

## **SUMMARY: Child and Family Practice Review of the Death of a Child Known to the Director in 2021**

### Circumstances of the Fatality

The review examined the ministry services provided to an Indigenous child who died. The child and their family received services at the time of the death.

### Findings

The ministry thoroughly assessed and planned for the safety of the child and their sibling while in their parents' care. While addressing the initial concern, a second concern for the child and their sibling was received. This issue was not fully assessed or planned for, leaving the child's safety and well-being at risk.

Prior to the review being finalized the team leaders and practitioners of the involved Service Delivery Area reviewed the process of assessing newly received concerns when a previous concern is still being addressed.

### Actions

No further actions were required to address the findings of the review.

**The review was completed in September 2022.**
