

## BC Manufacturing Jobs Fund Funding Recipients

BUSINESS NAME	BRIEF PROJECT DESCRIPTION	FUNDING ALLOCATION	COMMUNITY
<b>STREAM 2 CAPITAL PROJECTS</b>			
<b>MASSIVE CANADA</b>	Massive Canada is a new mass timber and prefabricated manufacturer. This project establishes a new 91,000 sq ft mass timber modular home manufacturing facility that will pre-fabricate laneway homes, apartment units, townhouses and commercial projects using mass-timber building products. This project will create 71 jobs.	\$10,000,000	Williams Lake (Cariboo)
<b>A-1 TRUSSES LTD.</b>	A1 Trusses Ltd. builds wood trusses for residential and commercial building construction in B.C. This project supports the substantial expansion of their facility to begin producing prefabricated wall panels and floor cassettes. This project will create 125 jobs.	\$9,500,000	Surrey (Mainland/Southwest)
<b>PUNJAB MILK FOODS INC.</b>	Punjab Milk Foods is a processor of traditional dairy-based South Asian foods. This project consolidates its B.C. and Washington-based facilities through construction of a new 293,000 sq. ft. processing plant in Surrey, creating 50 new jobs.	\$7,500,000	Surrey (Mainland/Southwest)
<b>S&amp;R SAWMILLS LTD.</b>	S&R Sawmills is a custom cut lumber manufacturer. This project supports the expansion, purchase and commissioning of a trimmer/sorter/stacker line that will improve efficiency, reduce waste, and enable S&R to process smaller dimension logs. This project will create 25 jobs and protect 100 jobs.	\$4,000,000	Langley (Mainland/Southwest)
<b>VMAC GLOBAL TECHNOLOGY INC.</b>	VMAC Global Technology manufactures rotary screw air compressors for commercial vehicles. The project will include building a manufacturing facility and purchasing equipment to manufacture air compressors for the heavy duty commercial electric vehicle (EV) market. This project will create 45 jobs.	\$3,400,000	Nanaimo (Vancouver Island/ Coast)
<b>SAN INDUSTRIES LTD.</b>	San Industries is a vertically integrated forestry company. This project supports upgrades to current equipment to optimize their	\$2,500,000	Port Alberni (Vancouver Island/Coast)

	value-added operations, purchases new equipment, and constructs a new storage building. This project will create 30 jobs.		
<b>RICHMOND PLYWOOD CORPORATION LIMITED</b>	Richmond Plywood Corporation Limited manufactures and distributes plywood products. This project supports the acquisition and installation of new equipment to optimize their value-added manufacturing processes and improve quality and operational efficiency. This project will create 14 jobs.	\$2,300,000	Richmond (Mainland/Southwest)
<b>CANOE FOREST PRODUCTS LTD.</b>	This project replaces equipment to improve the long-term viability of the company, which manufactures softwood sheathing, veneer and specialty plywood. This project will protect 205 jobs.	\$2,250,000	Canoe (Thompson-Okanagan)
<b>WOODTONE SPECIALTIES INC.</b>	Woodtone produces engineered wood building materials for residential and commercial purposes, including interior and exterior siding, trim, posts, corners and wood paneling. This project involves a capital expansion to increase efficiency, improve fiber recovery and add a new product line from second-growth knotty wood. This project will create 50 jobs.	\$1,340,000	Spallumcheen (Thompson-Okanagan)
<b>DR. MA's LABORATORIES</b>	Dr. Ma's Laboratories is a manufacturer of natural health products, such as supplements, vitamins, and food. This project includes infrastructure upgrades, scaling-up and automation of their manufacturing processes, and brings raw ingredient processing in-house. This project will create 75 jobs and protect 52 jobs.	\$1,250,000	Surrey (Mainland/Southwest)
<b>COAST TSIMSHIAN RESOURCES LTD.</b>	Coast Tsimshian Resources is a forestry company fully owned by the Lax Kw'alaams Band. Project activities include the acquisition of an industrial chipper and peripherals which will allow them to utilize residual wood, reduce logging waste, and ultimately create a new business stream for Lax Kw'alaams Band. This project will create up to 108 jobs.	\$970,000	Lax Kw'alaams (North Coast)
<b>DOWNIE TIMBER LTD.</b>	Downie Timber Ltd is a lumber milling and remanufacturing wood processor. This project supports the purchase and commissioning of a new debarker system that enables the company to process small profile logs and optimize operations. This project will protect 229 jobs.	\$825,000	Revelstoke (Thompson-Okanagan)

