### **Balanced Budget Maintained**

The fiscal plan update in the first *Quarterly Report* highlights the capacity of the Government's balanced budget framework to absorb unanticipated events.

In 2015/16, higher expected taxation revenue has offset additional wildfire costs and lower commercial Crown corporation net income.

A significant amount of the 2015/16 revenue improvement is one-time, with only a portion of the impact carrying forward into 2016/17 and 2017/18. Taxation improvements over the fiscal plan period relate primarily to personal and corporation income tax revenues increasing by \$751 million due to the impact of higher tax assessments, as well as higher property transfer taxes totalling \$353 million.

Over the three years, natural resource revenue is \$281 million lower than the *Budget 2015* projections reflecting expected weaker economic growth in some of BC's major trading partners and a lower outlook for commodity prices and markets.

Projections of federal government transfers and other revenue remain fairly constant over the fiscal plan period, with a reduction in the first year offset by an increase in 2016/17 and 2017/18.

Changes to the commercial Crown corporation income projections are primarily due to a downward revision in ICBC's outlook across the fiscal plan period in response to higher claims costs. Government is engaged with ICBC in reviewing the underlying trends in order to mitigate the cost pressure's impact.

Revenue improvements in 2015/16 are offset by significant statutory spending pressures, mainly as a result of the 2015 wildfire season. Firefighting costs are expected to reach \$380 million this year due to exceptionally dry conditions. The initial \$63 million is funded from the Direct Fire vote with the remainder funded from standing statutory appropriations. Other statutory spending is due to government's share of the unfunded liability in the Teachers' Pension Plan, emergency program flood-related costs and other pressures.

The projected revenue improvements are supplemented by projected savings in debt servicing costs. Cumulative lower interest costs of \$478 million over the fiscal plan period are anticipated due to lower opening debt levels following 2014/15, a downward revision in the interest rates, and improved timing of debt issuances.

The fiscal plan also includes increases in refundable tax credit transfers totalling \$121 million over the three year period, with the increase due primarily to film tax credits.

In response to potential risks, uncertainty and volatility, government is increasing the level of prudence over the fiscal plan period. The forecast allowance has been increased by \$150 million in 2016/17 and 2017/18. As well, the Contingencies vote allocation has increased by \$50 million in 2016/17 and \$100 million in 2017/18.

### **Modest Economic Growth**

The Ministry of Finance forecasts BC's real GDP to grow by 2.0 per cent in 2015, a 0.3 percentage point reduction from *Budget 2015*, followed by growth of 2.4 per cent in 2016 and 2.3 per cent per year in the medium-term – unchanged from the previous forecast.

#### **BC GDP outlook**

The Ministry's forecast for BC's real GDP growth of 2.0 per cent in 2015 is slightly lower than the 2.3 per cent projected in *Budget 2015*, as year-to-date data for BC employment and exports are somewhat softer than expected earlier this year. However, many indicators of BC's economic performance so far in 2015 show stable domestic activity relative to the same period of 2014, and retail sales and housing starts are performing better than expected compared to *Budget 2015*.

The Ministry's outlook for BC's real GDP growth remains prudent relative to the private sector, being 0.2 percentage points lower in 2015 and 0.3 percentage points lower in 2016 than the current average outlook of six private sector forecasters (a subset of the Economic Forecast Council).

#### **Ministry outlook compared to private sector**

This prudence acknowledges the downside risks to the economic forecast and is one of the levels of prudence built into the fiscal plan. Downside risks to BC's economic outlook include the potential for a slowdown in domestic and US activity, ongoing fragility in Europe, and slower than anticipated Asian demand, particularly in China. Additional risks include a fluctuating Canadian dollar and weak inflation.

### **Capital Spending**

Taxpayer-supported capital spending is financed by provincial borrowing, funding provided by third parties and from agencies' internal cash flows. Capital spending on hospitals, education facilities, transportation infrastructure, housing and other projects will total \$11.5 billion over the fiscal plan period.

Self-supported infrastructure spending, mainly related to electrical generation, transmission and distribution projects, is forecast to be \$8.0 billion over the next three years.

### **Strategic Debt Management**

Total provincial debt is projected to increase by \$6.1 billion to \$69.0 billion by 2017/18. The rate of growth in total debt has dropped on average by 0.2 percentage points over the fiscal plan period. The ending balance reflects a reduction of \$5.7 billion to direct operating debt. By 2017/18, direct operating debt is forecast to be \$3.6 billion, its lowest level since 1985/86.

The above improvements are primarily due to government's debt management strategy. Government significantly exceeded its debt management targets in 2014/15, resulting in improvements in both the debt to GDP and debt to revenue ratios than forecast for that year in *Budget 2015*. The first *Quarterly Report* extends this improvement with reductions in both ratios by the end of the fiscal plan period. Debt to GDP is down 0.4 percentage points, and debt to revenue is now down 3.2 percentage points.

### **Continuing debt affordability trend**

### **Risks to the Fiscal Plan**

The main risks to the government's fiscal plan include:

- risks to the BC economic outlook, largely due to the continued uncertainty surrounding global economic activity;
- assumptions underlying revenue and Crown corporation forecasts such as economic factors, commodity prices and weather conditions;
- potential changes to federal transfer allocations, cost-sharing agreements with the federal government and impacts on the provincial income tax bases arising from federal tax policy and budget changes; and
- utilization rates for government services such as health care, children and family services, and income assistance.

Government incorporates four main levels of prudence in its projections to mitigate the risks to the fiscal plan:

- The Ministry outlook for BC's real GDP growth is lower than the current private sector average outlook.
- The natural gas revenue forecast continues to incorporate a prudent price forecast that is within the 20<sup>th</sup> percentile of the private sector forecasts.
- Government has maintained a forecast allowance of \$250 million in 2015/16, increasing to \$500 million in each of 2016/17 and 2017/18 noted above to assist in managing ongoing revenue volatility.
- The updated fiscal plan includes Contingencies vote allocations of \$350 million in 2015/16, increasing to \$450 million in 2016/17 and \$500 million in 2017/18, to help manage unexpected pressures and fund priority initiatives.

### **Conclusion**

Government's balanced budget framework, built on four levels of prudence, has demonstrated the ability to withstand unanticipated events.

Revenue improvements in the near term have more than offset the demands on government finances from an unusually expansive wildfire season. However, the current year revenue improvements also highlight the potential volatility in government's revenue sources.

Economic growth is modest, with employment growth and exports somewhat softer than what was projected earlier in the year. Government's updated

real GDP forecast for 2015 shows a 0.3 percentage point reduction from *Budget 2015*, while the projections for next year and the medium term remain unchanged.

Finally, government is continuing to invest in a robust infrastructure program over the next three years; and is focussing on strategic debt management in order to achieve lower costs, maintain debt affordability and support a AAA credit rating.

# PART ONE – UPDATED 2015/16 FINANCIAL FORECAST

## Introduction

**Table 1.1 2015/16 Forecast Update**

(\$ millions)	Budget 2015	First Quarterly Report
Revenue .....	46,365	46,739
Expense .....	(45,831)	(46,212)
<b>Surplus before forecast allowance .....</b>	<b>534</b>	<b>527</b>
Forecast allowance .....	(250)	(250)
<b>Surplus .....</b>	<b>284</b>	<b>277</b>
<b>Capital spending:</b>		
Taxpayer-supported capital spending .....	3,731	3,867
Self-supported capital spending .....	2,518	2,537
	<b>6,249</b>	<b>6,404</b>
<b>Provincial Debt:</b>		
Taxpayer-supported debt .....	43,182	42,325
Self-supported debt .....	22,528	22,189
<b>Total debt (including forecast allowance) .....</b>	<b>65,960</b>	<b>64,764</b>
<b>Taxpayer-supported debt-to-GDP ratio .....</b>	<b>17.4%</b>	<b>17.2%</b>
<b>Taxpayer-supported debt-to-revenue ratio .....</b>	<b>95.4%</b>	<b>92.5%</b>

The first quarter fiscal outlook for 2015/16 forecasts a surplus of \$277 million – \$7 million lower than the projection in *Budget 2015*. The revised outlook reflects a \$374 million increase in revenue mainly due to higher taxation revenues offset by a \$381 million increase in expense mainly due to wildfire statutory costs.

**Chart 1.1 2015/16 surplus forecast decreased**

Projected taxpayer-supported capital spending has increased by \$136 million for 2015/16, mainly due to higher routine capital maintenance spending by health authorities as well as increased spending by post-secondary institutions' funded internally, partially offset by lower spending in transit and other areas. The \$19 million increase in self-supported capital spending is due to project scheduling changes on the Port Mann Bridge/Highway 1 project.

Total debt is down \$1.2 billion compared to *Budget 2015*, with much of the reduction resulting from stronger than expected 2014/15 results. The taxpayer-supported debt forecast is \$857 million lower, primarily reflecting continued success in government's ongoing debt management strategy. Similarly, self-supported debt is forecast to be \$339 million lower than budget, mainly due to lower borrowing in 2014/15.

