

cleanBC Industrial Incentive Program (CIIP) Workshop

May 10, 2022

CleanBC Industrial Incentive Program

Tuesday, May 10, 2022

10:00– 10:05 AM Introduction

Opening remarks: John Nagle, Manager, Compliance, Climate Action Secretariat

10:05 – 11:00 AM CleanBC Industrial Incentive Program (CIIP) Update

Behzad Bahtooi, Unit Head, Industrial Competitiveness

Hanna Vovk, Senior Policy Analyst, Industrial Competitiveness

Konstantin Zahariev, Senior Policy Analyst, Industrial Competitiveness

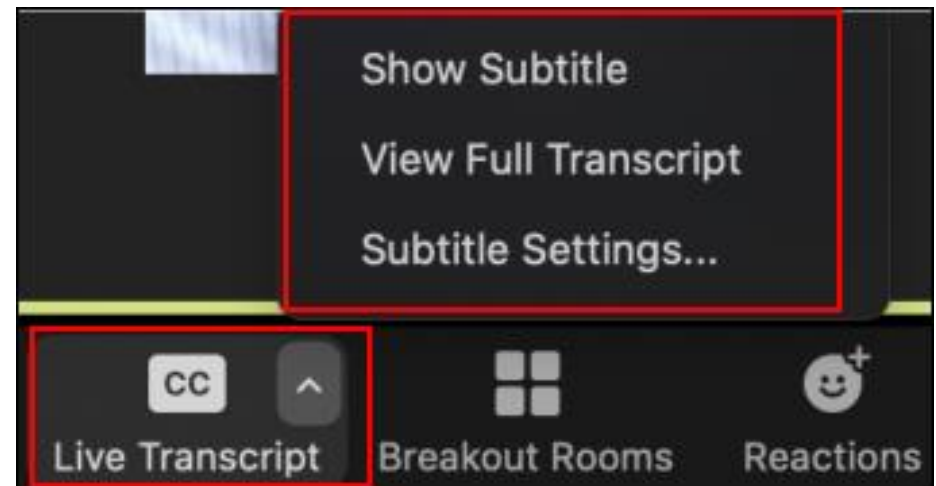

Background of the CleanBC Program, 2022 cycle timelines, and updates to guidance Material and web application.

11:00 – 11:30 AM Question and Answer session

Moderated: Hanna Vovk, Senior Policy Analyst, Industrial Competitiveness

HOUSEKEEPING

- Webinar mode: participants are muted
- For any questions:
 - During the presentation, please type them in the 'Chat' window
 - After the workshop, please send an email to GHGRegulator@gov.bc.ca
- Closed captioning is available
- For any technical issues, please use the 'Chat' window

How to Enable the 'Closed Captioning'

CleanBC Industrial Incentive Program (CIIP) Update

Question & Answer	

Context

- In Dec 2018, government announced **CleanBC** to reduce climate pollution and build a low-carbon economy
- Includes **CleanBC Program for Industry (CPI)** with the following objective:
 - Enhancing British Columbia's competitive advantages while reducing our own GHG emissions intensity
- Two CPI Initiatives:
 - **CleanBC Industrial Incentive Program (CIIP)**: incentive payments based on operations' emissions intensity compared to a **world-leading performance benchmark**
 - **CleanBC Industry Fund (CIF)**: funding for industrial emissions reduction projects
- The program is funded by the carbon tax paid by industry above \$30/tonne

CleanBC Program for Industry **cleanBC**

CIIP Program Requirements

- Eligibility Criteria:
 - Must be a GGIRCA “reporting operation” or part of one
 - Emit 10,000+ tCO₂e, excl. Sched. C Biomass
 - Submit an emission report for the applicable reporting year
 - Must be in an eligible sector
 - Material non-compliance under GGIRCA could result in ineligibility or impact future payments under CIIP
- Must submit a CIIP application with all required additional information by program deadline
 - If applicable (emissions $\geq 25,000$ tCO₂e), must also submit verification statement and report, including for production

CIIP in a Nutshell

CIIP 2021

	2020	2021	Change
No. of applications	518	459	-11%
No. of Operators	82	75	-9%
% of total emissions covered by CIIP	85%	75%	-10%
Incentive Payment (\$M)	\$81	\$65	-20%
Overall incentive ratio	81%	67%	-17%
Applications with no comment	94	182	94%
Total no. of comments	2387	516	-78%
Administration-related	206	116	-44%
Emissions-related	587	148	-75%
Fuel-related	1138	161	-86%
Production-related	456	91	-80%

