### **Robust Economy Pays Dividends**

The fiscal plan update in the first *Quarterly Report* demonstrates the strong economic performance of British Columbia relative to our peers, and the fiscal dividends this robust performance affords. In all years of the fiscal plan, increases in income tax and property transfer tax revenues allow for significant investments in key priority areas for government.

Revenue improvements total \$5.1 billion over the three year fiscal plan offset by \$2.2 billion in higher spending compared to *Budget 2016*.

Revenue improvements over the fiscal plan include personal and corporate income tax

revenues increasing by \$2.4 billion mainly due to the impact of higher 2015 tax assessments, and higher property transfer tax revenues totalling \$2.1 billion, of which \$675 million is estimated for the new 15% tax.

Over the three years, natural resource revenue is \$489 million higher than *Budget 2016* reflecting projected improvements in forest revenues and natural gas royalties.

Projections of federal government transfers and other revenue are \$519 million higher over the fiscal plan period predominantly due to an improved outlook by taxpayer-supported service delivery and SUCH sector agencies.

Changes to the commercial Crown corporation income projections are primarily due to continued erosion in ICBC's outlook across the fiscal plan period mainly due to continuing pressure in the form of higher claims costs.

Revenue improvements are net of government's decision to cancel Medical Service Plan rate increase scheduled for January 1, 2017, and assist in funding \$685 million statutory spending pressures in 2016/17. Statutory spending mainly relates to \$500 million in new housing investments in 2016/17 from government's *Housing Priority Initiatives* Special Account, higher fire management costs, and compensation agreements finalized after *Budget 2016*. The fiscal plan update also commits \$800 million in additional measures to be approved over the 2017/18 and 2018/19 fiscal years.

Revenue gains have also allowed for increases in prudence built into the fiscal plan. In response to potential risks, uncertainty and volatility, government is increasing the forecast allowance by \$150 million in 2017/18 and 2018/19. As well, the Contingencies vote allocation has increased by \$100 million in 2017/18 and 2018/19.

### **Steady Economic Growth**

The Ministry of Finance forecasts BC's real GDP to grow by 2.7 per cent in 2016 (a 0.3 percentage point increase from *Budget 2016*) and 2.2 per cent in 2017 (a 0.1 percentage point decrease from *Budget 2016*). BC's economy is expected to grow by 2.3 per cent per year in the medium-term – unchanged from the previous forecast.

#### **BC GDP outlook**

The Ministry's forecast for BC's real GDP growth of 2.7 per cent in 2016 is higher than the 2.4 per cent projected in *Budget 2016*, as indicators

of BC's economic performance through the first portion of 2016 show strong domestic activity relative to the same period of 2015. In particular, year-to-date data for BC employment, retail sales, and housing starts are stronger than anticipated earlier this year. However, exports are underperforming expectations and the external economic situation is weaker than anticipated.

The Ministry's outlook for BC's real GDP growth remains prudent relative to the private sector, being 0.2 percentage points lower in 2016 and 2017 than the current average outlook of six private sector forecasters (a subset of the Economic Forecast Council).

#### **Ministry outlook compared to private sector**

This prudence acknowledges the downside risks to the economic forecast and is one of the levels of prudence built into the fiscal plan. Downside risks to BC's economic outlook include the potential for a slowdown in North American economic activity, ongoing fragility in Europe, uncertainty associated with the UK referendum vote (Brexit), and slower than anticipated Asian demand (particularly in China). Additional risks include uncertainty in the outlook for the Canadian dollar and weak inflation.

### **Capital Spending**

Taxpayer-supported capital spending on hospitals, education facilities, transportation infrastructure, housing and other projects is financed through a combination of provincial borrowing, funding provided by third parties, and from agencies' internal cash flows. Capital spending is forecast to total \$13.1 billion over the fiscal plan period, representing an increase of \$1.1 billion over the budget forecast. The increase is mainly due to new federal government infrastructure programs in the transportation and post-secondary sectors, as well as higher self-funded capital spending by service delivery agencies.

Self-supported infrastructure spending by commercial Crown corporations has increased by \$0.8 billion over *Budget 2016* to total \$9.5 billion over the three year period, mainly related to the inclusion of the George Massey Tunnel Replacement project.

### **Strategic Debt Management**

Total provincial debt is projected to increase by \$6.6 billion to reach \$71.9 billion by 2018/19. The ending balance reflects a reduction of \$7.2 billion to direct operating debt over the fiscal plan period. By 2018/19, direct operating debt is now forecast to be \$812 million. Direct operating debt has not been this low since 1982/83.

Government's focus on debt management continues to yield improvements in both the debt to GDP and debt to revenue affordability ratios. By the end of the fiscal plan period, debt to GDP is forecast to be 0.6 percentage points, and debt to revenue 5.7 percentage points, lower than forecast in *Budget 2016*.

#### **Continuing debt affordability trend**

##### **Taxpayer-supported debt to revenue**

### **Risks to the Fiscal Plan**

The main risks to the government's fiscal plan include:

- risks to the BC economic outlook, largely due to the continued uncertainty surrounding global economic activity;
- assumptions underlying revenue and Crown corporation forecasts such as economic factors, commodity prices and weather conditions;

- potential changes to federal transfer allocations, cost-sharing agreements with the federal government and impacts on the provincial income tax bases arising from federal tax policy and budget changes; and
- utilization rates for government services such as health care, children and family services, and income assistance.

Government incorporates four main levels of prudence in its projections to mitigate the risks to the fiscal plan:

- The Ministry outlook for BC's real GDP growth is lower than the current private sector average outlook.
- The natural gas revenue forecast continues to incorporate a prudent price forecast that is within the 20<sup>th</sup> percentile of the private sector forecasts.
- Government has maintained a forecast allowance of \$350 million in 2016/17, increasing to \$500 million in each of 2017/18 and 2018/19 noted above to assist in managing potential volatility and risks.
- The updated fiscal plan includes Contingencies vote allocations of \$450 million in 2016/17, increasing to \$500 million in each of 2017/18 and 2018/19, to help manage unexpected pressures.

### **Conclusion**

British Columbia's economic strength is translating into an improving fiscal outlook. Government is working to maintain cautious fiscal management in the form of balanced budget objectives, debt affordability, and prudence, while meeting key program area and infrastructure needs that will benefit all British Columbians.

# PART ONE – UPDATED 2016/17 FINANCIAL FORECAST

## Introduction

**Table 1.1 2016/17 Forecast Update**

(\$ millions)	Budget 2016	First Quarterly Report
Revenue .....	48,066	50,543
Expense .....	(47,452)	(48,252)
<b>Surplus before forecast allowance .....</b>	<b>614</b>	<b>2,291</b>
Forecast allowance .....	(350)	(350)
<b>Surplus .....</b>	<b>264</b>	<b>1,941</b>
<b>Capital spending:</b>		
Taxpayer-supported capital spending .....	4,251	4,585
Self-supported capital spending .....	3,108	2,938
	<b>7,359</b>	<b>7,523</b>
<b>Provincial Debt:</b>		
Taxpayer-supported debt .....	43,227	41,939
Self-supported debt .....	24,113	24,229
<b>Total debt (including forecast allowance) .....</b>	<b>67,690</b>	<b>66,518</b>
<b>Taxpayer-supported debt-to-GDP ratio .....</b>	<b>17.0%</b>	<b>16.4%</b>
<b>Taxpayer-supported debt-to-revenue ratio .....</b>	<b>92.4%</b>	<b>85.0%</b>

The first quarter update for 2016/17 reflects significant improvements in revenues with a surplus of \$1.9 billion - \$1.7 billion higher than *Budget 2016*. The increase is due to a \$2.5 billion increase in revenues (mainly income and property transfer taxes), partially offset by \$800 million in higher spending, including \$500 million in new commitments from the *Housing Priority Initiatives* Special Account and other statutory spending.

**Chart 1.1 2016/17 surplus forecast increased**

Projected taxpayer-supported capital spending has increased by \$334 million in 2016/17, due mainly to higher routine capital maintenance spending by health authorities and increased spending in the post-secondary and transportation sectors in response to new federal government program commitments. Self-supported capital spending is down from budget by \$170 million, due mainly to project timing changes for BC Hydro.

The total debt forecast is down \$1.2 billion compared to *Budget 2016*. Taxpayer-supported debt is \$1.3 billion lower resulting from improved cash flows afforded by improved operating results. Self-supported debt is \$116 million higher due mainly to higher ending balances in 2015/16, partially offset by the lower capital spending by commercial Crown corporations noted above.

**Table 1.2 2016/17 Forecast – Changes from *Budget 2016***

(\$ millions)	Q1 Update
<b>2016/17 surplus – <i>Budget 2016</i> (February 16, 2016)</b>	<b>264</b>
<b>Revenue changes:</b>	
Personal income tax – mainly higher 2015 tax assessments	1,111
Corporate income tax – increased prior-year adjustment, reflecting higher 2015 tax assessments, and higher federal government instalments	191
Property transfer tax – stronger year-to-date sales results and an additional 15% tax	965
Provincial sales tax – stronger year-to-date results	100
Other taxation sources	(17)
Natural gas royalties – higher natural gas liquids royalties and savings from lower utilization of royalty programs partially offset by lower prices and volumes	61
Forests – mainly higher stumpage rates	88
Other natural resources	8
Other revenue – higher revenue from fees and miscellaneous sources, partly offset by lower investment earnings and the impact of cancelling the MSP rate increase	36
Health and social transfers – lower population share	(2)
Other federal government transfers – mainly improved contributions in support of affordable housing initiatives	54
Commercial Crown agencies operating results:	
ICBC – mainly increased claims costs	(157)
Other commercial Crown agencies – mainly stronger LDB sales	39
<b>Total revenue changes</b>	<b>2,477</b>
<b>Less : expense increases (decreases):</b>	
Consolidated Revenue Fund changes:	
Statutory spending:	
Fire management costs	66
New <i>Housing Priority Initiatives</i> special account measures to be announced	500
Emergency program flood-related costs	14
Compensation settlements	81
BC Training and Education Savings grant – higher anticipated eligibility	8
Elections BC	16
Management of public debt (net) – reflects lower interest rates and revisions to scheduled borrowing	(18)
Spending funded by third party recoveries	(65)
(Increase) decrease in operating transfers to service delivery agencies	(354)
Changes in spending profile of service delivery agencies:	
School districts	141
Universities	36
Colleges	23
Health authorities and hospital societies	206
Other service delivery agencies	146
<b>Total expense increases (decreases)</b>	<b>800</b>
<b>Total changes</b>	<b>1,677</b>
<b>2016/17 surplus – first <i>Quarterly Report</i></b>	<b>1,941</b>

As a result of the significantly higher forecasted revenues and lower debt levels, the taxpayer-supported debt to revenue ratio is now projected to be 85.0 per cent – 7.4 percentage points lower than budget. Lower debt levels and a stronger economic outlook also improves the debt to GDP ratio by 0.6 percentage points compared to *Budget 2016*, and is now forecast to end the year at 16.4 per cent.

