

NOTICE TO BIDDERS

New BC Bid System

The Ministry of Citizens Services launched the first phase of the new BC Bid system in May 2022, and the construction tendering module was available for use on October 3, 2022. Effective November 2, 2022, the Ministry of Transportation and Infrastructure will be transitioning to the construction tendering module of the new BC Bid System.

As a result, revisions were made in the Tender Document Package to reflect required changes. Bidders should review the entire tender package as there have been significant revisions to align to the new BC Bid system and required new processes. The Glossary of Terms document outlines new definitions that are important to understand to effectively navigate the new BC Bid Website.

All new Ministry of Transportation and Infrastructure tender opportunities after November 1st will be posted on the new BC Bid system. Please note that effective November 30, 2022, the legacy BC Bid system will no longer be used for Invitations to Tender.