CIIP Updates

- Updated CIIP Web Application (“CIIP System”).
- CIIP webpage is updated.
- Updated guidance documents and calculators.
- Verification of production is required for facilities with emissions $\geq 25,000$ tCO₂e.
- Reconciliation of previous year payments to be performed as applicable.
- Consultation with industry on additional benchmarking for sold electricity, oil and gas other, petroleum storage.
- Electricity factors (tCO₂e/GWh) are updated:
 - Integrated grid: 40.1 → 9.7
 - Fort Nelson grid: 530 → 511
 - Self-generated hydro electricity: 10.5 → 0

Carbon pricing review

- As described in the CleanBC Roadmap to 2030, B.C.'s carbon tax will continue to meet or exceed any federal carbon price requirements for 2023 and beyond
- CAS is currently working with the Ministry of Finance on reviewing B.C.'s approach to carbon pricing, including the CleanBC Program for Industry
- Engagement on carbon pricing approaches is underway and further details on any potential changes will be discussed with industry stakeholders throughout the year

Payment Reconciliation

Why?

- SWRS reports updated after approval of CIIP applications
- New program and processes both to industry stakeholders and program staff
- Consistent tools and more rigorous processes developed in 2021
- Grant agreements allow for a reconciliation to occur as a corrective action

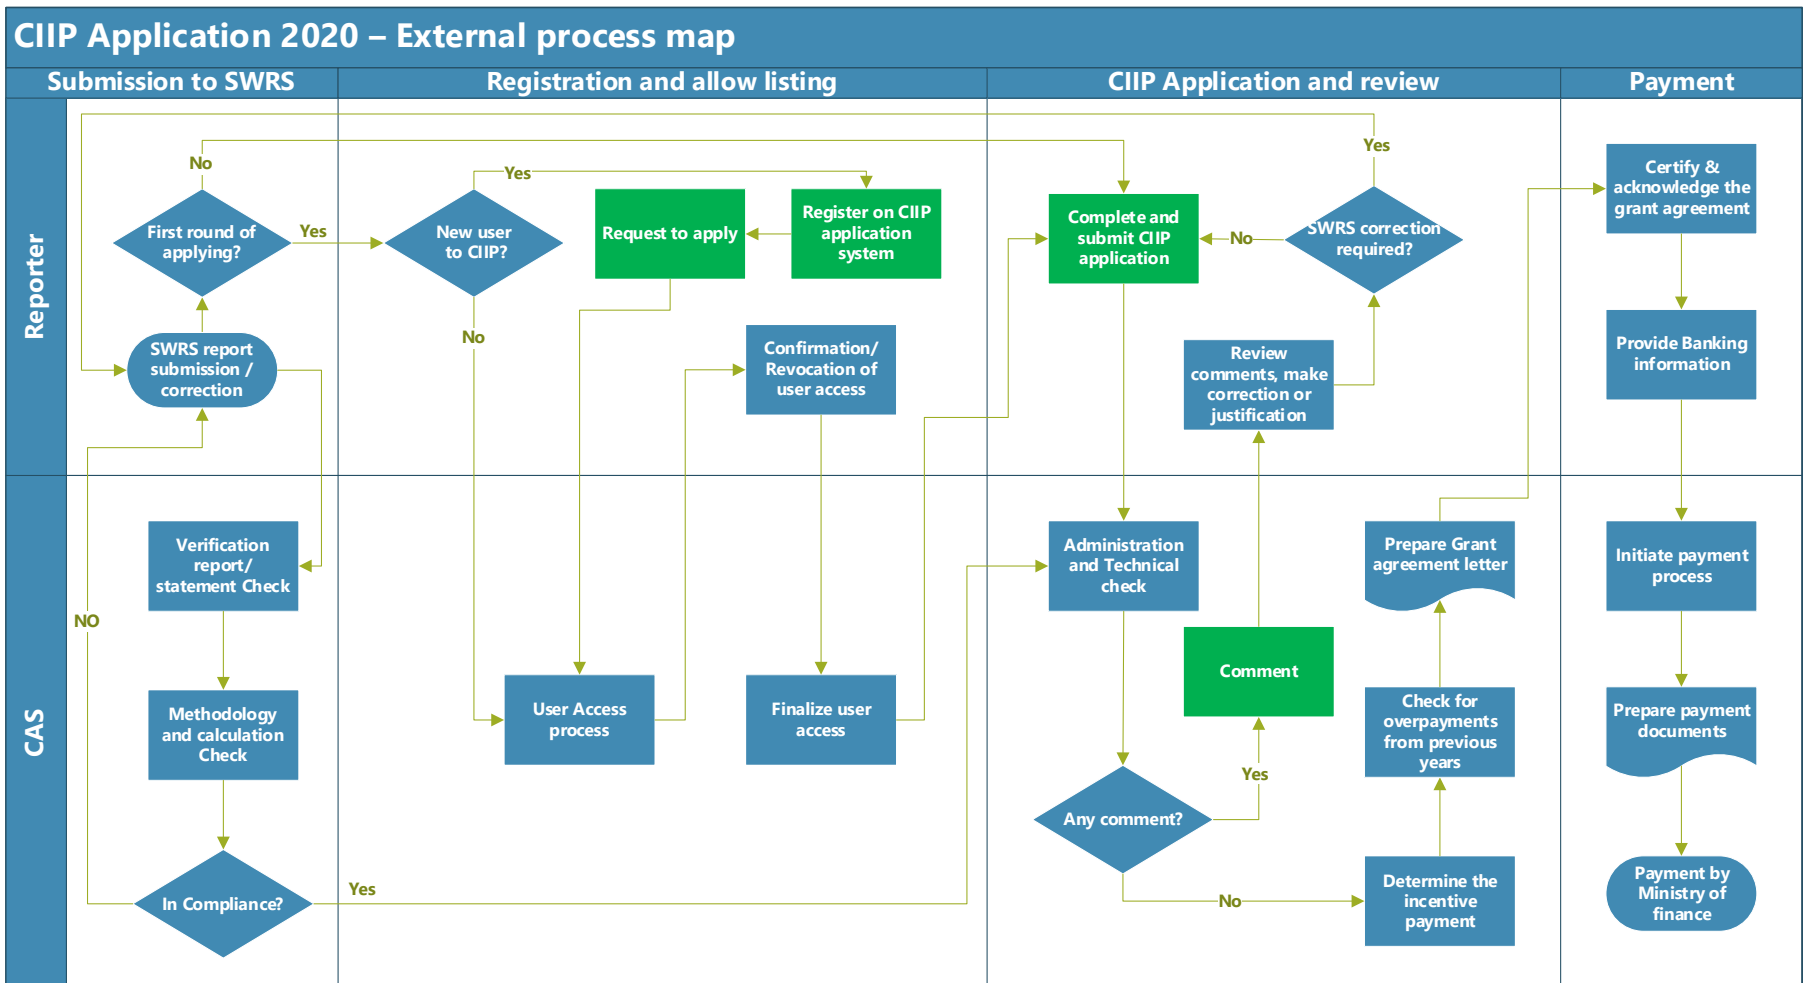

Payment Reconciliation

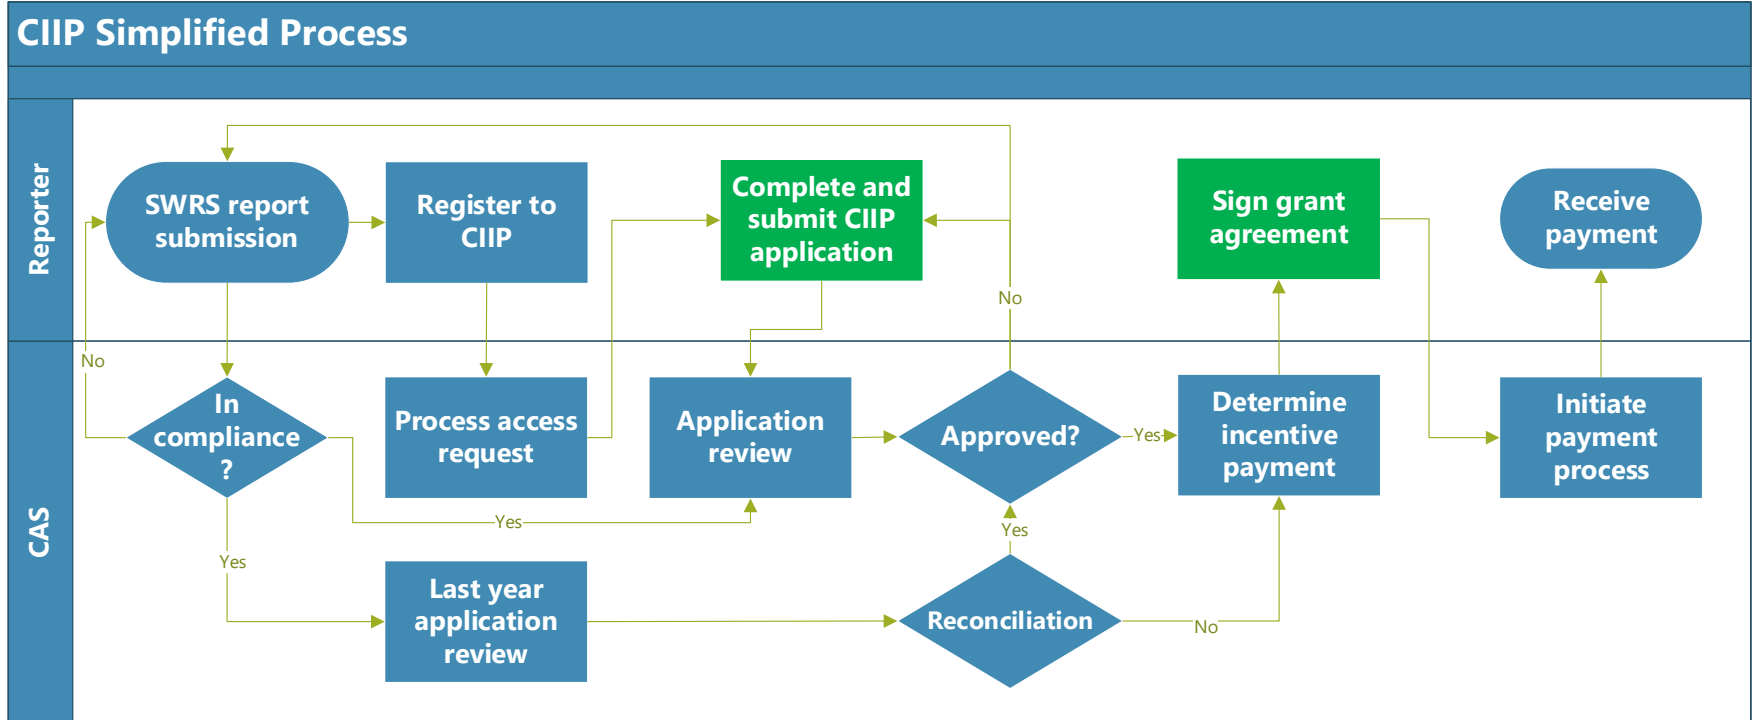

Corrective Action

- 36 operators were contacted for clarification on their 2020 applications; applications were revised and resubmitted
- Reconciliation amounts (overpayment/underpayment) for 100 facilities added as adjustment to 2021 incentive payments
