1. EXECUTIVE SUMMARY

HPSA program continues to perform well despite a decrease (11.5%) in volume collected due to some changes in reporting disposal weight as well as the removing of extra packaging when returning medications for safe disposal from 100,174.1 (2015) to 88,673.3 (2016). The British Columbia Medications Return Program (BCMRP) continues to operate around 1,221 collection sites (1,186 in 2015), representing a total of 95% of eligible BC pharmacies.

- **Information:** The public continued to received information on proper medication disposal through a number of channels, including: easy-to-find links to pharmacies through the Recyclopedia app available on the Recycling Council of British Columbia's (RCBC) website, links to our program on the British Columbia Pharmacy Association's (BCPhA) website, and on the majority of Regional District and municipal websites, and through HPSA's website directory and integrated pharmacy search tool.
- **Promotion:** In 2016, HPSA continued to promoted our programs through the BC Pharmacy Association's Annual Medications Return Campaign. This spring campaign focused on media relations while providing BCPhA members with links to access promotional materials available at no cost through our Association. Over 145 pharmacies participated in the one month campaign while over 50 locations requested materials in one week alone. News releases, issued jointly with eight participating regional districts, were targeted to local media in each region, and interviews and photo ops arranged with participating Pharmacy members. Because of the age range of the target audience, the campaign focused on traditional media – print, radio and TV. Social media outlets, such as regional districts' Twitter and Facebook sites, were also used to supplement news releases.

Our program continues to focus on unused and expired medications from households and continues to offer multiple solutions to reflect local/regional differences. Permanent collection programs provide ongoing, year-round drop-off services for consumers.

Once approved, this report will be available on our website at www.healthsteward.ca.

Products within plan	Prescription drugs, over-the-counter drugs and natural health products
Program website	www.healthsteward.ca

Recycling Regulation Reference	Topic	Summary Report
Part 2, section 8(2)(a)	Public Education Materials and Strategies	The public is kept informed about proper medication disposal through a number of channels, including: easy-to-find links to pharmacies through the Recyclopedia app and web search available on the Recycling Council of British Columbia's website, our own directory on HPSA's website and on the majority of Regional District or Municipalities' websites which link either directly to HPSA's website or to the RCBC Recyclopedia App(see Appendix 1).
Part 2, section 8(2)(b)	Collection System	<p>Section 5 (1) (c) (iii) of the regulation requires that a plan must adequately provide for reasonable and free consumer access to collection facilities. Since 1997, HPSA has established a comprehensive network of permanent collection sites under the BCMRP where the public can conveniently return health products for responsible disposal. This network consists of community pharmacies as well as some clinics, hospitals, community centers and other collections sites with a significant volume of consumer returns. HPSA produces an annual District Summary Report (Section 7, Table 1) that shows the number of registered collection locations per capita by district and demonstrates the high level of consumer access and program coverage in B.C.</p> <p>The provincial average is 3,810 people per HPSA registered collection location.</p> <p>See Section 7</p>

Recycling Regulation Reference	Topic	Summary Report
Part 2, section 8(2)(c)	<u>Product Environmental Impact Reduction, Reusability and Recyclability</u>	<i>n/a</i>
Part 2, section 8(2)(d)	<u>Pollution Prevention Hierarchy and Product / Component Management</u>	All products returned are disposed of through incineration.
Part 2, section 8(2)(e)	<u>Product Sold and Collected and Recovery Rate</u>	The quantity of products returned per capita is 0.019kg (or a total of 88,673.30 kg returned for destruction).
Part 2, section 8(2)(e.1)		See Appendix 2 for breakdown per regional district
Part 2, section 8(2)(f)	<u>Summary of Deposits, Refunds, Revenues and Expenses</u>	<p>The BCMRP is fully funded by the health products industries. No fees, visible or otherwise, are passed on to the consumer.</p> <p>Appendix 6 for report from independent auditors</p>

2. PROGRAM OUTLINE

The Health Products Stewardship Association (HPSA) is a not-for-profit industry stewardship organization that meets its obligations as outlined in the BC extra provincial Society Act, and files the required reports with the Corporate Property Registry Branch of the Ministry of Finance. HPSA has been registered with Industry Canada since 2000.

The HPSA has been appointed as the agency to meet producer's regulatory obligations as health products stewards. HPSA's role is to perform on behalf of each member certain duties required under the regulation. As of December 2016, HPSA's membership was established at 163 stewards (<http://www.healthsteward.ca/about-us/partners/brand-owners>). The Program is accountable to its members, the general public and the government of British Columbia through the Ministry of Environment. The Program performance is publically accountable through the annual report.

This program is designed to capture unused or expired medications from the residential sector. The Program includes both products clearly attributable to an existing steward, and orphan products (those that are no longer in production, the steward is no longer in business, or products purchased outside Canada).

