
Atlin Taku Land Use Plan
Map 17: Projected Persistent Alpine

- Projected Persistent Alpine
- General Management Direction Area
- Atlin Taku Land Use Plan Boundary
- Existing Parks and Protected Areas
- Roads - Deactivated
- Roads - Loose
- Roads - Paved

NOTE: Persistent Alpine areas are the portions of current alpine areas (defined as the Coastal Mountain-Heather Alpine (CMA) and Boreal Altai Fescue Alpine (BAFA) biogeoclimatic zones in the Atlin Taku that are projected to continue to have a sufficiently cold, windy and snowy climate that alpine vegetation and soils will persist 50 years or so in the future (based on projected Mean Annual Temperature increase of 3 degrees Celsius, and in consideration of local climate and topography).

PLEASE NOTE: The mapped information has been developed at a strategic scale. All data is subject to change. Maps may be amended or updated over time to reflect new information. For more information, see the Atlin Taku Land Use Plan.
