

## Security Day Agenda – May 27, 2020

### “Remote and Ready – Cyber Hygiene at Home”

<b>10:00am</b>  <b>Bobbi Sadler</b> Assistant Deputy Minister, Ministry of Citizens' Services, OCIO, Province of BC		<b>Opening</b>
<b>10:05am</b>  <b>CJ Ritchie</b> Government Chief Information Officer, Ministry of Citizens' Services, OCIO, Province of BC		<b>Welcome to Security Day</b>
<b>10:10am - Opening Keynote</b>  <b>Dominic Vogel</b> Founder & Chief Strategist, CyberSC		<b>Zoom - Is It Really the Tool of the Devil?</b>  Understand the actual security risks Zoom users face and separate the hype from facts. Dominic will share why defining business and security requirements should be the driving force behind your video conference platform choices and how to best secure Zoom according to your risk tolerance.
<b>10:40am</b>  <b>Ryan McDonald</b> Freelance Consultant		<b>Who Are You?</b>  You access your email, bank, employer, entertainment, all from the comfort of your home. The challenge of assuring home users are who they claim to be is complex and Cyber criminals are taking advantage. Learn common techniques for identifying users and understand ways you will be identifying yourself in the future.
<b>11:10am – Special Guest</b>  <b>Scott Jones</b> Head of The Canadian Centre for Cyber Security		<b>We Can All Do Our Part to Enable a Secure Digital Canada</b>  While Canadians are doing their part to keep our communities safe during this vulnerable time, cyber threat actors are trying to take advantage. We will discuss what The Canadian Centre for Cyber Security has done to protect Canada and where we need every Canadian to join with us. Together we can make Canada the safest place to live, work and play online...even when we need to do it all in the safety of our homes.
<b>11:40am</b>  <b>Dale Land</b> Director of Cyber Intelligence and Investigations, OCIO, Province of BC		<b>Turning Your Home into a Cyber Fortress</b>  Due to the current situation, businesses are now operating with mostly remote users. As a result, technology solutions to meet this working style have never been more prevalent. We need to remember the basics of information security to help us work remotely and securely, such as, accessing only need-to-know information for our work and assessing the risk associated with using popular tools.
<b>12:10pm</b>  <b>Justin Malczewski</b> Regional Manager, CrowdStrike		<b>Outside the Corporate Firewall</b>  Since the declaration of a global pandemic, organizations of all sizes are facing sudden and profound challenges as employees are directed to vacate offices to work from home. This session will examine how to shore up organizational risk when moving employees outside of the corporate firewall.
<b>12:40pm – Closing Keynote</b>  <b>Gary Perkins</b> Executive Director and Chief Information Security Officer, OCIO, Province of BC		<b>ABCs of Security – Tips for Securing Your Devices at Home</b>  Get practical advice on how to secure your home devices and networks including: desktops and laptop computers, passwords, backups, safe browsing and browser settings, Wi-Fi, smartphones, Internet of Things, emails and phishing. These tips are intended to help you and others practice excellent cyber hygiene at work and at home.