- ✓ All prescriptions drugs
- ✓ Over-the-Counter Medications
- ✓ Natural Health Products

HPSA provides all collection containers and collateral materials, pays all shipping and responsible disposal costs, so there is ***no cost to the public or collection sites to participate***. Collection systems are designed with user convenience and flexibility in mind.

The collection sites for the *Medications Return Program* are community pharmacies. Pharmacy managers interested in participating must complete a registration form. Details on the program are provided to ensure that the manager and their staff are knowledgeable on the program and its operations. All participating community pharmacies receive a guide containing instructions with information on the program for the public and containers.

3. PUBLIC EDUCATION MATERIALS AND STRATEGIES

HPSA's promotional and educational strategies are designed to ensure B.C. citizens know where and how to dispose of unused or expired medications.

A) Publicity

The Program has posters, brochures, flyers, rack cards, bookmarks, etc. that can quickly be supplied to participating pharmacies, special events or other associates including Regional District Service offices and municipalities. The brochures provide clear directions on what is accepted and not accepted in the BCMRP, how to return the unused or expired health products and where returns are accepted in an easy to understand manner. HPSA offers its support to health awareness events and health trade shows that advertise responsible disposal of unused or expired health products.

B) Printed Materials

Take-Aways: Brochures and point of purchase signage are distributed to pharmacies and other locations such as clinics and doctor's offices through a reorder system by fax or email, free of charge. Brochures are presently available in English, while bookmarks are available in four languages (English, French, Punjabi and Chinese). More than 22,000 bookmarks and brochures destined for the public were ordered by pharmacies in 2016.

Municipal Garbage and Recycling Calendars: HPSA continues to promote the B.C. Medications Return Program in the recycling calendars (5) published by Regional Districts and municipalities informing residents about municipal services. See appendix 1 for full details

Mail Outs: HPSA continues to provide promotional material to Regional Districts and municipalities or other groups/organizations interested in promoting the program.

News Bulletins: These are currently available on a quarterly basis to HPSA members. HPSA also provides a bi-annual e-bulletin for the community pharmacy managers.

Local Newspapers: HPSA has contributed to articles in community newspapers promoting the B.C. Medications Return Program. Other advertising and story initiatives take place during the Pharmacist Awareness Week, the Medications Return Campaign operated by the British Columbia Pharmacy Association and other health related events throughout the year.

C) Other Resources

Web Site: The HPSA website (www.healthsteward.ca) provides the public with information on the program and locations of collection sites for the disposal of health products. The site also provides a searchable database of participating pharmacies and details on products accepted by the program.

As HPSA continues to build the membership base, it can utilize the members' own promotional network to advertise the B.C. Medications Return Program. These initiatives are reported annually.

Consumer Information: Information on the safe use, storage and disposal of medications is provided to the consumer at the time of purchase and was published in various magazines such as the Seniors Information Directory and the Seniors Living Magazine.

Regional District Advertising: Links to either HPSA's homepage and pharmacy locator tool on the HPSA sponsored Recyclepedia App appeared on the websites of 26 Regional Districts.

Pharmacy Participation:

National Prescription Drug Drop-Off Day: HPSA partnered with the BCPhA , London Drugs , Vancouver Police Department and Metro Vancouver to urge the public to safely dispose of their medications. We held a media event at London Drugs on May 16 and issued a joint [media release](#) in Vancouver on the same day to encourage the public to bring unused or expired medications to select Vancouver police stations, community centres and London Drugs pharmacies at no charge from May 16 to 21.

LONDON DRUGS

London Drugs' website has a static link on all webpages for Medication Disposal (<http://www.londondrugs.com/Medication-Disposal/Medication-Disposal,default.pg.html>). Customers are reminded of the importance of properly disposing of their unused and expired medications through the Medications Return Program.

PHARMASAVE

Pharmasave stores participate in the HPSA programs and have the following program information on their website.
(http://www.pharmasave.com/default/0/healthfeatures_details.aspx?selectedhfid=48&selectedartid=48)

REXALL

During the months of March and April each year, Rexall promotes a medicine cabinet clean out with their customers by providing them with a disposal bag for unused and expired medications (see below) and a checklist designed to help consumers keep only useful medications in their home. The Rexall web site (www.rexall.ca/medicinecabinet) contains information for consumers on how to ensure they only have safe and effective medications in the medicine cabinet. Rexall stores are registered as collection locations in the HPSA programs.

Medicine Cabinet Cleanup

Helpful tips and advice on how to manage your Medicine Cabinet

Manage Your Medicine Cabinet

In a busy household, especially with children, it's very important to give your medicine cabinet regular checkups. Here are some simple steps to manage your medicine cabinet and ensure that you have safe, effective and up-to-date products.