- **Reconciliation of previous year submissions is part of the CIIP process**

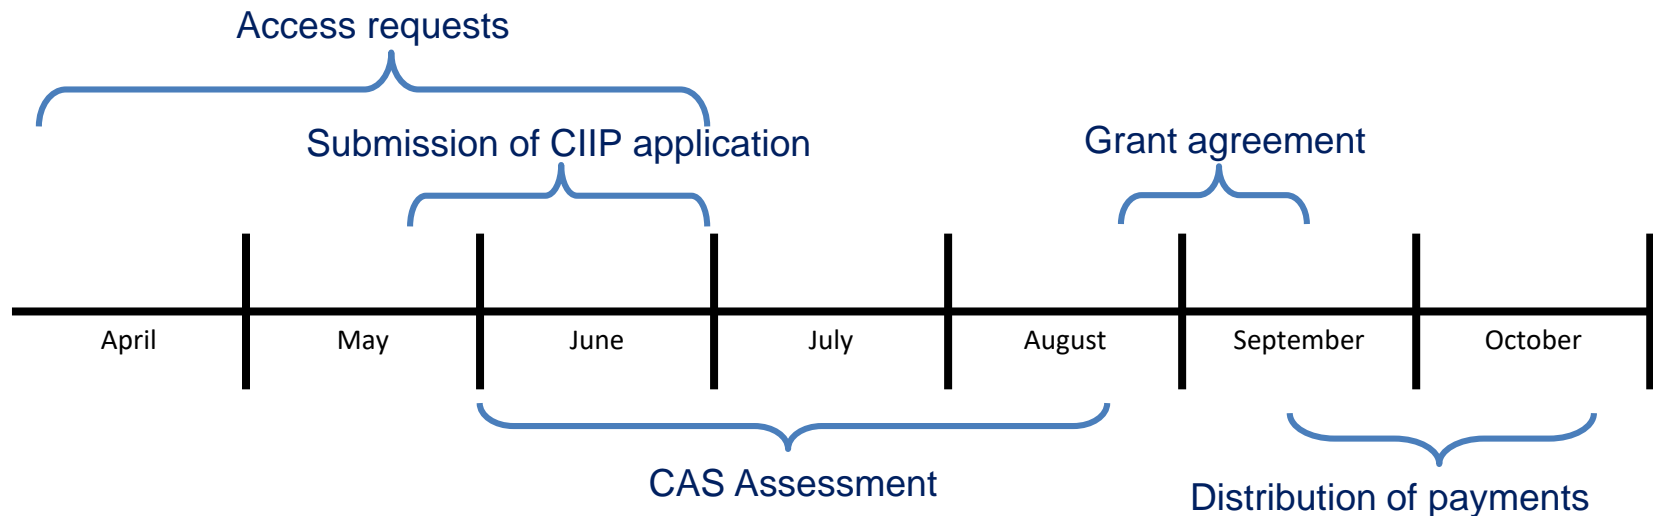

Application Process

Application Process - Simplified

2022 Cycle Timeline

1. CIIP Web System registration opens in April; CAS confirms user access
2. CIIP Web System expected to open on May 24th and close on June 30th
 - Emissions information pre-filled from SWRS information
 - Submission of verification statement/report with the SWRS reports
3. CAS assesses CIIP applications and may ask clarifying questions
4. CIIP applications approved and grant agreements issued
5. Signed grant agreements received and payments distributed to applicants

CIIP Web Application (CIIP Web App)

- Online application system: <https://ciip.gov.bc.ca/>

What is the CleanBC Industrial Incentive Program?