**Table 1.2 2015/16 Forecast – Changes from *Budget 2015***

(\$ millions)	Q1 Update
<b>2015/16 surplus – <i>Budget 2015</i> (February 17, 2015)</b>	<b>284</b>
<b>Revenue changes:</b>	
Personal income tax – mainly higher 2014 tax assessments	246
Corporate income tax – increased prior-year adjustment, reflecting higher 2014 tax assessments, partially offset by lower federal government instalments	128
Provincial sales tax – carryforward impact of higher 2014/15 sales revenue results	40
Property transfer tax – stronger year-to-date sales results	200
Other taxation sources	(24)
Natural gas royalties – lower prices, partially offset by lower utilization of royalty programs	(124)
Coal, metals and minerals – mainly lower coal prices and production	(20)
Forests – mainly higher SLA border and logging tax revenue	45
Other natural resources	4
Fees, investment earnings and miscellaneous sources – lower revenue from investment earnings and miscellaneous revenue partly offset by higher fee revenue	(50)
Health and social transfers – lower entitlement for prior years	(11)
Other federal government transfers – improved transfers to taxpayer supported Crowns and SUCH sector entities	19
Commercial Crown agencies operating results:	
ICBC – mainly increased claims costs	(101)
Other commercial Crown agencies changes	22
<b>Total revenue changes</b>	<b>374</b>
<b>Less : expense increases (decreases):</b>	
Consolidated Revenue Fund changes:	
Statutory spending:	
Direct fire-fighting costs	317
Emergency program flood-related costs	13
Teachers' Pension Plan liability adjustment	60
BC Training and Education Savings grant – higher anticipated eligibility	9
Elections BC	3
Refundable tax credit transfers	65
Management of public debt (net) – reflects lower interest rates and revisions to scheduled borrowing	(78)
Spending funded by third party recoveries	(38)
(Increase) decrease in operating transfers to service delivery agencies	(30)
Changes in spending profile of service delivery agencies:	
School districts	(3)
Universities	23
Colleges	11
Health authorities and hospital societies	75
Other service delivery agencies	(46)
<b>Total expense increases (decreases)</b>	<b>381</b>
<b>Total changes</b>	<b>(7)</b>
<b>2015/16 surplus – first Quarterly Report</b>	<b>277</b>

As a result of the reduced debt levels and higher forecasted revenues, the taxpayer-supported debt to revenue ratio is now projected to be 92.5 per cent – 2.9 percentage points lower than budget. Lower forecasted debt levels also improve the debt to GDP ratio by 0.2 percentage points compared to *Budget 2015*, and is now forecasted to end the year at 17.2 per cent.

The forecast allowance has been left unchanged at \$250 million, reflecting continuing volatility in a number of revenue sources (e.g. corporate income tax, natural resource revenues, and commercial Crown net income) and other potential risks.

## Revenue

Revenue for 2015/16 is forecast to be \$46.7 billion – \$374 million higher than the projection in *Budget 2015*. The improvement reflects additional revenue from taxation sources, partially offset by reductions in natural resource revenue, commercial Crown corporation net income and other taxpayer-supported revenue sources.

**Chart 1.2 2015/16 revenue forecast increased**

Detailed revenue projections are disclosed in Table 1.6, and key assumptions and sensitivities relating to revenue are provided in Appendix Table A1. Major changes from *Budget 2015* include the following:

### Income tax revenue

Personal income tax revenue is up \$246 million, as stronger 2014 tax assessments are partly offset by lower 2015 and 2016 household income growth assumptions. The increased revenue includes a one-time \$159 million prior-year adjustment related to 2014/15.

Corporate income tax revenue is up \$128 million mainly due to an assumed higher prior year settlement payment, reflecting stronger 2014 tax assessment results.

**Consumption and other tax revenue**

Provincial sales tax revenue is up \$40 million mainly reflecting final 2014/15 results, consistent with higher growth in consumer and business investment expenditures.

Property transfer tax revenue is up \$200 million due to continued strength in the housing market.

Other taxation revenues are down \$24 million.

**Natural resources revenue**

Revenue from natural gas royalties is down \$124 million due to a 19.1 per cent decrease in the average natural gas price, partially offset by lower utilization of royalty programs and infrastructure credits.

Columbia River Treaty electricity sales revenue is up \$28 million due to higher electricity prices.

Revenue from coal, metals and minerals is down \$20 million mainly due to the effects of lower coal prices and production, reflecting weaker market conditions.

Revenue from sales of Crown land tenures is down \$18 million due to the effect of weaker bid prices and auctioned land volumes.

Forest revenue is up \$45 million reflecting higher border taxes collected under the *Softwood Lumber Agreement* and higher logging tax revenue, partially offset by the impacts of lower harvest volumes and lumber prices.

Other natural resource revenue changes result in a net decline of \$6 million.

**Other revenue**

Revenue from fees, licenses, investment earnings and other miscellaneous sources is down \$50 million mainly due to lower investment earnings and miscellaneous revenue sources, partly offset by higher fee revenues mainly in the SUCH sector entities.

**Federal government transfers**

Canada Health and Social Transfers are down \$11 million, mainly reflecting lower Canada Health Transfer entitlement for 2013/14. Other federal government contributions are expected to be up \$19 million due to increased transfers to taxpayer-supported Crown corporations and SUCH sector entities.

**Commercial Crown corporations**

The outlook for commercial Crown corporation net income is \$79 million lower mainly reflecting changes in the forecasts from ICBC and LDB.

- ICBC's net income projections reflect a \$101 million reduction due to increasing claims costs. Government is engaging with the corporation to review the updated projection and options to mitigate impacts.
- The LDB forecast is up \$19 million due to higher sales volumes across product lines.

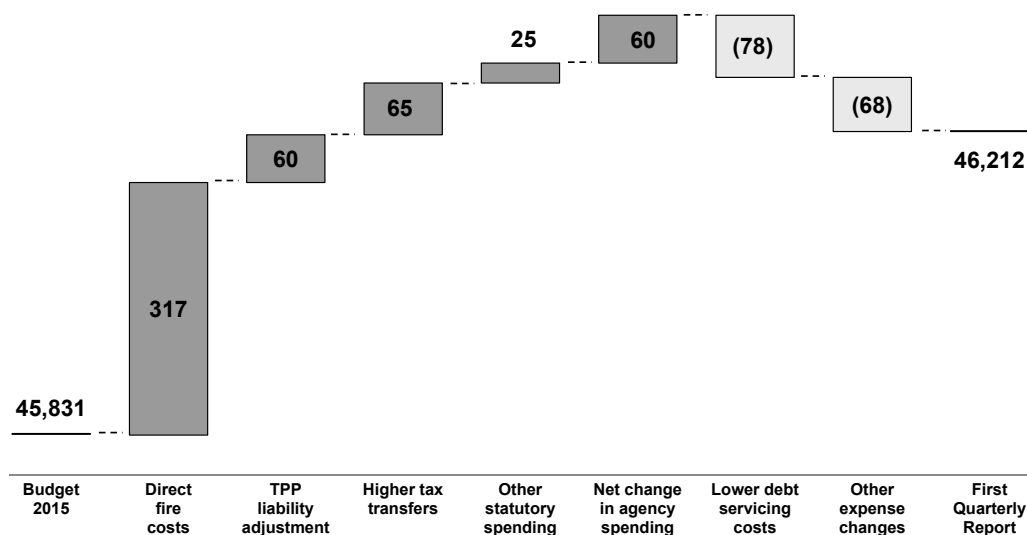

## Expense

The government spending forecast for 2015/16 is \$381 million higher compared to the projection in *Budget 2015* mainly due to statutory spending for direct fire costs.

### Chart 1.3 2015/16 expense forecast increased

\$ millions

Total expense increased by \$381 million

### Consolidated Revenue Fund (CRF) spending

Statutory spending is projected at \$467 million in 2015/16, including the following:

- \$317 million for direct fire costs – this is in addition to the \$63 million in the Direct Fire Vote in the 2015/16 *Estimates*. Overall, firefighting costs are projected to reach \$380 million this year.
- \$60 million for the Teachers' Pension Plan liability accrual – recent actuarial valuations have disclosed the TPP is in an unfunded liability position, and employee/employer contributions have been increased to address the issue. Current accounting standards require government to track the status of its share of the unfunded liability on an ongoing basis until it is addressed. This tracking process takes a number of years, and the unfunded liability will begin to decline in future years as the increased contributions take effect.
- \$13 million for emergency program flood-related costs.
- \$9 million for additional grants from the BC Training and Education Savings Program (formerly the Children's Education Fund) to reflect higher projected eligibility under the program.
- \$3 million for Elections BC costs related to the Metro Vancouver transit plebiscite.
- \$65 million increase in refundable tax credit transfers, mainly under the film tax credit program.

Other CRF spending changes include a \$78 million reduction in debt servicing costs due to lower debt levels, a reduced interest rate forecast, and improved timing of borrowing.