The forecast allowance has been left unchanged at \$350 million, reflecting continuing volatility in some revenue sources (e.g. higher income and property transfer taxes).

## Revenue

Revenue for 2016/17 is forecast to be \$50.5 billion – \$2,477 million higher than the projection in *Budget 2016*. The improvement reflects additional revenue from taxation sources, natural resource revenue, contributions from federal government and other taxpayer-supported revenue sources, partially offset by reductions in commercial Crown corporation net income.

**Chart 1.2 2016/17 revenue forecast increased**

Detailed revenue projections are disclosed in Table 1.6, and key assumptions and sensitivities relating to revenue are provided in Table A.1. An analysis on historical volatility of major economic drivers can be found in the *2016 BC Financial and Economic Review* (pages 14-15). Major changes from *Budget 2016* include the following:

### Income tax revenue

Personal income tax revenue is up \$1,111 million, reflecting stronger 2015 tax assessments, partly offset by a reduction in 2016 and 2017 household income growth assumptions. The increased revenue includes a one-time \$682 million prior-year adjustment related to 2015/16 and a \$429 million base impact in 2016/17.

The *Budget 2016* forecast assumed relatively weak 2015 income tax contributions for higher-income individuals based on very strong results in the previous two years and relatively weak equity markets last year. The preliminary 2015 tax assessment results indicate fairly strong income growth across all income cohorts and over 2.0 per cent growth in the number of tax-filers. These assessments also indicate that all of the growth in the net tax per tax-filer is concentrated in the \$250,000 and over income cohort. Provincial personal income tax rates were unchanged in 2015.

Corporate income tax revenue is up \$191 million due to increased advance instalments from the federal government and an assumed higher prior year settlement payment, reflecting stronger 2015 tax assessment results.

### **Consumption and other tax revenue**

Provincial sales tax revenue is up \$100 million mainly reflecting year-to-date results, consistent with higher growth in consumer expenditures, business investment and strong retail sales.

Property transfer tax revenue is up \$965 million due to strength in the provincial housing market, reflecting increases in average house sale prices and the number of transactions. The forecast also incorporates the impact of the 15% additional property transfer tax, estimated at \$165 million.

Other taxation revenues are down \$17 million.

### **Natural resources revenue**

Revenue from natural gas royalties is up \$61 million mainly due to increased natural gas liquids production and decreased utilization of royalty program credits, partially offset by lower natural gas prices and production volumes. The natural gas price is assumed at \$0.94 (\$Cdn/gigajoule, plant inlet) in 2016/17. This is within the 20<sup>th</sup> percentile of the private sector forecasts, continuing the practice of adopting a prudent natural gas price outlook.

Forest revenue is up \$88 million mainly due to higher stumpage revenue reflecting higher stumpage rates and lumber prices. Crown harvest volumes are expected to be 62 million cubic metres, unchanged from the *Budget 2016* forecast.

Other natural resource revenues are expected to be up \$8 million as a \$13 million improvement in the petroleum royalty forecast due to projected increases in production volumes and average price, is partially offset by a \$5 million decline in all other natural resource revenues.

### **Other revenue**

Revenue from other own-source taxpayer-supported sources is up \$36 million due to higher revenues from fees and miscellaneous sources (predominately in the SUCH sector), partly offset by the quarter-year impact of cancelling the MSP rate increase scheduled for January 2017 and lower investment earnings mainly due to reduced interest revenue recovered from Crown agencies. Lower recoveries of investment earnings (under the Fiscal Agency loan program) have an offsetting interest expense reduction with no impact on the surplus.

### **Federal government transfers**

Canada Health and Social Transfers are down \$2 million reflecting a lower BC population share of the national total. Other federal government contributions are expected to be up \$54 million mainly due to increased transfers in support of affordable housing initiatives.

### **Commercial Crown corporations**

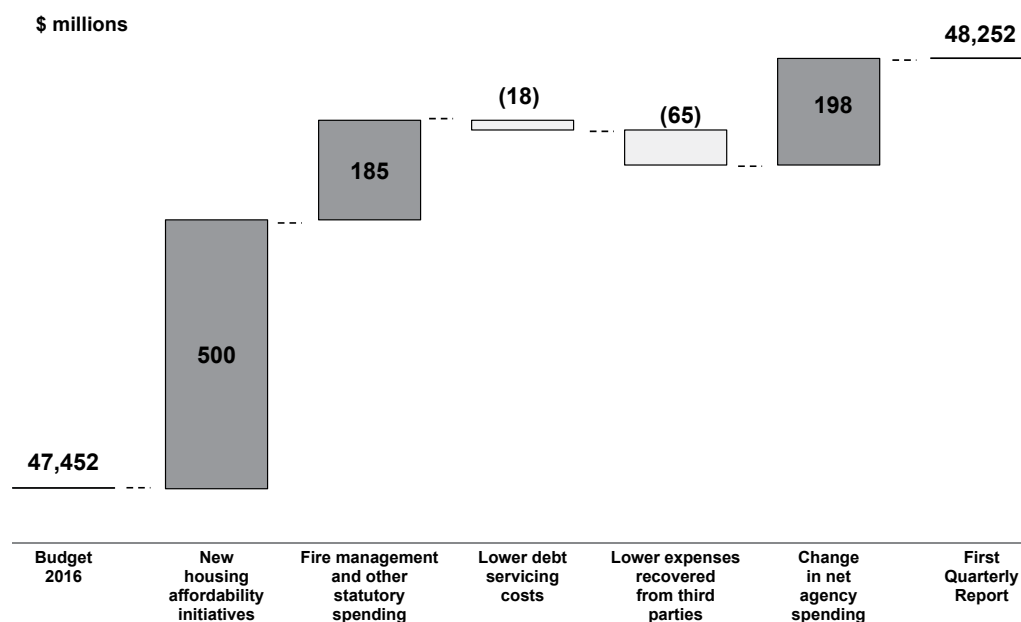

The outlook for commercial Crown corporation net income is \$118 million lower mainly due to the erosion in ICBC's forecast resulting from the continuing increases in claims costs offset by improvements in premium and investment income (down \$157 million), partially offset by Liquor Distribution Branch improvements due to increased volumes across product lines (up \$37 million) and other changes (up \$2 million).

## Expense

The government spending forecast for 2016/17 is \$800 million higher compared to the projection in *Budget 2016* mainly due to statutory spending for housing initiatives, compensation arrangements, and fire management costs.

**Chart 1.3 2016/17 expense forecast increased**

**Total expense increased by \$800 million**

## Consolidated Revenue Fund (CRF) spending

Statutory spending is projected at \$685 million in 2016/17 including a commitment of \$500 million in investments from the new *Housing Priority Initiatives* Special Account to help address housing access and supply. In addition to housing, changes in statutory spending include the following:

- \$81 million for compensation settlements in the health and post-secondary sectors that were not finalized until after *Budget 2016* was tabled.
- \$66 million for fire management costs – this is in addition to the \$63 million budgeted for fire management in the 2016/17 *Estimates*. Overall, firefighting costs are currently forecast to reach \$129 million this year.
- \$16 million for Elections BC costs related to scheduled electoral events, including preparations for the 2017 provincial general election.
- \$14 million for emergency program flood-related costs and the costs of other emergency and disaster response efforts.
- \$8 million for additional grants from the BC Training and Education Savings Program (formerly the Children's Education Fund) to reflect higher projected eligibility under the program.

Other CRF spending changes include an \$18 million reduction in debt servicing costs due to lower projected debt levels and interest rates, as well as changes in the timing of borrowing.

### **Contingencies**

The Contingencies vote allocation of \$450 million for 2016/17 is unchanged from *Budget 2016*. Contingencies are intended to help manage unexpected cost pressures as they arise.

### ***Spending recovered from third parties***

Spending funded by third parties is forecast to fall by \$65 million due to lower interest costs recovered from commercial Crown corporations.

### ***Operating transfers to service delivery agencies***

Operating transfers to service delivery agencies are forecast to be \$354 million higher mainly due to adjustments to projected health organization and school district allocations in response to spending forecast changes noted below.

### ***Service delivery agency spending***

Service delivery agency spending is forecast to increase by \$552 million.

- School district spending is forecast to be up \$141 million on a total spending of \$6.0 billion, mainly due to an increase in operating spending funded by higher grants, other contributions, and own source revenues. Increases are based on prior year results and higher projected student enrollment.
- Post-secondary sector spending is forecast to be up \$59 million, mainly due to higher estimates for grants to third parties. Higher spending is projected to be funded by higher sales of goods and services, fees, and endowment earnings.
- Health authority and hospital society spending is forecast to be up \$206 million, mainly due to negotiated compensation increases for the nurses and physicians. These increases are projected to be funded by additional provincial grants.
- Other service delivery agency spending is forecast to be up \$146 million, due to higher program spending of \$101 million from BC Housing Management Commission funded by federal contributions, \$18 million from BC Transportation Financing Authority, and \$27 million from other agencies.

Detailed expense projections are disclosed in Table 1.7. Key spending assumptions and sensitivities are provided in Appendix Table A3.

### **Government employment (FTEs)**

The projection of government employment for 2016/17 has increased by 55 full time equivalents due to higher ministry staffing requirements related to fire management efforts. Further details on FTEs are provided in Appendix Table A9.

## Provincial capital spending

Capital spending is projected to total \$7.5 billion in 2016/17 – \$164 million higher than the forecast in *Budget 2016* (see Tables 1.3 and 1.9).

**Table 1.3 2016/17 Capital Spending Update**

(\$ millions)	Q1 Update
<b>2016/17 capital spending – Budget 2016 (February 16, 2016)</b> .....	<b><u>7,359</u></b>
<b>Taxpayer-supported changes:</b>	
Primarily higher routine capital maintenance spending by health authorities .....	140
Additional self-funded post-secondary institution spending .....	85
Additional transportation sector spending .....	133
Other net adjustments to capital schedules .....	(24)
Total taxpayer-supported .....	<u>334</u>
<b>Self-supported changes:</b>	
BC Hydro - timing of capital spending .....	(219)
Other .....	49
Total self-supported .....	<u>(170)</u>
<b>Total changes</b> .....	<b><u>164</u></b>
<b>2016/17 capital spending – first Quarterly Report</b> .....	<b><u>7,523</u></b>

Taxpayer-supported capital spending is projected at \$4.6 billion. The \$334 million increase since *Budget 2016* is mainly due to increased funding from the federal government under new infrastructure programs for the transportation and post-secondary sectors. In addition, health authorities have increased their capital spending from internal and third party sources for priorities such as facility lifecycle maintenance.

At \$2.9 billion, self-supported capital spending is \$170 million lower than *Budget 2016* due mainly to project timing changes by BC Hydro.

