

Andesite Creek Boat Launch

- The project team is aware of the importance of the Andesite Creek boat launch.
- It will be accessible to the public, as often as feasible while maintaining safety, throughout project construction.
- There will need to be restrictions to access during certain construction activities such as blasting and pile driving.
- Access to the boat launch will be improved as a result of the project. Final design of the future boat launch configurations will be completed in conjunction with the detailed design of the project.
- Enhancements are being made to Exstew boat launch facilities to provide additional access to the Skeena River.
- The project team is continuing to work with First Nations and stakeholders to ensure impacts during construction are mitigated as much as possible.
