1. Executive Summary

Collections through community pharmacies across British Columbia (BC) increased slightly from 51,297 kg to 60,543 kg of returns in 2010, representing a 25% increase in medications collected. The quantity of product returns also increased from .008 kg to .0134 kg per capita.

Total costs for the Program have been going down due to some saving from recycling containers but destruction costs associated with environmentally appropriate methods have gone up.

PCPSA achieved several goals in regards to promotion and education on safe, efficient and secure drug returns.

- **Collection points:** In 2010, PCPSA was able to maintain pharmacy participation rates at 95.6% with convenient access to over 1,016 locations.
- **Information:** The public is informed about proper medication disposal through a number of channels, including: easy-to-find links to pharmacies on the Recyclepedia on the Recycling Council of British Columbia's website, links to participating pharmacies on the British Columbia Pharmacy Association's website, our own directory and on the majority of Regional District or Municipalities' websites.
- **Promotion:** Increased media coverage for safe disposal of waste medications, information on the *Medications Return Program* published in Annual Recycling Calendars and informational bookmarks distributed in different parts of the province all help promote the *Medications Return Program*.

This program continues to focus on unused and expired medications from households and continues to offer multiple solutions to reflect local/regional differences. Permanent collection programs provide ongoing, year-round drop-off services for consumers.

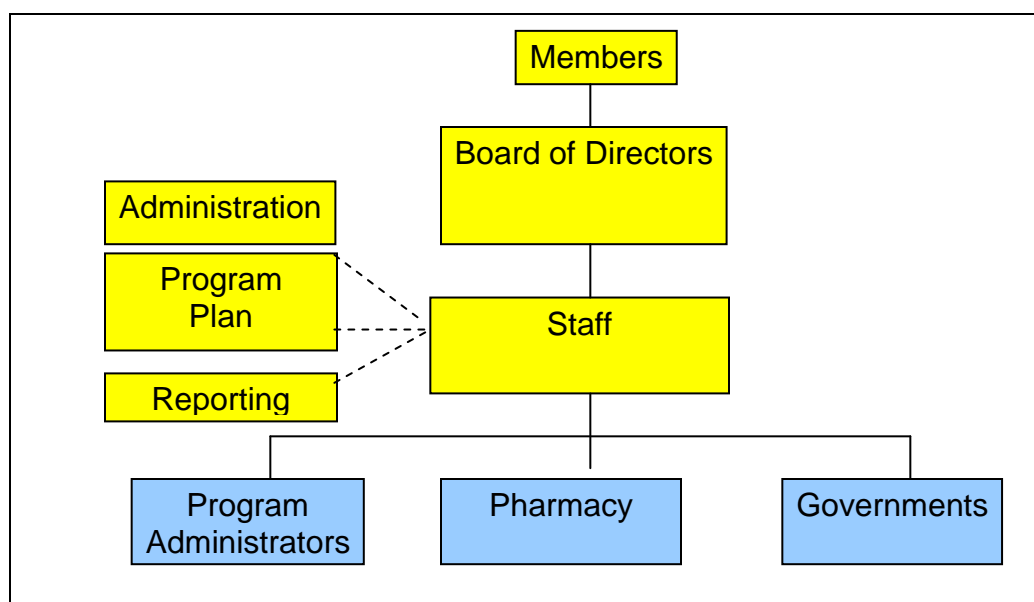

Once approved, this report will be available on the medications return website at www.medicationsreturn.ca

2. Program Outline

The Post-Consumer Pharmaceutical Stewardship Association (PCPSA) is a not-for-profit association formed in 1999 under the British Columbia extra-provincial Society Act and registered with Industry Canada since 2000. PCPSA's mandate is to perform on behalf of each steward certain duties required under the *Recycling Regulation* through our stewardship plan filed with the Ministry of Environment.

Our members are the “stewards” (brand-owners, first importer or retailers) obligated by the *Recycling Regulation* (B.C. Reg. 449/2004) under the pharmaceutical category; as of December 2010, PCPSA membership was at 109.