**Contingencies**

The Contingencies vote allocation of \$350 million for 2015/16 is unchanged from *Budget 2015*. Contingencies are intended to help manage unexpected cost pressures and fund priority initiatives as they arise.

***Spending recovered from third parties***

Spending funded by third parties is forecast to fall by \$38 million due to lower interest costs recovered from Crown agencies. This is fully offset by lower investment earnings resulting in no impact on the projected surplus.

***Operating transfers to service delivery agencies***

Operating transfers to service delivery agencies are forecast to be \$30 million higher mainly due to adjustments to projected health organization allocations in response to spending forecast changes noted below.

***Service delivery agency spending***

Service delivery agency spending is forecast to increase by \$60 million.

- School district spending is forecast to be virtually unchanged with only a \$3 million reduction overall on total spending of \$5.8 billion.
- Post-secondary sector spending is \$34 million higher due to higher estimates for grants to third parties.
- Health authority and hospital society spending is forecast to be up \$75 million, mainly due to negotiated salary and benefits cost increases. These increases are projected to be funded by additional provincial grants within the ministry's budget allocation.
- Other service delivery agency spending is revised downward by \$46 million mainly due to lower spending in the transportation sector.

Detailed expense projections are disclosed in Table 1.7. Key spending assumptions and sensitivities are provided in Appendix Table A3.

**Government employment (FTEs)**

The projection of government employment for 2015/16 has been increased by 120 full time equivalents due to increased staffing requirements related to direct forest fire fighting. The projections for 2016/17 and 2017/18 remain unchanged from *Budget 2015*. Further details on FTEs are provided in Appendix Table A9.

## Provincial capital spending

Capital spending is projected to total \$6.4 billion in 2015/16 – \$155 million higher than the forecast in *Budget 2015* (see Tables 1.3 and 1.9).

**Table 1.3 2015/16 Capital Spending Update**

(\$ millions)	Q1 Update
<b>2015/16 capital spending – <i>Budget 2015</i> (February 17, 2015)</b> .....	<b><u>6,249</u></b>
<b>Taxpayer-supported changes:</b>	
Primarily higher routine capital maintenance spending by health authorities .....	109
Additional self-funded post-secondary institution spending .....	103
Lower BC Transit spending due to timing delays .....	(60)
Other net adjustments to capital schedules .....	(16)
Total taxpayer-supported .....	<u>136</u>
<b>Self-supported changes:</b>	
Project scheduling changes on the Port Mann Bridge/Highway 1 .....	19
<b>Total changes</b> .....	<b><u>155</u></b>
<b>2015/16 capital spending – first <i>Quarterly Report</i></b> .....	<b><u>6,404</u></b>

Taxpayer-supported capital spending is projected at \$3.9 billion. The \$136 million increase since *Budget 2015* is mainly due to health authorities increasing their self-funded capital envelope for facility lifecycle maintenance. In addition, post-secondary institutions have increased forecasted self-funded capital spending reflecting timing delays from 2014/15. These spending impacts are partially offset by lower spending as a result of net adjustments to other construction schedules, mainly in the transportation sector.

At \$2.5 billion, self-supported capital spending is up \$19 million from *Budget 2015* with the increase due to trailing costs from 2014/15 relating to the completion of the on-corridor Port Mann Bridge/Highway 1 project.

### *Projects over \$50 million*

Capital spending projects greater than \$50 million are presented in Table 1.10. Since *Budget 2015* a new \$85 million transportation project has been added to construct an interchange at the Highway 1–Admirals Road/McKenzie Avenue intersection in Victoria.

The following projects have been completed since *Budget 2015* and are no longer listed in the table:

- South Fraser Perimeter Road construction;
- Sierra-Yoyo-Desan Road upgrade; and
- Integrated Case Management System development and implementation.

Changes since *Budget 2015* for eight existing projects include:

- Allocation of costs between direct procurement and P3 contract components were established for the Emily Carr University of Art and Design campus redevelopment project. Overall cost of the project remains unchanged.
- The Northern Cancer Control Strategy was completed \$5 million under budget.

- The completion date for the Queen Charlotte/Haida Gwaii Hospital has been extended to 2016 from 2015.
- Allocation of costs between direct procurement and P3 contract components were revised for the Evergreen Line Rapid Transit project. Overall cost of the project remains unchanged.
- BC Hydro's Vancouver City Central transmission project increased \$1 million. The project is in service and only minor trailing costs remain. The project will be completed \$29 million under budget.
- Total estimated cost for the Iskut extension project has decreased \$40 million reflecting lower construction costs for the substation and distribution line portions of the project.
- The completion date for the Dawson Creek/Chetwynd area transmission project has been extended to 2016 due to delayed delivery of power poles and station design changes.
- BC Lotteries' gaming management system project decreased by \$4 million. The project is in service and only minor trailing costs remain.

## Provincial debt

The provincial debt, including a \$250 million forecast allowance, is projected to total \$64.8 billion by the end of the fiscal year – \$1.2 billion lower than the projection in *Budget 2015*. This reduction in debt is due to a combination of lower 2014/15 debt levels compared to the *Budget 2015* forecast, and anticipated reductions in the 2015/16 fiscal year relating mainly to balance sheet management and CRF improvements.

**Table 1.4 2015/16 Provincial Debt Update**

(\$ millions)	Q1 Update
<b>Budget 2015 projection</b> .....	<b>65,960</b>
<b>Taxpayer-supported changes:</b>	
Government operating:	
– lower debt level from 2014/15 .....	(161)
– higher opening cash balance .....	(421)
– higher revenue cash receipts .....	(112)
– other changes .....	(51)
Total operating debt changes .....	(745)
Capital debt:	
– Net reduction due to lower 2014/15 debt levels and timing changes .....	(125)
– lower contributions from external parties .....	108
– increase in internal financing .....	(95)
Total capital debt changes .....	(112)
<b>Total taxpayer-supported</b> .....	<b>(857)</b>
<b>Self-supported changes:</b>	
– lower debt level from 2014/15 .....	(388)
– higher capital spending .....	19
– decrease in internal financing .....	30
<b>Total self-supported</b> .....	<b>(339)</b>
<b>Total changes</b> .....	<b>(1,196)</b>
<b>First Quarterly Report</b> .....	<b>64,764</b>

In 2015/16, taxpayer-supported debt is projected to be \$42.3 billion – \$857 million lower than the projection in *Budget 2015*, reflecting a \$422 million reduction due to improved 2014/15 results and a further \$435 million decrease mainly due to balance sheet management and CRF improvements in 2015/16.

The decrease reflects lower direct operating debt (down \$745 million), due to a lower level carried forward from 2014/15, higher opening cash balance, higher CRF revenue cash receipts and other changes.

Forecasted borrowing for capital purposes in 2015/16 is down \$112 million from *Budget 2015*. The reduction is due to a net reduction in debt due mainly to lower debt levels in 2014/15 carrying forward as a result in timing changes on transportation projects.

As a result of the lower forecasted debt levels, government's key debt affordability measures have improved from *Budget 2015*. The taxpayer-supported debt to revenue ratio is now projected to be 92.5 per cent – a 2.9 percentage point improvement, and the debt to GDP ratio has been reduced by 0.2 percentage points to end the year at 17.2 per cent.

Self-supported debt is projected to be \$22.2 billion – \$339 million lower than the projection in *Budget 2015*, mainly due to improved 2014/15 results carrying forward into the current year.

Details on provincial debt are shown in Table 1.11.

## Risks to the fiscal forecast

There are a number of risks and pressures to the fiscal plan including risks to the BC economic outlook, which are largely due to the continued uncertainty surrounding global economic activity. Forecasted revenues, expenditures, capital spending and debt are estimates based on a number of economic, financial and external factors. Variables will change throughout the year as new information becomes available, with potentially material impacts.

Revenues can be volatile due in part to the influence of the cyclical nature of the natural resource sector in the economy. Changes in energy or commodity prices, such as natural gas and lumber, may have a significant effect on revenue and the fiscal forecast. In addition, personal and corporate income tax assessments for the 2014 tax year will not be finalized until March 2016 and could result in further revenue and tax credit transfer spending adjustments.

The spending forecast in the fiscal plan is based on ministry and service delivery agency plans and strategies. Litigation developments may occur that are beyond the assumptions used in the plan (for example, higher-than-expected volumes, or size of claim amounts and timing of judgments and settlements). Changes to planning assumptions, such as utilization or demand rates for government services in the health care, education, or community social services sectors, and costs associated with natural disaster response represent the main spending risks.

In addition, capital spending and debt figures may be influenced by a number of factors including design development, procurement activity, weather, geotechnical conditions and interest rates. As a result, the actual operating surplus, capital expenditure and debt figures may differ from the current forecast. Government will continue to update the fiscal plan throughout the year in the second and third *Quarterly Reports*.

The potential fiscal impact from these risks is covered by the \$350 million Contingencies vote and the \$250 million forecast allowance.

## Supplementary schedules

The following tables provide the financial results for the three months ended June 30, 2015 and the 2015/16 full-year forecast.

