

A map of the province of British Columbia, Canada. The province is colored light yellow. The text "B.C." is printed in the center. A small region in the north-central part of the province is highlighted in red. A line points from this red region to a larger, more detailed map of the same region shown in the next slide.

This map was created for the benefit of operational forestry planning.
It did not consider sub-surface resources and is not intended for mineral sector.

Dease-Liard Sustainable
Resource Management Plan

This is a detailed topographic map of the Yukon River drainage basin in Alaska. The map shows the extensive Yukon River system, including major tributaries such as the Kuskokwim River, Tanana River, and Koyuk River. Key towns and communities are marked, including Fairbanks, Whitehorse, and Dease Lake. The map features elevation contours, road networks, and a legend. The Yukon River is shown flowing from the north towards the south, with numerous smaller tributaries feeding into it. The terrain is rugged, with many mountains and valleys. The map is oriented with North at the top.
