VI	Evaluation and Accountability	5
VII	Conclusions	5

### **Appendices**

- A. List of Participating Pharmacies
- B. List of sponsoring members

## **I PROGRAM OUTLINE**

The collection sites for the *Medications Return Program* are community pharmacies. The program administrator has information on all participating pharmacies to ensure pharmacists have knowledge of the program and the way the program operates. In 2005, Post Consumer Pharmaceutical Stewardship Association had 80% participation rate from community pharmacies (Appendix A), covering nearly every community in the province. Community pharmacies are a natural, logical and safe site for consumers to return unused or expired medications. Pharmacists are the most knowledgeable of all health care professionals when it comes to medications. Many of these pharmacies are open extended hours, offering a convenient place for consumer disposal year-round. There is no charge to a consumer to return products. Community pharmacies currently participating in the program can be easily located by consumer on our website

The residual medications are stored in 20 litre plastic containers. Once the container(s) is full, the pharmacy contacts the program administrator who arranges for pick up within 7 days. The full container is replaced with an empty container(s). The program administrator consolidates and then sends the collected residual medications to a licensed incinerator for destruction.

The Post-Consumer Pharmaceutical Stewardship Association (PCPSA) is a nationally registered non-profit organization (1999). In this reporting period the *Medications Return Program* was contracted to the Residuals Management Group Ltd. by PCPSA.

## **II COMMUNICATIONS**

In 2005,

Several municipalities have included the *Medications Return Program* in their annual refuse notice mailed to each household.

PCPSA continued to participate in the Recycling Council of British Columbia (RCBC) hotline that provides toll-free information regarding the disposal of expired and unused medications. Approximately 100 calls were made to the recycling hot line representing less than 1% of their total calls. These calls decreased from 155 in 2004.

### III PROGRAM COSTS AND FUNDING

The cost of the Program during this reporting period, including management, communications, collection and disposal was \$225,000.

The *B.C. Medications Return Program* is completely funded by the participating pharmaceutical brand owners through PCPSA. The *Medications Return Program* does not pass on or show separately the cost of the Program to the consumer. A list of Brand Owners is attached in **Appendix B**.

### IV RESIDUAL MEDICATIONS COLLECTED

The *B.C. Medications Return Program* continued to collect post-consumer, residual, unused and expired medications at pharmacies throughout British Columbia. A list of participating pharmacies can be found in **Appendix A**. The pharmacies voluntarily collected these medications during usual business hours. Most pharmacies are open Monday to Saturday; 9:00 am to 6:00 pm or later.

During the reporting period 18,012 kg of residual medications or 1,430 containers were picked up from the Pharmacies. With the guaranteed pickup program there aren't any pharmacies with full pails of leftover product.

The collection volume in container numbers and weight are up significantly. Weight is up 16.2% over 2004 and the number of containers received is up by 18.7%. We attributed this increase to awareness of the program over the past year. The volume of medications collected by region was as follows:

REGION	CONTAINERS	WEIGHT (Kg)
Coastal B.C.	28	322
Fraser Valley	143	1,877
Greater Vancouver	574	7,138
Kootenays	50	743
Northern B.C.	94	1,160
Okanagan	153	1,839
Vancouver Island	<u>388</u>	<u>4,933</u>
Total	1,430	18,012

On a quarterly basis the collections were:

<b>QUARTER</b>	<b>WEIGHT (Kg)</b>
Q1 – 2005 (Jan – Mar)	4,252
Q2 – 2005 (Apr – Jun)	5,255
Q3 – 2005 (Jul – Sep)	4,148
Q4 – 2005 (Oct – Dec)	<u>4,357</u>
Total	18,012

## **V WASTE DISPOSAL**

All residual medications collected through the *B.C. Medications Return Program* were incinerated by:

- 1) Beiseker Envirotech Inc (formerly Cristallo Engineering Technologies Inc).  
Located in Beiseker, Alberta

Due to the nature of the waste and the risk to the public, no efforts are planned to move away from incineration as the preferred method of managing the residual medications.

## **VI EVALUATION AND ACCOUNTABILITY**

The volume of product collected since inception of the program continues to increase. The increase from 2004 is significant and reflects the success of our website and some advertising through local newspapers.

## **VII CONCLUSIONS**

During the reporting period, 18,012 tonnes of residual medications were collected and incinerated. All of the residuals medications were incinerated in 2005. The collection has been geographically diversified throughout the province.

The PCPSA continues to contract with Residuals Management Group Ltd. to administer the *Medications Return Program*.

The public has accepted the *Medications Return Program* as the logical solution for disposing of post consumer, residual, unused and expired medications. There have been no direct complaints from the public to the program manager during the reporting period.