## PART TWO — ECONOMIC REVIEW AND OUTLOOK <sup>1</sup>

### Summary

The Ministry of Finance forecasts BC's real GDP to grow by 2.0 per cent in 2015, 2.4 per cent in 2016 and 2.3 per cent per year in the medium-term. These projections are prudent relative to the current private sector outlook for BC.

The Ministry's outlook for BC's real GDP growth in 2015 is 0.2 percentage points lower than the current average of six private sector forecasters (a subset of the Economic Forecast Council). For 2016, the Ministry's forecast is 0.3 percentage points below the private sector. This level of prudence acknowledges the downside risks to the forecast for both years.

**Chart 2.1 Ministry's outlook for BC prudent compared to private sector**

Sources: Ministry of Finance and Private Sector Average (Economic Forecast Council subset consisting of BMO, CIBC, IHS Global Insight, RBC, Scotiabank and TD).

Downside risks to BC's economic outlook include the potential for a slowdown in domestic and US activity, ongoing fragility in Europe, and slower than anticipated Asian demand, particularly in China. Additional risks include a fluctuating Canadian dollar and weak inflation.

### British Columbia economic activity and outlook

The Ministry's forecast for BC's real GDP growth of 2.0 per cent in 2015 is slightly lower than the 2.3 per cent projected in *Budget 2015*, as year-to-date data for BC employment and exports are somewhat softer than expected earlier this year. However, many indicators of BC's economic performance so far in 2015 show stable domestic activity relative to the same period of 2014 (see Table 2.1), and retail sales and housing starts are performing better than expected in *Budget 2015*. While private sector forecasters have also lowered their expectations for BC this year, they still expect BC economic growth to rank among the top provinces in 2015.

<sup>1</sup> Reflects information available as of August 28, 2015, unless otherwise indicated.

**Table 2.1 British Columbia Economic Indicators**

All data seasonally adjusted	Jan. to Mar. 2015	Apr. to Jun. 2015	Year-to-Date
	change from Oct. to Dec. 2014	change from Jan. to Mar. 2015	Jan. to Jun. 2015 change from Jan. to Jun. 2014
	Per cent change		
Employment .....	+0.3	-0.1	+0.4
Manufacturing shipments .....	+0.5	-2.0	+4.5
Exports .....	+1.7	+1.7	+0.6
Retail sales .....	+2.0	+2.1	+7.6
Housing starts .....	+0.5	+16.5	+14.5
Non-residential building permits .....	-38.6	+13.4	+8.7

The Ministry's forecast of 2.4 per cent growth in 2016 is unchanged from the projection that was presented in *Budget 2015*, and remains prudent versus the private sector in recognition of the potential downside risks to the economic forecast.

### Labour market

Employment activity in BC has been modest during the first seven months of 2015, as year-to-date data shows a 0.5 per cent increase relative to the same period last year. This increase translates into about 11,600 more jobs, with a gain of 39,600 jobs in full-time employment offsetting a loss of around 28,000 part-time jobs.

**Chart 2.2 BC employment**

Major year-to-date employment gains in 2015 were observed in manufacturing (+10,557 jobs) and transportation and warehousing (+10,329 jobs). Improvements in these industries helped to offset job losses in retail and wholesale trade (-9,686 jobs) and finance, insurance, real estate and leasing (-7,171 jobs) compared to the January to July period of 2014.

BC's monthly unemployment rate averaged 5.9 per cent year-to-date to July, 0.3 percentage points below its average during the same period of 2014. Meanwhile, the size of BC's labour force increased 0.3 per cent on a year-to-date basis.

## Outlook

The Ministry forecasts employment in BC to increase by 0.6 per cent in 2015, or approximately 12,800 jobs. This pace of employment growth is projected to improve next year, with an expected increase of 1.0 per cent, or about 23,800 jobs. In the medium-term, employment is forecast to rise by 1.2 per cent each year from 2017 to 2019. The province's unemployment rate is expected to reach 6.0 per cent this year, down slightly from 6.1 per cent recorded in 2014. The unemployment rate is forecast to average 6.1 per cent in 2016 and average about 6.3 per cent in the 2017 to 2019 period, as increases to BC's labour force slightly outpace employment gains.

## Consumer spending and housing

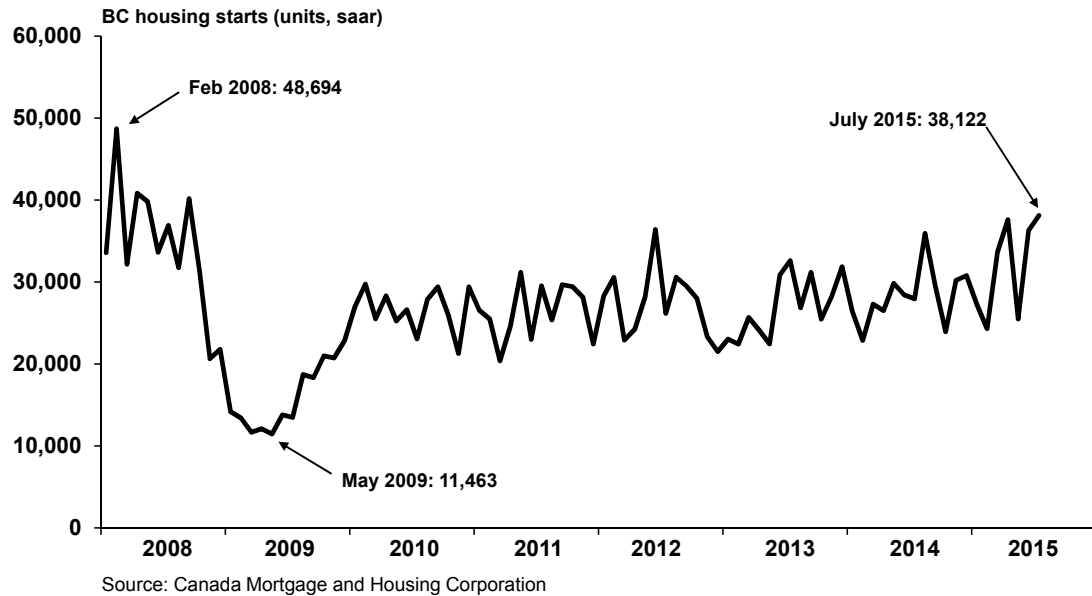

Retail sales advanced 7.6 per cent year-to-date to June 2015, boosted by notable gains at food and beverage stores, motor vehicle and parts dealers and building material and garden equipment and supplies stores. These increases worked to offset a sharp decline in sales at gasoline stations due to lower prices relative to the same period last year. In addition to domestic demand, supported by stronger interprovincial migration and low interest rates, the low Canadian dollar is also lifting sales through increased tourism.

**Chart 2.3 BC retail sales**

Following an annual gain of 4.8 per cent in 2014, BC housing starts continued to rise through the first seven months of 2015. Year-to-date to July, housing starts averaged about 31,800 annualized units, an increase of 17.7 per cent over the same period in 2014. The increase reflects solid growth in both the multiple-family and single-family components.

Residential building permits (a leading indicator of new housing activity) climbed 33.6 per cent year-to-date to June compared to the same period of 2014. Meanwhile, the value of non-residential building permits increased by 8.7 per cent compared to the first half of last year. Notable gains were observed in the commercial and industrial categories, while institutional and government permits rose at a more moderate pace during this period.

**Chart 2.4 BC housing starts**

Like new home construction, home sales in BC have benefitted from a low interest rate environment. After rising 15.2 per cent in 2014, BC home sales jumped 21.4 per cent year-to-date to July compared to the same period of 2014. This increase reflects a large monthly gain observed in February 2015. More recently, however, sales activity has moderated and home sales declined 0.2 per cent in July compared to the previous month. Meanwhile, shrinking inventory of homes for sale is putting upward pressure on prices. The average home price during the first seven months of 2015 was around \$619,700, an increase of 10.4 per cent year-to-date to July.

### *Outlook*

The Ministry forecasts real household consumption of goods and services to increase by 3.7 per cent in 2015, matching the estimated pace of growth observed in 2014. Real consumer spending is projected to increase by 2.7 per cent in 2016 and by about 2.5 per cent each year over the medium-term.

In current dollars, retail sales are expected to rise by 5.1 per cent this year, after a 5.6 per cent increase in 2014. The strong pace of retail sales growth observed so far in 2015 is expected to moderate in the coming months, given BC's current labour market conditions. Retail sales are forecast to grow by 3.8 per cent in 2016 and average 3.6 per cent growth over the medium-term.

The Ministry forecasts housing starts to total 29,000 units in 2015 and around 27,800 units in 2016. Looking further ahead, residential construction activity is expected to average around 27,100 units per year from 2017 to 2019. The outlook for housing starts is roughly in line with the average rate of construction observed over the past couple of decades.