SHOPPERS DRUG MART

In the provincial services section, British Columbians are reminded that they can safely dispose of their medications, syringes, pens, needles and lancets (<http://www1.shoppersdrugmart.ca/en/health-and-pharmacy/pharmacy-services/details?province=bc&service>)

Medication Disposal

We can safely dispose of your medications, syringes, pen needles and lancets.

[Top of the Page](#)

From July to December 2016 Shoppers Drug Mart partnered with the Partnership for a Drug-Free Canada for their largest medicine take-back campaign. With the new theme, “Teen Takers” and campaign “Secure Your Meds,” a video was produced that discusses the dangers and reality of prescription drug and over-the-counter medicine abuse by teenagers. (Video: <https://www.youtube.com/watch?v=Cipn3z6VtUk>)

Teen Takers

D) Media coverage

In the media, during the Medications Return 2016 Campaign, comments were given by David Pavan (BCPhA past president), Martin Bruce (inspector with the VPD), Malcolm Brodie (chair of Metro Vancouver's Zero Waste Committee and Mayor of Richmond) and John Tse (vice president of pharmacy at London Drugs). The event received media coverage on CBC Radio, CTV News, News1130 and BCIT Evolution Radio.

This event was designed to coincide with National Prescription Drug Drop-Off Day on May 21, BCPhA members David Au, Michal Israel and Yan Xia volunteered their time to accept and count medication returned at community centres in Trout Lake and Kerrisdale for this event.

Fish can't say no to drugs video was launched on the same day as the media event and posted on our website and cross-promoted by the regional districts throughout BC. Video views: 392

Coverage was received in several regions including BCIT, On the Coast, CTV, Infotel.ca, Kelowna Now, News 1130, Kelowna Daily Courier, Nanaimo News Bulletin, Goldstream News Gazette and Bridge River Lillooet news.

The following Regional Districts issued press releases for the Medications Return Campaign

- Alberni-Clayoquot
- Capital Regional District
- Central Okanagan
- Nanaimo
- Northern BC
- Squamish-Lillooet

E) Sponsorship

RCBC Toll-Free and Recyclopedia Recycling Council of British Columbia’s “recycling hotline” service and the new on-line app version for the recycling information including medications.

The 2016 BC Medications Return Campaign The communications objectives of the 2016 Medications Return Campaign were:

- To promote the positive role community pharmacy plays in the safe disposal of medications.
- To encourage British Columbians to return unused and expired medications to their local pharmacies using proper return practices.
- To partner with other organizations – locally and around BC – to promote medications return in the media.

Because of the popularity of the 2015 video and the increased focus on social media and online content – we created another entertaining and educational video about medications return, using the same theme as the previous year. Partnering with the BCPhA and the Capital Regional District, HPSA provided funding for the creation of the *Fish can't say no to drugs* video which was released in May.

Ambassador Program

The annual Summer Ambassador Program began in May 2016 and marked the largest tour to date. Nine provincial product stewardship organizations came together under a unified banner with the goal of increasing overall recycling awareness and collection rates of all recyclables.

TOTAL REACH: 808,150

The most successful events were

- Khatsalano Festival
- Cloverdale Rodeo
- Sunset Beach Festival (Pride Week Vancouver)
- Abbotsford Air Show
- Collaborated with London Drugs on 3 store front events in: Victoria, Kelowna and Burnaby

4. COLLECTION SYSTEM AND FACILITIES

Since 2000, HPSA has increased the number of registered pharmacies from 575 to 1,221 representing 95% of licensed community pharmacies in the province. HPSA's collection location network consists of community pharmacies as well as some clinics, hospitals, community centers and other collections sites with a significant volume of consumer returns. HPSA provides promotional items (posters, brochures, flyers, etc.) for display and has a news bulletin circulated annually in the spring and fall (see Appendix 4). There is no charge to the consumer to return products. Community pharmacies currently participating in the program can be located by the public on the HPSA website at www.healthsteward.ca, or by accessing the Recycling Council of British Columbia's Recyclopedia app at www.rcbc.bc.ca. In addition:

- Pharmacies are a natural, logical and safe site for the public to return health products.
- Pharmacies offer easy access to those with special needs and varying degrees of personal mobility.
- Pharmacists are very knowledgeable about the dispensing of health products and provide advice on individual medical conditions and the proper use of health products.
- Many pharmacies are open during extended hours, offering a convenient place for consumer disposal year-round.
- The provincial average is 3,810 people per HPSA registered collection location.

5. PRODUCT ENVIRONMENTAL IMPACT REDUCTION, REUSABILITY AND RECYCLABILITY

The Canadian Council of Ministers of the Environment in their Extended Producer Responsibility Product Evaluation Tool proposed several criteria to measure the impact of pharmaceutical waste on human and environmental health.

