Instructions

Use this form if you manufacture natural gas in, or import natural gas into, B.C. and use it in a stationary internal combustion engine. You can also use this form for natural gas that you purchase in B.C. and use in a stationary internal combustion engine.

If you purchase natural gas, you are required to pay 7% provincial sales tax (PST) plus the 0.4% ICE Fund tax on the purchase price of the natural gas, unless a specific exemption applies. However, if you use this natural gas in a stationary internal combustion engine, you may be eligible for a refund of tax or be required to self-assess additional tax depending on the amount of PST paid.

Natural gas is exempt when purchased for use in motor vehicles and other equipment designed to be self-propelled on land.

Effective July 1, 2015, this return and remittance are due the last day of the month following the month the natural gas was used, unless you are registered as a self-assessor with the ministry and have been assigned a different filing frequency. If you have a quarterly or annual filing frequency, this return and remittance are due on the last day of the month following the end of the reporting period in which the natural gas was used.

If you identify an error in a tax return from a previous reporting period, **you must submit an amended return** for that period.

Part 2 – Fuel Activity

All fuel volumes must be reported and rounded to the nearest whole number (e.g. 1.49 becomes 1 and 1.5 becomes 2). **Do not input decimals into the return.**

- 1) Stationary Compressors** – Report all natural gas used, including natural gas purchased and used in compressors that compressed natural gas at the following locations:
- | | | |
|--|--------|-----------------------------------|
| a) Outside of the natural gas processing plant used to move marketable gas in or out of storage facilities, or from the gas processing plant to market; | → | 1.9 cents for every 810.32 litres |
| b) Within the natural gas processing plant used to compress marketable gas ; | → | 1.1 cents for every 810.32 litres |
| c) Within the gas processing plant or between a gas processing plant and a well and used to transmit waste gas (composed primarily of hydrogen sulphide and carbon dioxide) from the processing plant to the well, or;
Located at the well head and used to inject waste gas into a depleted well for permanent disposal, or;
Located at the well head, along the pipeline between the well head and the processing plant, or within the gas processing plant and used to compress gas that is not marketable gas . | }
} | Exempt |
- 2) Stationary Pumps** – Report all natural gas used, including any natural gas purchased and used in pumps that pump oil at the following locations:
- | | | |
|---|---|-----------------------------------|
| a) Along pipelines that move oil from the well head to the oil processing plant, from the oil processing plant to market, or in or out of storage facilities; | → | 1.9 cents for every 810.32 litres |
| b) At the well head or within the oil processing plant. | → | 1.1 cents for every 810.32 litres |
- 3) Other Stationary Engines** – Report all natural gas used, including any natural gas purchased and used in stationary internal combustion engines other than the compressors and pumps listed above (e.g. a natural gas engine used to generate electricity).
- | | | |
|--|---|-----------------------------------|
| | → | 1.1 cents for every 810.32 litres |
|--|---|-----------------------------------|

Line 14: Enter the dollar amount of any PST paid on natural gas you purchased that was used in any stationary compressors, stationary pumps, or other stationary engines.

Line 15: If there is a net amount payable, include a cheque or money order made payable to the Minister of Finance. The ministry cannot issue a refund of less than \$10.

Part 3 – Taxpayer Certification

This form must be certified by an authorized signing authority.