### *Business and government*

Real business investment (including residential) is estimated to have grown by 2.4 per cent in 2014, following a decline of 0.5 per cent in 2013. The improvement in estimated investment last year is attributable to steady increases in the residential construction, machinery and equipment and non-residential construction components, as well as a strong gain in residential construction.

Total real dollar expenditures in BC by federal, provincial and municipal governments are estimated to have increased by 0.9 per cent in 2014. This follows government spending growth of 0.6 per cent in 2013.

### *Outlook*

Real business investment (including residential) is forecast to rise by 3.0 per cent in 2015, led by investment gains in residential construction and supported by investment increases in non-residential construction and machinery and equipment. For 2016 onwards, total business investment is projected to grow by an average of 3.4 per cent annually through 2019.

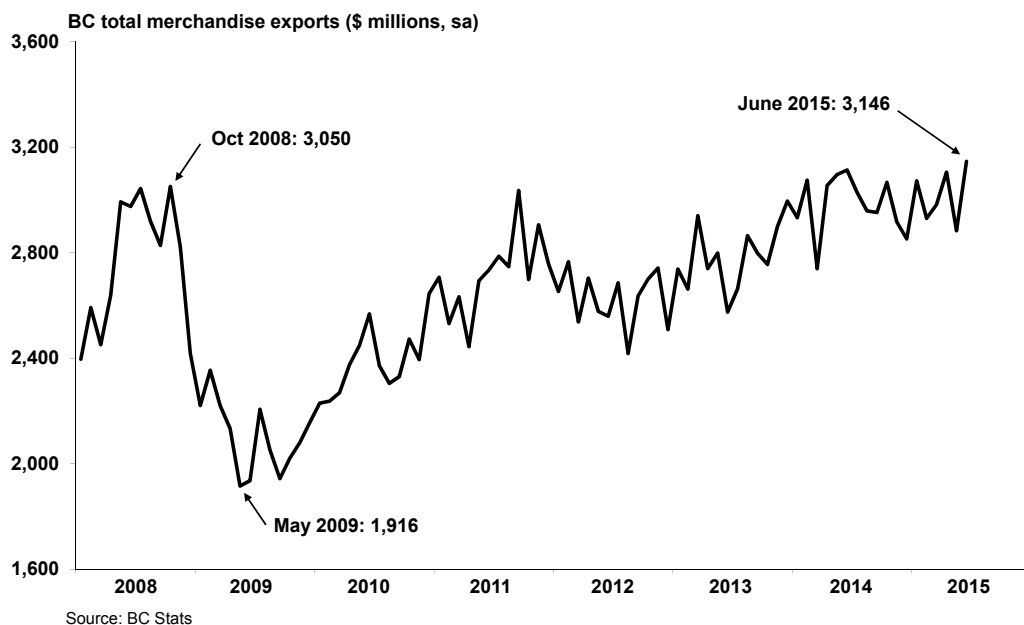

Combined real spending by the three levels of government (federal, provincial and municipal) on goods and services in BC is forecast to increase by 1.9 per cent in 2015. Government spending is then projected to rise by 1.0 per cent in 2016 followed by annual growth of about 0.9 per cent on average in the medium-term.

The Ministry projects net operating surplus (an approximation of corporate profits) to decline by 1.8 per cent in 2015, following an estimated gain of 5.9 per cent in 2014. Net operating surplus is then forecast to advance by 5.7 per cent in 2016 and average about 5.5 per cent growth per year from 2017 to 2019.

### *External trade and commodity markets*

BC's merchandise exports have moderated in recent months following two consecutive years of solid gains. Year-to-date to June 2015, the value of BC international merchandise exports rose 0.6 per cent compared to the same period of 2014. This moderation primarily reflects lower prices for metals, minerals and energy products alongside less global demand. During this period, gains in exports of forestry products and building and packaging materials (+5.9 per cent), farm, fishing and intermediate food products (+33.3 per cent) as well as consumer goods (+18.4 per cent) offset a significant decline in exports of BC's energy products (-23.6 per cent) and metal ores and non-metallic minerals (-7.8 per cent).

**Chart 2.5 BC exports**

Shipments of manufactured goods from BC improved through the first six months of 2015, up 4.5 per cent compared to the same period of the previous year. Relatively broad-based gains were observed during this period, led by food (+16.2 per cent), transportation equipment (+12.2 per cent) and wood product manufacturing (+2.6 per cent). At the same time, year-to-date declines occurred in electrical equipment, appliance and components manufacturing (-7.5 per cent), fabricated metal products (-1.0 per cent) and paper products (-0.1 per cent).

Prices for most metals and minerals fell during the first seven months of 2015 relative to the same period last year, primarily due to softer demand in China. Year-to-date to July, significant declines occurred in prices for gold (-7.7 per cent), silver (-19.2 per cent), copper (-16.1 per cent), lead (-12.1 per cent), nickel (-21.2 per cent), and molybdenum (-35.4 per cent). In contrast, the average price for zinc rose by 1.0 per cent during this period.

After beginning 2015 at \$332 US/000 board feet in January, the monthly price of SPF lumber fell steadily over four consecutive months before recovering somewhat to average \$301 US/000 board feet in July. Year-to-date to July, the price of lumber averaged \$294 US/000 board feet – a decline of 17.2 per cent compared to the first seven months of 2014.

The price of pulp edged lower through the first five months of 2015, before stabilizing at \$850 US per tonne in May. Year-to-date to July, the price of pulp averaged \$867 US per tonne, down 5.8 per cent compared to the same period of 2014.

Oil prices dropped more than 50 per cent from mid-June 2014 through early 2015 and have fluctuated around historically low levels in recent months as a global glut of oil supply continues to outweigh slowing demand. The daily West Texas Intermediate (WTI) oil price averaged just \$52.89 US per barrel year-to-date to July, down from \$101.43 US per barrel during the same period of 2014. Meanwhile, the price of natural gas has declined since early 2015. The Plant Inlet price averaged \$1.46 C/GJ year-to-date to July – down significantly from the \$3.57 C/GJ observed during the same period a year ago.

### *Outlook*

Given less global demand, real exports of goods and services are forecast to decline by 0.7 per cent in 2015, following an estimated annual gain of 2.3 per cent in 2014. The pace of real export growth is projected to pick up in 2016, alongside gradual improvements in the global economy, to reach 2.8 per cent growth. Over the medium-term, real exports are forecast to average around 2.9 per cent growth annually.

Commodity prices may be volatile in the near-term due to ongoing global economic uncertainty, the potential for further slowing of the Chinese economy, and fluctuations in petroleum markets.

The price of Western spruce-pine-fir (SPF) lumber is forecast to average \$300 US/000 board feet this year — down from the \$353 US/000 board feet recorded in 2014. Lumber prices are anticipated to improve to \$321 US/000 board feet in 2016 and then increase to average \$325 US/000 board feet through the medium-term.

The price of natural gas is expected drop to \$1.69 C/GJ this fiscal year and then rise gradually over the rest of the forecast horizon to reach \$2.46 C/GJ in 2017/18.

---

## ***Demographics***

BC's population grew 1.1 per cent in the January to March quarter of 2015 compared to the same period of 2014. During this quarter, BC saw a net inflow of 6,121 people, as the province welcomed 2,315 people from other countries and 3,806 people from other provinces.

### *Outlook*

The forecast calls for BC's July 1<sup>st</sup> population to increase by 1.2 per cent in both 2015 and 2016, to reach a total of 4.69 million people and 4.74 million people, respectively. Over the medium-term, the province's population growth is projected to average 1.3 per cent per year from 2017 to 2019.

Total net migration is forecast to expand in 2015 to reach a net inflow of about 45,200 persons. Net entry of about 12,500 people from other provinces is forecast in 2015, along with an anticipated net gain of about 32,700 people from other countries. In 2016, the Ministry forecasts a total net inflow of around 47,100 individuals, followed by net inflows of about 52,000 people per year on average over the medium-term.

## ***Inflation***

Since mid-2014, the underlying pace of inflation has moderated, weighed down primarily by weaker prices for gasoline and natural gas. Consumer prices in BC rose 0.8 per cent year-to-date to July 2015 (compared to the first seven months of 2014) reflecting moderate price increases for semi-durables and services, while prices for durable and non-durable goods remained relatively flat. Higher prices for clothing and footwear boosted the overall rise in the semi-durable component. At the same time, higher prices for non-durable items such as food worked to offset significant declines in gasoline and natural gas prices during this period. The aggregate price for durable goods was up slightly compared to the first seven months of 2014, partially due to higher vehicle costs. Meanwhile, price increases for services were broad-based, including categories such as water, property taxes, home and mortgage insurance as well as food purchased from restaurants.

### *Outlook*

The lower price of fuel continues to dampen inflation. As such, BC's consumer price inflation is forecast to be 1.1 per cent in 2015 and 1.9 per cent in 2016. In the medium-term, inflation is expected to average 2.0 per cent per year. By comparison, the Canadian rate of inflation is assumed to be 1.2 per cent in 2015 and then increase to 2.0 per cent annually from 2016 to 2019 (in line with the Bank of Canada's inflation target).