A nine-member Board of Directors manages PCPSA, with representatives from brand name, generic and consumer health products sectors. An Executive Director reports to the Board and is responsible for operations management, financial management, communications and general administrative duties.

Product category:

Schedule 2 of the *Recycling Regulation* defines products that are included under the pharmaceutical product category. Included in this program are:

- ✓ All prescriptions drugs
- ✓ Over-the-Counter Medications
- ✓ Natural Health Products
- ✓ All dosage forms
- ✓ Units sold in oral dosage form
- ✓ Units sold in oral dosage form

There are no exclusions from the above product categories. The Program's focus is the collection and proper disposal of unused or expired medications from the residential sector. Products dispensed in hospitals or provincial health care systems are outside the scope of this program. The Program includes both products clearly attributable to an existing steward and orphan

products. Orphan products are those that are no longer in production, the steward is no longer in business or products purchased outside Canada.

Collection system:

The collection sites for the *Medications Return Program* are community pharmacies. Pharmacy managers interested in participating can sign up voluntarily (no fees charged) to be a collection and storage point for the Program. Details on the Program are provided to ensure that management and staff is knowledgeable on the Program and its operation. Once the container is full, the pharmacist contacts the service provider who arranges for pick-up and replacement of containers within 7 days. All containers returned are tracked by pickup date, weight and location, and are stored in a secure location until a shipment is ready for safe destruction through a licensed destruction facility.

Environmental assessment:

Expired medications do not represent a serious threat to public health. Medications collected under this program do not meet the criteria from Transport Canada for hazardous material. Health Canada and Environment Canada evaluate the environmental risk according to the criteria of persistence, bio-accumulation and toxicity.

Fee structure:

PCPSA member's contributions are based on a sample of returns conducted in 2009. PCPSA continues to invoice stewards of affected products once a year. Their contributions are based on prescriptions dispensed (brand-name and generic) and/or percentage of sales of affected consumer health products. Rates are set yearly by the Board of Directors in relation to projected costs. The *Medications Return Program* is fully funded by the members, Appendix 1.

There are no fees to the public for returning medications to participating pharmacies.

3. Educational Materials and Strategies

PCPSA's 2010 publicity target has been achieved: information on the *Medications Return Program* is posted on 14 regional districts and municipalities websites, and in 13 recycling calendars.

Recycling Council for British Columbia(RCBC) PCPSA continued its contract with the (RCBC) "recycling hotline" service. RCBC hotline operators provide consumers with a convenient "one stop" contact to obtain information about PCPSA programs and any other recycling questions. PCPSA promotes the RCBC hotline number through its web page and brochures. The RCBC Hotline is open Monday through Friday from 9 am to 4 pm, and is accessible to all BC residents by a toll-free telephone number (1-800-667-4321). In 2010, RCBC received 120 calls relating to medications, representing less than 1% of their total calls.

RCBC Recyclepedia: PCPSA collection sites are also listed online with <http://rcbc.bc.ca/recyclepedia>.

PCPSA provided sponsorship to the RCBC Annual Zero Waste Conference in 2010.

Local government partnerships: In 2010, PCPSA continued its efforts to work with municipalities and regional districts (RD) in promoting the *Medications Return Program*.

- Advertising in all municipal garbage collection/recycling calendars. (Table 1)

5" x 2.5" Ad

Langley (Vancouver)	40,000
Chilliwack (Fraser Valley)	20,000
Coquitlam	32,000
TOTAL	348,500

Table 1 BC Annual Recycling Calendar Ads

Website links: Many consumers look to their local government for recycling information. Accordingly, PCPSA contacted BC's regional districts in order to establish or confirm the placement of links on the regional districts' websites to the PCPSA site or to collection sites. Currently 20 of the 27 regional districts websites have links to the PCPSA website.

Table 2 2010 RD Websites and links

Ambassador program: PCPSA collaborated once again with British Columbia Used Oil Management Association for a province-wide communications campaign. A team of two university students embarked on a tour of the province spreading the message on safe disposal of expired medications with municipalities, government officials and at community events throughout the course of the summer. In several municipalities, they also stopped into local pharmacies to drop off promotional signage and provide additional information on the Program. They participated in 5+ community events, 3000 brochures were distributed at community events in 83 municipalities including communities in Peace River, Fort St. John, Quesnel, Cariboo and Prince George.

