

Geographic Response Plans

B.C. Spill Response Regime Engagement
April 2016

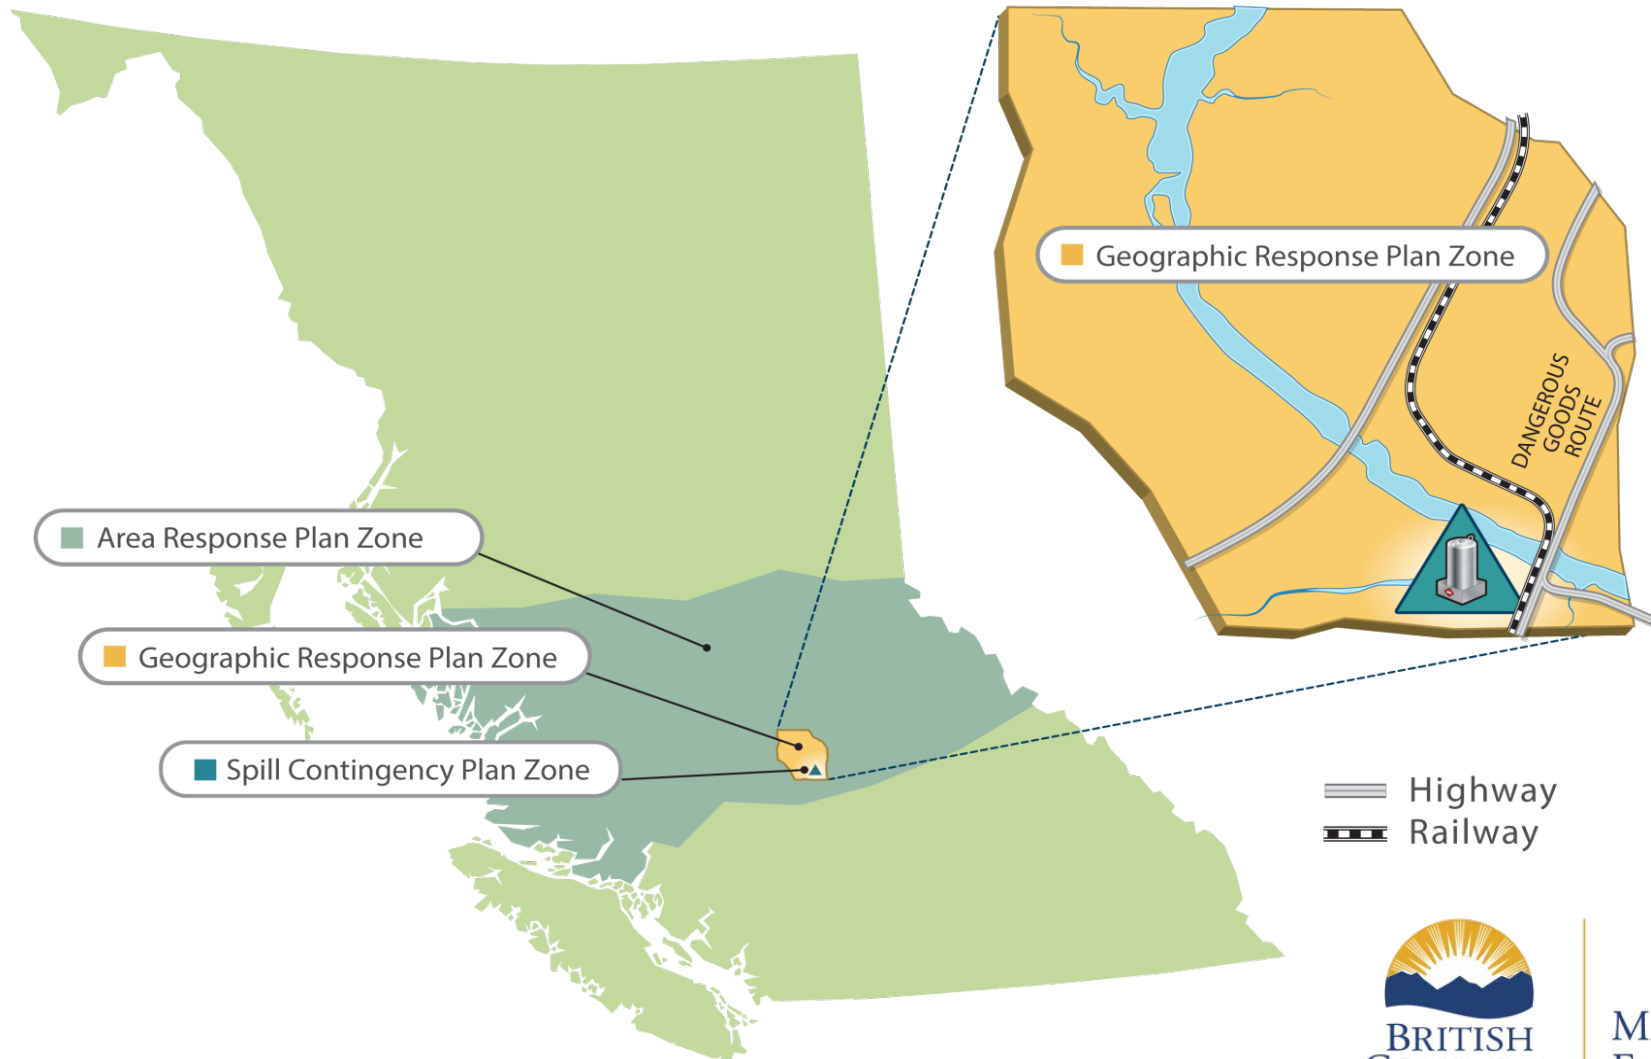

Ministry of
Environment

Agenda

- Three levels of planning
- Geographic response planning overview
- Existing planning initiatives
- Amendments
- Proposed policies
- Next steps
- Questions and discussion

Three Tiered Planning

What are Geographic Response Plans?