<b>SUNRISE ENGINEERING AND MFG INC.</b>	Sunrise is a machine shop that specializes in machining and fabricating services, primarily equipment repairs for the pulp mill industry. This project purchases and commissions new equipment that will increase efficiency, improve quality of production, maintain competitive advantage, and attract new workers. This project will create 5 jobs.	\$805,000	Delta (Mainland/Southwest)
<b>ACCESS PRECISION MACHINING LTD.</b>	Access Precision Machining is an advanced manufacturing machining and fabrication service provider that manufactures custom machined parts for various industries including oil and gas, aerospace, and commercial sectors. This project involves purchasing seven machines, including six CNC machines, to extend their capacity and upgrade current machining abilities. This project will create 18 jobs.	\$800,000	Salmon Arm (Thompson-Okanagan)
<b>DYNAMIC WINDOWS AND DOORS</b>	Dynamic Windows and Doors is a custom window and door manufacturer. This project will purchase and install automated equipment and integrate new automated processes into the company's production. This project will create 9 jobs.	\$755,000	Abbotsford (Mainland/Southwest)
<b>WHEN WE EAT MANUFACTURING LTD.</b>	When We Eat Manufacturing manufactures frozen food snacks for distribution at large retailers. This project expands their production facility, installs new equipment to minimize CO2 emissions, and scales up their manufacturing to support future growth and diversified product offerings. This project will create 50 jobs and protect an additional 30.	\$623,000	Coquitlam (Mainland/Southwest)
<b>NOVO TEXTILE COMPANY</b>	Novo is a textile company that manufactures medical-grade masks and other single-use healthcare products. Their capital project consists of acquiring and installing highly specialized, automated equipment to develop an N95 mask production department to both diversify their current product offering and grow into export markets. This project will create 13 jobs.	\$584,000	Coquitlam (Mainland/Southwest)
<b>KINSOL TIMBER SYSTEMS</b>	This project involves building a pre-fabrication facility at Kinsol's operating site to increase capacity for mass-timber production. The facility will add a nail-laminated timber line, increase its sawn-timber and glue-laminated-timber fabrication, and establish a new panelized wall line. This project will create 9 jobs.	\$500,000	Mill Bay (Vancouver Island/Coast)

<b>MONSTER INDUSTRIES LTD.</b>	Monster Industries Ltd. is a steel construction company specializing in mechanical and structural installations and maintenance for forestry, energy and mining industries. This project involves building a new fabrication facility and purchasing a new crane that will help manufacture drying kilns for the forestry industry in B.C., which are essential for the production of value-added wood products. This project will create 7 jobs and protect an additional 77 jobs.	\$466,000	Terrace (North Coast)
<b>FRANKLIN FOREST PRODUCTS LTD.</b>	Franklin Forest Products is a sawmill that converts primarily old growth fibre and utility grade logs into niche lumber products that are sized and graded for specific end users. This project involves retrofitting and purchasing sawmill equipment to more effectively process wider variety of log diameters and shift from old growth logs to smaller, more uniform second growth timber. This project will create 5 jobs and protect an additional 37.	\$425,000	Port Alberni (Vancouver Island/ Coast)
<b>J.H. HUSCROFT</b>	J.H. Huscroft is a value-added specialty manufacturer of glulam, trim, boarding and flooring. This project purchases and replaces equipment that will boost productivity and capacity at its sawmill, expanding the types of logs that can be processed, and protecting 71 jobs.	\$400,000	Creston (Kootenays)
<b>WESTERN WOOD PRESERVERS LTD.</b>	Western Wood is a lumber treating facility. This project expands and renovates a processing facility to double production and meet increasing demand. This project will create 7 jobs and protect an additional 9.	\$300,000	Aldergrove (Mainland/Southwest)
<b>NEW WAVE DOCKS LTD.</b>	New Wave manufactures docks and floats out of wood, metal and roto-molded plastic for residential and commercial markets, including resorts and marinas. This project will construct a new 14,000 square foot steel engineered building on the existing site, designed to house a large-scale roto-oven and aluminum fabrication shop. This project will create 7 jobs.	\$300,000	100 Mile House (Cariboo)
<b>C.W. CREATIVE WOODCRAFT LTD.</b>	C.W. Creative Woodcraft is a cabinet and millwork manufacturer specializing in using local, second growth fibre. This project supports the expansion of their existing facility and the acquisition	\$286,000	Cobble Hill (Vancouver Island/Coast)