### Projects Over \$50 Million

Capital spending projects greater than \$50 million are presented in Table 1.10. Since *Budget 2016* six projects have been added to the table:

- Construction of two new schools in the lower mainland; Grandview Heights Secondary School (\$61 million) and New Westminster Secondary School (\$107 million);
- Redevelopment of the University of British Columbia's undergraduate life science teaching laboratories (\$80 million);
- The Vancouver Island Health Authority's \$100 million iHealth project to house a single health record for patients, residents and Island Health clients;
- The George Massey Tunnel replacement project has a capital budget of \$3.5 billion. Prior to government approval to proceed with the project, development and planning costs of \$48 million were incurred and expensed, as per accounting policy; and
- W.A.C. Bennett Dam riprap upgrade project (\$170 million) to improve erosion protection of the dam.

The following projects have been completed since *Budget 2016* and are no longer listed in the table:

- Belmont Secondary School construction;
- Northern Cancer Control Strategy project; and
- British Columbia Lottery Corporation's Gaming Management System.

Changes since *Budget 2016* for existing projects include:

- Reallocation of costs between the direct procurement and P3 contract components for Emily Carr University of Art and Design campus redevelopment project to account for the full P3 contract amount. Previous reporting only accounted for the P3 liability under the P3 contract and the remaining amounts under the direct procurement. The overall cost of the project remains unchanged.
- Completion of the Surrey Emergency/Critical Care Tower is extended to 2018 from 2016 for the direct procurement portion of the project.
- Completion of the Interior Heart and Surgical Centre is extended to 2018 from 2017 for the direct procurement portion of the project.
- Allocation of costs between direct procurement and P3 contract components were established for the Penticton Regional Hospital – patient Care Tower following completion of Financial Close in April 2016. This resulted in a \$13 million reduction in anticipated costs from \$325 million to \$312 million. The anticipated completion date for phase 1 of the project is 2019 under the P3 contract, with the direct procurement component being completed by 2021.
- Reallocation of \$6 million in costs between the direct procurement and P3 contract components for the Evergreen Rapid Transit Line project. The overall cost of the project remains unchanged, and the opening is now expected by the end of 2016.
- Total estimated cost for the Okanagan Correctional Centre has decreased \$3 million, reflecting a reduction in risk reserves as the project nears completion.
- The Natural Resource Permitting Project is following the best practice of breaking down large IT projects into smaller, self-contained scope components that deliver value. An additional \$7 million of capital funding was approved for 2016/17 to initiate work on the next scope component of the Natural Resource Permitting Project. Phase one of the project is still expected to be completed in 2018 at the previously approved \$57 million.
- Total anticipated cost for five BC Hydro's projects has been reduced:
  - The Northwest transmission line project has been reduced \$12 million, from \$716 million to \$704 million;
  - The Merritt area transmission project has been reduced \$5 million, from \$65 million to \$60 million;
  - The Hugh Keenleyside spillway gate reliability upgrade has been reduced \$8 million from \$123 million to \$115 million;
  - The Upper Columbia capacity addition at Mica units 5 and 6 has been reduced \$87 million, from \$714 million to \$627 million; and
  - The Long Beach area reinforcement project total cost has been reduced \$18 million, from \$56 million to \$38 million.
- Anticipated spending for the capital portion of ICBC's business transformation program decreased by \$3 million to \$315 million, reflecting a reallocation of costs between capital and operating expense. The overall program budget, which includes both capital and operating expense components, remains unchanged at \$400 million.

## Provincial debt

The provincial debt, including a \$350 million forecast allowance, is projected to total \$66.5 billion by the end of the fiscal year – \$1.2 billion lower than the projection in *Budget 2016*. This reduction in debt is due to anticipated changes in the fiscal year, partly offset by a higher 2015/16 ending balance.

**Table 1.4 2016/17 Provincial Debt Update**

(\$ millions)	Q1 Update
<b>Budget 2016 projection</b> .....	<b><u>67,690</u></b>
<b>Taxpayer-supported changes:</b>	
Government operating:	
– lower debt level from 2015/16 .....	(34)
– Improved operating surplus.....	(1,677)
– other working capital changes .....	<u>322</u>
Total operating debt changes .....	<u>(1,389)</u>
Capital debt:	
– higher debt level from 2015/16 .....	52
– higher capital spending .....	334
– higher contributions from external parties .....	<u>(285)</u>
Total capital debt changes .....	<u>101</u>
<b>Total taxpayer-supported</b> .....	<b><u>(1,288)</u></b>
<b>Self-supported changes:</b>	
– higher debt level from 2015/16 .....	234
– lower capital spending .....	(170)
– decrease in internal financing .....	<u>52</u>
<b>Total self-supported</b> .....	<b><u>116</u></b>
<b>Total changes</b> .....	<b><u>(1,172)</u></b>
<b>First Quarterly Report</b> .....	<b><u>66,518</u></b>

Total debt at the end of 2015/16 was \$252 million higher than the forecast for the year in *Budget 2016* (excluding the forecast allowance), mainly due to higher than expected self-supported Crown corporations' debt level.

In 2016/17, taxpayer-supported debt is projected to be \$41.9 billion – \$1.3 billion lower than the projection in *Budget 2016*. The decrease reflects lower direct operating debt (down \$1,389 million), primarily due to an improved operating surplus, partly offset by other working capital changes. The improvement in direct operating debt is offset by higher borrowing requirements for capital infrastructure investments (up \$101 million), reflecting increased capital spending partly offset by higher contributions from external parties.

The taxpayer-supported debt to GDP ratio is projected to be 16.4 per cent – a 0.6 percentage point improvement from *Budget 2016*.

The taxpayer-supported debt to revenue ratio is projected to be 85.0 per cent – a 7.4 percentage point improvement from *Budget 2016*.

Self-supported debt is projected to be \$24.2 billion – \$116 million higher than the projection in *Budget 2016*, reflecting the increased \$234 million carried forward from 2015/16 partly offset by a \$118 million decrease to the projected change in debt for 2016/17.

Details on provincial debt are shown in Table 1.11.

Total provincial debt is presented consistent with the Debt Summary Report included in the *Public Accounts*. Debt is shown net of sinking fund investments and unamortized discounts, excludes accrued interest, and includes non-guaranteed debt directly incurred by commercial Crown corporations and debt guaranteed by the Province. The reconciliation between provincial debt and the financial statement debt is shown in Table A11.

## Risks to the fiscal forecast

There are a number of risks and pressures to the fiscal plan including risks to the BC economic outlook, which are largely due to the continued uncertainty surrounding global economic activity. The forecasts of revenues, expenditures, capital spending and debt are estimates based on a number of economic, financial and external factors. Variables will change throughout the year as new information becomes available, with potentially material impacts.

Revenues can be volatile due in part to the influence of the cyclical nature of the natural resource sector in the economy. Changes in energy or commodity prices, such as natural gas and lumber, may have a significant effect on revenue and the fiscal forecast. In addition, personal and corporate income tax assessments for the 2015 tax year will not be finalized until March 2017 and could result in further revenue and tax credit transfer spending adjustments.

The spending forecast in the fiscal plan is based on ministry and service delivery agency plans and strategies. The main risks are changes to planning assumptions, such as utilization or demand rates for government services in the health care, education, or community social services sectors, and costs associated with natural disaster responses.

In addition, capital spending and debt figures may be influenced by a number of factors including design development, procurement activity, weather, geotechnical conditions and interest rates. As a result, the actual operating surplus, capital expenditure and debt figures may differ from the current forecast. Government will continue to update the fiscal plan throughout the year in the second and third *Quarterly Reports*.

The potential fiscal impact from these risks is expected to be covered by the \$450 million Contingencies vote and the \$350 million forecast allowance.

## Supplementary schedules

The following tables provide the financial results for the three months ended June 30, 2016 and the 2016/17 full-year forecast.

<sup>1</sup> Only projects that receive provincial funding and have been approved by Treasury Board and/or Crown corporation boards are included in this table. Ministry service plans may highlight projects that still require final approval. Capital costs reflect current government accounting policy.

<sup>2</sup> Assets have been put into service and only trailing costs remain.

<sup>3</sup> Reflects approved capital costs to date, subject to change if future scope components are approved by government.

<sup>4</sup> Figures shown are based on preliminary Treasury Board approvals and reflect the capital project budget only, planning costs of \$48 million have been expensed as per accounting policy. These amounts will change after P3 contracts are finalized.

<sup>5</sup> The G.M. Shrum G1-G10 control system upgrade project has three phases. The total authorized capital amount of \$60M represents partial implementation funding as at June 30, 2016 for phases I and II and definition funding for phase III.

<sup>1</sup> Provincial debt is presented consistent with the Debt Summary Report included in the *Public Accounts*. Debt is shown net of sinking funds and unamortized discounts, excludes accrued interest, and includes non-guaranteed debt directly incurred by commercial Crown corporations and debt guaranteed by the Province.

<sup>2</sup> Includes debt and guarantees incurred by the government on behalf of school districts, universities, colleges and health authorities/hospital societies (SUCH), and debt directly incurred by these entities.

<sup>3</sup> Post-secondary institutions' debt includes public-private partnership obligations of \$8 million for the three months ended June 30, 2015, \$28 million for the three months ended June 30, 2016, \$22 million for fiscal 2015/16 and \$55 million for fiscal 2016/17.

<sup>4</sup> Health facilities' debt includes public-private partnership obligations of \$1,298 million for the three months ended June 30, 2015, \$1,477 million for the three months ended June 30, 2016, \$1,442 million for fiscal 2015/16 and \$1,589 million for fiscal 2016/17.

<sup>5</sup> BC Transportation Financing Authority debt includes public-private partnership obligations of \$1,139 million for the three months ended June 30, 2015, \$1,004 million for the three months ended June 30, 2016, \$1,159 million for fiscal 2015/16 and \$824 million for fiscal 2016/17.

<sup>6</sup> Includes the BC Housing Management Commission and the Provincial Rental Housing Corporation. Social housing debt includes public-private partnership obligations of \$74 million for the three months ended June 30, 2015, \$89 million for the three months ended June 30, 2016, \$93 million for fiscal 2015/16 and \$82 million for fiscal 2016/17.

<sup>7</sup> Includes service delivery agencies, student loan guarantees, loan guarantees to agricultural producers, guarantees issued under economic development and home mortgage assistance programs and loan guarantee provisions.

<sup>8</sup> Joint ventures of the Columbia Power Corporation and Columbia Basin Trust.

## PART TWO — ECONOMIC REVIEW AND OUTLOOK <sup>1</sup>

### Summary

The Ministry of Finance forecasts BC's economy to grow by 2.7 per cent in 2016, 2.2 per cent in 2017 and 2.3 per cent per year in the medium-term. These projections are prudent relative to the current private sector outlook for BC.

The Ministry's forecast is 0.2 percentage points lower than the current average of six private sector forecasters (a subset of the Economic Forecast Council) for both 2016 and 2017. This level of prudence acknowledges the downside risks to the outlook for both years.

