

# School District No. 23 (Central Okanagan) -

"Together We Learn"

## **2012 Carbon Neutral Action Report**

#### **Executive Summary**

On behalf of School District No.23, we are pleased to submit the 2012 Climate Action Report. This report provides an overview of our accomplishments and our initiatives for the calendar year 2012. One of our foremost accomplishments is that SD23 is the only district to operate fleet of Compressed Natural Gas (CNG) buses. Our school district has taken a leadership role in area of Greenhouse Gas (GHG) reduction by continuously improving our student transportation system. CNG buses operations contributed to 4% less GHG total fleet emissions when compared to 2010 calendar year. This year SD23 has reduced their diesel demand by 69,000 litres. This continuous improvement model is our school district's commitment to consistent effort in the proper management of our social and natural environment.

Another major accomplishment for SD23 involves our continual 2012 electrical reduction targets. These utility targets have been achieved. In 2008, the Provincial Government and BC Hydro's entered in "Public Sector Energy Conservation Agreement". The agreement states that electricity consumption in Public Sector Offices (PSO) will be reduced by 5% from 2006 baseline. Our school district has reduced 1,000,000 kWhr per year of electricity as a part of this agreement. We are committed to being leaders in environmental sustainability in all aspects of our operations taking measures to minimize the impact of our school district on the environment. In our role as leaders we dedicate time and resources to encourage and educate about the benefits and responsibility to participate in energy conservation and other sustainable initiatives. This report provides our goals and describes our plans for the future.

Wille

Superintendent of Schools,

Central Okanagan, School District No. 23

#### 2012 Greenhouse Gas Emissions

In 2012 School District No.23 created 6179Tonnes of Green House Gases (GHG). Parts of these emissions were created by our bus fleet, which we did not purchase offsets for, so our actual offset emissions were 4944tCO2e. (tCO<sub>2</sub>e). (tCO<sub>2</sub>e is a standard unit of measure in which all types of greenhouse gases are expressed based on their global warming potential relative to carbon dioxide.

#### Offsets Applied to Become Carbon Neutral in 2012

- Total offsets purchased: 4944(tCO<sub>2</sub>e)
- Total offset investment: \$123,600.00 @ \$25 per (tCO<sub>2</sub>e)
- Emissions which do not require offsets: 1235 (tCO<sub>2</sub>e)

School District No.23 bus transportation department do not require offsets. 1235 Tonnes of carbon dioxide equivalent (tCO<sub>2</sub>e) are offset exempt. Bussing school children is exempted because it removes parent's vehicles from roadways. SD23 transported students 1.2 million km in 2012. A total of 61 passenger buses transport students daily safely to and from SD23 schools. Bussing students removes the equivalent of 5,000 cars from our roadways every school day.

#### **Changes to Greenhouse Gas Emissions and Offsets Reporting from Previous Years**

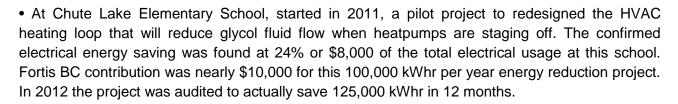

School District No. 23 (Central Okanagan) made corrections to 2011 SMARTTool data after our 2011 public report was released on June 30, 2012. This was due to errors that were uncovered by the late arrival of data that reflected energy use during the 2010 calendar year.

Following the public release of School District No. 23 (Central Okanagan) – 2011 Carbon Neutral Action Report, it was determined that the total emissions for the 2011 calendar year are correct.

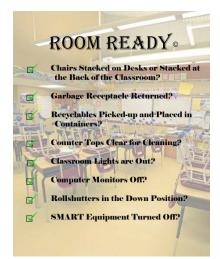

#### **Actions Taken to Reduce Greenhouse Gas Emissions in 2012**

#### Goals

- Create a healthy and comfortable learning and work environment;
- Reduce energy consumption; Room Ready Poster Campaign
- Reduce greenhouse gas emissions;
- Reduce landfill waste, developing a long range 5 year plan for waste, recycling and composting;
- Manage and operate facilities in ways that minimize negative effects on our ecosystem;
- Promote and advance environmental sustainability;
- Increase awareness and education opportunities on the importance of sustainability;
- Share information and expertise on sustainability issues internally and externally;

- Working with Fortis BC to develop a school district total energy strategy that will reduce SD23's GHG by 33%.
- Contributing to an ongoing long-term energy study on eight Heatpump Schools. The report included four newer SD23 schools and compared total energy and real utility costs. The executive summary indicated that Heatpump Schools were used 50% less total energy, 33% less cost in energy, and 750% less carbon foot print then conventional RTU heating & cooling systems.
- Begin of SD23's school year, 15 Compressed Natural Gas (CNG) school buses transported students to schools. Our CNG buses saved the cost of 69,270 liters of diesel fuel. These CNG buses contributed to a total of 4% less greenhouse gases from our 2010 fleet.
- Solar Domestic Hot Water heating systems at Glenrosa Middle and at Rutland Senior Secondary were used to teach Students about the power of the Sun. Solar BC, Fortis BC and National Resource Canada incentives through Public Sector Energy Conservation Agreement (PCESA) supplied the funding. Online website that examines the long term performance issues of solar power.
- Schools were challenged to become involved with the Destination Conservation (DC) program. Nine schools have committed to the program. Students presented on electrical conservation campaigns throughout our district.

