The BC Major Projects inventory is a comprehensive database of major development activity within British Columbia and published quarterly by the Ministry of Jobs, Tourism and Skills Training with funding from its Labour Market & Immigration Division. Not all major projects in British Columbia are included in the MPI. For inclusions, projects must be made known to the publisher. By definition confidential project information is not included. While information sources are checked regularly, the Government of British Columbia and its contractors are not responsible for any errors or omissions in this publication.

Definitions of Key Terms

Proposed project is in planning or permitting stages, remediation, demolition, excavation or site servicing may occur at this stage.

On Hold project is delayed but still may go ahead or is cancelled and will be removed from the MPI in the following issue.

Construction Started foundations have started, includes excavation for road projects.

Completed construction is substantially complete, landscaping or deficiency inspection may still occur.

Public projects that have funding from municipal, provincial or federal governments and may include private funding.

Clean Energy describes projects that are clean energy producers, such as wind power or hydroelectric.

Green Building projects that are planned to Leadership in Energy and Environmental Design (LEED®) or Green Globes sustainable building standards.

About the Major Projects Inventory

The BC Major Projects Inventory (MPI) contains summary information on major projects in the Province of British Columbia, Canada, that are over \$15 million (Cdn.) capital cost, or \$20 million in the Lower Mainland–Vancouver area. As of June 2010, the information in this published version of the BC Major Projects Inventory is prepared by Rene Corcoran, although it is now owned and published by the Province of British Columbia.

Sources of MPI Information Information sources include print and electronic media, developers, architects, general contractors, and government agencies (provincial, regional, municipal) as well as occasional site visits. Projects that are under consideration or proposed to be funded by the Provincial government may be listed where there is public information about such projects. The description may indicate the status of Provincial funding applications, if it is known.

Project Location Projects are listed within the eight regions: Vancouver Island/Coast, Mainland/Southwest (Vancouver area), Thompson/Okanagan, Kootenay, Cariboo, North Coast, Nechako, and Northeast. Maps showing the location of the regions and main population centres are included in the MPI. Projects are also listed according to the nearest population centre, which could be an unincorporated centre or a local government, (*e.g.*, a municipality). Updates New projects are added to the database every quarter. Projects already in the database are updated, at minimum, every six months unless there is no expected change in status for a longer period of time. Projects may be shown as updated with no

change in information—this means that the information shown is still valid according to the verifying source.

Estimated Costs Cost estimates are general estimates from the information sources used.

Start and Finish Dates Start and finish dates for proposed projects are based on estimates from the sources used, or in some cases, on reasonable assumptions. These dates are revised as new information becomes available.

Project Status Projects are listed by status: proposed, under construction, completed, or on hold. Notes on other status indicators are also included in the project description. Projects that are on hold for longer than two years are normally removed from the publication (although retained in our database). Cancelled projects are noted in the project descriptions as cancelled, then removed from the next issue of the MPI.

Sustainable Building Design As a new feature, the MPI has begun identifying sustainable building design and construction projects within that have been registered and certified under a recognized green building rating system (*e.g.*, LEED®, Green Globes). Certification provides greater assurance that a building will be an environmentally responsible, energy efficient, profitable, and healthy place to live, work and play. This designation has been added to the project description to promote awareness of the benefits of green buildings.

Highlights of the December 2014 Issue

This issue of the BC Major Projects Inventory lists 33 new proposed projects over \$15 million for the fourth quarter of 2014, with available capital cost estimates totaling approximately \$833 million in potential new capital investment, if all the projects proceed.

Twenty-two major projects started construction in the fourth quarter, with an estimated value of \$2.96 billion. Some of the largest projects started are the Elk Valley Water Quality Plan in Sparwood at \$600 million, and the Concord Gardens Residential Development in Richmond at a cost of \$350 million.

Forty-two projects completed construction in the fourth quarter, with an estimated capital cost of approximately \$3.7 billion; the largest project is the \$1 billion Urban Village Condominium Development in Surrey, followed by the \$300 million Residential Towers at Plaza 88 in New Westminster.

All capital costs are estimates, and therefore, subject to changes, especially in the early stages of a project proposal. Some capital costs are not included because they were not available at press time or the developer/owner requested that no capital cost be shown. The capital cost of all major projects currently under construction in BC is estimated at \$79.9 billion, down from the \$81.7 billion reported in the third quarter of 2014. Many major project proposals listed are in very preliminary stages and are not approved for construction, therefore capital cost estimates should be viewed with caution. The available capital cost of proposed projects is estimated at approximately \$285 billion, up from \$269.5 billion in the previous quarter. Approximately \$27.2 billion of projects are judged to be 'on hold' for the time being.