The Pharmaceuticals and Personal Care Products (PPCP) Surveillance Network operated by Environment Canada since 2008 is designed to study the status of Pharmaceuticals and Personal Care Product pollutants in surface waters in Canada. PPCP comprise a diverse collection of thousands of chemical substances, including prescription and over-the-counter medications and is gathering information from past regional surveillance projects, such as studies on the distribution of acidic and neutral pharmaceuticals and veterinary drugs in Eastern Canada. For more information visit <https://www.ec.gc.ca/scitech/default.asp?lang=En&n=FDFE3DAA-1>

The bulk of human pharmaceuticals found in waterways most likely got there by way of sewage. It is questioned whether take-backs have any real environmental and safety benefit. Taking unused pharmaceuticals out of landfills might have only a small difference in the concentrations found in water. But take-back programs may help prevent leftover pharmaceuticals from being misused, diverted or illicitly used.

6. POLLUTION PREVENTION HIERARCHY AND PRODUCT / COMPONENT MANAGEMENT

The pollution prevention hierarchy requirements outlined in the *Recycling Regulation* to reduce the environmental impact are not feasible for pharmaceutical products; consequently, HPSA disposes of the waste at government-approved facilities through incineration.

7. PRODUCT SOLD AND COLLECTED AND RECOVERY RATE

Section 5 (1) (c) (iii) of the British Columbia Recycling Regulation requires that a plan must adequately provide for reasonable and free consumer access to collection facilities. HPSA produces an annual District Summary Report that shows the number of registered collection locations per capita by district and demonstrates the high level of consumer access and program coverage in B.C. A list of participating pharmacies can be found in Appendix 4.

Medications may have a long delay between the time of purchase and return and prescriptions drugs should be fully consumed unless otherwise directed by a health professional. The *Medications Return Program* collects medications; not the bottle or vial used to market the product or used to dispense the prescription. We recommend that containers be recycled by the consumer via the blue box program.

The quantity of products returned per capita was 0.019 kg representing 88,673.40 kg returned for disposal (Appendix 2). The highest rate of return was Metro Vancouver at 43,317.5 kg followed by Capital at 10,537.2 kg; the lowest rate was Mount Waddington at 132.4 kg. This is a 9.5% reduction of the per capita rate from 2015 (0.021) which can be explained in the reporting change from transported weight (which included containers) and the disposal weight (which excludes the containers).

Table 1 shows the Collection Location per Capita by regional districts.

Section 7, Table 1 2016 Collection Location per Capita by Regional Districts

Regional District	Volumes (KG)	Population (2016)	Area (km ²)	Population Density	Collection Locations (#)	Capita per location	Weight per Capita
Alberni-Clayoquot	408.0	44,671	6,588	4.71	13	3,436	0.009

n/a

9. PLAN PERFORMANCE

Reference: Recycling Regulation – Part 2, section 8(2)

(g) a comparison of the approved plan's performance for the year with the performance requirements and targets in this regulation and the approved plan

Since 2012, HPSA has been operating under its 2012-2016 Stewardship Plan while awaiting approval. Below are the frame of reference for each performance target.

Performance Targets	2016 Results	Improvement Strategies
A. Consumer Awareness <i>[section 5 (1) (c) (iv)]</i> Surveys will take place at specific intervals as the BCMRP further matures and are a tool used to help measure program performance and usage. A consumer awareness survey was developed in 2007 and used in 2010, 2013 and 2016.	Appendix 3 provides survey results	HPSA remains committed to continuous improvement and new consumer awareness and usage targets were developed for the 2017/2021 plan.
B. Number of Collection Points <i>[section 5 (1) (c) (iii)]</i> a) Contact existing pharmacies with ownership and/or manager changes on a quarterly basis. b) Contact pharmacies demonstrating a significant change in collection pattern. c) Contact new licensed community pharmacies on a quarterly basis as identified from lists obtained from the B.C. College of Pharmacists.	<ul style="list-style-type: none"> Maintained participation rate above 95%. Maintain the capita serviced per location under 4,500. 	HPSA continues to contact new community pharmacies on a quarterly basis to maintain participation rates above 95%.
C. Product Recovery Target HPSA revised plan to reach 95 tons on a three-year rolling average in year 7 of the Stewardship Plan.	Collected over 95 tons.	In 2016, we began reporting net weight sent for destruction. Containers are reusable and their tare weight (1.74 kgs) is no longer

