

Updates to British Columbia Water Quality Guidelines

Date	Updated file	Description
June 27, 2017	Working Water Quality Guidelines	In table 1, the term “dissolved” was removed from the sulfide water quality guideline.
August 10, 2017	PAH approved freshwater and marine sediment quality guidelines	The Water Protection and Sustainability Branch rescind the BC approved freshwater and marine sediment quality guidelines for PAHs. The sediment working quality guidelines for PAHs now apply and are available at: http://www2.gov.bc.ca/assets/gov/environment/air-land-water/water/waterquality/wqgs-wqos/bc_env_working_water_quality_guidelines.pdf