Request for brochures and posters: In addition to our posters and brochures that can quickly be supplied to participating pharmacies, we have produced new bookmarks available for events. The brochure provides directions on what is accepted and not accepted, how to return unused or expired medications and where to go in an easy-to-follow fashion. Posters and bookmarks help develop and promote awareness of the *Medications Return Program*.

Twelve public display locations requested flyers/posters for their information areas. Metro Vancouver was the most active with workshops on stewardship programs for surrounding municipalities (26).

Print media: (Appendix 4)

- Distribution of e-newsletter through chains (Safeway, Katz Group of Company, Costco, Overwaitea, Wal-Mart and London Drugs) as well as 20% of participating independent retailers.
- Cariboo Regional District Flyer and Brochure on Product Stewardship circulated to residents as well as logos on back of waste reduction promotional trailer.
- Township of Langley's Resident's Guide to Waste Reduction.
- Brochure to residents for the township of Delta
- Yellow Pages ad in their Eco Guide.
- Senior Information Directory
- Medicine Cabinet clean up through Shoppers Drug Mart (November 2010)
- In 2010, a brochure was complete featuring multi-industry stewardship programs and a complimentary video is scheduled for 2011.
- Bookmarks to replace brochures were developed and available in English, Traditional Chinese and Punjabi.

Table 3 Multilingual bookmarks

PCPSA website: www.medicationsreturn.ca was actively maintained throughout 2010 to provide information to BC residents, listing participating locations, description of products accepted by the Program, annual reports and more information on programs.

4. Collection System Information

PCPSA's 2010 target to maintain a pharmacy program participation rate of 90% has been achieved. Our current participation rate is 95.6% with convenient access to over 1,016 locations.

In addition to regular collection sites, PCPSA has agreed to provide take-back containers for unused or expired medications from the public to sites with special needs, such as a community hospitals (5) located in a remote area as well as 5 retirement/care facilities or clinics.

Community pharmacies currently participating in the Program can be easily located by the public on the Association's website at www.medicationsreturn.ca or through RCBC Recyclepedia.

5. Life Cycle Management

The Canadian Council of Ministers of the Environment in their Extended Producer Responsibility Product Evaluation Tool proposed several criteria to measure the impact of pharmaceutical waste on human and environment health.

Q. Does the product or its components or by-products contain toxics or other substances that are hazardous to human health or to the environment?	A. Researchers have found some classes of drugs in the Canadian environment, primarily in surface water. However, the potential effects are considered to be very low.
Q. Are the anticipated duration effects on human health or the environment likely to be significant?	A. The anticipated duration of the effects could be considered medium-term. There is scientific evidence that the risk to human is very low, however there are concerns about the effects of those low levels on aquatic life, therefore research on the chronic toxicity potential of pharmaceuticals in the environment is important, but outside the scope of responsibilities of the <i>Medications Return Program</i> .
Q. Is this product a significant component to municipal waste stream?	A. Pharmaceuticals products are not significant by volume or weight to the waste stream.

The bulk of human pharmaceuticals found in waterways most likely got there by way of sewage. It is questioned whether take-backs have any real environmental and safety benefit. Taking unused pharmaceuticals out of landfills may make only a small difference in the concentrations found in water. But take-back programs may help prevent leftover pharmaceuticals from being misused, diverted or illicitly used.

Pollution prevention hierarchy:

The pollution prevention hierarchy requirements outlined in the *Recycling Regulation* to reduce the environmental impact are not feasible for pharmaceutical products; consequently, PCPSA disposes of the waste at government approved facilities.

6. Recovery Rate

Medications may have a long delay between purchase and return and prescriptions drugs should be fully consumed unless otherwise directed by a health professional. The *Medications Return Program* collects medications; not the bottle or vial used to market the product or used to dispense the prescription. We recommend that containers be recycled by the pharmacists and the consumer.

