

Version 4.18 - July 1st, 2020

The changes in this release bring ECAS in line with new policy for the interior which will be effective July 1st, 2019.

For a more accurate estimate of silviculture costs, ECAS63 now offers the following selection of enhanced silviculture regimes for those BEC zone, subzone, and variant combinations which are eligible for enhanced silviculture:

	DESCRIPTION	XML Code
1	Merritt ISS - Increased Planting Density	IPD
2	Prince George FSP#11 - Increased Target Stocking	ITS
3	Bulkley ISS - Sx leading	SXL
4	Bulkley ISS - Pli leading -1800 sph	P18
5	Bulkley ISS - Pli leading- 2000 sph	P20
6	Cariboo Regional Standard - Enhanced Density	EDE
7	Cariboo Regional Standard - Enhanced Diverse	EDI
8	2017 Wildfire - Post-Wildfire Fdi	PWF

The following changes remove some inaccuracies or strengthen screen functions for interior appraisals:

- Allow negative specified operations costs (ECAS65)
- New Submit validation for interior changed circumstance reappraisals to ensure there is certification on the subsequent reappraisal
- Strengthen Submit validation for TSB field on ECAS60 screen to ensure a TSB value is selected and saved unless the FTA management unit type is T (TFL)