HPSA 2016 Report to Director, Extended Producer Responsibility Programs

		part of volume reported for destruction.
--	--	--

Performance Targets	2016 Results	Improvement Strategies
D. Promotion <ul style="list-style-type: none"> a) Promotion of program in different media. b) Publicity on the webpages of 25 Regional Districts or municipalities. c) Track traffic to BC page and access to locations. d) Continue to work with communication firm for the promotion and advertising plan. e) Connect with pharmacists and help disseminate information on the program through the Ambassador or similar initiatives. f) Work with chain and independent pharmacies to increase the availability of collection bags for the public. g) Hold a minimum of 12 special events. 	<ul style="list-style-type: none"> a) Promotion of program through TV, Radio, Print, and Internet (see Section 3 for details). b) Promotion on the webpages of all Regional Districts c) 8,264 pageviews of BC specific content on HPSA's website and pharmacy locator tool updated monthly with new and deleted collection sites. d) Worked with communication firms regarding development of advertising and promotional materials. New promotional rack cards were developed adding to our free promotional material. e) 45 site visits through the Ambassador program and promotion through the BCPhA's magazine. Bi-annual newsletters to pharmacies with attached order forms for free promotional materials (see Appendix 4) f) Promotion at 25 community events. 	<p>HPSA continues to work to expand the scope of advertising and promotional activities. HPSA committed to participation in the 2016 BC Recycles Ambassador Tour and further site visits. HPSA has also created an employment opportunity, whether in house or by contract, to create, implement, and oversee the marketing and promotion strategy for the next five years.</p>
E. Accessibility Indicators	<ul style="list-style-type: none"> • Reported (See Section 7, Table 1)

Appendix 3 2016 Survey Results

This summary provides an overview of the results of a survey in British Columbia undertaken with 1,235 adults in September 2016.

British Columbians are fairly aware of pharmacy disposal options for unwanted medications, but there is room for improvement when it comes to usage of program. There is strong public willingness to participate once they are made aware, and no evident barriers. Experiences with our program, so far, have been very positive. There have been significant improvements in many areas since 2010. Awareness is generally better among women and older people, but there are no significant differences between regions of the province.

Awareness:

- Only seventy per cent of British Columbians report that they have, or usually have or use medications in their home. This is a significant decrease from the 2013 when 88% claimed to have medications at home.
- Just over under one-quarter of British Columbians (22 %) report that they have medications in their home that are no longer required. This is similar to the proportion who reported this situation in 2013 (23 %). There are no significant demographic or regional trends discernible in these results
- Top-of-mind awareness of pharmacy disposal for unwanted medications is now 72 per cent in British Columbia, up significantly from 57 per cent in 2013.
- When British Columbians are asked directly if they have used our program, amongst those that have medications 39% from 30% in 2013, and among those who have unwanted meds 43% up from 32 % in 2013.
- Overall, awareness that industry stewardship programs allow medications to be returned to pharmacies has grown since 2010 from 51 per cent to 75 per cent
- Finally, when asked how they had disposed of their unwanted medications in the past, 67 percent took them back to the pharmacy while 26% threw them away and 13% put them down the toilet/sink. Even though, 79 % are aware of a program for safe disposal and 90% perceive the program as convenient, this confirms that past behaviors are hard to change.

2016 Re-Registration Campaign

HPSA will be undergoing its re-registration campaign for participating BCMRP collection location pharmacies.

To date we have received over 80% of the required updated registration forms and would like to thank those who have taken the time to complete and submit their forms. If you have not yet completed and submitted your registration form please do so as soon as possible. This will assist with the upgrading of our database which will increase our ability to improve services. This form can be found by visiting:

<http://www.healthsteward.ca/collection/british-columbia>

Promotional Awareness Growth

HPSA has once again partnered with the BCPhA and the Capital Regional District for the "Fish Can't Say No to Drugs" campaign. Keep your eyes open for a fun and informative ad coming soon! The HPSA has also hit the airwaves for the first time with our very own PSA. Readers can tune in to UBC campus radio to hear an informative message about the MRP. Furthermore, the BC Ambassadors program hits the road for four months again this summer, making stops at events all across the province!

2015 Weight Reports

2015 was another great year for returns in the province! Through our collection sites in British Columbia, we collected 7799 containers with a combined return weight over 100,000 Kilograms! Weight collected has increased in 2015 by 3.6%! Thank you for your ongoing participation in the BCMRP.

NEW TO THE PROGRAM?

* The Health Products Stewardship Association (HPSA) is a national industry stewardship organization(ISO) representing companies that introduce medications and medical sharps into the marketplace.

* All costs and expenses of the MRP program are covered by the brand owners of the health products industry.

* You can order program promotional materials at no cost by simply filling out a request form which can be found on our website at: www.healthsteward.ca/collection/british-columbia

* There is no minimum requirement for a pail pick up request.

* The minimum weight requirement for pails in a pick up is 10kg

FALL 2016

BRITISH COLUMBIA

HEALTH PRODUCTS
STEWARDSHIP ASSOCIATION

HEALTH PRODUCT PACKAGING

The Health Products Stewardship Association (HPSA) would like to remind all pharmacies to please ensure that extra packaging is removed from unused and expired medications for disposal through the Medications Return Program.