The average rate of returns per capita for the province is 0.013 kg. The highest rate of return is Sunshine Coast at .0220 followed by the Capital Regional District and Nanaimo at .021; the lowest rate remains with Kitimat-Stikine at 0.0020. Table 4 is the absolute collection per capita by Regional Districts. Appendix 2 shows the absolute collection of medication in kilogram (mass recovered) on a quarterly basis.

	POPULATION	WEIGHT (kg)	CONTAINER	per capita/kg
British Columbia	4,530,960	60543	4854	0.0134
Alberni-Clayoquot	31,635	220	16	0.0070
Bulkley-Nechako	39,183	568	39	0.0145

Table 4 Collection by Regional Districts

7. Public Awareness

Significant improvements have occurred in British Columbia since 2007 in terms of the number of consumers *aware* of pharmacy disposal programs and the number who *actually use* them. Consumers perceive no major barriers to using pharmacy disposal and, once aware, indicate a strong intention to use the Program in the future. Continued efforts to increase awareness bring significant rewards, as more than 70% of British Columbians who are made

aware of the opportunity will use the pharmacy disposal program. A detailed report available in Appendix 3

- Without prompting, almost one-half of British Columbians (48%) are able to identify *pharmacies* as a place where consumers may dispose of unwanted medications. This is up significantly from 31% in 2007
- Asked directly whether medications may be returned to a pharmacy, 60% of British Columbians say they may. About one half (51%) of British Columbians claim they were aware of this before completing the survey.
- Since 2007, there has been a remarkable increase in the percentage of British Columbians who returned their unwanted medications to pharmacies. This percentage has more than doubled, from 21% to 51%, and there has been a large corresponding decline in the use of garbage to dispose of medications.
- Three-quarters of all British Columbians who claim to be aware that pharmacy disposal is an option actually used this option the last time they had unwanted medications.

8. Fee Information

- (i) No fee collected or charges for this product

9. Performance Targets

2010 Planned Target Set in Approved Stewardship Plan		2010 Report on the Planned Target
Maintain a pharmacy program participation rate of 90%.	Actual pharmacy program participation rate of 95%.	
2010 planned strategies:		
1. Contact existing pharmacies with ownership and/or manager changes on a quarterly basis.	Completed as planned	
2. Contact pharmacies with a significant change in collection pattern.	Completed as required	
Year 5		
Contact new licensed community pharmacies from amended list purchased from the B.C. College of Pharmacists on a monthly basis	Purchase monthly report from the BC College of Pharmacists	

Waste composition Study Target from 2007 to 2011:	Decrease the presence of pharmaceuticals in regional districtss that conduct waste composition studies.
Performance measure	Report amounts of pharmaceuticals estimated in statistically significant regional districtss' waste composition studies.
Strategies:	We have joined with the BC Stewards Group to formalize a working partnership with regional districts to conduct detailed waste audits to determine the makeup of the waste stream. It is anticipated that the reports derived from these audits will be analyzed and used as one of many tools by stewards to establish the effectiveness of their programs in accordance with the requirements of the <i>Recycling Regulation</i> . The resulting information will assist the partners in achieving the long-term goal of zero waste
Year 5	Develop protocol for waste composition studies with other stewards and selected regional districts through BC stewardship council.

Public Awareness Target from 2007 to 2011:	50% increase in public awareness of the Program compared to 2007 awareness. Baseline program awareness level at 31% SD \pm 4.3%.
Performance Measures	Measure changes in Awareness, behaviour in 2010.
Strategy in year 4	Survey in September 2010. 48% are able to identify pharmacies to return medications 51% has returned medications in the last 6 months
Year 5	Social and video Media contest in secondary and adult school. Projects with RD's and Health Authorities on the <i>Medications Return Program</i> .

Quantity Collected performance target 2007-2011	Maintain a minimum quantity collected of 14,000 kg.
Performance measure:	Report total quantity collected on a yearly basis with quarterly results by regional districts
Year 4	Total collection for 2010 is 60,543 kg Results indicated on table 4 and Appendix 2
Confirming next year's strategies	2011 strategies will target Regional districts with lower returns.