	of new machinery to double their production capacity, optimize production and reduce waste. This project will create 14 jobs.		
<b>OT TIMBER FRAMES LTD.</b>	OT Timber Frames is a custom residential and commercial timber frame manufacturer. This project expands their production facility and adds two CNC machines to scale-up the production of pre-fabricated homes, including a new product offering, and maintains year-round employment for staff. This project will create 5 jobs and protect an additional 20.	\$235,000	150 Mile House (Cariboo)
<b>TIGER TOOL INTERNATIONAL INC</b>	Tiger Tools is a machinery manufacturer of tools and equipment for the automotive, heavy-duty truck and industrial sectors. This project purchases and installs two CNC machines to enable high-precision production of tools and equipment. This project will create 3 jobs.	\$220,000	Abbotsford (Mainland/Southwest)
<b>NEXUS GLOBAL BUILDING SOLUTIONS</b>	Nexus will expand and upgrade their existing facility and purchase new machinery that will diversify their product lines for the construction of modular and manufactured homes. The integration of increased efficiencies and component accuracy will save money and reduce waste. This project will create 12 jobs.	\$200,000	Cobble Hill (Vancouver Island/Coast)
<b>PIPPIN POINT FARMS LTD.</b>	Pippin Point is an agriculture company that produces juice, cider, and reusable wooden boxes from BC plywood. This project constructs a new, larger production plant and purchases a CNC machine and processing equipment to allow them to operate year-round, increase the manufacturing of their wooden boxes, and hire new staff. This project will create 4 jobs.	\$176,610	Wynndel (Kootenay)
<b>BIG EDDY MACHINE SHOP LTD.</b>	Big Eddy Machine Shop is a machine part manufacturer for numerous industries, such as forestry repair and rail maintenance equipment. Their project will add a large CNC milling machine, increasing efficiency, adding a new product line and a more inclusive/accessible operating environment. This project will create 1 job.	\$152,270	Revelstoke (Thompson-Okanagan)

<b>YARROW WOOD (2012) INC.</b>	Yarrow Wood is a lumber remanufacturer, providing custom square and rectangular lumber remanufacturing for forestry companies. This project installs new equipment that will support the profiling of lumber in-house and will allow them to mill a wider variety of value-added wood products utilizing diverse log species. This project will create up to 7 jobs.	\$130,000	Chilliwack (Mainland/ Southwest)
<b>BIOFLAME BRIQUETTES LTD.</b>	Bioflame Briquettes manufactures briquettes from waste sawdust from the forestry industry. This project purchases and commissions a hammermill and briquette press to increase fibre diversity and production. This project will create 4 jobs.	\$117,320	Chemainus (Vancouver Island/ Coast)
<b>PARADIGM BUILDING SOLUTIONS</b>	Paradigm Building Solutions is a prefabricated wall panel manufacturer. This project will purchase an automated saw, which will result in increased output, reduction of waste, and a new product line including floor panels and roof trusses. This project will create 5 jobs.	\$106,000	Louis Creek (Thompson-Okanagan)
<b>CONIFEX MACKENZIE FOREST PRODUCTS INC. (CMFP)</b>	Conifex Mackenzie manufactures high-quality lumber for sale to markets in North America and Japan. This project will purchase equipment to improve tipping and sawing accuracy, increase the quality and efficiency of their lumber production, lengthen saw life, reduce downtime, and improve recovery and value from their fiber volume. This project will protect 159 jobs.	\$105,000	Mackenzie (Cariboo)
<b>BID GROUP TECHNOLOGIES LTD.</b>	Bid Group designs and manufactures equipment for the sawmill industry. This project increases manufacturing capacity at the Vanderhoof facility by replacing two manual lathes to enable them to reduce outsourcing and optimize parts production.	\$100,000	Vanderhoof (Nechako)
<b>OTHER COMMITTED STREAM 2 CAPITAL PROJECTS – To be announced Spring 2024</b>			<b>\$33,705,000</b>