**Chart 2.1 Ministry's outlook for BC prudent compared to private sector**

Sources: Ministry of Finance and Private Sector Average (Economic Forecast Council subset consisting of BMO, CIBC, IHS Global Insight, RBC, Scotiabank and TD).

Downside risks to BC's economic outlook include the potential for a slowdown in North American economic activity, ongoing fragility in Europe, uncertainty associated with the UK referendum vote (Brexit), and slower than anticipated Asian demand (particularly in China). Additional risks include uncertainty in the outlook for the Canadian dollar and weak inflation.

### British Columbia economic activity and outlook

The Ministry's forecast for BC real GDP growth of 2.7 per cent in 2016 is somewhat higher than the 2.4 per cent projected in *Budget 2016*, as year-to-date data for BC employment, retail sales, and housing starts are stronger than anticipated earlier this year. Overall, most indicators of BC's economic performance through the first half of 2016 show strong domestic activity relative to the same period of 2015, while exports are underperforming expectations (see Table 2.1). Given the overall strength in the economy, private sector forecasters expect BC to rank first in provincial economic growth in 2016.

<sup>1</sup> Reflects information available as of August 26, 2016, unless otherwise indicated.

**Table 2.1 British Columbia Economic Indicators**

All data seasonally adjusted	Jan. to Mar. 2016	Apr. to Jun. 2016	Year-to-Date
	change from Oct. to Dec. 2015	change from Jan. to Mar. 2016	Jan. to Jun. 2016 change from Jan. to Jun. 2015
	Per cent change		
Employment .....	+0.4	+1.0	+3.2
Manufacturing shipments .....	+1.4	-0.0	+1.2
Exports .....	+2.7	-3.8	-0.7
Retail sales .....	+2.2	+1.6	+6.7
Housing starts .....	+33.4	+0.6	+43.9
Non-residential building permits .....	+6.9	-7.0	+0.3

The Ministry's BC real GDP forecast of 2.2 per cent growth in 2017 is slightly lower than the 2.3 per cent gain that was projected in *Budget 2016*, and remains prudent versus the private sector in recognition of the potential for various downside risks to the economic outlook.

### Labour market

Employment activity in BC has been relatively strong during the first seven months of 2016, advancing by 3.3 per cent year-to-date to July compared to the same period of last year. This translates into about 74,900 more jobs, with a gain of 44,100 full-time jobs and 30,800 part-time jobs.

**Chart 2.2 BC employment**

So far this year, major year-to-date employment gains were observed in industries such as retail and wholesale trade (+22,800 jobs), healthcare and social assistance (+13,200 jobs), and construction (+9,400 jobs). These improvements helped offset job losses in accommodation and food services (-10,500 jobs) and transportation and warehousing (-4,200 jobs) compared to the January to July period of 2015.

BC's monthly unemployment rate averaged 6.2 per cent year-to-date to July, which is 0.2 percentage points above its average during the same period of 2015. Meanwhile, the size of BC's labour force rose 3.5 per cent on a year-to-date basis.

## Outlook

The Ministry forecasts employment in BC to increase by 2.4 per cent in 2016, or approximately 56,000 jobs. This pace of employment growth is expected to moderate next year, with a projected increase of 1.2 per cent, or about 27,900 jobs. Looking further ahead, employment is forecast to grow by 1.2 per cent each year from 2018 to 2020. The province's unemployment rate is expected to average 6.2 per cent this year, matching the rate observed in 2015. The unemployment rate is forecast to hold steady at 6.2 per cent in 2017 and then average about 6.4 per cent in the 2018 to 2020 period as increases to BC's labour force slightly outpace employment gains.

## Consumer spending and housing

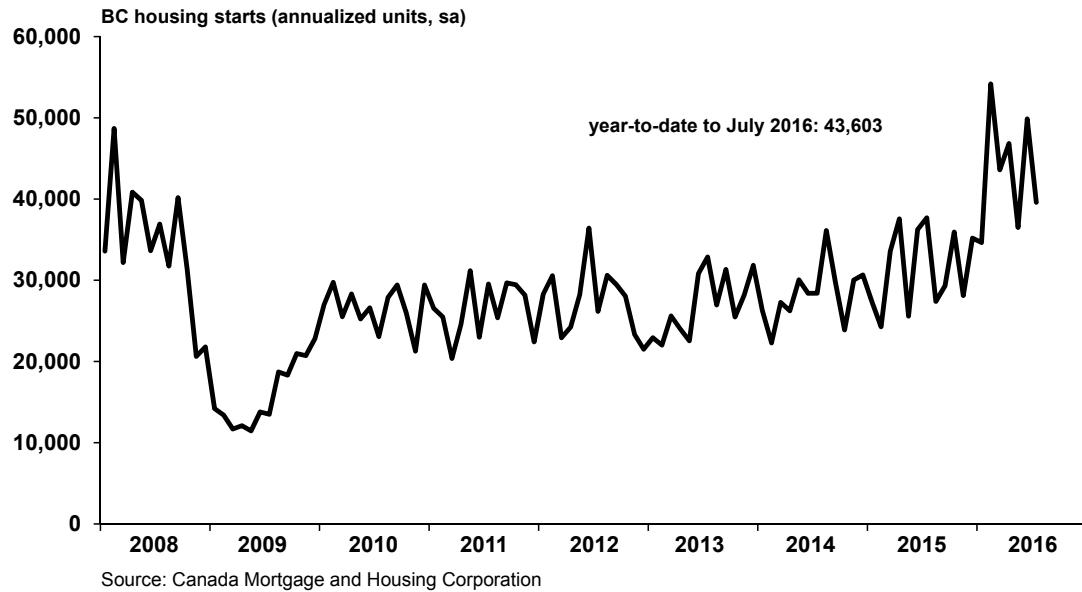

Retail sales advanced 6.7 per cent year-to-date to June 2016, boosted by notable gains at motor vehicle and parts dealers, building material and garden equipment and supplies stores, and health and personal care stores. These increases offset a sizable decline in the value of sales at gasoline stations due to lower fuel prices relative to the same period last year. Strength in consumer spending is being supported by low interest rates, strong employment growth, interprovincial migration, and increased tourism.

**Chart 2.3 BC retail sales**

Following an annual gain of 10.9 per cent in 2015, BC housing starts experienced continued growth through the first seven months of 2016. Year-to-date to July, housing starts averaged 43,603 annualized units, an increase of 37.3 per cent over the same period in 2015. The increase reflects growth in both the multiple-family and single-family components.

Residential building permits (a leading indicator of new housing activity) rose 9.8 per cent year-to-date to June compared to the same period of 2015. Meanwhile, the value of non-residential building permits increased just 0.3 per cent compared to the first half of 2015. Permit issuance for commercial and industrial buildings advanced year-to-date to June, while institutional and government permits declined relative to the same period of 2015.

**Chart 2.4 BC housing starts**

Like new housing construction, home sales in BC have benefitted from a low interest rate environment along with steady employment and population growth. After rising 22.0 per cent in 2015, BC home sales jumped 27.6 per cent year-to-date to July compared to the same period of 2015. Most recently, however, sales activity in BC declined for three consecutive months, including a 5.6 per cent decrease in July compared to June. Meanwhile, a tight inventory of homes available for sale has placed upward pressure on prices. The BC average home price increased 17.3 per cent year-to-date to July. Greater Vancouver and the Fraser Valley have recorded the strongest growth in home prices among BC regions so far this year, with double-digit gains in all housing types (single family, townhomes, and apartments). Since *Budget 2016*, the BC government has announced various measures to help address the complex issue of housing affordability in the province.

**Chart 2.5 Greater Vancouver housing market activity**

*Outlook*

The Ministry forecasts real household consumption of goods and services to increase by 3.5 per cent in 2016 following an estimated pace of 3.9 per cent growth in 2015. Real household spending is projected to increase by 2.7 per cent in 2017 and then grow by about 2.6 per cent per year over the medium-term.

In current dollars, retail sales are forecast to rise 5.4 per cent this year, supported by robust tourism and housing activity, following 6.0 per cent growth in 2015. Retail sales are forecast to increase by 3.7 per cent in 2017 and average 3.6 per cent growth annually over the medium-term.

The Ministry forecasts housing starts to total 40,000 units in 2016, given strong year-to-date performance. Then BC housing starts are expected to moderate to 29,280 units in 2017, moving closer to the historical average. Over the medium-term, residential construction activity is forecast to average around 27,200 units per year – roughly in line with the average rate of construction observed over the past couple of decades.

***Business and government***

Real business investment (including residential) is estimated to have increased by 5.6 per cent in 2015, up from 5.4 per cent growth observed in 2014. The improvement in investment last year primarily reflects increases in residential and non-residential construction, while investment in machinery and equipment moderated from the double-digit pace of growth recorded in 2014.

Total real dollar expenditures in BC by federal, provincial and municipal governments are estimated to have increased by 3.7 per cent in 2015, following a 0.3 per cent contraction in 2014.

*Outlook*

Real business investment (including residential) is forecast to rise by 7.6 per cent in 2016, led by gains in residential construction and supported by increases in non-residential construction and machinery and equipment. Total business investment is projected to grow by 3.9 per cent in 2017 and then average 3.5 per cent growth annually from 2018 to 2020.

Combined real spending by the three levels of government (federal, provincial and municipal) on goods and services in BC is forecast to increase by 1.9 per cent in 2016. Government spending is then projected to rise by 0.7 per cent in 2017 followed by annual growth of about 1.1 per cent on average in the medium-term.

The Ministry projects net operating surplus of corporations (an approximation of corporate profits) to increase by 6.8 per cent in 2016, following an estimate of 0.0 per cent growth in 2015. Net operating surplus is forecast to rise by 5.3 per cent in 2017 and then average 5.4 per cent growth per year from 2018 to 2020.

***External trade and commodity markets***

Low energy and metal prices continue to weigh on the value of BC's goods exports. Year-to-date to June, international merchandise exports decreased 0.7 per cent compared to the same period of 2015. This contraction primarily reflects lower prices for metals, minerals and energy products alongside reduced global demand. During the first half of 2016, gains in exports of forestry products and building and

packaging materials (+5.1 per cent) and consumer goods (+9.1 per cent) partially offset significant declines in exports of BC's energy products (-6.5 per cent) and metal ores and non-metallic minerals (-11.0 per cent). So far this year, exports to the US are up 7.9 per cent year-to-date to June while exports to all other international destinations (including key markets such as China and Japan) are down 8.8 per cent.

### Chart 2.6 BC exports

Shipments of BC's manufactured goods increased 1.2 per cent year-to-date to June. During this period, gains were led by increased shipments of wood products (+8.6 per cent) and primary metals (+24.6 per cent), which worked to offset notable declines in shipments of fabricated metal products (-5.2 per cent) and paper products (-7.9 per cent) relative to the same period of 2015.