All pills should be emptied from its original packaging and loosely disposed of into a Medications Return container. Liquids, creams, inhalers, etc. are the only exceptions to the "no original packaging" rule.

If a person returns medications in its original packaging, it is the pharmacist's responsibility to provide them with alternative options. Please be sure to remove all personal identification from additional packaging. Pharmacists are encouraged to then appropriately recycle all paper and plastic materials.

All pharmacies should have a "Take It Back" rack card, which outlines the proper steps of disposal. To ensure patients are correctly preparing unwanted medications to return, please be sure to provide them with this when applicable.

If you wish to order more rack cards to help you inform the public about HPSA programs and procedures, you can do so through HPSA's website: www.healthsteward.ca, free of charge.

BRITISH COLUMBIA MRP CONTAINERS

YES

Combined, loose tablets, and contained liquids or creams are accepted.

NO

Extra packaging, sharps materials, and free liquids or creams are not accepted.

SHARPS DISPOSAL

As you know, HPSA's Sharps Collection Program is not currently active in British Columbia. As such, sharps materials should not be accepted - under any circumstances - in the province.

Recently, HPSA has been advised that there have been a number of incidences where loose sharps materials have been disposed of through its Medications Return Program.

This is concerning as improperly packaged sharps materials, such as needles, are left exposed to the public — leaving everyone vulnerable and capable of being harmed by them.

HPSA relies on its participating pharmacies to play an active role in the ongoing public education and awareness efforts for its programs.

We ask that pharmacies provide staff with annual training about HPSA programs to ensure that information about the safe storage as well as the handling and management of unwanted medications and used sharps (where applicable) are readily available to the public.

If you have any questions about the B.C. Medications Return or Sharps Collection programs, please, feel free to contact our Programs Co-ordinator, Cassidy Johnson, via e-mail at cjohnson@healthsteward.ca.

Appendix 6 Independence Assurance Report

2016 INDEPENDENT REASONABLE ASSURANCE REPORT FOR SELECTED NON-FINANCIAL INFORMATION

We have been engaged by Health Products Stewardship Association's (the "Stewardship Agency") to perform a reasonable assurance engagement in respect of the following information (the "Subject Matter"), detailed within the Stewardship Agency's annual report to the Ministry of Environment and in Appendix 1 and 2, for the year ending December 31, 2016:

- The location of collection facilities, and any changes in the number and location of collection facilities from the previous report in accordance with Section 8(2)(b) of B.C. Regulation 449/2004 (the Recycling Regulation);
- The description of how the recovered product was managed in accordance with the pollution prevention hierarchy in accordance with Section 8(2)(d) of the Recycling Regulation;
- The total amount of the producer's product sold and collected and, if applicable, the producer's recovery rate in accordance with Section 8(2)(e) of the Recycling Regulation; and,
- Performance for the year in relation to approved targets under Section 8(2), (b), (d) and (e) in accordance with Section 8(2)(g) of the Recycling Regulation.

Our reasonable assurance engagement does not constitute a legal determination on the Stewardship Agency's compliance with Section 8(2)(b), (d), and (e) of the Recycling Regulation.

Responsibilities

Preparation and fair presentation of the Subject Matter in accordance with the evaluation criteria as listed in Appendix 1 is the responsibility of the Stewardship Agency's management. Management is also responsible for such internal control as management determines is necessary to enable the preparation of the Subject Matter such that it is free from material misstatement. The suitability of the evaluation criteria is the responsibility of management. Furthermore management is responsible for preparation of suitable evaluation criteria in accordance with the Third Party Assurance Requirements for Non-Financial Information in Annual Reports – 2016 Reporting Year dated February 2017 ("Assurance requirements") as specified by the Director under section 8(2)(h) of the Recycling Regulation of the Province of British Columbia.

Our responsibility is to express an opinion on the Subject Matter based on the procedures we have performed and the evidence we have obtained.

Evaluation Criteria

The evaluation criteria presented in Appendix 1 are an integral part of the Subject Matter and address the relevance, completeness, reliability, neutrality, and understandability of the Subject Matter.

Scope of the Assurance Procedures

We carried out our reasonable assurance engagement in accordance with the International Standard on Assurance Engagements 3000 (ISAE 3000) published by the International Federation of Accountants. This Standard requires, amongst others, that the assurance team possesses the specific knowledge, skills and professional competencies needed to understand and audit the information included within the Subject Matter, and that they comply with specific requirements to ensure their independence.

