REGIONAL BAG LIMITS

- » **Deer:** The bag limit for mule (black-tailed) deer in Region 7A is 1. The bag limit for white-tailed deer in Region 7A is 2, only one of which may be a buck, and one of which may be antlerless.
- » **Grouse:** The regional daily aggregate bag limit for grouse: blue (dusky), spruce (Franklin), ruffed is 10. The regional daily bag limit for ptarmigan is 10.

ACCESS MANAGEMENT AREAS

- » Approximately one million hectares of Crown Land has been closed to snowmobile use to support Mountain Caribou recovery in the Thompson, Kootenay, Cariboo, and Omineca regions. Snowmobile closure maps with boundaries, legal access trails, prohibited dates, and identified riding areas are no longer published in the Hunting and Trapping Regulations Synopsis, they are available online at gov.bc.ca/snowmobileclosures.
- » Vanderhoof Access Management Plan is available at <https://www2.gov.bc.ca/gov/content/industry/crown-land-water/land-use-planning/regions/omineca/vanderhoof-lrmp/vanderhoof-amp>
- » There are a number of restrictions and prohibitions in this Region. See definitions of “motor vehicle”, “ATV” and “snowmobile” in Definitions section.
- » Information signs may be posted at the points of closure for road and vehicle restrictions. These signs are for the benefit of hunters, but it is the hunters’ responsibility to recognize closures whether a sign is in place or not.
- » **Symbol Key:** Use the following symbols to determine what type of motor vehicle prohibition

is in place in the following regional MUs (see also Site and Access Restrictions section, page 9 and regional maps).

- ★ **Motor Vehicle Closed Areas** (See page 10).
- ▲ **Motor Vehicles for Hunting Closed Areas** (See page 10): The operation of all motor vehicles, including electric bicycles for the purpose of hunting, to transport wildlife, to transport equipment, firearms, and supplies which are intended for or in support of hunting or to transport hunters to and from the location of wildlife is prohibited in these areas.
- ◆ **ATVs for Hunting Closed Areas** (See page 10): The operation of ATVs (including motorcycles and electric bicycles) for the purpose of hunting, to transport wildlife, to transport firearms, or equipment and supplies which are intended for or in support of hunting, or to transport hunters to or from the location of wildlife is prohibited in these areas.
- **Snowmobiles for Hunting Closed Areas** (See page 10): The operation of snowmobiles for the purpose of hunting, to transport wildlife, to transport firearms or equipment and supplies which are intended for or in support of hunting, or to transport hunters to and from the location of wildlife is prohibited in these areas.

Closure does not apply on the road surface of the Omineca Mining Road through Lawyers Pass from Aiken Lake to the south shore of the Toadoggone River or on the road to Johanson Lake.

NOTICE TO HUNTERS

- » Hunters, while returning from hunting, are required to keep the antlers of a bull moose taken in the Omineca sub-region, and the species licence under which the moose was taken together and available for inspection by an officer of MoE.
- » A few white moose have been noticed in the Omineca region. Hunters are requested not to shoot a white moose due to their uniqueness and viewing value to all people who enjoy wildlife.

NOTICE TO HUNTERS!

McLeod Lake Indian Band asks hunters to respect their Treaty Settlement Lands. Access to these lands require permission from the local Band Office and it is the hunter's responsibility to be aware of these Treaty Settlement Lands / Indian Reserves. For more information visit <https://www.mlib.ca/departments/land-referral/land-referral-overview/hunter-information>

For persons hunting in MUs 7-29 (north of Nation River), 7-37 or 7-38 you will be within the traditional territory of the Tsay Keh Dene Nation. For persons hunting in MUs 7-39 to 7-41 you will be within either the traditional territory of the Kwadacha or Tsay Keh Dene Nation depending on your location. Before you hunt, please check at the appropriate Nation's office, by phone or email, to receive important information pertinent to their safety and environmental concerns.

Tsay Keh Dene Nation (TKDN) offers a voluntary Licensed Hunter Registration System for those hunting in TKDN territory. This system informs the Nation of hunting and harvest statistics while providing a safety and communication resource for hunters. To access the system, we ask hunters to please visit <http://fishandwildlife.tsaykeh.com/register/>. If you have any additional questions or concerns, please contact the department of Lands, Resources, and Treaty Operations manager Evan MacKinnon at evan.mackinnon@tkdb.ca or (250) 562-8882.

If you will be hunting in Kwadacha Nation's traditional territory, it is strongly encouraged that you contact the Lands and Resources Officer (LRO) in Kwadacha at (250) 471-2302 or email kfnref@gmail.com

We ask that you visit www.kwadacha.com website and fill out both the Notification to Hunt and Hunter Harvest Surveys and submit to the LRO, so that safety and open communication between hunters and the Dane Nan Yé Dāh Land Guardians is established.

Wildlife Management Update from the Omineca Region

From 2011 to 2017, results from surveys across parts of BC's Central Interior documented declining moose numbers, with populations estimated 50-70% below what they were a decade earlier. The decline coincided with the large-scale outbreak of the mountain pine-beetle and the associated salvage logging that may have influenced the distribution and abundance of moose, hunters, and predators. Results from recent population monitoring since 2020, however, suggest that moose numbers have stabilized in the southern and central parts of the region, and have slightly increased west of Prince George. While the recent trends are positive, numbers are still well below densities that were observed during the mid-2000s. Research on the factors influencing moose population dynamics continues and moose habitat enhancement trials have been established to support moose-friendly forestry practices. On April 7, 2022 Ungulate Winter Ranges (UWRs) were established for moose. The UWRs preserve 20,468 ha of core moose habitat. In addition, the UWRs designated 422,163 ha of area where forest harvesting is paired with management requirements with the intent to maintain or improve habitat for moose.

Monitoring for species such as elk, mule deer, thinhorn sheep, mountain goat, caribou, wolves, fisher, and marten continues with the objective to obtain updated population/density estimates for priority areas in the region. Other wildlife management challenges include the recovery of declining fisher and caribou populations. While habitat management is essential, habitat recovery happens slowly over decades. Population management actions for some caribou herds include wolf reduction and moose management. In 2021, the commercial trapping season for fisher was closed across the region.

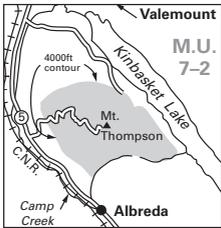

BC strives to maintain the health of wildlife populations in collaboration with our partners for the benefit of all British Columbians. Our goals are to ensure that Indigenous hunters can exercise their right to hunt wildlife within their Traditional Territories, promote licensed hunter and trapper participation, retention, and recruitment, and promote a sustainable guide-outfitter industry. We would like to thank our partners, including members of Indigenous communities; resident hunters, trappers, and guide-outfitters organizations; academia, and non-profit groups, for their continued support of wildlife management in the Omineca region.