The CleanBC Industrial Incentive Program (CIIP) is part of the CleanBC Program for Industry, which applies to large industrial operations that report their emissions under the Greenhouse Gas Industrial Reporting and Control Act (GGIRCA).

The CIIP helps encourage cleaner industrial operations across the province by reducing carbon tax costs for facilities that can demonstrate they operate near world-leading emissions benchmarks.

As the price of carbon rises, the CleanBC Program for Industry will support competitiveness and facilitate emission reductions using revenues from the carbon tax that industry pays above \$30 per tonne carbon dioxide equivalent (tCO₂e).

Apply for the CleanBC Industrial Incentive Program (CIIP)

The due date for CIIP application forms has passed. You may still log in to view your submitted CIIP applications and submit any changes requested by the Climate Action Secretariat.

Registration and User Access

To complete a CIIP application:

- Register with the CIIP Web App at <https://ciip.gov.bc.ca/>
- On the CIIP Web App, request access to the operator for which you wish to complete a CIIP application

A screenshot of the CIIP Web App interface showing a search for operators. At the top, it says "(You can search to narrow the results in the dropdown)". Below this is a blue button labeled "Select Operator". Underneath the button is a search input field with the placeholder text "Search...". Below the search field is a dropdown menu showing "SFO operator". To the right of the search field, there is a note: "the list, please contact CAS for assistance."

