# **Overall Rating - High**

This notification is intended as an informational bulletin for technical audiences.

# **Summary**

The Vulnerability and Risk Management (VRM) Team is aware a use-after-free flaw was found in vmxnet3\_rq\_alloc\_rx\_buf in drivers/net/vmxnet3/vmxnet3\_drv.c in VMware's vmxnet3 ethernet NIC driver in the Linux Kernel.

# **Technical Details**

This issue could allow a local attacker to crash the system due to a double-free while cleaning up vmxnet3\_rq\_cleanup\_all, which could also lead to a kernel information leak problem.

This vulnerability is rated as a High Severity.

# **Recommended Action**

- Investigate how your area of responsibility is affected.
- Notify business owner(s) as required.
- Ensure mitigation is performed at your next change window.

Please notify <u>VRM</u> with any questions or concerns you may have.