A reasonable assurance engagement includes examining, on a test basis, evidence supporting the amounts and disclosures within the Subject Matter. The procedures selected depend on our judgement, including the assessment of the risks of material misstatement in the Subject Matter due to omissions, misrepresentations and errors. In making those risk assessments, we consider internal control relevant to the entity's preparation and fair presentation of the Subject Matter in order to design assurance procedures that are appropriate in the circumstances, but not for the purpose of expressing a conclusion on the effectiveness of the entity's internal control. A reasonable assurance engagement also includes assessing the evaluation criteria used and significant estimates made by management, as well as evaluating the overall presentation of the Subject Matter. The main elements of our work were:

Applicable Criteria

The following evaluation criteria was applied to the assessment of the location of collection facilities, and any changes in the number and location of collection facilities from the previous report in accordance with Section 8(2)(b) of the Recycling Regulation

1. We obtained a list of all of the Collection Facilities from the Association as at December 31, 2016.
2. We randomly selected 30 Collection Facilities in accordance with the Sample Size General Guidance suggested.
3. To test the completeness of the listing, we selected 30 Collection Facilities in accordance with the Sample Size General Guidance suggested. We traced these from the clients listing to Appendix 5 in the annual report. We obtained the historical data for the total number of Collection Facilities for the past 3 years as reported by the Association in the annual reports and investigated the reasons for the fluctuation.

The following criteria was applied to the description of how the recovered product was managed in accordance with the pollution hierarchy in accordance with Section 8 (2) (d) of the Recycling Regulation:

1. All of the product is collected by one company, Stericycle.
2. We obtained their monthly invoices, which contain a breakdown of the total product collected by weight. The report is broken down by dates and locations
3. All of the product is sent for incineration. Nothing is recovered or sold.
4. We obtained the quarterly Certificates of Destruction provided by Stericycle.

The following criteria was applied to the total amount of the producer's product sold and collected, and if applicable, the Stewardship's Agency's recovery rate in accordance with Section 8(2)(g) of the Recycling Regulation.

1. None of the recovered product is sold or recovered.
2. All of the product is collected by one company, Stericycle.
3. We obtained their monthly invoices, which contain a breakdown of the total product collected by weight. The report is broken down by dates and locations

Summary of Work Performed

The following is a summary of the work performed on the assessment of the location of collection facilities, and any changes in the number and location of collection facilities from the previous report in accordance with Section 8(2)(b) of the Recycling Regulation

We obtained a list of all of the Collection Facilities from the Association as at December 31, 2016.

The listing stated 1221 facilities, matching the number in the 2016 annual report.

We randomly selected 30 Collection Facilities in accordance with the Sample Size General Guidance suggested. Registration forms were not available for some of the locations. In 2015 management started the process of obtaining forms for all locations. Of the 30 selected, 2 did not have a form available. For those with a form, the form agreed to the clients listing.

We obtained the historical data for the total number of Collection Facilities for the past 3 years as reported by the Association in the annual reports: (2016 – 1221, 2015 – 1186, 2014 – 1160). The fluctuation over the 3 year period is 5%, and is because of a general increase in the number of sites. This was confirmed by comparing the list of collection facilities for 2016, 2015, and 2014.

The following is a summary of the work done on the description of how the recovered product was managed in accordance with the pollution hierarchy in accordance with Section 8 (2) (d) of the Recycling Regulation:

- 1. All of the product is collected by one company, Stericycle.*
- 2. We obtained their monthly invoices, which contain a breakdown of the total product collected by weight. The report is broken down by dates and locations*
- 3. All of the product is sent for incineration. Nothing is recovered or sold.*
- 4. We obtained the quarterly Certificates of Destruction provided by Stericycle. We agreed this to the monthly invoices, and investigated and variances.*
- 5. During the year it was found that Stericycle had been overbilling the Association regarding disposal weights. We obtained the Associations calculations to correct for this, and ensured that the calculations were reasonable and that the amounts reported in the annual report reflected the revised total.*

The following is a summary of the work done total amount of the producer's product sold and collected, and if applicable, the Stewardship's Agency's recovery rate in accordance with Section 8(2)(g) of the Recycling Regulation.

- 1. All of the product is collected by one company, Stericycle.*
- 2. We obtained their monthly invoices, which contain a breakdown of the total product collected by weight. The report is broken down by dates and locations*

Significant Inherent Limitations

There is no significant inherent limitations.

Emphasis of Matter

Without qualifying our opinion, we draw your attention to Appendix 2 which describe why certain items not required by the Assurance Requirements have been excluded.

Conclusion

In our opinion, the Subject Matter for the year ended December 31, 2016 presents fairly, in all material respects, in accordance with the evaluation criteria listed in Appendix 1:

OUSELEY HANVEY CLIPSHAM DEEP LLP
Licensed Public Accountants

Ottawa, Ontario
June 14, 2017

Appendix 1

The location of collection facilities, and any changes in the number and location of collection facilities from the previous report in accordance with Section 8(2)(b) of the Recycling Regulation.