Promotion performance target 2007-2011	Publicity on the MRP in 14 regional districts or municipalities' websites with recycling sections. Indication of program in 13 recycling calendars.
Performance measure:	Increase in awareness of program to dispose of medications.
2010 strategies	Report of 2010 strategies: PCPSA continued its efforts to work with municipalities and regional districts (RD) in promoting the <i>Medications Return Program</i> . Specific actions include: <ul style="list-style-type: none"> • Advertising in all municipal garbage collection/recycling calendars.(page 6) • Working with Local government website linkages (page 7)
Year 5	Contact regional districts and municipalities with information for the website/recycling directory/annual calendar on the <i>Medications Return Program</i> .

10. Disposal

There are limited options for disposing drugs collected through this program. Pharmaceutical waste should always be incinerated. We continue to look at viable alternative for responsible disposal.

In 2011, PCPSA products collected were sent to Alberta for incineration.

11. Non-financial information

Specific audit procedures were conducted on operations in BC over certain non-financial information related to:

1. BC Reg449/2004, Section 8 (2)(b): Location of Collection Facilities,
2. BC Reg449/2004, Section 8 (2)(d): A description of how the recovered product was managed in accordance with the pollution prevention hierarchy,
3. BC Reg449/2004, Section 8 (2)(e): The total amount of the producer's product sold and collected.

A summary of the procedures performed and findings are included in Appendix 6

11. Appendices

None specified.

Appendix 3 Population survey

This report provides a summary of findings from a survey of British Columbia residents undertaken in October 2010.

Objectives and Approach

The Post-consumer Pharmaceutical Stewardship Association (PCPSA) monitors public awareness and uptake of pharmaceutical return programs. In 2010, the Association identified a number of information needs in British Columbia, including the following:

- Aided and unaided awareness of programs which encourage consumers to return unwanted medications to a pharmacy, as well as use of these programs.
- The quality of the experience when returning medications to a pharmacy
- Identify any barriers to using pharmaceutical return programs
- Any change in these factors since 2007.

Approach

To obtain answers to the information needs identified above, the PCPSA engaged Redfern Research to undertake a survey of 500 adult residents of British Columbia. The survey was fielded between September 15th and 30th, 2010. Five hundred and nine (509) surveys were actually completed. Respondents were selected randomly from the population and contacted by telephone. Only one interview was completed per household. The questionnaire took approximately 10 minutes to complete.

- Ninety percent of British Columbians report that they have medications in their home, including 30% who have unused or expired medications.
- Without prompting, almost one-half of British Columbians (48%) are able to identify *pharmacies* as a place where consumers may dispose of unwanted medications. This is up significantly from 31% in 2007.
- Asked directly whether medications may be returned to a pharmacy, 60% of British Columbians say they may. About one half (51%) of British Columbians claim they were aware of this before completing the survey.
- Down from 39% in 2007, 33% of British Columbians say they have disposed of medications in the last six months. Since 2007, there has been a remarkable increase in the percentage of British Columbians who returned their unwanted medications to pharmacies. This percentage has more than doubled from 21% to 51%, and there has been a large corresponding decline in the use of garbage to dispose of medications.

- Three-quarters of all British Columbians who claim to be aware that pharmacy disposal is an option actually used this option the last time they had unwanted medications. Thus, awareness is a very powerful driver of behavior in British Columbia.
- Among those British Columbians who disposed of medications at a pharmacy, the experience was both *convenient* (93% agree) and *satisfactory* (94% agree).
- Unprompted, 43% of British Columbians say they would return medications to a pharmacy in the future (up 19 points since 2007), while 51% would use either the regular garbage or a household drain (down 17 points since 2007).
- When prompted, the overwhelming majority of British Columbians (86%) say they would be likely to use pharmacy disposal if it were available. Specifically, 70% say they are *very likely* to use a pharmacy and 16% say they are *somewhat likely*.
- There are no major barriers in the minds of consumers to using pharmacies to dispose of unwanted medications. More than two-thirds of consumers (69%) say they can see no reason why they would not use a pharmacy for this purpose. For most others, the potential barriers are convenience, distance, laziness or forgetfulness.
- From a demographic perspective, women are generally more aware and more active in the proper disposal of medications. Older consumers are also more aware and more proactive.