Langley To Vancouver

Gateway Program - Port Mann Bridge/Highway 1 Improvements

BC Ministry of Transportation and Infrastructure Ph: (604) 456-2420

A new 10-lane bridge across the Fraser River between Coquitlam and Surrey, selected in favour of the initial plan for the twinning of the Port Mann Bridge. The new span will have provision for a RapidBus service, future light rapid transit and pedestrian/cyclist network. The project includes widening Hwy 1 west to McGill St in Vancouver by one lane each way, and east to 216 St in Langley by two lanes each way and upgrading the associated interchanges to current standards. The Connect BC Development Group (Macquarie Group, Transtoll Inc, Peter Kiewit Sons and Flatiron Constructors Canada) have been selected for this contract. The bridge will be funded through electronic tolls and financing will be provided by the Provincial government (\$1.375 billion), the proponent (\$1 billion) and bank financing (\$1.15 billion). Certified under the Environmental Assessment Act, the new Port Mann Bridge phased opening with 8 lanes in Dec 2012. Highway 1 widening west to Langley completed Dec 2013. Cariboo Overpass completed in Dec 2014, construction continues in the areas of United Blvd and Brunette Ave. Website: www.pmh1project.com

The South Shore Trade Area is one of several important import/export gateways in the Lower Mainland and geographically covers port activities along the south shore of Burrard Inlet. The project includes road improvements on port lands between Heatley Avenue and McGill Street in Vancouver, making it easier and more efficient for port-related traffic to use the Port's internal road system as much as possible, reducing road-rail conflicts and facilitating long-term rail capacity improvements. The project will reduce the effects of port operations on local streets as trade within the south shore continues to grow. Construction of overpass has completed, nearing completion of pedestrian walkway.

Valemount To Burnaby**Trans Mountain Pipeline Expansion (TMX)***Kinder Morgan Ph: (403) 514-6638*

Pipeline expansion planned in stages along the existing Trans Mountain Line from Edmonton, AB to Burnaby, BC. The pipeline would loop Kinder Morgan's existing 60 cm pipeline with a new 76 cm pipeline. TMX-1, the Anchor Loop, has completed in 2008 including 7 new pump stations and upgrading 6 existing pump stations (\$210 million). TMX-2 includes 243 km of 30 and 36-inch pipe between Valemount and Kamloops and back to Edmonton. In Spring 2012, Kinder Morgan received customer commitment resulting in an increased planned expansion to 750,000 barrels/day with an estimated cost of \$5 billion (cost shown is for BC portion). A total of 900 km of twinned pipeline would be part of the expansion project. An application has been submitted to the National Energy Board for regulatory approval. Geotechnical field studies are underway. Website: www.transmountain.com

Iskut Extension Project

BC Hydro Ph: (604) 683-0140

The project includes construction of a customer-built 287 kV transmission line extension from Bob Quinn Substation to the customer's mine, via a new BC Hydro-built substation at Tatogga Lake. In addition, BC Hydro has built a 16 km distribution line from Tatogga Lake Substation to the community of Iskut. The total cost represents the gross costs of the project and has not been netted to reflect the contribution from the customer towards the construction of the transmission line. The total cost increased from \$180M to \$209M to reflect a higher cost for the transmission line. BC Hydro purchased the transmission line upon completion by the customer at a fixed cost. The additional cost of the line, including the cost increase, was paid for by the customer and the net cost to BC Hydro for the project has not increased.

Atlin

New Polaris Gold Mine

Canarc Resource Corp. Ph: (604) 685-9700

Reactivation and expansion of a former underground gold mine approx 100 km south of Atlin and 60 km east of Juneau, Alaska. Re-modeling, metallurgical testing and engineering of a portion of the gold resources, necessary for a 65,000 opy high-grade underground gold mine, is underway. A scoping study identified the potential to develop a 65,000 oz./year to 100,000 oz./year high grade, underground gold mine over the next three years. New office and refurbished camp complex now on site. New mine resource estimate released on Feb 2007 and the mine plan is expected to complete in Spring 2007. A feasibility plan and environmental studies will be carried out prior to government permitting. Website: www.canarc.net

Dease Lake Area

Turnagain Nickel Project

Hard Creek Nickel Corp. Ph: (604) 681-2300

Proposed nickel mine located 70 km east of Dease Lake. An updated Preliminary Assessment (PA) of the Turnagain deposit by engineering firm AMEC Americas Limited showed positive economics with a potential 27 year mine life, producing an average of 20,397 tonnes of nickel per year. The ore would be processed through an on-site concentrator and hydrometallurgical process facility that would produce nickel, cobalt and copper precipitation products. Site C Clean Energy Project

BC Hydro Ph: (604) 623-4472 Toll Free: 1-866-647-3334

Site C will be a third dam and hydroelectric generating station on the Peace River approximately seven kilometres southwest of Fort St. John. It will be capable of producing approximately 5,100 gigawatt-hours of electricity annually and 1,100 megawatts of capacity. Site C project was approved by the Provincial Government in December 2014. Site C will provide clean, renewable and cost-effective power in B.C. for more than 100 years. *Planned in-service date for all units. This timeline reflects the project's current schedule and is subject to change based on a review of the construction schedule. **Total cost excludes the Project Reserve of \$440 million (established by Government to account for events outside of BC Hydro's control that could occur during construction) which is held by the Treasury Board. The increase to the 2010 capital cost estimate from \$7,900 million to \$8,335 million reflects costs associated with the change from the harmonized sales tax to the provincial sales tax, and a revised construction start date from January 2015 to summer 2015.