## Risks to the economic outlook

Risks to the BC economic outlook continue to be weighted to the downside. The main risks to the current outlook include the following:

- potential for a slowdown in domestic economic activity, such as modest employment growth;
- renewed weakness in the US economic recovery, particularly as interest rates increase;
- fragility in Europe as governments and the financial system deal with elevated sovereign debt alongside a weak economic recovery;
- slower than anticipated economic activity in Asia, particularly in China, resulting in weaker demand for BC's exports and downward pressure on global commodity prices;
- weaker than expected inflation; and
- exchange rate volatility.

## External outlook

### United States

US real GDP grew by an annualized 3.7 per cent in the April to June quarter of 2015, following a slow start to the year with 0.6 per cent growth recorded in the January to March quarter (largely due to another severe winter, disruptions at West Coast ports and the impact of a stronger US dollar on exports). The increase in real GDP in the second quarter reflected broad-based gains, supported by consumer spending, state and local government spending, exports and non-residential investment. The US Bureau of Economic Analysis also released revisions to real GDP data for the last four years, lowering average annual growth for the 2011 to 2014 period to 2.0 per cent, down from the previous estimate of 2.3 per cent growth.

**Chart 2.6 US economic growth**

Source: US Bureau of Economic Analysis; \* Second estimate, subject to revision

US employment continued to rise through the first seven months of 2015, with about 211,300 jobs created on average each month, resulting in a 2.2 per cent increase year-to-date to July. After beginning the year at 5.7 per cent in January, the US unemployment rate gradually decreased to 5.3 per cent in July, alongside falling labour force participation. The labour force participation rate was 62.6 per cent in July, holding steady at the lowest monthly participation rate since 1977. Furthermore, wage growth has been marginal in recent months, an indication of ongoing slack in the US economy.

**Chart 2.7 US employment**

The American housing market continued to gradually improve through the first seven months of 2015. Following an 8.5 per cent annual gain last year, US housing starts averaged 1,087,000 annualized units year-to-date to July 2015. This represents an 11.1 per cent increase in residential construction compared to the same period last year, but is still below the historical average pace of about 1.5 million annualized starts.

**Chart 2.8 US housing starts**

US home sales have experienced uneven gains so far this year. New home sales averaged around 509,700 annualized units year-to-date to July, up 20.9 per cent over the first seven months of last year. Existing home sales averaged 5.2 million annualized units year-to-date to July, up 7.8 per cent compared to the same period of 2014. Meanwhile, national home prices are 13.4 per cent below their pre-recession peak and about 10.2 per cent of all American mortgages had negative equity (where the home value is lower than the mortgage amount owing) as of the first quarter of 2015. Despite a highly accommodative interest rate environment, the US housing market has not fully recovered. Furthermore, housing market activity may face downward pressure when interest rates rise.

US retail sales increased by 2.2 per cent year-to-date to July compared to the same period last year. Confidence among American consumers has been uneven so far this year. Most recently the Conference Board's index of consumer confidence rebounded in August to reach 101.5, up from an eight-month low of 91.0 recorded in July.

### Outlook

*Consensus Economics* forecasters have downgraded their average US economic growth forecast for 2015 since *Budget 2015*. The August *Consensus* survey projects growth of 2.3 per cent for 2015, down from the 3.2 per cent growth expected in January. *Consensus* analysts cited weaker-than-expected economic activity in the first quarter of the year and noted reduced investment (particularly in the energy sector). The August *Consensus* forecasts US real GDP growth to be 2.7 per cent in 2016, down slightly from the January projection of 2.8 per cent growth.

**Chart 2.9 Consensus outlook for the US in 2015**

Source: Consensus Economics

The chart above represents forecasts for real GDP growth in 2015 as polled on specific dates. For example, forecasters surveyed on January 13, 2014 had an average 2015 US growth forecast of 3.0 per cent, while on August 10, 2015 they forecast 2015 US growth at 2.3 per cent.

In acknowledgement of downside risks, the Ministry's growth assumptions are lower than the August *Consensus*, with the Ministry assuming that the US economy will expand by 2.1 per cent in 2015. The Ministry expects US real GDP to steadily increase by 2.5 per cent annually in the 2016 to 2019 period.

**Table 2.2 US real GDP forecast: Consensus vs Ministry of Finance**

	2015	2016
	Per cent change in real GDP	
Ministry of Finance .....	2.1	2.5
<i>Consensus Economics</i> (August 2015) .....	2.3	2.7

## Canada

Weaker commodity prices have taken a toll on Canada's economy so far in 2015. Following annualized growth of 2.2 per cent in the fourth quarter of 2014, Canadian real GDP contracted by an annualized 0.6 per cent in the January to March quarter of 2015 – the weakest quarterly performance since mid-2009. The decline was attributable to a reduction in business investment and private consumption of goods. Exports also negatively impacted growth, falling for a second consecutive quarter. Further, a significant amount of economic production in the first quarter went into the accumulation of inventories, which suggests a downside risk that future investment may be pulled back if businesses are unable to sell excess stock.

Domestic economic activity has been mixed so far this year. The labour market has been relatively weak across Canada so far this year with Canadian employment increasing by a modest 0.9 per cent (or 152,100 jobs) year-to-date to July compared to the same period a year ago. After beginning the year at 6.6 per cent in January, the national unemployment rate ticked up to 6.8 per cent, where it has remained for six consecutive months. On a year-to-date basis, the national unemployment rate is down from the 7.0 per cent average observed during the same period in 2014. Retail sales grew by 2.2 per cent year-to-date to June compared to the first six months of last year. Meanwhile, national housing starts declined by 1.7 per cent year-to-date to July to average around 185,300 annualized units. Home sales increased by 5.4 per cent during the same period (despite two consecutive monthly declines in June and July) and the average home price rose 7.9 per cent.

Softer global demand and weak commodity prices during the first half of 2015 led to a 2.6 per cent decline in the value of Canadian merchandise exports compared to the same period in 2014. A sharp decline in the value of energy product exports (-29.2 per cent) more than offset otherwise broad-based gains across export categories year-to-date to June. In addition, shipments of Canadian manufactured goods fell 1.5 per cent year-to-date to June compared to the same period of last year.

## Outlook

Since *Budget 2015*, private sector economists have significantly lowered their forecast for the Canadian economy in 2015, citing marked weakness in industry and scaled-back investment in the energy sector. The August *Consensus* expects Canada's real GDP to grow by just 1.1 per cent in 2015, down from 2.3 per cent expected in January. For 2016, the *Consensus* is calling for 2.1 per cent growth, down 0.1 percentage points from the January publication.

**Chart 2.10 Consensus outlook for Canada in 2015**

Source: Consensus Economics

The chart above represents forecasts for real GDP growth in 2015 as polled on specific dates. For example, forecasters surveyed on January 13, 2014 had an average 2015 Canadian real GDP growth forecast of 2.5 per cent, while on August 10, 2015 they forecast 2015 Canadian real GDP to grow by 1.1 per cent.

Acknowledging the potential for renewed weakness in the US and across global economies, as well as potential for softer domestic activity, the Ministry assumes that the Canadian economy will grow by 0.9 per cent in 2015, followed by a 1.8 per cent expansion in 2016. Looking further ahead, Canadian real GDP is forecast to grow by an average of 2.2 per cent annually over the medium-term.

**Table 2.3 Canadian real GDP forecast: Consensus vs Ministry of Finance**

	2015	2016
	Per cent change in real GDP	
Ministry of Finance .....	0.9	1.8
<i>Consensus Economics</i> (August 2015).....	1.1	2.1

## Europe

The euro zone economy advanced at a modest pace through the first half of 2015. After growing by an annualized 1.5 per cent in the January to March period, euro zone real GDP rose by 1.3 per cent in the second quarter of 2015. The region's unemployment rate sat at 11.1 per cent in July, unchanged since April 2015. Further, euro zone youth unemployment remains elevated, fluctuating around 22 per cent for the first half of the year. Industrial production in the region has weakened, posting monthly declines in three of the last four months. Furthermore, in July the European Central Bank (ECB) cautioned that volatility in Chinese markets may have a larger-than-expected adverse impact on the euro zone's fragile economy.

The ECB is expected to continue its quantitative easing program, which was introduced in January 2015 and includes the purchase of 60 billion euros worth of European assets each month, until at least September 2016. In addition, the euro benchmark interest rate will likely remain at current low levels for an extended period of time given that European inflation remains well below the central bank's target. Furthermore, fundamental challenges to the euro zone economy remain and uncertainty over financial stability in Greece continues to weigh on the outlook.

### Outlook

Private sector forecasters continue to project modest growth in the euro zone in 2015, supported by stable economic activity in core countries such as Germany and Spain. The August 2015 *Consensus* projects euro zone real GDP to grow by 1.5 per cent this year and 1.8 per cent the following year. While the outlook for 2015 is higher than expected in January, *Consensus* analysts have identified mixed data, uncertainty over demand from China, and concerns about Greece as reasons for the relatively muted growth outlook for this year. In light of the downside risks and uncertainty surrounding the euro zone outlook, the Ministry assumes euro zone real GDP growth of 1.1 per cent in 2015, followed by 1.2 per cent growth in 2016.