- Existing access status shown on your Dashboard

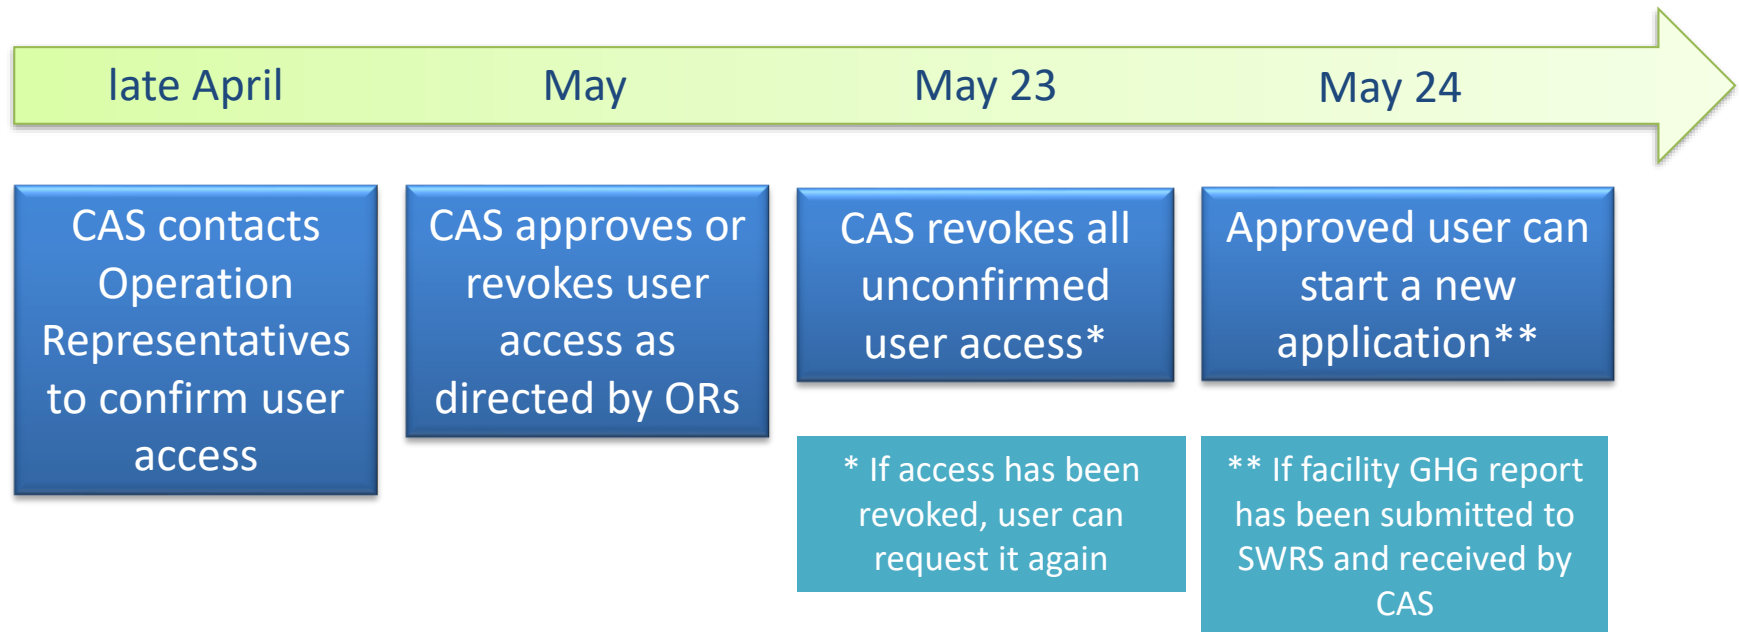

Operator	Access Status	Operations/Facilities
LFO operator	APPROVED	View Facilities

User Access (cont.)

- Access to an Operator in the CIIP Web App allows users to see data from the SWRS GHG Report
- An Operation Representative must authorize the user's access request
- CAS grants/rejects access to the user as authorized by the Operation Representative
- Users can view previous applications and request access any time
- Start new application – after May 24th
 - Before application cycle opens, only previous year's facilities / applications are visible

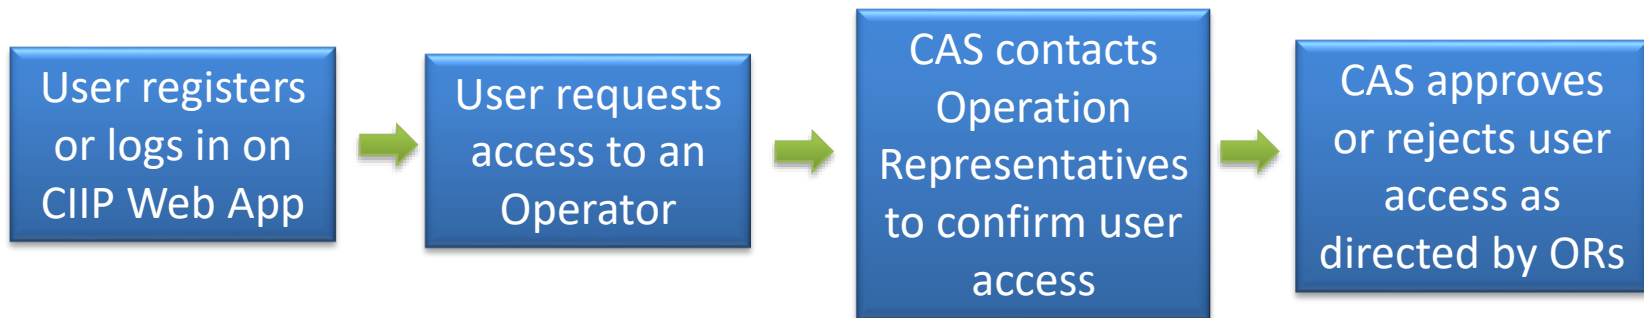

Existing CIIP System Users

- Process for existing users, i.e. those who obtained access to an Operator in the previous year

New Access Requests

- Process for new users; and
- Existing users requesting access to a different operator

- Registration and access requests can be done at any time
- If user is an Operation Representative (as listed in SWRS report), CAS grants access automatically

Completing a CIIP Application

- Select facility and reporting year

Reporting period

2021

Operator Name	Facility Name	Facility Type	BC GHG id	SWRS Report Received	Application Status	Application #	
<input type="text" value="Search"/>	<input type="text" value="Search"/>	... ▼	<input type="text" value="Search"/>	... ▼	... ▼	<input type="text" value="Search"/>	<input type="button" value="Clear"/> <input type="button" value="Apply"/>
Not started operator	facility 1105	SFO	1105	Yes	Application not started		<input type="button" value="Apply for CIIP for this facility"/>

Application Tabs

- Administrative Data
- SWRS Onsite Emissions
- Fuels
- Production and Emissions Allocation

Data pre-populated from SWRS

- May take approx. 10 business days; if no data is available, try again in a few days
- Review and confirm data
- If updates, also update in SWRS
- Some instances where information reported differently from SWRS → see sector guidance

CIIP Application – Administrative

Administration Data ✓ Form input saved

[Add a comment](#)

Facility Information

Facility Name * Facility Type *

Operator Information

Legal name * Trade name *

NAICS code * BC Corporate Registry number *

Operator Mailing Address

Street address * City *

Legal name and BC Corporate Registry Number

- Should match, as appears on [OrgBook](#)
- Grant payment will be issued to this name

