NOTE: Initial OGMA amendment option areas were determined by selecting for the same Landscape Unit (Exstew), BEC Label (CWHws2/MHmm2), tree species (BA/HM/HW/H), & Projected Age (>250) & crown closure (>=40%) as the OGMA in the Shames CRA. Areas with some logging in the past (according to RESULTS/FTA), were removed from the option area.

The final area was chosen to overlap the Ungulate Winter Range and preserve interior forest conditions.
