

Soo TSA Vegetation Resources Inventory Strategic Inventory Plan

It is the intention of the proponent to implement the Sunshine Coast TSA Vegetation Resources Inventory Strategic Inventory Plan (VSIP) as described. Vegetation Resources Inventory Project Implementation Plans (VPIP), which build upon information provided in the VSIP, will be required to provide detailed project implementation information. As a key stakeholder in the inventory, Ministry of Forest and Range (MOFR) VRI staff will be consulted during the development of these plans.

I have reviewed the Soo TSA VSIP. I will be advising Pricewaterhouse Coopers that the work proposed in this plan meets Vegetation Resources Inventory standards and MOFR business needs.

Jon Vivian, R.P.F.
Manager,
Vegetation Resources Inventory Section
Forest Analysis and Inventory Branch