For a designated geographic area

Direct Response Actions for first 48 to 72 hours

Identify companies and activities with a spill risk

Identify Resources at risk from spills

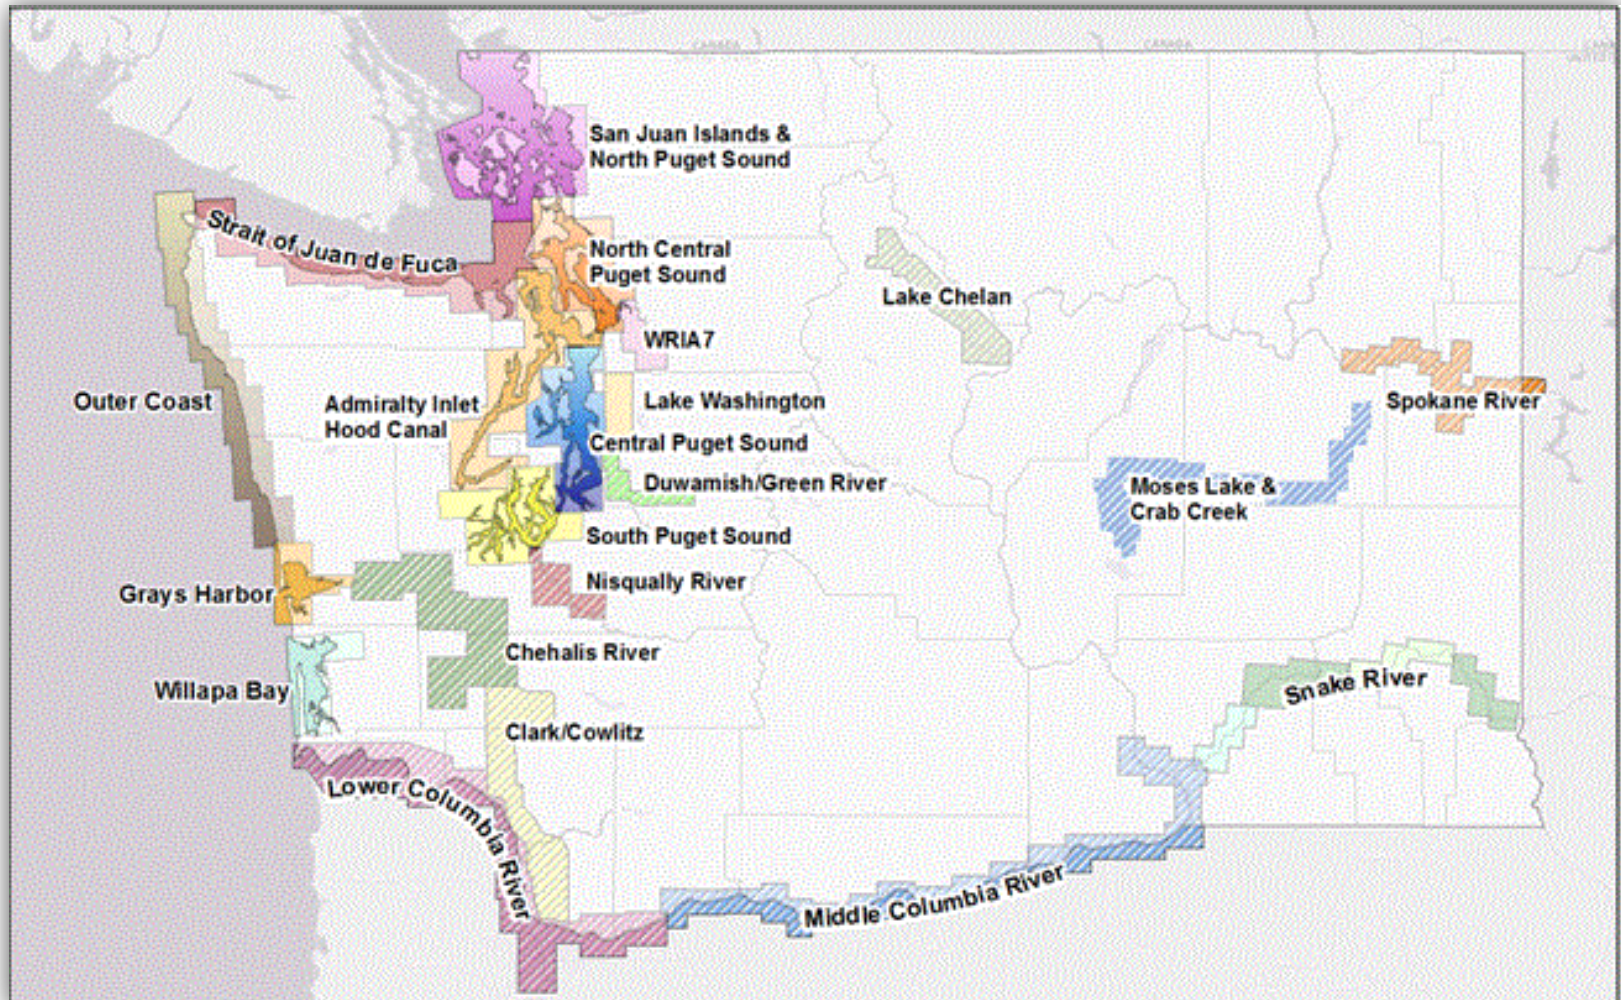

Identify resources and personnel available to respond

Are publicly available

Why have Geographic Response Plans?

Example – Washington State GRPs

Existing Planning Initiatives

ARPP
EC - Coastal
mapping

CN Rail -
WCMRC - Port
of Prince
Rupert

Marine Area
Planning
Partnership

Amendments

Before...

GRPs not
required or
regulated in
B.C.

