Notes: ASMR - Age Standardized Mortality Rates per 10,000 standard population. Deaths with gender unknown are excluded

Status/Other is the ratio of the Status Indian 1992-2006 ASMR to the rate of Other Residents.

Order based on the ASMR rank for Status Indians. In case of ties, the cause with the larger number of deaths has the higher rank.

## **LIFE EXPECTANCY BY HEALTH SERVICE DELIVERY AREA AND GENDER**

This Life Expectancy table is an abridged life table with five-year age groups up to 100+. Due to the sparse observations of mortality in the elderly Status Indian population, a robust method based on empirical data, known as the extinct generation method, was employed to improve the estimates of mortality for oldest ages for this life table. The reader should be mindful of this when comparing this life expectancy estimates to others produced using different methodology or in previous publications.

S/O - Status/Other is the ratio of the Status Indian 1992-2006 rate to the rate for Other Residents in the area shown.  
\*In 1993 the medical certification of death was revised to include a question about environmental, occupational, and lifestyle factors that may have contributed to the death. As a result, the number of deaths indirectly due to alcohol has increased since 1993.

Notes:

- <sup>1</sup>Live Birth Rates per 1,000 population.
- <sup>2</sup>Rates for birth statistics and infant deaths per 1,000 live births.
- <sup>3</sup>Stillbirth rates per 1,000 total births (five births plus stillbirths).
- ASMR per 10,000 Standard population (Canada Census 1991)
- S/O - Status/Other is the ratio of the Status Indian 1992-2006 rate to the rate for Other Residents in the area shown.
- \*In 1993 the medical certification of death was revised to include a question about environmental, occupational, and lifestyle factors that may have contributed to the death. As a result, the number of deaths indirectly due to alcohol has increased since 1993.

Notes: <sup>1</sup>Live Birth Rates per 1,000 population. <sup>2</sup>Rates for birth statistics and infant deaths per 1,000 live births. <sup>3</sup>Stillbirth rates per 1,000 total births (live births plus stillbirths).  
 ASMR per 10,000 Standard population (Canada Census 1991)  
 S/O - Status/Other is the ratio of the Status Indian 1992-2006 rate to the rate for Other Residents in the area shown.  
 \*In 1993 the medical certification of death was revised to include a question about environmental, occupational, and lifestyle factors that may have contributed to the death. As a result, the number of deaths indirectly due to alcohol has increased since 1993.
