

Procedures in the NROS Portal

New Road Use Permit Application - Adding a Partial Length

Please note that NROS portal application for Partial Branch lengths is not working properly right now. Applicants are now being instructed to submit using the “Entire Branch” option for the application to be accepted by the system. Please see the image below.

The screenshot shows the 'FSR Branch' form in the NROS Portal. The form includes the following fields and options:

- FSR ID:** A text box containing '8630' with a 'Clear FSR ID' button below it.
- Project Name:** An empty text box.
- FSR Branch:** A text box containing '01' with a 'Choose Another FSR Branch' button below it.
- Stations:** A section with two radio buttons: 'Entire Branch' (selected and highlighted with a red box) and 'Part of FSR Branch'.
- Estimated Number of Loads Per Day:** A text box containing '15'.
- TRUCK CONFIGURATION:** A section with three checkboxes: 'ON HIGHWAY' (checked), 'OFF HIGHWAY', and 'SPECIAL AUTHORIZATION VEHICLE (SAV)'.

Instructions and feedback messages are present: 'Click on the (+) to add another FSR Branch to this RUP' at the top left, and 'Please click on the "Clear FSR ID" button to clear your selection.' and 'Please click on the "Choose Another" button to clear your selection.' near their respective buttons.

The applicant can enter the **partial length information** in the “Comments” portion of the application. Please see the image below.

Here is a comment example –

“Used to access CP 123 - We only require the RUP from 0.0km to 9.0 km, however the system is not accepting partial sections at this time.”

Please attach a location map in pdf format providing: BC Geographic Warehouse base layers (water features, survey parcels, district administrative boundaries, parks, active forest and crown land tenures, roads, labels). Use a suitable scale that clearly shows the area of interest. Include a title block (Natural Resource District, date, map of), north arrow, legend. Show points of commencement and termination, GPS coordinates (UTM or Lat/Long) and lengths. Ensure map clearly illustrates all road sections applicable under the notification.

Once the application has been successfully submitted to the system, this partial length information will be forwarded to the District prior to being processed.