**Chart 2.11 Consensus outlook for the euro zone in 2015**

Source: Consensus Economics

The chart above represents forecasts for real GDP growth in 2015 as polled on specific dates. For example, forecasters surveyed on January 13, 2014 had an average 2015 euro zone growth forecast of 1.4 per cent, while on August 10, 2015 they forecast euro zone growth of 1.5 per cent in 2015.

### China

The Chinese economy has been gradually decelerating since reaching a post-recession peak of 11.9 per cent in early 2010. So far this year, China's economy expanded by 7.0 per cent in both the first and second quarters of 2015, consistent with the government's target for annual growth. However, in recent months, many of China's key economic indicators have weakened including industrial production, fixed asset investments and exports. Meanwhile, inflation has been slow in China, increasing 1.6 per cent (year-over-year) in July and is well below the government's target of around 3.0 per cent. Chinese authorities have responded to the slowdown in economic growth (and to some extent recent stock market volatility) by introducing several policy measures. For example, various infrastructure spending programs have been initiated and interest rates have been reduced

five times since November 2014 (with the latest decrease announced in August 2015). Meanwhile, the central bank recently changed its exchange rate guidance, which resulted in a depreciation of the renminbi.

### Outlook

The slowing trend in China's economy is projected to continue. The August *Consensus* forecasts China's real GDP to expand by 6.9 per cent in 2015 and 6.7 per cent in 2016. With greater potential for further slowing of the Chinese economy, the Ministry assumes that China's real GDP will expand by 6.7 per cent in 2015 and by 6.4 per cent in 2016.

## Financial markets

### Interest rates

On July 15, 2015, the Bank of Canada lowered its target for the overnight rate to 0.50 per cent from 0.75 per cent after a similar reduction in January. Lower investment spending plans by oil producers, lower exports to China and faltering non-resource exports influenced the latest decision. The Bank stated that Canadian real GDP was projected to have contracted modestly in the first half of the year, resulting in higher excess capacity and additional downward pressure on inflation. The Bank of Canada now expects inflation to remain below 2.0 per cent until early 2016, reflecting weak year-over-year gasoline price inflation.

**Chart 2.12 Interest rate forecasts**

The US Federal Reserve (Fed) has held its intended federal funds rate in the 0.00 to 0.25 per cent range since December 2008. At its July 2015 meeting, the Fed noted strengthening labour market conditions, moderate growth in household spending and improvement in the housing sector, however, the Fed cautioned that inflation continues to run below target (partly reflecting energy price declines) and business fixed investment and net exports have been soft. As such, the Fed anticipates that it will increase the target for the federal funds rate when it sees further improvement in the labour market and expects that inflation will move to its 2.0 per cent objective over the medium-term.

## Outlook

The Ministry assumes that the Bank of Canada's overnight target rate will average 0.7 per cent in 2015 and 2016. These assumptions are based on the average of six private sector forecasts as of July 20, 2015. The same six private sector forecasters anticipate that the fed funds rate will remain in the 0.00 to 0.25 per cent range until the July to September quarter of 2015. They forecast the fed funds rate to average 0.3 per cent in 2015 and 1.1 per cent in 2016.

Canadian three-month Treasury bill interest rates are expected to average 0.6 per cent in 2015 and 0.7 per cent in 2016, according to the same six private sector forecasters. Meanwhile, ten-year Government of Canada bond rates are pegged at 1.7 per cent in 2015 and 2.3 per cent in 2016 on average.

**Table 2.4 Private sector Canadian interest rate forecasts**

## Exchange rate

Weakness in the Canadian dollar has continued so far in 2015, largely owing to the sustained pullback in commodity prices alongside a gradual recovery of the US economy. The loonie averaged 80.5 US cents during the first seven months of 2015, significantly lower than the 91.5 US cents average observed during the same period last year.

**Chart 2.13 Private sector expectations for the Canadian dollar**

Sources: Bank of Canada and BC Ministry of Finance forecasts

\* Based on the average of private sector forecasts. Budget 2015 as of January 2, 2015 and First Quarterly Report as of July 20, 2015.

*Outlook*

An average of six private sector forecasts as of July 20, 2015 calls for the Canadian dollar to average 79.5 US cents in 2015 and continue to depreciate to reach 78.5 US cents in 2016. The Ministry's exchange rate outlook is based on these private sector forecasts.

# APPENDIX – FISCAL PLAN UPDATE

**Table A1 Material Assumptions – Revenue**

Revenue Source and Assumptions (\$ millions unless otherwise specified)	Budget Estimate	Updated Forecast	Plan 2016/17	Plan 2017/18	2015/16 Sensitivities
	2015/16				
<b>Personal income tax</b>	<b>\$7,948</b>	<b>\$8,194</b>	<b>\$8,172</b>	<b>\$8,520</b>	
<u>Current calendar year assumptions</u>					
Household income growth .....	3.5%	3.1%	3.6%	3.9%	+/- 1% point change in 2015 BC household income growth equals +/- \$70 to \$100 million
Compensation of employees growth .....	3.7%	3.2%	3.8%	4.0%	
Tax base growth .....	3.4%	2.6%	3.1%	3.5%	
Average tax yield .....	5.29%	5.30%	5.18%	5.22%	
Current-year tax .....	\$7,713	\$7,818	\$7,874	\$8,209	+/- 0.5 change in 2015 BC policy neutral elasticity equals +/- \$120 to \$130 million
Prior year's tax assessments .....	\$327	\$327	\$337	\$347	
Unapplied taxes .....	\$90	\$90	\$90	\$90	
BC Tax Reduction .....	-\$140	-\$147	-\$150	-\$153	
Non-Refundable BC tax credits .....	-\$66	-\$75	-\$70	-\$70	+/- 1% point change in 2014 BC household or taxable income growth equals +/- \$90 to \$100 million one-time effect (prior-year adjustment) and could result in an additional +/- \$70 to \$80 million base change in 2015/16
Policy neutral elasticity * .....	1.1	1.0	1.1	1.1	
<u>Fiscal year assumptions</u>					
Prior-year adjustment .....	—	\$159			
<u>2014 Tax-year</u>	2014 Assumptions				
Household income growth .....	3.0%	3.1%			+/- 1% change in the 2015 national tax base equals +/- \$20 to \$30 million
Tax base growth .....	1.6%	3.9%			
Average 2014 tax yield .....	5.25%	5.26%			
2014 tax .....	\$7,399	\$7,560			
2013 & prior year's tax assessments .....	\$317	\$317			+/- 1% point change in the 2015 small business share equals +/- \$20 to \$30 million
Unapplied taxes .....	\$90	\$90			
BC Tax Reduction .....	-\$133	-\$140			
Non-refundable BC tax credits .....	-\$66	-\$84			
Policy neutral elasticity * .....	0.9	1.5			
* Ratio of annual per cent change in current-year revenue to annual per cent change in personal income (calendar year).					
<b>Corporate income tax</b>	<b>\$2,630</b>	<b>\$2,758</b>	<b>\$2,867</b>	<b>\$3,074</b>	
<u>Components of revenue (fiscal year)</u>					
Instalments - subject to general rate .....	\$2,436	\$2,374	\$2,545	\$2,703	+/- 1% change in the 2015 national tax base equals +/- \$20 to \$30 million
Instalments - subject to small business rate .....	\$285	\$278	\$296	\$313	
Non-refundable BC tax credits .....	-\$105	-\$78	-\$91	-\$97	
Advance instalments .....	\$2,616	\$2,574	\$2,750	\$2,919	
<i>International Business Activity Act</i> refunds .....	-\$20	-\$20	-\$20	-\$20	+/- 1% point change in the 2015 small business share equals +/- \$20 to \$30 million
Prior-year adjustment .....	\$34	\$204	\$137	\$175	
<u>Current calendar year assumptions</u>					
National tax base (\$ billions) .....	\$287.2	\$281.6	\$294.3	\$300.4	
BC instalment share of national tax base .....	11.5%	11.5%	11.6%	12.1%	+/- 1% change in the 2014 BC tax base equals +/- \$30 to \$40 million in 2015/16
Effective tax rates (general/small business) .....	11.0 / 2.5	11.0 / 2.5	11.0 / 2.5	11.0 / 2.5	
Share of the BC tax base subject to small business rate .....	34.0%	34.0%	33.9%	33.8%	
BC tax base growth (post federal measures) .....	4.6%	0.2%	6.5%	5.5%	
BC net operating surplus growth .....	3.3%	-1.8%	5.7%	5.8%	
<u>2014 Tax-year</u>	2014 Assumptions				
BC tax base growth (post federal measures) .....	5.3%	11.3%			+/- 1% change in the 2014 BC tax base equals +/- \$30 to \$40 million in 2015/16
BC net operating surplus growth .....	5.3%	5.9%			
Gross 2014 tax .....	\$2,664	\$2,814			
Prior-year adjustments .....	\$34	\$204			
Prior years losses/gains (included in above) .....	-\$40	-\$40			
Non-refundable BC tax credits .....	-\$97	-\$77			
<p>Net cash received from the federal government and cash refunds under the <i>International BusinessActivity Act</i> are used as the basis for estimating revenue. Due to lags in the federal collection and instalment systems, changes to the BC net operating surplus and tax base forecasts affect revenue in the succeeding year. The 2015/16 instalments from the federal government reflects two-third of payments related to the 2015 tax year (paid during Apr-July 2015 and adjusted in Sept and Dec) and one-third of 2016 payments. Instalments for the 2015 (2016) tax year are based on BC's share of the national tax base for the 2013 (2014) tax year and a forecast of the 2015 (2016) national tax base. BC's share of the 2013 national tax base was 11.45%, based on tax assessments as of December 31, 2014. Cash adjustments for any under/over payments from the federal government in respect of 2014 will be received/paid on March 31, 2016.</p>

