

BC Hydro

Value of Strategic Energy Management Plans

November, 2016

Explore the full potential
of energy conservation.

Value of Having a good SEMP

A BC Hydro Perspective

- Helps to differentiate the “energy team” within a large organization
- Builds credibility and gains commitment
- Executive sign off will trigger commitment to the goal, unlocks funding necessary to achieve goal.
- Helps to assign organizational stakeholders necessary to meet the goal

A Good SEMP has Benefits.

How does it help when interacting with BC Hydro?

- Access to resources, programs and funding opportunities
- Hydro/Fortis/NRCAN
- Able to navigate and share with many users
- Speed up decision making for allocating resources
- “Always on” information
- Credibility at the executive level.

Managing DSM.

Shifting our focus to meet evolving energy needs.

- Continue to offer access to energy managers, energy management planning support and help in identifying energy conservation projects.
- Discontinue inefficient programs and approach programs in new ways.
- Adjust spend to target programs based on cost-effectiveness and areas of need.
- Explore new ways of supporting customers' energy saving goals.
