

2014 CARBON NEUTRAL ACTION REPORT – SMALL EMITTERS FORM

DUE: May 29, 2015

[This form is for the use of BC Public Sector Organizations that had GHG emissions of less than 600 tonnes CO₂e in the 2014 reporting year, which as a group, equals less than 1% of all PSO emissions]

Organization Name:

BC Games Society

Contact name:

Slavka Schiavio

GHG Emissions and Offsets for 2014 (TCO2E)	
GHG Emissions created in Calendar Year 2014 (from SMARTTool Homepage):	
Total Emissions	2.89 tonnes
Total Offsets	3 tonnes
Adjustments to GHG Emissions Reported in Prior Years (from SMARTTool Homepage):	
Total Emissions	N/A
Total Offsets	N/A
Total Emissions for Offset for the 2014 Reporting Year (from SMARTTool Homepage)	
Total Offsets	3 tonnes

To enable comparisons with all B.C. public sector organizations, please provide the following data for your organization:

1. How many Full Time Equivalent (FTE) employees do you have within your organization? 10
2. Schools, Universities and Colleges only: Number of student FTEs as of Dec 31, 2014? N/A
3. What is the total amount of floorspace in your organization (including occupied and unoccupied space)? Please report in square meters: 258.83 square meters

List the top three actions taken by your organization in 2014 to reduce GHG emissions and/or improve sustainability:

Action
1. Most of the resources provided to Provincial Sport Organization volunteers are provided in an electronic format. BC Games Society also provides the majority of supporting information for the Host Community volunteers in electronic format. Volunteers are also encouraged to use cloud system to share documents electronically. Moreover, approximately 90% of the results are submitted electronically.
2. BC Games participants are accommodated in their sport venue or as close as possible to reduce the transportation needs during the Games. Bio-diesel buses are used for transportation of BC Games participants to and from the Host Community. BC Games Society also has a no-idling protocol for all buses and cars used in the Games.
3. The BC Games Society encourages the Host Communities to have an environmental plan. Information given to the volunteers, participants, and the community includes statements that the BC Games Society is committed to sustainability and reducing the impact on the environment. All participants are encouraged to travel lightly, buy local, ethical and green, and minimize waste. There is no individual bottled water in any of the sport venues or at the special events. Breakfasts and dinners for participants are provided buffet style, and lunches are delivered in bulk, reducing packaging and allowing for items to be returned and reused.

Describe Plans your organization has for continuing to minimize your GHG emissions

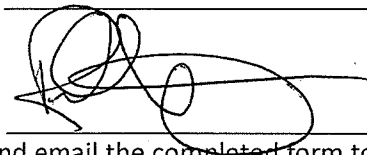

BC Games Society will continue to try to decrease the green house gas emissions in the office in Victoria, as well as in each host community. The Society will continue to lead the host communities around the province to host sustainable multi-sport events. BC Games will continue using its one of a kind LED torch that eliminates 900,000 cubic feet of natural gas each Games. Each host community will have a volunteer Environment Chair who will oversee the implementation of the Environmental Plan.

Executive Sign-off

Name: Kelly Mann
(print)

Title: President & CEO

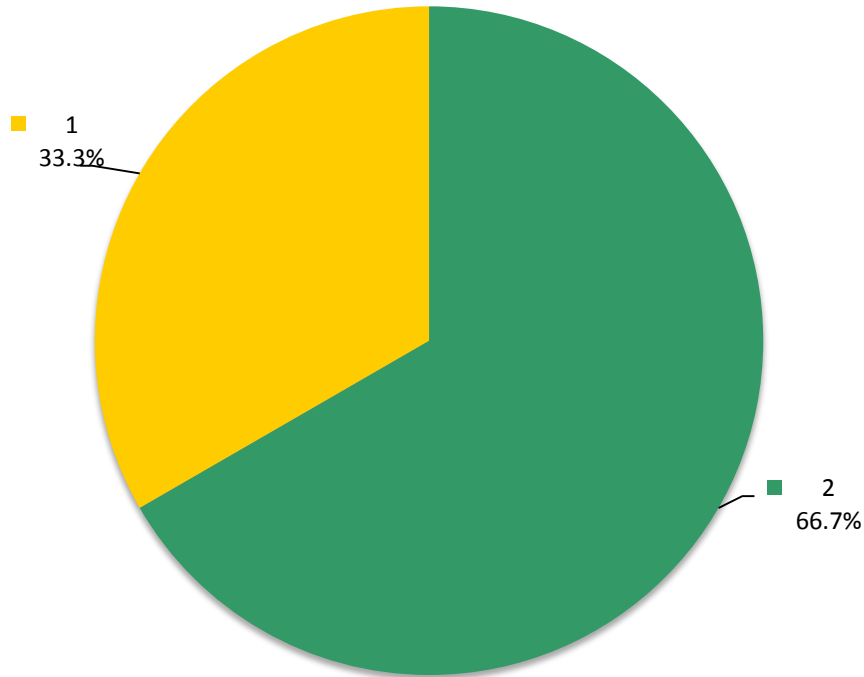

Signature:

Date: May 20, 2015

Please scan and email the completed form to climateactionsecretariat@gov.bc.ca or fax to 250-356-7286.

**BC Games Society
Greenhouse Gas Emissions by Source
for the 2014 Calendar Year (tCO₂e*)**

Total Emissions: 3

■ Stationary Fuel Combustion (Building Heating and Generators) and Electricity ■ Supplies (Paper)

Offsets Applied to Become Carbon Neutral in 2014 (Generated June 22, 2015 12:33 PM)

Total offsets required: **3**. Total offset investment: **\$75**. Emissions which do not require offsets: **0** **

*Tonnes of carbon dioxide equivalent (tCO₂e) is a standard unit of measure in which all types of greenhouse gases are expressed based on their global warming potential relative to carbon dioxide.

** Under the *Carbon Neutral Government Regulation of the Greenhouse Gas Reduction Targets Act*, all emissions from the sources listed above must be reported. As outlined in the regulation, some emissions do not require offsets.