BUSINESS NAME	BRIEF PROJECT DESCRIPTION	FUNDING ALLOCATION	COMMUNITY
<b>STREAM 1 PLANNING PROJECTS</b>			
<b>GOLD RIVER AQUAFARMS</b>	This project includes final stage planning required to repair and retrofit a former pulp and paper mill warehouse to become an aquafarm and salmon processing facility.	\$50,000	Gold River (Vancouver Island/Coast)
<b>STUWIX RESOURCES INC.</b>	Stuwix Resources is a forestry management company owned by eight First Nations. The planning activities include a feasibility assessment to implement long log harvesting, which will turn wood waste into merchantable products.	\$50,000	Merritt (Thompson-Okanagan)
<b>K-C RECYCLING LTD.</b>	K-C Recycling is a lead acid automotive battery recycler. This project includes final stage business planning to prepare for a new recycling facility that will turn recycled materials into new products.	\$50,000	Trail (Kootenays)
<b>B COLLECTIVE HOMES INC.</b>	B Collective is a home construction company with a focus on energy efficient passive homes with sustainable bio-based closed panel construction. This project moves offsite prefabrication of panels in-house to allow B Collective to target affordable housing projects that are urgently needed in the Vancouver region.	\$50,000	Vancouver (Mainland/Southwest)
<b>POWER WOOD CORP.</b>	Power Wood is a specialty cedar lumber remanufacturing business which produces high-value cedar end products such as siding, paneling and trim. They are completing business planning, technical drawings, and engineering to build a new Thermal Modification facility. The project will allow them to make use of new fiber sources and double their production capacity.	\$50,000	Agassiz (Mainland/Southwest)
<b>KRUGER KAMLOOPS PULP L.P.</b>	Kruger Kamloops produces northern bleached softwood kraft and unbleached softwood kraft pulp. This project conducts planning activities required to install a diffusion washer at the pulp mill, which will allow them to pursue new, innovative product lines using cellulose and lignin.	\$50,000	Kamloops (Thompson-Okanagan)

<b>ADVANCED BIOCARBON 3D LTD.</b>	ABC3D is a plastic waste recycling company which uses agricultural, forestry, and plastic waste to manufacture a wood-plastic composite decking material. This project conducts an operational and technical assessment to determine how to best expand their manufacturing capabilities.	\$40,000	Trail (Kootenays)
<b>THOMPSON RIVER VENEER PRODUCTS LTD.</b>	Thompson River Veneer Products is a producer of veneer plywood panels used for sheathing and building. This project conducts a technical assessment to replace press platens in order to increase productivity and reduce costs.	\$30,000	Kamloops (Thompson-Okanagan)
<b>LIL'WAT FORESTRY VENTURES INC.</b>	Lil'wat Forestry Ventures is a forestry company solely owned by Lil'Wat First Nation, primarily operating as a forestry management company. This project includes a market assessment and business plan in preparation for purchasing a carbonator which will process waste wood into biochar, create new jobs, and establish a new revenue stream.	\$30,000	Mount Currie (Mainland/Southwest)
<b>VITALIS EXTRACTION COMPANY INC.</b>	Vitalis is an original equipment manufacturer (OEM) of CO2 based technologies. Their planning activities include performing a market analysis and product launch plan.	\$25,000	Kelowna (Thompson-Okanagan)
<b>SILVERSTONE EXPLORATION INC.</b>	Silverstone is an industrial mining company that manufactures custom architectural products for use in masonry applications and landscape materials. This project completes a planning study to determine the best strategy to bring their new product line to the U.S. market.	\$24,750	Topley (Nechako)
<b>SOUL BITE FOOD INC.</b>	Soul Bite Food is a plant-based food manufacturing and catering business that produces and distributes a line of vegan frozen dinners. This project includes an operational assessment, technical evaluation, and market research required to automate production which will help achieve economies of scale, diversify product lines and explore export opportunities.	\$22,000	Coquitlam (Mainland/Southwest)

<b>YUN KA WHU'TEN FORESTRY LTD. (WEST CHILCOTIN FOREST PRODUCTS LTD.)</b>	West Chilcotin Forest Products is a forest management company, fully owned by Ulkatcho First Nation. This project completes a full business case for a new post and rail business line.	\$11,950	Ulkatcho First Nation Territory - Anahim Lake (Cariboo)
<b>OTHER COMMITTED STREAM 1 PLANNING PROJECTS – To be announced Spring 2024</b>			<b>\$473,310</b>
<b>TOTAL COMMITTED FUNDS TO DATE</b>			<b>\$88,283,210</b>