Specific disclosures in the annual stewardship report for which evaluation criteria were developed	
Disclosure per Annual Report	Reference
Total number of collection locations in 2016 – 1,221	Pages 1, 10 Section 7, Table 1 Appendix 5
Total number of collection site in 2016 was 1,221, total number in 2015 was 1,186 – an increase of 3%	Page 1
“The British Columbia Medications Return Program (BCMRP) continues to operate around 1,221 collection sites, representing a total of 95% of eligible BC pharmacies.”	Section 1: Executive Summary (page 1)
“Since 2000, HPSA has increased the number of registered pharmacies from 575 to 1,221 representing 95% of licensed community pharmacies in the province. HPSA’s collection location network consists of community pharmacies as well as some clinics, hospitals, community centers and other collections sites with a significant volume of consumer returns.”	Section 4: Collection System and Facilities (page 10)

The following evaluation criteria were applied to the assessment of the location of collection facilities, and any changes in the number and location of collection facilities from the previous report in accordance with Section 8(2)(b) of the Recycling Regulation:

- “Collection facilities” depots that have a signed contract with the Stewardship Agency for the collection of medications during the reporting period of January 1 – December 31, 2016.
- The Stewardship Agency maintains a listing of all collection facilities for the program, including the location of the collection facility, the total of which agrees to the number of collection facilities as disclosed in the Annual Report.
- The change in number of collection facilities is calculated by comparing the current number of collection facilities, a sum of all of the collection facilities that have a signed contract within a given reporting year and those that closed within the same reporting year, to the number of collection facilities reported in the prior reporting year.

Appendix 1

The description of how the recovered product was managed in accordance with Section 8 (2)(e) of the Recycling Regulation

Specific disclosures in the annual stewardship report for which evaluation criteria were developed	
Disclosure per Annual Report	Reference
<ul style="list-style-type: none"> All of the product is sent for incineration at government-approved facilities. 	Page 11

The following criteria was applied to the description of how the recovered product was managed in accordance with the pollution hierarchy in accordance with Section 8 (2) (d) of the Recycling Regulation:

- All of the product is sent for incineration. Nothing is recovered or sold.
- All of the product is collected by one company, Stericycle.
- We obtained their monthly invoices, which contain a breakdown of the total product collected by weight. The report is broken down by dates and locations
- We obtained the quarterly Certificates of Destruction provided by Stericycle. We compared the totals on the Certificates of Destruction to the monthly invoices to ensure that they are consistent.
- We agreed this total to the Annual Report for the reporting period January 1 – December 31, 2016. All of the products was incinerated.
- During the year it was found that Stericycle had been overbilling the Stewardship. We obtained the Stewardship Agency's calculations to correct for this, and ensured that the calculations were reasonable and that the amounts reported in the annual report reflected the revised total.

Appendix 1

The description of the total amount of the producer's product collected, in accordance with Section 8 (2)(e) of the Recycling Regulation.

Specific disclosures in the annual stewardship report for which evaluation criteria were developed	
Disclosure per Annual Report	Reference
88,673.3 kg was collected in 2016.	Pages 1, 12 Section 7, Table 1 Appendix 2: Regional District Summary Report
The quantity of products returned per capita is 0.019kg (or a total of 88,673.30 kg returned for destruction).	Section 1, Table (page 3)
"The quantity of products returned per capita was 0.019 kg representing 88,673.40 kg returned for disposal (Appendix 2).."	Section 7: Product Sold and Collected and Recovery Rate (page 12)

The following criteria was applied to the description of the total amount of the producer's product collected in accordance with Section 8 (2)(e) of the Recycling Regulation.

- All of the product is collected by one company, Stericycle.
- We obtained their monthly invoices, which contain a breakdown of the total product collected by weight. The report is broken down by dates and locations
- We agreed this total to the Annual Report for the reporting period January 1 – December 31, 2016.
- During the year it was found that Stericycle had been overbilling the Stewardship Agency. We obtained the Stewardship Agency's calculations to correct for this, and ensured that the calculations were reasonable and that the amounts reported in the annual report reflected the revised total.

Appendix 2

Product sold and recovery rate

The Stewardship Agency has not reported the recovery rate for the year in accordance with 8(2)(e) of the Recycling Regulations for the year ended December 31, 2016 as the approved stewardship plan does not outline the requirement to report recovery rates. If the stewardship program does not report a recovery rate in the approved plan, assurance for producer's product sold data is not required as outlined in the Assurance Requirements.

Performance Targets

The Stewardship Agency has not reported its performance for the year in relation to approved targets under 8 (2) (b), (d) and (e) in accordance with 8(2)(g) of the Recycling Regulation for the year ended December 31, 2016 as the Stewardship Agency is not required to report this to the Director as there are no targets set in the approved stewardship plan for these sections applicable to the reporting year.