Accountant's Report on Specified Audit Procedures Performed on Non-Financial Information

To Management of the Post-Consumer Pharmaceutical Stewardship Association

As specifically agreed, we have performed specified audit procedures on the Post-Consumer Pharmaceutical Stewardship Association (the "Association") operations in the Province of British Columbia as described in this letter for the year ended December 31, 2010 over certain non-financial information related to:

1. BC Reg449/2004, Section 8(2)(b) – the location of its collection facilities, and any changes in the number and location of collection facilities from the previous annual report;
2. BC Reg449/2004, Section 8(2)(d) – a description of how the recovered product was managed in accordance with the pollution prevention hierarchy; and
3. BC Reg449/2004, Section 8(2)(e) – the total amount of the producer's product sold and collected.

A summary of the procedures performed and our findings, including a description of any exceptions, are set out in the accompanying section to the report titled "Specified Audit Procedures and Results". The procedures were performed on the data and other information pertinent to the Association's operations in British Columbia only. This specified procedures engagement was conducted in accordance with the guidelines set out in the Canadian Institute of Chartered Accountants Handbook, Section 9100, *Reports on the Results of Applying Specified Auditing Procedures to Financial Information other than Financial Statements*.

Our procedures did not constitute an audit of the Association's non-financial information and therefore, we express no opinion on the overall accuracy or completeness of the non-financial information of the Association for the year ended December 31, 2010.

The sufficiency of the procedures outlined in this report is solely the responsibility of the specified users of the report. Consequently, we make no representation regarding the sufficiency of the procedures set out therein, either for the purpose for which this report has been requested, or for any other procedures performed by the Association.

This report has been prepared solely for management of the Association and the British Columbia Ministry of Environment in connection with their consideration of the accuracy and completeness of certain non-financial information as reported by the Post-Consumer Pharmaceutical Stewardship Association for the year ended December 31, 2010.

Appendix A – Specified Audit Procedures and Results

BC Reg449/2004, Section 8(2)(b) – the location of its collection facilities, and any changes in the number and location of collection facilities from the previous report

Testing Procedure #	Objective and Purpose	Specified Procedures	Results
1.1	To obtain comfort over the existence and accuracy of the collection facilities reported in the Agency's annual report	<ol style="list-style-type: none"> For the period under review, obtain a listing of all collection facilities from the Agency, broken out by type (if applicable). Compare the total count of Collection Facilities from the listing with the annual report; investigate any discrepancies with the Agency as applicable. Randomly select a sample of Collection Facilities and obtain the business file for each. Review each file to determine that a registration form meets the following criteria: <ol style="list-style-type: none"> A registration form exists for the Collection Facility; The registration form lists contact information and location, which agrees with the detailed listing; and The registration form is signed by the Collection Facility. Using contact information on the facility listing provided in #1 above, phone each randomly selected Collection Facility to verify their existence and that they have an adequate understanding of the program. 	<ol style="list-style-type: none"> We obtained a listing of all Collection Facilities from the Association. The listing stated 1,022 facilities, matching the number in the 2010 annual report. We randomly selected 30 Collection Facilities in accordance with the Sample Size General Guidance as provided. Management indicated that registration forms were not available for all locations as the Association only recently started having new facilities sign these forms. Of the 30 locations reviewed, registration forms were only provided for 4 locations. The address and contact information on this form is consistent with the detailed listing. With the exception of two forms, all forms were signed by a collection site representative. We randomly selected 30 Collection Facilities using the contact information in the listing. We verified their existence by confirming the address of the Collection Facility. We asked each facility to acknowledge the existence of Medication Returns Program pails at the location, with no exception except as follows: <ol style="list-style-type: none"> One of the Collection Facilities contacted was closed during 2010 and no longer exists; and One Collection Facility stated that they do not participate in the program.
1.2	To obtain comfort over the completeness, consistency, and validity of the number of Collection Facilities	<ol style="list-style-type: none"> Obtain the historical data for the total number of Collection Facilities for the past 3 years as reported by the Agency in their annual reports. Investigate any fluctuations greater than 5% to understand the reason for the fluctuation in the number of Collection Facilities. 	<ol style="list-style-type: none"> We obtained the historical data for the total number of Collection Facilities for the past 3 years as reported by the Association in the annual reports: 2010 – 1022; 2009 – 1,080; 2008 – 942 The calculated fluctuation in number of Collection Facilities for 2010 is a decrease of 5.3%. The listing provided indicated that this is due to addition of 44 Collection Facilities and 102 Collection Facilities ceasing their participation in the Medication Returns Program the year ended December 31, 2010.