Prices for most metals and minerals fell during the first seven months of 2016 compared to the same period last year, primarily due to softer demand in China. Year-to-date to July, notable declines occurred in prices for aluminum (-11.6 per cent), copper (-19.4 per cent), lead (-6.0 per cent), molybdenum (-19.9 per cent), nickel (-33.2 per cent), and zinc (-12.2 per cent). In contrast, the average price for gold (+3.7 per cent) and silver (+0.7 per cent) rose during this period.

After beginning 2016 at \$267 US/000 board feet in January, the monthly price of SPF lumber gradually increased to average \$324 US/000 board feet in July. Year-to-date to July, the price of lumber averaged \$299 US/000 board feet, up 1.8 per cent compared to the first seven months of 2015.

The price of pulp fell steadily throughout 2015 and hit a low of \$790 US per tonne in early 2016. Year-to-date to July, the price of pulp averaged \$799 US per tonne, down 7.9 per cent compared to the same period of 2015.

The price of oil continues to hover around historically low levels, with the global glut of oil supply outweighing reduced demand. The daily West Texas Intermediate (WTI) oil price averaged just \$40.25 US per barrel year-to-date to July, down from \$52.89 US per barrel during the same period of 2015. Meanwhile, the price of natural gas continued to fall sharply throughout the first half of this year, hitting a low of \$0.35 C/GJ in May 2016. Year-to-date to July, the Plant Inlet price averaged just \$0.65 C/GJ – well below the \$1.48 C/GJ observed during the same period of 2015.

*Outlook*

Given lower global demand, real exports of goods and services are forecast to decline by 1.0 per cent in 2016, following an estimated annual gain of 1.0 per cent in 2015. Alongside gradual improvements in the global economy, the pace of real export growth is projected to pick up in 2017 to reach 1.9 per cent. Over the medium-term, real exports are forecast to average around 2.4 per cent growth annually.

The price of Western spruce-pine-fir (SPF) lumber is forecast to average \$306 US/000 board feet this year, up from \$282 US/000 board feet observed in 2015. Lumber prices are anticipated to increase to \$318 US/000 board feet in 2017 and then average \$300 US/000 board feet over the medium-term.

The price of natural gas is expected to average \$0.94 C/GJ this fiscal year and then rise gradually over the forecast horizon to reach \$1.53 C/GJ in 2018/19.

Commodity prices may be volatile in the near-term due to ongoing global economic uncertainty, potential for further slowing of the Chinese economy, and fluctuations in petroleum markets.

**Demographics**

BC's population grew by 1.0 per cent in the January to March quarter of 2016 compared to the same period of 2015. During this quarter, BC saw a net inflow of 12,493 people, as the province welcomed 7,426 people from other countries and 5,067 people from other provinces. Since the second quarter of 2015, at least 30 per cent of BC's net interprovincial migration has originated from Alberta, with over half of the net inflow arriving from Alberta in the latest January to March quarter of 2016.

*Outlook*

The forecast calls for BC's July 1<sup>st</sup> population to increase by 1.2 per cent in 2016 and by 1.3 per cent in 2017, to reach a total of 4.74 million people and 4.80 million people, respectively. Over the medium-term, the province's population growth is projected to average 1.2 per cent annually from 2018 to 2020.

Total net migration is forecast to expand in 2016 to reach a net inflow of about 52,700 persons. Net entry of about 20,000 people from other provinces is forecast in 2016, along with an anticipated net gain of around 32,700 people from other countries. In 2017, the Ministry forecasts a total net inflow of about 51,000 individuals, followed by net inflows of about 49,900 people per year on average over the medium-term.

**Inflation**

Since mid-2015, the pace of inflation has risen, supported by modest increases in prices across most segments. Overall, consumer prices in BC rose 1.9 per cent year-to-date to July 2016, boosted by higher prices for items such as food, electricity and various homeowner related expenses. Meanwhile, energy prices (including natural gas and gasoline) fell year-to-date relative to the first seven months of last year, a continuation of price declines observed the year before.

*Outlook*

BC's consumer price inflation is forecast to be 1.9 per cent in 2016 and then increase to average 2.0 per cent per year from 2017 to 2020. By comparison, the Canadian rate of inflation is projected to be 1.7 per cent in 2016 before increasing to average 2.0 per cent annually from 2017 to 2020 (in line with the Bank of Canada's inflation target).

## Risks to the economic outlook

Risks to BC's economic outlook continue to be weighted to the downside. The main risks to the current outlook include the following:

- potential for a slowdown in domestic and Canadian economic activity;
- renewed weakness in the US economy, particularly as interest rates increase;
- fragility in Europe as governments and the financial system deal with elevated sovereign debt alongside weak economic growth and uncertainty associated with Brexit;
- slower than anticipated economic activity in Asia, particularly in China, resulting in weaker demand for BC's exports and downward pressure on global commodity prices;
- weaker than expected inflation; and
- exchange rate uncertainty.

## External outlook

### United States

US real GDP expanded by an annualized 1.1 per cent in the April to June quarter of 2016 following 0.8 per cent growth in the January to March quarter. The increase in real GDP during the second quarter reflected positive contributions from personal consumption expenditures and net exports, which were partly offset by declines in private inventory investment, residential and non-residential fixed investment, and government spending. The US Bureau of Economic Analysis also released revisions to real GDP data for the last four years, raising average annual growth for the 2012 to 2015 period to 2.2 per cent, up from the previous estimate of 2.1 per cent.

**Chart 2.7 US economic growth**

Source: US Bureau of Economic Analysis; \* Second estimate, subject to revision

US employment continued to improve through the first seven months of 2016, with around 186,000 jobs created on average each month (an increase in employment of 1.8 per cent year-to-date to July). The US unemployment rate averaged 4.9 per cent year-to-date to July, down 0.6 percentage points compared to the same period of 2015. Meanwhile, the US labour force participation rate averaged 62.8 per cent during the first seven months of 2016, up 0.1 percentage points from the same period of last year.

**Chart 2.8 US employment**

The American housing market gradually advanced through the first seven months of 2016. Following a 10.8 per cent annual gain last year, US housing starts averaged around 1,162,000 annualized units year-to-date to July 2016. This represents a 7.4 per cent increase in residential construction compared to the same period of 2015, yet remains below the historical average pace of about 1.4 million annualized starts.

**Chart 2.9 US housing starts**

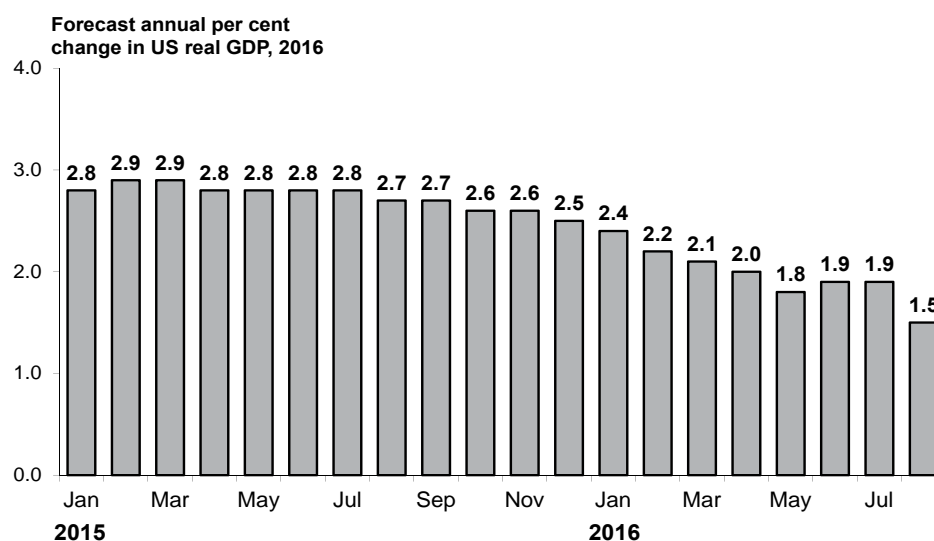

US new home sales averaged around 567,000 annualized units year-to-date to July, up 12.0 per cent compared to the same period of 2015. Existing home sales averaged 5.4 million annualized units year-to-date to July, an increase of 3.6 per cent compared to the first seven months of 2015. The S&P Case Shiller (20-city index) showed that national home prices were 9.0 per cent below their pre-recession peak as of May 2016. Meanwhile, around 8.0 per cent of all American mortgages had negative equity (where the home value is lower than the mortgage amount owing) as of the first quarter of 2016. Looking ahead, housing market activity in the US may face some downward pressure once interest rates continue to rise.

US retail sales increased by 2.6 per cent year-to-date to July compared to the same period last year. Meanwhile, the Conference Board's index of consumer confidence averaged 95.7 year-to-date to July, down from an average of 97.7 observed during the first seven months of 2015.

### Outlook

*Consensus Economics* forecasters have downgraded their US economic growth projections since *Budget 2016*. The August *Consensus* survey forecasts 1.5 per cent growth for 2016, down from the 2.4 per cent growth expected in January. *Consensus* analysts cited weaker than expected economic activity in the second quarter of this year and noted that growing concerns over the global outlook have increased uncertainty for the US outlook. The August *Consensus* forecasts US real GDP growth to be 2.3 per cent in 2017, down from their January projection of 2.5 per cent growth.

**Chart 2.10 Consensus outlook for the US in 2016**

Source: Consensus Economics

The chart above represents forecasts for US real GDP growth in 2016 as polled on specific dates. For example, forecasters surveyed on January 12, 2015 had an average 2016 US growth forecast of 2.8 per cent, while on August 8, 2016 they forecast 2016 US growth at 1.5 per cent.

The Ministry is forecasting the US economy to expand by 1.5 per cent in 2016, followed by 1.9 per cent growth in 2017. The Ministry expects US real GDP to average 2.2 per cent growth annually in the 2018 to 2020 period.

**Table 2.2 US real GDP forecast: Consensus vs Ministry of Finance**

	2016	2017
	Per cent change in real GDP	
Ministry of Finance .....	1.5	1.9
<i>Consensus Economics</i> (August 2016) .....	1.5	2.3

## Canada

Economic growth has been uneven in recent quarters as the Canadian economy continues to adjust to low commodity prices. Following annualized growth of just 0.5 per cent in the fourth quarter of 2015, Canadian real GDP rose by 2.4 per cent in the January to March quarter of 2016. Exports were the key growth driver in the first quarter while business investment declined for the fifth consecutive quarter, reflecting lower investment in non-residential structures, machinery and equipment, and intellectual property products. By contrast, residential investment rose for the fifth consecutive quarter.

Domestic economic activity has been mixed so far in 2016. The labour market has been relatively weak across the country, with Canadian employment increasing by a modest 0.6 per cent (or around 114,900 jobs) year-to-date to July compared to the same period of 2015. After beginning the year at 7.2 per cent in January, the national unemployment rate edged lower in recent months and sat at 6.9 per cent in July. Retail sales increased by 4.5 per cent year-to-date to June compared to the first half of 2015. National housing starts rose by 6.8 per cent year-to-date to July to average around 197,400 annualized units. At the same time, unit home sales increased by 9.0 per cent (despite three consecutive monthly declines from May through July) and the average home price increased 13.8 per cent year-to-date to July.