#### Plans to Continue Reducing Greenhouse Gas Emissions in 2013 – 2015

- Continue "The Energy Conservation Committee" composed of the utility sector and district staff with the mandate to share energy ideas and lay out framework for future energy projects.
- By using Learning Technology Department's help desk, the LT department employees can provide remote support for any computer in the district, reducing vehicle travel between schools and Hollywood Education Services. SharePoint document information software was implemented this year to reduce pressure on photocopying and energy demands.
- Lighting inventory of all Fortis BC territory school buildings has begun. This inventory list was used to identify and plan for future lighting upgrade projects within School classrooms. The Energy Manager has applied for energy grants offered by Fortis BC.
- Continually monitoring our districts utility/energy data to seek out billing and usage anomalies. The schools monthly energy usage is compared against other schools of size and design. Heating and cooling schedules are being optimized to reduce energy waste. High energy usage school are being audited to find the energy savings.
- In collaboration with Heath Promoting Schools, a Sustainability Policy and Regulations will be developed.
- Build on the success of pilot composting projects to implement for the Rutland school area. RSS's composting tubs are serving as the Rutland hub for compostable material. KSS composting tub installation in 2012.
- Enhance current recycling program to full co-mingling. In 2012, the first year of a school district wide comingled recycle program, this program diverted recyclable material from Kelowna's landfill. Celebrating that 244.4 metric tonnes of material were recovered which reduced the landfill requirements by 967.3 cubic yards.
- Purchase or convert additional fleet vehicles to CNG (Natural Gas).
- Develop water conservation plan that includes a continuous review of irrigation practices and landscaping standards.
- Develop and implement general "green purchasing" policy within Finance.
- Develop an Energy & Sustainability website.
- Review AFG plan for sustainability initiatives and rank within a five year plan.

#### **Objectives of Environmental Sustainability Education are to:**

- Support comprehensive, cross-disciplinary classroom and external learning opportunities
  related to climate change and sustainability education. KLO's Fascieux creek restoration
  project is great example of the good planning. KLO's Green Community members are
  working hard to present a comprehensive environment plan for the Trustee of SD23
- 2. Provide educational experiences for students to study climate change, including:
  - OKM Sustainability Grade 11/12 Class
- 3. Assist students in examining how human practices affect the sustainability of populations and ecosystems, including:
  - Impact of land-use decisions, de-forestation, urbanization and agriculture on the environment and living species within School Based Garden Clubs
  - Recycling Council of British Columbia (RCBC) is a multi-sectoral, non-profit organization promoting the principles of <u>Zero Waste</u> through information services, informing on how consumption and waste contribute to climate change
  - Natural resource management; water, energy and forests
- 4. Use learning resources to empower students and school communities to take action on climate change, and become sustainability messengers
- 5. Continue to develop comprehensive energy awareness in students about:
  - o Where energy comes from; energy systems, the energy system today and in future
  - How we use energy
  - How our use of energy impacts natural and human environments
  - How to make sustainable decisions around energy/natural resource use, from a local, provincial/regional and global perspective

## **Actions Towards Carbon Neutrality**

The actions listed below contribute to a reduction in greenhouse gas emissions from sources for which public sector organizations are responsible under the carbon neutral government regulation of the Greenhouse Gas Reduction Targets Act.

| Action  | Status                       | Steps Taken   | Steps Planned  | Start Year | End Year                                |
|---|------------------------------|---|--|------------|---|
| Mobile Fuel Combustion (Fleet and other)  |                              |   |  |            |   |
| Behaviour change program  |                              |   |  |            |   |
| Provide fleet driver training to reduce fuel use  | Ongoing/In<br>Progress       | NRCan training program to educate new drivers   | NRCan training program to educate new drivers                    | 2008       | No End Date (Continuous)                |
| Introduce anti-idling policy and/or raise anti-idling awareness for fleet drivers (e.g., signs, stickers, messages) | Ongoing/In<br>Progress       | Ongoing program with training, signage monitoring and incentives  | Ongoing program with training, signage monitoring and incentives | 2008       | No End Date<br>(Continuous)             |

# School District 23 - Central Okanagan (Kelowna) Greenhouse Gas Emissions by Source for the 2012 Calendar Year (tCO<sub>2</sub>e\*)

#### **Total Emissions: 6,179**

Mobile Fuel Combustion (Fleet and other mobile equipment)
 Stationary Fuel Combustion (Building Heating and Generators) and Electricity
 Supplies (Paper)

#### Offsets Applied to Become Carbon Neutral in 2012 (Generated May 28, 2013 3:38 PM)

Total offsets required: 4,944. Total offset investment: \$123,600. Emissions which do not require offsets: 1,235 \*\*

<sup>\*</sup>Tonnes of carbon dioxide equivalent (tCO<sub>2</sub>e) is a standard unit of measure in which all types of greenhouse gases are expressed based on their global warming potential relative to carbon dioxide.

<sup>\*\*</sup> Under the Carbon Neutral Government Regulation of the Greenhouse Gas Reduction Targets Act, all emissions from the sources listed above must be reported. As outlined in the regulation, some emissions do not require offsets.
