

# Damage Reports

# 4

Whenever the codes for Blowdown, Fire and/or Insect damage are detected on card type 2s, damage reports are produced in addition to the normal (non-damage related) output. These reports will segregate the reported volumes into separate damage types and/or codes, as indicated. Root rot damage is reported for block summaries only and is optional.

The damage reports will be the same as the normal output, only there will be a designation of species and damage type and damage codes on the report.

Damage Type	Code	Description	Species
Blowdown	E	Down trees	All Species
	G	Down and shattered trees	All Species
Fire	A	Light fire	All Species
	B	Medium fire	All Species
	C	Heavy fire	All Species
Insect/Disease	1	Green attack	Balsam, Pine
	2	Red attack	Balsam, Pine
	3	Grey attack	Balsam, Pine
	4	Blister rust	White Pine
	5	Green attack - alive	Spruce, Douglas Fir
	6	Green attack - dead	Spruce, Douglas Fir
	7	Grey attack - dead	Spruce, Douglas Fir

<b>Damage Type</b>	<b>Code</b>	<b>Description</b>	<b>Species</b>
	8	Red attack	Douglas Fir
	X	Defoliator G live cambium	All Species
	Y	Defoliator D dead cambium	All Species
Root Rot	J	Light	All Species
	K	Moderate	All Species
	L	Heavy	All Species

## 4.1 List of Damage Reports

The following damage reports are required for damage types Blowdown, Fire, and Insect:

1. 006 Extended Forest Type Stand and Stock Table, one page with all trees, one page with non-damaged trees, and one page for each Blowdown, Fire, or Insect damage code.
2. 007 Stand and Stock Tables, one page for each species and damage type containing each of the damage codes for that damage type.
  - i 007a Block Stand Table.
  - ii 007b Block Stock Table.
  - iii 007c Block Basal Area.
  - iv 007d Timber Type Stand Table.
  - v 007e Timber Type Stock Table.
  - vi 007f Timber Type Basal Area.
  - vii 007g Cutting Permit Stand Table.
  - viii 007h Cutting Permit Stock Table.
  - ix 007i Cutting Permit Basal Area.
3. 009 Volume Summaries, one page for each species and damage type reporting each of the damage codes for that damage type.
  - i 009a Timber Type Summary.
  - ii 009b Block Summary.
  - iii 009c Cutting Permit Summary.
  - iv 009d Treatment Unit within Block Summary - Coast only.
4. 011 Plot Summary, damage code volumes segregated for each species.
5. 015 Harvesting Method Summary, percent net volumes will be segregated for each Harvesting Method under the headings Fire, Heavy Fire (Damage code C), Down trees, and Insect damage.

The following damage reports are optional:

1. 009b Root Rot Block Summary.

## 4.2 Damage Report Calculation

Trees with multiple damage codes will report each damage type in the *Damage Summary Reports*. The damage code or codes that will assign the highest risk group will be used in the calculation of the net volume for each of the damage types. If pathological indicator(s) move the risk group higher than the damage code(s) then use the risk group from the pathological indicator(s) to calculate the *Damage Summary Reports*.

### *Example*

Cruise = 1 ha, 1 plot, 1.0 m<sup>3</sup> mature Lodgepole Pine tree that represents 100 stems/ha with down tree code G, fire code B and insect 3:

Risk groups (RG) -Down Tree = RG3, Fire = RG2, Insect 3 = RG 2. Use RG 3 since it is the highest risk group.

Volume - Hypothetical loss factor DWB = 30% plus 28% for the grey attack breakage add-on = 58%.

Tree = 1.0 m<sup>3</sup> - 0.5 m<sup>3</sup>. Cruise volume per hectare = 0.5 \* 100 stems = 50 m<sup>3</sup>.

Damage reports -Type, Block and Cutting Permit Damage Report Net Volume = 50 m<sup>3</sup> for Lodgepole pine Down Tree (G), Fire (B) and Insect (3).

### 4.3 Sample Damage Report Listings

Some of the DBH classes have been removed from these sample listing.
