

BIG BAR LANDSLIDE UPDATE

AUGUST 24, 2019

Incident Webpage

BC River Forecast

- There have been over 100 ideas submitted to the Big Bar Incident Command that could aid in this response. These ideas are organized into four categories: fish handling, capture and transport, health, hydrology and engineering, and innovation and are continually being reviewed and evaluated by experts. Many submissions or variations of ideas have been used or are in the progress of being used. For more information on the innovative ideas implemented at the Big Bar Landslide, please visit the [website](#).
- The field camp was established on August 16, 2019 and is located near the site of the incident. There are currently 68 personnel working at the landslide and staying in camp. They are working in the river, on shore and in the air and are from First Nations, Federal and Provincial governments. Some of these groups include the seining crews, fish wheel operators, welders, logistic officers, and wildland firefighters. This week, the Unified Incident Commanders visited the camp and collectively acknowledged the hard work that's being done out in the field.

Unified Incident Commanders.