Amendments

Before...

GRPs not
required or
regulated in
B.C.

After...

Preparation, review, updating and
testing of a GRP collectively by
regulated persons operating
within a designated area.

Proposed Policies - GRPs

- Government oversight
- GRP Advisory Committee
- Content and form
- Public consultation
- Publication
- Review, testing and updating

Proposed Government Oversight

- Determine geographic boundaries
- Prioritize development
- Determine content of plans
- Collaborative process

Proposed GRP Advisory Committee

- Suggested Membership
 - Local government, First Nations, NGO, industry, federal and provincial natural resource agencies and spill response experts
- Duties and responsibilities
 - Development and implementation of GRPs

Proposed Content and Form

• Content

- Site description
- Response options - strategies and priorities
- Shoreline information and countermeasures
- Resources at risk
- Sensitive resources
- Logistical support

PLAN SECTIONS	TOPICS IN EACH SECTION
Introduction	Purpose Development process Goals Record of changes
Site description	Maps GPS coordinates Photographs Physical features Hydrology Currents and tides Winds Climate Seasonal constraints Risk assessments
Response strategies and priorities: Equipment and control points	Maps Booming strategy priority tables Proposed booming and collection strategies Onsite considerations: <i>control points access locations staging sites waste storage sites decontamination sites wildlife management plan safety plan sampling and monitoring plan communications plan evacuation plan hazmat response plan oil spill response plan</i>
Shoreline information and countermeasures	Shoreline types and sensitivities Shoreline workforce Maps Appropriate countermeasures
Resources at risk	Natural, cultural, economic, social, historical resources at risk General resource concerns
Sensitive resources	Fish and wildlife Hazing Flight restriction zones Agricultural, recreational and economic points Key infrastructure Any other points of local importance
Logistical support	Spill response contact sheet Location of operations center for the central response organization Local equipment and trained personnel Local facilities and services and appropriate contacts for each (housing, medical, food) Site access and contacts Staging areas Helicopter and air support Local experts Volunteer organizations Potential wildlife rehabilitation centers or infrastructure to support facilities Marinas, docks, piers, and boat ramps Potential interim storage locations, permitting process Damaged vessel safe havens Vessel repairs and cleaning Response times for bringing equipment in from other areas
Appendices	Summary of protection techniques Original GRP contributors comments, corrections and suggestions received via engagement.

Public Consultation and Publication

- Public consultation
 - Standardized engagement and timeline
- Publication
 - Plans available online to the public

Review, Testing and Updating

- Proposed Review
 - Five-year cycle
- Testing and updating
 - Specified testing
 - Regular update

Summary

Proposed Policy	Potential Options
Government Oversight	<ul style="list-style-type: none">• Collaborative site selection and prioritization
Advisory Committee	<ul style="list-style-type: none">• Local level representatives• Development and implementation of GRPs
Content and form	<ul style="list-style-type: none">• Standardized content requirements
Public Consultation	<ul style="list-style-type: none">• Standardized engagement requirements
Publication	<ul style="list-style-type: none">• Plans available online
Review and updating	<ul style="list-style-type: none">• Five-year cycle
Testing and updating	<ul style="list-style-type: none">• Pending updates kept between cycles

Next Steps

- Gather input
 - 3rd Intentions Paper responses
 - Workshop discussion
- Technical workgroups
 - Looking for members
 - Planning
 - Advisory
 - June - Oct
- Develop requirements

Discussion

1. Who should be included in the advisory committees for the development of GRPs?
2. What content do you think GRPs should include?
3. How can we integrate existing planning work into GRPs?

Thank you!

Feedback and IP Submissions

Until June 30, 2016, provide your comments on the Third Intentions Paper by:

1. Post your comments publically at <https://engage.gov.bc.ca/spillresponse/>
2. Submit formal attachments on organizational letter head to spillresponse@gov.bc.ca
All attachments will then be posted publically at the website above.
