### **Technical Details**

On July 10, 2023, Apple published rapid security responses to address a vulnerability in the following products:

- iOS and iPadOS versions prior to 16.5.1 (a)
- macOs Ventura versions prior to 13.4.1 (a)

Apple has received reports that CVE-2023-37450 has been actively exploited.

For details of specific vulnerabilities impacting Apple device s please refer to the product links provided.

This vulnerability is rated as a **HIGH** risk. A software patch exists to address this risk. As there are reports of active exploits in the wild and many of the vulnerabilities are remote code execution, users should update to the current versions to avoid potential compromise.

## **Action Required**

- Locate the device or application and investigate.
- Notify business owner(s).
- Perform mitigating actions, as required.

Please notify <u>VRM</u> with any questions or concerns you may have.
