

B.C. COASTAL FISHERIES
FORESTRY GUIDELINES

STREAMSIDE AREAS

Armour bridge abutments

Remove unstable debris
from channels

Keep backspars out of
streamside management zones

Protect streams with
pesticide free zones
and fertilizer free zones

Identify fish by trapping
to classify streams

Plan streamside
management zones

Know local soil materials

Use alternative
harvesting systems

Discuss stream
protection with workers

Identify wind-throw
prone and unstable areas

Regenerate forests promptly

Protect streamside areas
while spacing and pruning

Learn about fish

Protect wildlife trees
and snags
