## **Automotive supply chain vulnerable to attack as cybersecurity regulation looms**

Almost two-thirds (64%) of automotive industry leaders believe their supply chain is vulnerable to cyberattacks, with many businesses inadequately prepared for a connected automotive era. That's according to new Kaspersky research based on 200 interviews with C-level decision makers in large enterprises of at least 1,000 employees in the automotive sector. It revealed a vast range of attacks encountered by automotive companies - from vendor to supplier - at almost every stage of production.