Softer global demand and relatively weak commodity prices during the first half of 2016 led to a 4.2 per cent decrease in the value of Canadian merchandise exports compared to the same period in 2015. Year-to-date to June, sharp declines in the value of energy products exports (-31.5 per cent), metal ores and non-metallic minerals (-19.4 per cent), and metal and non-metallic minerals (-7.5 per cent) more than offset solid gains in exports of motor vehicles and parts (+20.2 per cent) and consumer goods (+11.5 per cent). Meanwhile, shipments of Canadian manufactured goods increased 0.3 per cent year-to-date to June compared to the same period of 2015.

## Outlook

Since *Budget 2016*, private sector economists have significantly lowered their forecast for the Canadian economy in 2016, citing negative effects of the devastating wildfires in Alberta earlier this year, uncertainties over the impact of Brexit, and soft domestic demand. The August *Consensus* expects Canada's real GDP to grow by 1.2 per cent in 2016, down from the January *Consensus* forecast of 1.7 per cent growth. For 2017, the *Consensus* is calling for 2.1 per cent growth, down 0.1 percentage points from its January 2016 publication.

**Chart 2.11 Consensus outlook for Canada in 2016**

The chart above represents forecasts for Canadian real GDP growth in 2016 as polled on specific dates. For example, forecasters surveyed on January 12, 2015 had an average 2016 Canadian real GDP growth forecast of 2.2 per cent, while on August 8, 2016 they forecast 2016 Canadian real GDP to grow by 1.2 per cent.

Acknowledging the potential for greater than anticipated weakness in commodity markets, the global economy, and domestic activity, the Ministry assumes that the Canadian economy will grow by 1.0 per cent in 2016, followed by 1.8 per cent growth in 2017. Looking further ahead, Canadian real GDP is forecast to expand by an average of 2.0 per cent annually over the medium-term.

**Table 2.3 Canadian real GDP forecast: Consensus vs Ministry of Finance**

	2016	2017
	Per cent change in real GDP	
Ministry of Finance .....	1.0	1.8
<i>Consensus Economics</i> (August 2016).....	1.2	2.1

## Europe

The euro zone economy advanced at a moderate pace through the first half of 2016. After growing by an annualized 2.2 per cent in the January to March period of 2016, euro zone real GDP eased to 1.1 per cent growth in the second quarter. Overall, the region's unemployment rate sat at 10.1 per cent in June and unemployment among euro zone youth remains elevated. Industrial production in the region continued at a modest pace, increasing by 1.1 per cent year-to-date to June.

Since December 2015, the European Central Bank (ECB) has cut key interest rates further and has accelerated bond purchases. However, euro zone inflation has hovered around zero for over two years – well below the ECB’s target of just below 2 per cent. In July, at its first policy meeting following the Brexit vote, the ECB left interest rates and monetary policy measures unchanged. ECB President Mario Draghi stated that it was too early to determine the economic fallout of the UK referendum but stressed that the central bank stood ready to act again to support growth and inflation if necessary. In August 2016, the Bank of England introduced a package of measures in response to the change in the UK economic outlook following the Brexit vote. These measures included a 25 basis points cut to the policy rate and the purchase of an additional 60 billion pounds in government bonds over the next several months.

### Outlook

The *Consensus* continues to anticipate modest growth in the euro zone for 2016, calling for the region’s real GDP to grow by 1.5 per cent this year. However, private sector forecasters cut their euro zone outlook for 2017 to 1.2 per cent growth (down from the January 2016 survey average of 1.7 per cent) given the increased uncertainty surrounding the impact of Brexit next year. In light of downside risks to the outlook, the Ministry assumes euro zone real GDP growth of 1.3 per cent in 2016, followed by 0.9 per cent growth in 2017.

**Chart 2.12 Consensus outlook for the euro zone in 2016**

Source: Consensus Economics

The chart above represents forecasts for euro zone real GDP growth in 2016 as polled on specific dates. For example, forecasters surveyed on January 12, 2015 had an average 2016 euro zone growth forecast of 1.6 per cent, while on August 8, 2016 they forecast euro zone growth of 1.5 per cent in 2016.

### Asia

Economic activity in Japan remains relatively stagnant, tempered by weak investment and structural factors. Japan’s economy advanced by 0.5 per cent in 2015 following no annual growth in 2014. While Japan’s economy expanded by an annualized 2.0 per cent in the first quarter of 2016, economic activity slowed to just 0.2 per cent growth in the April to June period of this year. In July 2016, the Bank of Japan eased monetary policy measures in an effort to support growth. Furthermore in August, policymakers announced additional fiscal stimulus (including new infrastructure spending and a delay in a sales tax hike) to address uneven domestic economic growth and concerns over slower global economic activity.

China's real GDP has been on a downward trend since 2010 as policymakers aim to transition the economy away from industrialized growth and towards a consumer-driven economy. On a year-over-year basis, China's economy advanced 6.7 per cent in both the first and second quarters of 2016, supported by a strong housing market and fiscal and monetary stimulus measures introduced in late 2015 and early 2016. Although real GDP growth remained within the Chinese government's target range of 6.5 to 7.0 per cent through the first half of the year, China's economy continues to face considerable downward pressure.

### Outlook

The slowing trend in China's economy is projected to continue. The August *Consensus* forecasts China's real GDP to expand by 6.6 per cent in 2016 and 6.3 per cent in 2017. With greater potential for further slowing of the Chinese economy, the Ministry assumes that China's real GDP will grow by 6.2 per cent in 2016 and by 6.1 per cent in 2017.

## Financial markets

### Interest rates

The Bank of Canada's overnight target rate remains at 0.5 per cent, unchanged since July 2015, when the central bank cut the rate by 25 basis points in response to a sluggish Canadian economy. The Bank's July 2016 Monetary Policy Report included modest downgrades to its global growth projections given the considerable uncertainty surrounding the Brexit process. Looking ahead, the Bank of Canada expects inflation to move towards 2.0 per cent in 2017.

**Chart 2.13 Interest rate forecasts**

Sources: Bank of Canada, US Federal Reserve and BC Ministry of Finance forecast.

The US Federal Reserve has kept its monetary stance unchanged since December 16, 2015, when it increased the range for the federal funds rate to 0.25 to 0.50 per cent (from 0.00 to 0.25 per cent). In July 2016, the Fed acknowledged an improvement in the US labour market but noted a softening in business investment along with weak inflation. As such, the Fed expects economic conditions to evolve in a manner that will warrant only gradual increases to the federal funds rate.

### Outlook

The Ministry assumes that the Bank of Canada's overnight target rate will average 0.5 per cent in 2016 and 2017, based on the average of six private sector forecasts. The same six private sector forecasters anticipate that the US federal funds rate will remain within the 0.25 to 0.50 per cent range for the rest of 2016. Thereafter, private sector analysts are calling for a gradual increase to the federal funds rate throughout next year, to average 1.0 per cent in the fourth quarter of 2017.

These analysts are forecasting the Canadian three-month Treasury bill interest rate to average 0.5 per cent in both 2016 and 2017. Meanwhile, they expect the ten-year Government of Canada bond rate to average 1.2 per cent in 2016 and 1.5 per cent in 2017.

**Table 2.4 Private sector Canadian interest rate forecasts**

Average annual interest rate (per cent)	3-month Treasury Bill		10-year Government Bond	
	2016	2017	2016	2017
IHS Global Insight .....	0.5	0.6	1.3	2.0
CIBC .....	0.5	0.5	1.3	1.6
Bank of Montreal .....	0.5	0.5	1.2	1.3

### Exchange rate

After beginning the year at 71.6 US cents, slight increases in the price of oil and other commodities have contributed to the recent modest appreciation of the Canadian dollar. Overall, the loonie averaged 75.4 US cents during the first seven months of 2016, down from the 80.5 US cents average observed during the same period of 2015.

\* Based on the average of private sector forecasts. Budget 2016 as of January 4, 2016 and First Quarterly Report as of July 18, 2016.

### Outlook

An average of six private sector forecasts as of July 18, 2016 calls for the Canadian dollar to average 75.5 US cents in 2016 and 77.2 US cents in 2017. The Ministry's exchange rate outlook is based on these private sector forecasts.

## Long-run economic prospects in BC

### Introduction

In the 2015 report *Monitoring Fiscal Sustainability*, the Auditor General of British Columbia recommended that government “report publicly on its assessment of the province’s long-term fiscal sustainability.” A first step in this process is to assess long-term economic prospects in BC since the economy helps shape fiscal conditions (both opportunities and pressures).

To assess long-run growth prospects, analysts look beyond short-term economic cycles (caused by changes in demand) towards structural factors that determine an economy’s long-run capacity to produce goods and services. Generally speaking, long-run economic capacity and growth depend on labour supply (how many hours are worked in an economy) and labour productivity (how much output is produced in each hour of work). Historical trends observed in both of these variables have implications for long-term economic prospects in the province.

The purpose of this report is to review historical trends in BC’s labour supply and productivity performance in order to assess their potential implications for economic prospects in the decades to come. The review suggests that economic growth is likely to moderate, reflecting aging demographics. This is an issue facing numerous jurisdictions. Given these prospects, the BC government has policies in place to help the province maintain its long-run competitive advantage and fiscal sustainability. By taking a long-term perspective, government can effectively respond to emerging issues that affect British Columbians.

### Labour supply

The number of labour hours supplied in an economy is shaped by demographics, which determine the size of the population and the extent to which the population works in

the labour market. In BC, the annual rate of population growth has slowed over the past half-century, from close to 3 per cent in the early 1970s to around 1 per cent in recent years (see Chart 1). This slowdown in population growth has been largely attributable to falling fertility rates among British Columbians, which have been only partially offset by the moderate increase in net migration into the province over that period. A similar slowing phenomenon is occurring in many other jurisdictions, including Canada, the US and China. On an aggregate level, the global fertility rate has fallen from an average of around 5 births per woman in the early 1960s to under 3 births per woman in recent years, while the annual rate of global population growth has slowed from around 2 per cent to closer to 1 per cent over this time horizon.<sup>1</sup>

**Chart 1 – BC population growth**

At the same time, people are living longer than ever due to better health care and medical technology, as well as healthier lifestyles and higher living standards. Together with the effects of the baby boom (a twenty-year period of heightened fertility after the Second World War), this increase in average life expectancy amid falling fertility rates has resulted in an overall aging of the BC population over the past several decades, despite fluctuating growth in the number of school age children aged 5 to 19 and growth in the number of adults aged 20 to 64.

<sup>1</sup> International and global demographic data from the World Bank.