Appendix A – Specified Audit Procedures and Results

BC Reg449/2004, Section 8(2)(d) – a description of how the recovered product was managed in accordance with the pollution prevention hierarchy

Procedure #	Objective/Purpose	Specified Procedures	Results
<i>Where processors/manufacturers are subject to audit around their product management practices, only Step 2.1 as well as sub-steps 1 to 3 in test 2.2 should be completed. Where processors/manufacturers are not subject to audit, Test 2.1 is not relevant, but Test 2.2 should be completed in its entirety.</i>			
2.1	To obtain comfort over the effective weight of end-use product collected and the accuracy of the manufacturer's receipt of weight of product	<ol style="list-style-type: none"> Where available, obtain the 3rd party auditors opinion over registered processors/manufacturers compliance with waste management or program specific guidelines for managing product appropriately. Ensure the auditor's opinion is unqualified. 	<p>Not applicable – Management stated that the Association does not engage 3rd party auditors to opine on the processor's compliance with waste management guidelines.</p>
2.2	To obtain comfort over the accuracy, completeness and existence of end-use of the product collected and the accuracy of the manufacturer's or processor's receipt of weight of product, test on a sample basis the deliveries of product recovered to their end-use (or next along the custody chain)	<ol style="list-style-type: none"> Obtain a schedule/listing of products shipped to processors/manufacture for the period under review. The listing should provide: <ol style="list-style-type: none"> The processor/manufacture name/address; The total weight of the product weighted at the collection site or consolidation site (where applicable); The total weight of the product weighted at the processor/manufacture; and The date of delivery to the processor/manufacture. Obtain a listing of all registered processors/manufacturers. Scan listing to ensure all receivers of product were approved processors/manufacturers. If there is not a listing of approved manufacturers/processors, ensure that the manufacturer is not a related party to the processor by researching the related parties of each organization and ensuring that the transaction was made at arm's length. Randomly select shipments and obtain a copy of the invoice or other supporting documentation. Verify that each invoice or other supporting document has evidence of the weight of the product shipped by the processor and received by the customer. 	<ol style="list-style-type: none"> We have obtained a schedule of products shipped to the processor for the year ended December 31, 2010 that included all the required information in procedures (a) through (d). The listing detailed that there were 3 shipments to a processor in 2010. The only processor used by the Association was Wainwright Waste to Energy Authority ("Wainwright") who is the only approved processor. We randomly selected one shipment in accordance with the Sample Size General Guidance as provided, and obtained the invoice and bill of lading. The invoice was issued by Wainwright and the bill of lading was issued by N. Yanke Transfer Ltd. The invoice is supported by a Certificate of Destruction presented to the Association to certify that all waste defined on the bill of lading was received and destroyed. The weight recorded on the bill of lading provided by N. Yanke Transfer Ltd. indicated 47,000 lbs was shipped while the processor (Wainwright) indicated that 22,060 kgs (48,634 lbs converted) was received.