Primary NAICS code

- Determines products available to report

Primary Application Contact
The person who should be contacted regarding this application

First Name * Last Name *

Position/Title * Organization *

Email Address * Telephone Number *

Secondary Application Contact
Optional - Someone authorized to access this application

First Name Last Name

Application contact

- **Primary contact** – who should CAS be in touch with about the application
 - Should be person submitting application
 - Receives automated system status notifications
- **Secondary contact** – optional
 - must be someone who has been granted access to the application;
 - does not receive automated system notifications

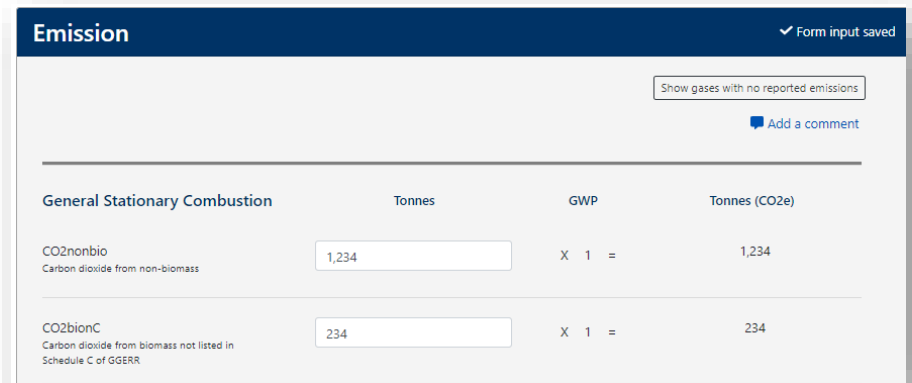

CIIP Application – Emissions and Fuels

SWRS Onsite Emissions

- Review and confirm
- Should be same as in SWRS

Fuels

- Review and confirm
- Should be same as in SWRS
- Oil and gas sector – different from SWRS in reporting flaring and venting

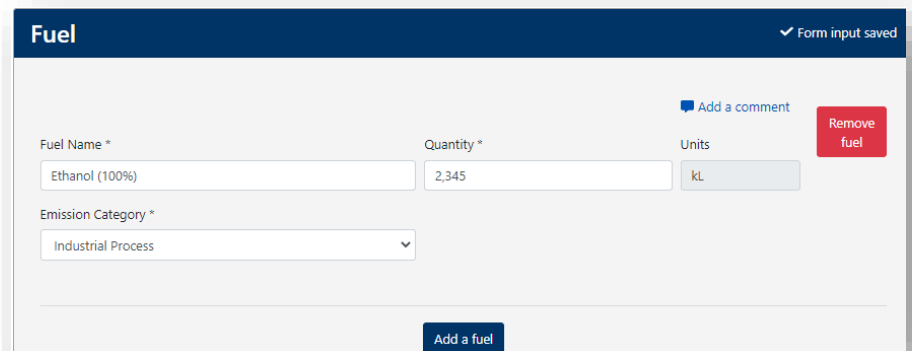

Emission ✓ Form input saved

Show gases with no reported emissions

Add a comment

General Stationary Combustion	Tonnes	GWP	Tonnes (CO ₂ e)
CO ₂ nonbio Carbon dioxide from non-biomass	1,234	X 1 =	1,234
CO ₂ bionC Carbon dioxide from biomass not listed in Schedule C of GGERR	234	X 1 =	234

Fuel ✓ Form input saved

Add a comment

Remove fuel

Fuel Name * Quantity * Units

Ethanol (100%) 2,345 kL

Emission Category *

Industrial Process

Add a fuel

CIIP Application - Production

Production and Emissions Allocation

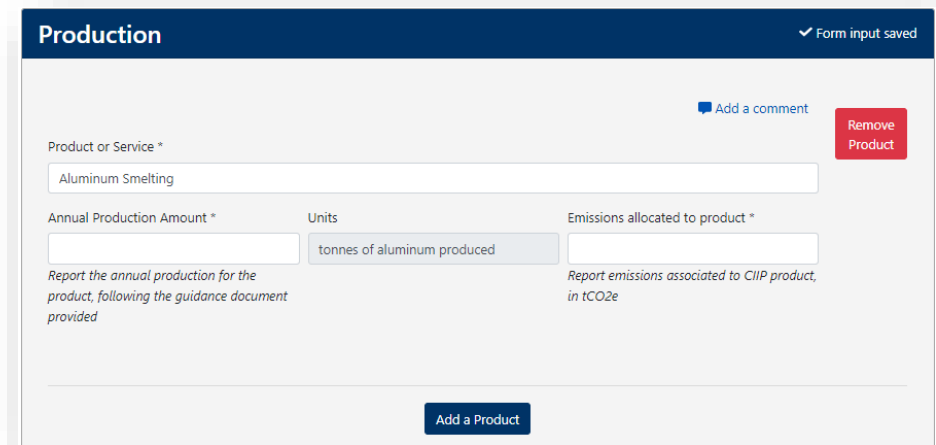

Review [sector guidance documents](#) on [CIIP website](#) for

- How to report production
- Allocating emissions and which to include or exclude
- Allocating if more than one product applies

e.g.
$$E_{Facility}^{CIIP} = E_{Attr.}^{SWRS} - E_{CO2bioC}^{SWRS} + E_{Purchased}^{Electr.}$$