Indeed, the share of British Columbians aged 65 years and over grew from about 9 per cent in 1975 to about 17 per cent in 2015 (see Chart 2). Similar trends have been observed across Canada, and in Newfoundland and Labrador in particular where the share of senior citizens increased from about 6 per cent in the early 1970s to about 18 per cent in 2015. Populations are also aging rapidly in many advanced nations including Japan, Italy, Spain and Germany, as well as some developing nations including China.<sup>1</sup> Looking ahead, BC Stats projects the share of British Columbians aged 65 years and over to rise further to 25 per cent by 2035 (as growth in the number of seniors outstrips growth in the number of school age children and adults), with the annual rate of provincial population growth slowing to around 0.8 per cent by that time.

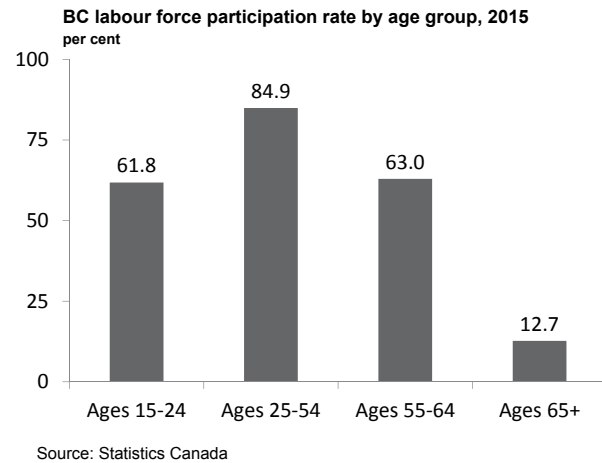

**Chart 2 – Share of BC population over 65 years old**

Slowing growth of the overall population limits the possible rate of growth of BC's labour supply. In addition, the changing age structure of the population impacts the number of hours worked. Although factors such as improving health and longevity have resulted in many workers delaying retirement, people aged 65 and older continue to participate less in the labour force than younger age groups.<sup>2</sup> As displayed in Chart 3, on average only 12.7 per cent of British Columbians aged 65 and over participated in the labour force in 2015, compared to 61.8 per cent of youths

aged 15 to 24 years, 84.9 per cent of adults aged 25 to 54 years, and 63.0 per cent of older adults aged 55 to 64 years.

**Chart 3 – BC labour force participation rates**

The labour force participation rate of adults has generally trended upwards over the past few decades. However, this occurred primarily among women (alongside falling fertility rates) and in the long-run the average participation rate of women will likely converge towards that of men. Furthermore, youths' labour force participation rate has declined in recent decades (partly due to increased emphasis on post-secondary education), and the average hours worked per employee has been trending lower alongside a rising share of part-time employment. There is also some evidence to suggest that physicians, managers, business and financial professionals, and others are tending to work fewer hours in recent years, which may reflect changing preferences around work-life balance. These long-term trends point towards continued slowing in British Columbia's labour supply in the coming decades, the reason proactive initiatives to smooth labour market frictions (such as BC's Skills for Jobs Blueprint) have been a government priority.

### Productivity

Productivity growth is vital to an economy's long-term prospects and sustained improvements in quality of life. In essence, productivity is about how effectively labour effort is translated into higher output. Long-run

<sup>2</sup> Generally speaking, participation in the labour force involves working or actively seeking work.

real wage rates are tied to productivity since businesses cannot remain profitable if they pay workers more than the value of their output. Furthermore, productivity growth is essential to mitigating the impact of slowing labour supply on aggregate economic growth by allowing more output to be created by fewer workers.

However, average Canadian productivity growth has fallen from over 3 per cent per year in the late 1960s to closer to 1 per cent in recent years (see Chart 4). Although historical productivity data for BC are limited, analysts believe that the province has experienced a similar slowdown in productivity growth as observed at the national level. Slowing productivity growth has also been a challenge across developed economies. For example, average annual productivity growth of the Group of Seven (G7) nations – consisting of Canada, France, Germany, Italy, Japan, the United Kingdom and the United States – dropped from around 3 per cent in the 1970s to below 1 per cent over the past few years.<sup>3</sup>

**Chart 4 – BC and Canadian productivity growth**

Source: Statistics Canada and BC Ministry of Finance calculations

Economists tend to agree that an educated and skilled workforce, a sound policy environment, and access to capital and new technology are important ingredients for productivity growth. The BC government actively supports all of these areas. The level of educational attainment

in BC has improved over the years, with more British Columbians attending post-secondary institutions than ever before. In addition, a variety of provincial and national public policies have been implemented since the 1990s that would be expected to bolster productivity. Examples of such policies include the implementation of an inflation targeting regime to stabilize prices, the introduction of trade agreements to reduce international barriers, and the elimination of corporate capital taxes to promote investment.

The amount of capital and technology available to workers in BC has generally trended upwards over the past few decades as well. However, similar to other economies (such as Ontario and Quebec), the level of business investment in intellectual property products and machinery and equipment in BC has leveled off somewhat over the past decade. Though the moderation in investment may be playing a role in BC and Canada's modest productivity performance, it is a relatively recent phenomenon and therefore likely does not explain the apparent downward trend in productivity growth underway since the 1970s. The specific reasons for the decline in productivity are therefore unclear.

Research continues on the reasons for variation in productivity growth across time, jurisdictions and industries. New research is taking place in Canada using firm-level data, largely through the Canadian Center for Data Development and Economic Research which was established at Statistics Canada in October 2012. The BC Ministry of Finance is studying this pioneering research and is engaged in discussions with Canadian firm-level productivity researchers. With many productivity-enhancing public policies already in place, research on business behaviour is all the more important as economists endeavour to understand this vital component of economic growth and wellbeing.

### **Implications**

Projected slowing in labour supply growth (largely due to aging demographics) and an uncertain outlook for productivity places

<sup>3</sup> International productivity data from the Organization for Economic Co-operation and Development (OECD).

downward pressure on economic growth in the longer term, which has implications for living standards, government revenues and corporate profits in BC as in many other jurisdictions. However, moderating economic growth is not a certainty going forward. There are various events that may unfold that could serve to bolster economic prospects.

Individuals, governments and businesses adapt to changing circumstances. For instance, as older British Columbians retire, potential labour shortages could put upward pressure on wage rates and thereby incent more individuals to participate in the labour force. Governments could adjust policies to increase international immigration and help smooth the transition of immigrants into the local workforce. At the same time, increasing competitive pressures may spur business investment in productivity-enhancing equipment and technology.

In addition, other trends have the potential to shape BC's economic future. Increasing globalization and competition from emerging markets, the effects of climate change and technological progress, and the transition towards a more service-based economy – not to mention unforeseen events – could work to undermine or augment current economic projections. However, despite the uncertainties and caveats, most economists agree that the gradual downward trend in economic growth observed over the past half-century across many jurisdictions including BC and Canada (as displayed in Chart 5) may continue over the longer term.

**Chart 5 – BC and Canadian real GDP growth**

## Conclusions

Demographics and productivity trends point towards moderating long-term economic growth amid an aging population in BC and abroad. BC government initiatives are underway to help ensure fiscal sustainability and maintain the province's competitive advantage, including the following:

- regular long-term population projections by BC Stats and annual 10 year workforce projections in the BC Labour Market Outlook,
- initiatives that foster a diverse economy and export partnerships, such as the BC Jobs Plan and regular trade missions to key emerging markets,
- skills training and labour force development programs such as WorkBC, BC's Skills for Jobs Blueprint, the Sector Labour Market Partnerships Program and the Canada-BC Job Grant,
- programs that support skills training specifically for BC's Aboriginal people, such as the Aboriginal Community-Based Training Partnerships program and programs funded by the Aboriginal Skills Training Development Fund,
- streamlined immigration pathways and services including the Provincial Nominee Program and WelcomeBC,
- ongoing productivity research,
- establishment of the BC Tech Fund to encourage growth in the province's high technology sector,
- strategic investment in infrastructure, including asset condition monitoring and 10 year capital planning within an affordability framework,
- competitive taxation policy, including the lowest general corporate income tax rate among provinces, the elimination of capital taxation, and one of the lowest overall tax burdens for families in Canada, and
- establishment of the Commission on Tax Competitiveness.

These measures will benefit British Columbians regardless of what the future holds. Government will continue its work to address long-run issues while maintaining fiscal discipline and tabling balanced budgets in support of its AAA credit rating.

* Reflects information as at August 22, 2016.					
Net cash received from the federal government and cash refunds under the <i>International Business Activity Act</i> are used as the basis for estimating revenue. Due to lags in the federal collection and instalment systems, changes to the BC net operating surplus and tax base forecasts affect revenue in the succeeding year. The 2016/17 instalments from the federal government reflects two-third of payments related to the 2016 tax year (paid during Apr-July 2016 and adjusted in Sept and Dec) and one-third of 2017 payments. Instalments for the 2016 (2017) tax year are based on BC's share of the national tax base for the 2014 (2015) tax year and a forecast of the 2016 (2017) national tax base. BC's share of the 2014 national tax base was 11.60%, based on tax assessments as of December 31, 2015. Cash adjustments for any under/over payments from the federal government in respect of 2015 will be received/paid on March 31, 2017.

