	Area open to Recreational Snowmobiling *			484,000

<sup>\*</sup> NOTE: These gross numbers do not reflect the actual area that is useable for snowmobiling because much of the terrain is unsuitable (i.e. forested slopes, steep alpine, glaciated with crevasses or inaccessible - this could be as much as 80% of the mountain terrain). It is difficult to accurately estimate the potential snowmobile area inside and outside the snowmobile closures. This was a key consideration in the stakeholder negotiation process and the majority of the area that is closed is either not suitable for snowmobiling or accessible to advanced riders only. There are several locations that are suitable and were used by more advanced riders that will be closed until the end of April including: the McAndrew Lake area in the North Thompson, Adolph Creek and Thunder lakes (previously closed by local agreement). Snowmobile opportunities have been expanded by reducing the closure area on Westridge and proposing improved access and management at Oasis and Robina. Respect for all user groups is encouraged where uses overlap.