Appendix A – Specified Audit Procedures and Results

BC Reg449/2004, Section 8(2)(c) – the total amount of the producer's product sold and collected

Procedure #	Objective/Purpose	Specified Procedures	Results
<i>[If a 3rd party audits the Agency's schedule of product collected (recovery rate), complete only step 3.1. If no audit is performed, complete steps 3.2 through 3.4]</i>			
3.1	To ensure that there were no qualifications within the auditor's opinion over the schedule of product recovered	<ol style="list-style-type: none"> 1. Obtain the auditor's opinion over the schedule of products recovered for the most recent fiscal year. 2. Review the opinion to ensure that there are no qualifications. 3. Check the mathematical accuracy of the calculated recovery rate (where applicable), as reported in the audited financial statements. 4. Compare calculated recovery rate to the recovery rate reported by the agency in their annual audited report. Note any discrepancies. 	<p>Management has stated that the Association's schedule of product recovered is not audited. Procedure 3.1 is not applicable.</p>
3.2	To ensure the accuracy and completeness of total product sold	<ol style="list-style-type: none"> 1. Obtain the financial statement auditor's opinion for the most recent fiscal year. 2. Review the opinion to ensure that there are no qualifications. 3. Obtain a schedule of eco-fees by product type from the agency (in total and by unit). 4. Compare the total eco-fees collected from the above schedule to the total reported in the Agency's financial statements (as opined by the financial statement auditor). 	<ol style="list-style-type: none"> 1. We have obtained the audited financial statement for the year ended December 31, 2010 for the Association. 2. We reviewed the opinion of the financial statements as issued by Ouseley Hanvey Clipsham Deep and noted that there are no qualifications. 3-4. Not applicable. Management has stated that the Association does not collect eco-fees.

Appendix A – Specified Audit Procedures and Results

Procedure #	Objective/Purpose	Specified Procedures	Results
3.3	To obtain comfort over the completeness, accuracy, cut-off and validity of the total product recovered, test on a sample basis, the collection of product recovered	<ol style="list-style-type: none"> Obtain a listing of product shipments (for each product the Agency manages) from Collection Facilities for the period under review with the following details: <ol style="list-style-type: none"> The Collection Facility name/address; The date of collection from the facility; The consolidation site or processor to which the product was delivered; The date of delivery to the consolidation site or processor; and The amount of product collected (units and in weight, where applicable). Compare the total weight of product collected from the detailed listing to the report total of product recovered from the Agency's annual report. Scan the detailed listing to ensure that there were no collections that were outside of the organization's fiscal year. Randomly select shipments and obtain the supporting document (Bill of lading or other support) to verify the amount of product shipped. Verify that each of the supporting documents received has appropriate evidence of the total product shipped and weight of product received by the consolidation site supported by a scale ticket or like support, and signatures by the Collection Facility, consolidation site and hauler/transporter. Confirm that the total product (in units/weight etc.) listed on the supporting document matches the total listed on the detailed listing. 	<ol style="list-style-type: none"> We obtained a listing of product shipments received from Collection Facilities for the year ended December 31, 2010. The listing provides the amount collected (in weight only), the Collection Facility name, and the date the shipment was received at the consolidation site but does not provide the Collection Facility address or the shipment date to the processor (Wainwright). The total weight of shipments (60,544 kg) from Collection Facilities per the listing and the weight reported on the annual report agrees without exception. We scanned the listing and noted that all shipments were completed during the organization's fiscal 2010 year. From the listing of all product shipments, we randomly selected 25 samples in accordance with the Sample Size General Guidance as provided to trace to the shipping returns document. This document is filled out by the Collection Facility. Of the sample tested, all of the shipping returns documents were signed by the Collection Facility, with the exception of two. The Association's procedure is to weigh the product at the consolidation site and record the weight on the shipping returns document. As the product is not weighed at the Collection Facility, it is not possible to reconcile the weight shipped to the weight recorded. The weight listed on the shipping returns document agrees to the listing, without exception.
3.4	To obtain comfort over the calculated recovery rate, by product type (where applicable)	<ol style="list-style-type: none"> Check the mathematical accuracy of the calculated recovery rate (where applicable) by dividing product recovered by product sold, as reported in the audited financial statements. Compare calculated recovery rate to the recovery rate reported by the Agency in their annual report. Note any discrepancies. 	The Association does not publish its Recovery rate. Procedure 3.4 is not applicable.