## Natural Gas Prices

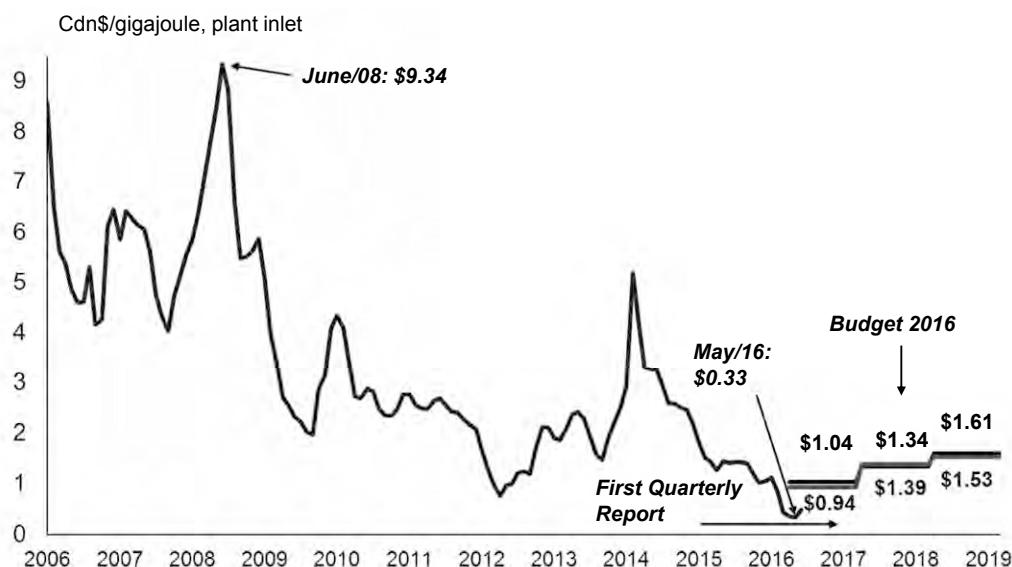

Table A3 Material Assumptions – Expense

Table 16: Material Assumptions			Expense		
Ministry Programs and Assumptions (\$ millions unless otherwise specified)	Budget Estimate	Updated Forecast	Plan 2017/18	Plan 2018/19	Sensitivities 2016/17
	2016/17				
Advanced Education .....	1,986	1,986	2,014	2,042	The number of student spaces may vary depending on the financial and other policies of post-secondary institutions.
Student spaces in public institutions .....	200,153	200,153	200,153	200,153	
(# FTEs)					
Children and Family Development .....	1,451	1,451	1,472	1,486	A 1% increase in the cost per case or a 1% increase in the average funded caseload will affect expenditures by approximately \$2 million (excluding Delegated Aboriginal Agencies)
Average children-in-care .....	7,250	7,250	7,200	7,100	
caseload (#)					
Average annual residential .....	44,800	44,800	46,600	48,500	(excluding Delegated Aboriginal Agencies)
cost per child in care (\$)					
Education .....	5,609	5,617	5,667	5,728	Enrolment figures are based on BC Stats and school district enrollment trends, to which the ministry has added forecasts for distributed learning, adult education and summer learning.
Public School Enrolment (# of FTEs) .....	543,490	543,490	545,735	549,491	
School age (K–12) .....	522,132	522,132	524,377	528,133	
Distributed Learning (online) .....	11,354	11,354	11,354	11,354	
Summer .....	6,401	6,401	6,401	6,401	
Adults .....	3,603	3,603	3,603	3,603	
Forests, Lands and Natural Resource Operations .....	671	737	671	682	Targets can be impacted by changes to actual inventory costs incurred. There is a lag of approximately 1.5 years between when inventory costs are incurred and when they are expensed. Volume harvested can also impact targets. For example, if volume harvested is less than projected in any year, then capitalized expenses will also be reduced in that year.
BC Timber Sales .....	182	182	175	182	
Fire Management .....	63	129	63	63	For authorized expenditures under the <i>Wildfire Act</i> . Over the past several years, wildfire fighting costs have ranged from a low of \$47 million in 2006 to a high of \$382 million in 2010.
Health .....	17,968	17,968	18,505	19,065	A 1% change in utilization or prices affects costs by approximately \$10 million.
Pharmacare .....	1,175	1,175	1,175	1,175	
Medical Services Plan (MSP) .....	4,300	4,300	4,465	4,647	A 1% increase in volume of services provided by fee-for-service physicians affects costs by approximately \$25 million.
Regional Services .....	12,214	12,214	12,582	12,958	
Justice .....	491	491	498	504	The number of criminal cases proceeded on by the provincial and federal Crown (including appeals to higher courts in BC), the number of civil and family litigation cases, the number of violation tickets disputed, and the number of municipal bylaw tickets disputes which would go to court for resolution.
New cases filed/processed .....	240,000	240,000	240,000	240,000	
(# for all courts)					
Crown Proceeding Act (CPA) .....	25	25	25	25	The number of new cases, and the difference between estimated settlements and actual settlements.
Public Safety and Solicitor General .....	681	681	708	711	The volume and severity of criminal activity, the number of inmate beds occupied and the number of offenders under community supervision.
Policing, Victim Services and Corrections .....	629	629	654	657	

Table A3 Material Assumptions – Expense (continued)

Ministry Programs and Assumptions (\$ millions unless otherwise specified)		Budget Estimate	Updated Forecast	Plan 2017/18	Plan 2018/19	Sensitivities 2016/17
		2016/17				
Social Development and Social Innovation .....		2,739	2,739	2,830	2,868	The expected to work caseload is sensitive to fluctuations in economic and employment trends. Costs are driven by changes in the cost per case and caseload. Cost per case fluctuations occur from changes in the needed supports required by clients.
Temporary Assistance ..... annual average caseload (#)		39,800	39,800	39,200	38,600	
Disability Assistance ..... annual average caseload (#)		97,900	97,900	102,500	102,900	
Adult Community Living: Developmental Disabilities Programs Average caseload (#) .....		18,130	18,130	18,980	19,810	The adult community living caseload is sensitive to an aging population and to the level of service required. Cost per case fluctuations are driven by the proportion of clients receiving certain types of services at differing costs. For example, residential care is significantly more costly than day programs.
Average cost per client (\$) .....		44,700	44,700	43,700	43,300	
Personal Supports Initiative Average caseload (#) .....		1,310	1,310	1,580	1,860	
Average cost per client (\$) .....		18,100	18,100	16,200	15,200	
Transportation and Infrastructure .....		858	872	862	867	For authorized expenditures under the <i>Emergency Program Act</i> , including those for further disasters, and the difference between initial estimates for disaster response and recovery costs and final project costs.
Emergency Program Act (EPA) .....		15	29	15	15	
Tax Transfers .....		1,039	1,039	1,043	1,047	These tax transfers are now expensed as required under generally accepted accounting principles.
Individuals .....		475.0	475.0	475.0	475.0	
Low Income Climate Action .....		195.0	195.0	195.0	195.0	
Early Childhood Tax Benefit .....		145.0	145.0	145.0	145.0	
Sales Tax .....		55.0	55.0	55.0	55.0	
Small Business Venture Capital .....		27.0	27.0	27.0	27.0	
BC Senior's Home Renovation .....		2.0	2.0	2.0	2.0	
Other tax transfers to individuals .....		50.8	50.8	50.8	50.8	
Family Bonus Program.....		0.2	0.2	0.2	0.2	
Corporations .....		564.0	564.0	568.0	572.0	
Film and Television .....		90.0	90.0	90.0	90.0	
Production Services .....		310.0	310.0	310.0	310.0	
Scientific Research & Experimental Development .....		66.0	66.0	70.0	74.0	
Interactive Digital Media .....		45.0	45.0	45.0	45.0	
Mining Exploration .....		40.0	40.0	40.0	40.0	
Other tax transfers to corporations .....		13.0	13.0	13.0	13.0	
Management of Public Funds and Debt .....		1,168	1,150	1,158	1,185	Full year impact on MoPD on interest costs of a 1% change in interest rates equals \$27.3 million; \$100 million increase in debt level equals \$1.7 million.
Interest rates for new provincial borrowing: Short-term .....		0.72%	0.59%	0.76%	1.73%	
Long-term .....		2.96%	2.11%	2.53%	3.50%	
CDN/US exchange rate (cents) .....		135.5	130.9	128.1	124.6	
Service delivery agency net spending .....		6,125	6,385	6,471	6,490	
School districts .....		311	354	287	324	
Post-secondary institutions .....		3,108	3,208	3,272	3,414	
Health authorities and hospital societies .....		598	604	691	491	
BC Transportation Financing Authority .....		1,187	1,205	1,252	1,327	
Other service delivery agencies .....		921	1,014	969	934	

Table A4 Operating Statement – 2009/10 to 2018/19

(\$ millions)	Actual 2009/10	Actual 2010/11	Actual 2011/12	Actual 2012/13	Actual 2013/14	Actual 2014/15	Actual 2015/16	Updated Forecast 2016/17	Plan 2017/18	Plan 2018/19	Average annual change (per cent)

<sup>1</sup> Revenue as a per cent of GDP is calculated using nominal GDP for the calendar year ending in the fiscal year (e.g. 2016/17 revenue divided by nominal GDP for the 2016 calendar year).

<sup>2</sup> Per capita revenue is calculated using July 1 population (e.g. 2016/17 revenue divided by population on July 1, 2016).

<sup>3</sup> Revenue is converted to real (inflation-adjusted) terms using the consumer price index (CPI) for the corresponding calendar year (e.g. 2016 CPI for 2016/17 revenue).

<sup>1</sup> Full-time equivalents (FTEs) are a measure of staff employment. FTEs are calculated by dividing the total hours of employment paid for in a given period by the number of hours an individual, full-time person would normally work in that period. This does not equate to the physical number of employees. For example, two half-time employees would equal one FTE, or alternatively, three FTEs may represent two full-time employees who have worked sufficient overtime hours to equal an additional FTE.

<sup>2</sup> The ministry 2011/12 FTE total includes a reduction of about 3,200 FTEs reflecting the shift of BC Ambulance Service oversight from the Ministry of Health to the Provincial Health Services Authority.

<sup>3</sup> Service delivery agency FTE amounts do not include SUCH sector staff employment.

<sup>4</sup> Population per FTE is calculated using July 1 population (e.g. population on July 1, 2016 divided by 2016/17 FTEs).

<sup>1</sup> Numbers may not add due to rounding.<sup>2</sup> Debt as a per cent of GDP is calculated using nominal GDP for the calendar year ending in the fiscal year (e.g. 2016/17 debt divided by nominal GDP for the 2016 calendar year).<sup>3</sup> Per capita debt is calculated using July 1 population (e.g. 2016/17 debt divided by population on July 1, 2016).<sup>4</sup> Debt is converted to real (inflation-adjusted) terms using the consumer price index (CPI) for the corresponding calendar year (e.g. 2016 CPI for 2016/17 debt).

<b>Debt (\$ millions)</b>											
Total provincial .....	41,885	45,154	50,193	55,816	60,693	62,920	65,292	66,518	68,946	71,861	6.2
Taxpayer-supported <sup>7</sup> .....	29,968	31,821	34,659	38,182	41,068	41,880	42,727	41,939	42,575	43,492	4.2
Provincial nominal GDP (\$ millions) <sup>8</sup> .....	196,250	205,117	216,786	221,414	226,605	237,188	245,409	255,676	266,292	277,719	3.9
Population (thousands at July 1) <sup>9</sup> .....	4,411	4,466	4,499	4,543	4,583	4,638	4,683	4,740	4,801	4,861	1.1

<sup>1</sup> The ratio of debt to population (e.g. 2016/17 debt divided by population at July 1, 2016).<sup>2</sup> The ratio of debt outstanding at fiscal year end to provincial nominal gross domestic product (GDP) for the calendar year ending in the fiscal year (e.g. 2016/17 debt divided by 2016 nominal GDP).<sup>3</sup> The ratio of interest costs (less sinking fund interest) to revenue. Figures include capitalized interest expense in order to provide a more comparable measure to outstanding debt.<sup>4</sup> Weighted average of all outstanding debt issues.<sup>5</sup> Includes revenue of the consolidated revenue fund (excluding dividends from enterprises) plus revenue of all government organizations and enterprises.<sup>6</sup> Excludes revenue of government enterprises, but includes dividends from enterprises paid to the consolidated revenue fund.<sup>7</sup> Excludes debt of commercial Crown corporations and agencies and funds held under the province's warehouse borrowing program.<sup>8</sup> Nominal GDP for the calendar year ending in the fiscal year (e.g. Nominal GDP for 2016 is used for the fiscal year ended March 31, 2017). 2015 GDP is a Ministry of Finance estimate.<sup>9</sup> Population at July 1st within the fiscal year (e.g. population at July 1, 2016 is used for the fiscal year ended March 31, 2017).