Note:

- CO2bioC (Schedule C biomass CO₂ emissions) are excluded
- Purchased electricity to be reported by all facilities (may or may not factor into incentive calculation depending on sector - see guidance)
- Electricity and heat are reported as products (if not applicable, enter “0”)

The screenshot shows the 'Production' form in the CIIP application. At the top right, it says 'Form input saved'. Below this, there is a section for 'Product or Service *' with a text input field containing 'Aluminum Smelting'. To the right of this field is a blue button labeled 'Add a comment' and a red button labeled 'Remove Product'. Below the product name, there are three input fields: 'Annual Production Amount *', 'Units', and 'Emissions allocated to product *'. The 'Units' field is a dropdown menu showing 'tonnes of aluminum produced'. Below the 'Annual Production Amount *' field, there is a small text note: 'Report the annual production for the product, following the guidance document provided'. Below the 'Emissions allocated to product *' field, there is a small text note: 'Report emissions associated to CIIP product, in tCO2e'. At the bottom right of the form, there is a blue button labeled 'Add a Product'.

CIIP Application Submission

Summary page

- Review all data
- Automated checks for some errors or inconsistencies
 - (SWRS vs CIIP data, emissions vs fuels reported, no primary (non-energy) product reported, emissions intensity within expected range)
- Address any warnings (correct or explain identified inconsistencies)
- Review legal terms
- Submit application

Summary of your application:

Please review the information you have provided before continuing.

Some inconsistencies were found in your application. Please address these items before submitting by correcting the reported values or adding a comment in the relevant section to provide an explanation.

- There are no reported fuels in some emission categories where emissions were reported. Please report fuels corresponding to all emission categories with reported emissions.
- There is no reported production of a primary (non-energy) product. At least one product must be reported.

Your application contains errors

Please correct the errors shown below before submitting. Alternatively, you may provide justification to override this and submit without corrections. Your justification will be reviewed by CAS and may cause a delay in processing your application.

New Verification Requirements (Production)

- Starting with 2022 application cycle, CIIP facilities that otherwise have facility-specific verification requirements under GGERR must also verify their CIIP product data.

NOTE: For clarity, a CIIP facility that, according to its emission reports under GGERR, emitted less than 25,000 tCO₂e, not including reporting-only emissions, in the current and past three reporting periods, does not need to verify production for CIIP purposes.

- The aggregate effects of errors, omissions, or misstatements related to reported product data, for a product, must not be greater than 0.1% of the total reported quantity of that product.

The complete CIIP Verification Policy and the corresponding verification statement template are available on the [CIIP resources and links](#) webpage.

Summary	
5. Calculation Methodologies	
5.1 Calculating emissions associated with purchased grid electricity	
5.2 Calculating emissions associated with purchased heat	
5.3 Calculating total facility production in terms of primary metal equivalent	

Sector-specific Guidance Documents and Calculators

→ 2. Quick Summary – Main Steps in CIIP application

(calculation) steps are detailed in section **5. Calculation Methodologies** below.

Sector-specific Guidance Documents and Calculators

→ 3. Facility Emissions for CIIP purposes

Sector-specific Guidance Documents and Calculators

→ 5.1 Calculating emissions associated with purchased grid electricity

The ministry provides a calculator spreadsheet with the appropriate calculation formulas built in, to assist in calculations at this step of the CIIP application process (available via e-mail and [at this link](#)).

In the blue cell, enter the amount of purchased electricity (in GWh).

Emissions associated with purchased grid electricity are then automatically calculated and displayed in cell G13, in tonnes CO₂e. For example:

Purchased Electricity

INPUT each variable listed below:

Purchased Electricity

	Electrical Grid		Amount	Units
Emissions Intensity Factor of Grid	Integrated Grid	EIF _{El. Grid}	9.7	tCO ₂ e/GWh
Amount of electricity purchased		Q _{EL_PURCHASED}	300.00	GWh
Emissions from Purchased Electricity		E _{EL_PURCHASED}	2,910.00	tCO ₂ e

Choose grid from dropdown menu

Enter the amount of emissions from purchased grid electricity in the CIIP application.

Q & A
