

CUMULATIVE EFFECTS FRAMEWORK

MOVING FORWARD

WORKSHOP 3

Target Audience

Technical and/or scientific experts in a value field, including representatives from industry, academia, ENGOs and other provincial experts or knowledgeable individuals.

Workshop 3 will focus primarily on the interests and needs of technical and/or scientific experts in a value field. The workshop will include representatives from industry, academia, ENGOs, and other provincial government (e.g., local, provincial, federal, First Nations) experts in the field. The workshop will provide a general overview of the cumulative effects assessment protocols and facilitate discussions around the specific cumulative effects assessments for provincial core values.

Goals of Workshop 3:

- Solicit expert technical/scientific review of the assessment protocols for provincial core values (i.e., Grizzly Bear, Aquatic Ecosystems and Old Forest).
- Review and provide input on the general assessment approaches, including selection of indicators, data inputs, and the communication of results.
- Identify outstanding issues/concerns/gaps.

Time: 1:00 to 4:30 and 8:30 to 2:30

Date: 27 June 2016 28 June 2016

Location: MORRIS J. WOSK CENTRE FOR DIALOGUE

Simon Fraser University

580 West Hasting Street, Vancouver, BC V6B 1L6

Phone: 778-782-5800

The draft policies for cumulative effects [assessment](#) and [management](#), [discussion paper on procedures](#), and [grizzly bear value summary](#) will serve as the basis for discussion during the workshop. It is recommended that all workshop participants review the drafts prior to the workshop, as there will not be sufficient time during the workshop to review all of these documents in detail. Other reading material will be distributed to registered participants prior to the workshop.

Cumulative Effects Framework
Assessing and Managing Cumulative Effects in British Columbia
