

Version 4.19 - December 15th, 2020

The updates in this release bring ECAS in line with new policy for the Coast which will be effective December 15th, 2020.

Coast Appraisal Updates

- Update to give licensees and submitters for BCTS the functionality to include Grade % Numbers data in their ECAS Coast XML, for validation and upload (ECAS44).
- New Specified Operations code available in Description drop down for Coast appraisals (ECAS34):
 - FRZ – Fibre Recovery Zone
- Updates to Tree Log Transportation (ECAS33):
 - Average Haul Distance field will be display only.
 - Point of Origin field will be displayed as “Point of Origin Area”.
 - 2nd Point of Origin field will no longer be displayed.
- Update to Wooden Culverts Units Cost (ECAS36):
 - The value of the Unit Cost (\$Unit) display field will change from 1000 to 2450.
- New Radio button in the District section of the Coast Control screen (ECAS32):
 - Button label “Was the Appraisal Data Office Checked:”, options of Yes or No.
- Retiring five Appraisal Log Dump codes from dropdown menu list in Point of Appraisal section of Cutting Authority Detail (ECAS41):
 - BRNO Brougham - Nodales Channel
 - COPI Cordero Channel - Picton Point
 - COTA Cordero Channel - Tallac Bay
 - ETMP East Thurlow Island - Mayne Passage
 - JSTP Johnstone Strait - Tuna Point, Sunderland Channel

Interior Appraisal Update:

- New PHARM Risk Assessment screen available by a menu item labelled PHARM (ECAS73):

To track and process the PHARM Risk assessment associated with post harvest reconciliation by cutting authority.

All these changes will be reflected in the Technical Specifications for ECAS.
