SAND, trace of silt, trace to some gravel from 13.1m			▼ GWL 2008/04/17
13.1				Filter Sand
14				
16	Wet, grey, soft, sandy SILT; some clay			Hole sloughed from 14.0 m to 18.3 m
18	Wet, grey, soft, silty SAND			
18.3	End of borehole @ 18.3 metres