**Table A1 Material Assumptions – Revenue (continued)**

Revenue Source and Assumptions (\$ millions unless otherwise specified)	Budget Estimate	Updated Forecast	Plan 2016/17	Plan 2017/18	2015/16 Sensitivities
	2015/16				
<b>Energy, sales of Crown land tenures, metals, minerals and other</b>	<b>\$1,456</b>	<b>\$1,328</b>	<b>\$1,318</b>	<b>\$1,202</b>	
Natural gas price					+/- \$0.50 change in the natural gas price equals
Plant inlet, \$Cdn/gigajoule .....	\$2.09	\$1.69	\$2.13	\$2.46	+/- \$175 million, including impacts on production volumes and royalty program credits, but excluding any changes from byproducts revenue (e.g. butane, ethane, propane)
Sumas, \$US/ MMBtu .....	\$3.20	\$2.58	\$3.00	\$3.39	Sensitivities can also vary significantly at different price levels.
Natural gas production volumes					
Billions of cubic metres .....	44.4	44.4	45.3	48.1	
Petajoules .....	1,760	1,761	1,798	1,907	
Annual per cent change .....	7.3%	3.0%	2.1%	6.1%	
Oil price (\$US/bbl at Cushing, Ok) .....	\$45.00	\$50.00	\$56.17	\$61.86	
Auctioned land base (000 hectares) .....	150	60	60	60	
Average bid price/hectare (\$) .....	\$1,000	\$196	\$252	\$290	+/- 1% change in natural gas volumes equals +/- \$3 million on natural gas royalties
Cash sales of Crown land tenures .....	\$150	\$12	\$15	\$17	
Metallurgical coal price (\$US/tonne, fob west coast) ....	\$128	\$104	\$111	\$125	
Copper price (\$US/lb) .....	\$3.02	\$2.75	\$2.90	\$3.05	
Annual electricity volumes set by treaty .....	4.1	4.1	4.0	4.0	+/- 1 cent change in the exchange rate equals +/- \$30 million on natural gas royalties
(million mega-watt hours)					+/- 10% change in the average Mid-Columbia electricity price equals +/- \$13 million
Mid-Columbia electricity price .....	\$28	\$31	\$29	\$30	
(\$US/mega-watt hour)					
Exchange rate (US\$/ Cdn\$, calendar year) .....	85.3	79.5	78.5	82.5	
<u>Components of revenue</u>					
Natural gas royalties .....	\$344	\$220	\$327	\$445	
Bonus bids, fees and rentals .....	\$784	\$766	\$632	\$365	+/- US\$10 change in the average Metallurgical coal price equals +/- \$30 to \$40 million
Petroleum royalties .....	\$47	\$59	\$71	\$81	Based on a recommendation from the Auditor General to be consistent with generally accepted accounting principles, bonus bid revenue recognition reflects nine-year deferral of cash receipts from the sale of Crown land tenures
Columbia River Treaty electricity sales .....	\$117	\$145	\$132	\$130	
Coal .....	\$67	\$47	\$55	\$66	
Minerals, metals and other .....	\$41	\$41	\$45	\$58	
Oil and Gas Commission fees and levies .....	\$56	\$50	\$56	\$57	
<u>Royalty programs and infrastructure credits</u>					
Deep drilling .....	-\$273	-\$224	-\$359	-\$527	
Road and pipeline infrastructure .....	-\$107	-\$88	-\$112	-\$100	
Total .....	-\$380	-\$312	-\$471	-\$627	
Implicit average natural gas royalty rate .....	9.4%	7.4%	8.5%	9.5%	

Royalty program (marginal, low productivity and ultra marginal drilling) adjustments reflect reduced royalty rates.

Natural gas royalties incorporate royalty programs and Treasury Board approved infrastructure credits.

Table A1 Material Assumptions – Revenue (continued)

Revenue Source and Assumptions (\$ millions unless otherwise specified)	Budget Estimate	Updated Forecast	Plan 2016/17	Plan 2017/18	2015/16 Sensitivities
	2015/16				
<b>Forests</b>	<b>\$835</b>	<b>\$880</b>	<b>\$885</b>	<b>\$890</b>	
<u>Prices (calendar year average)</u>					
SPF 2x4 (\$US/1000 bd ft) .....	\$344	\$300	\$321	\$325	+/- US\$50 change in SPF price equals +/- \$100 to \$120 million
Random Lengths Composite (\$US/thousand board feet) .....	\$369	\$340	\$351	\$355	
Pulp (\$US/tonne) .....	\$888	\$869	\$838	\$825	+/- US\$50 change in pulp price equals +/- \$5 to \$10 million
Coastal log (\$Cdn/cubic metre); Vancouver Log Market) .....	\$94	\$98	\$96	\$94	+/- Cdn\$10 change in average log price equals +/- \$10 to \$20 million
<u>Fiscal Year Trade Assumptions</u>					
Export tax rate (effective rate) .....	0.8%	4.8%	0.0%	0.0%	
Lumber shipments and consumption (billion board feet)					+/- 1 cent change in exchange rate equals
U.S. lumber consumption .....	41.3	41.8	41.8	41.8	+/- \$15 to \$20 million on stumpage revenue
BC surge trigger volumes .....	8.8	8.9	8.9	8.9	+/- 10% change in Interior harvest volumes equals
BC lumber exports to US .....	7.0	7.1	7.2	7.2	+/- \$50 to \$60 million
<u>Crown harvest volumes (million cubic metres)</u>					+/- 10% change in Coastal harvest volumes equals
Interior .....	48.9	46.5	48.1	48.3	+/- \$8 to \$12 million
Coast .....	14.1	13.5	13.9	13.7	
Total .....	63.0	60.0	62.0	62.0	
BC Timber Sales (included in above) .....	11.4	11.0	11.8	11.8	
<u>Stumpage rates (\$Cdn/cubic metre)</u>					
Total stumpage rates .....	\$11.80	\$11.74	\$12.51	\$12.68	
<u>Components of revenue</u>					The above sensitivities relate to stumpage revenue only. Depending on market conditions, changes in stumpage revenues may be offset by changes in softwood lumber border tax revenues
Tenures .....	\$517	\$470	\$534	\$545	
BC Timber Sales .....	\$248	\$256	\$263	\$263	
Federal border tax (SLA 2006) .....	\$0	\$64	\$0	\$0	
Logging tax .....	\$25	\$45	\$45	\$40	
Other CRF revenue .....	\$20	\$20	\$19	\$19	
Recoveries .....	\$25	\$25	\$24	\$23	
<b>Other natural resources</b>	<b>\$466</b>	<b>\$454</b>	<b>\$497</b>	<b>\$512</b>	
<u>Components of revenue</u>					
Water rental and licences* .....	\$395	\$383	\$426	\$446	
Recoveries .....	\$50	\$50	\$50	\$45	
Angling and hunting permits and licences .....	\$10	\$10	\$10	\$10	
Recoveries .....	\$11	\$11	\$11	\$11	
* Water rentals for power purposes are indexed to Consumer Price Index.					
<b>Other revenue</b>	<b>\$9,932</b>	<b>\$9,882</b>	<b>\$10,109</b>	<b>\$10,057</b>	
<u>Components of revenue</u>					
Fees and licences					+/- 1% point change in BC's population growth equals
Medical Services Plan (MSP) premium .....	\$2,399	\$2,399	\$2,528	\$2,662	+/- \$10 to \$20 million on MSP premium revenue
Consolidated Revenue Fund .....	\$2,315	\$2,315	\$2,444	\$2,578	MSP rates are assumed to increase 4 percent annually
MSP recoveries .....	\$84	\$84	\$84	\$84	
Motor vehicle licences and permits .....	\$516	\$522	\$528	\$536	
Other Consolidated Revenue Fund .....	\$381	\$400	\$357	\$373	
Summary consolidation eliminations .....	-\$16	-\$15	-\$16	-\$16	
Other recoveries .....	\$105	\$105	\$99	\$100

### Natural Gas Prices

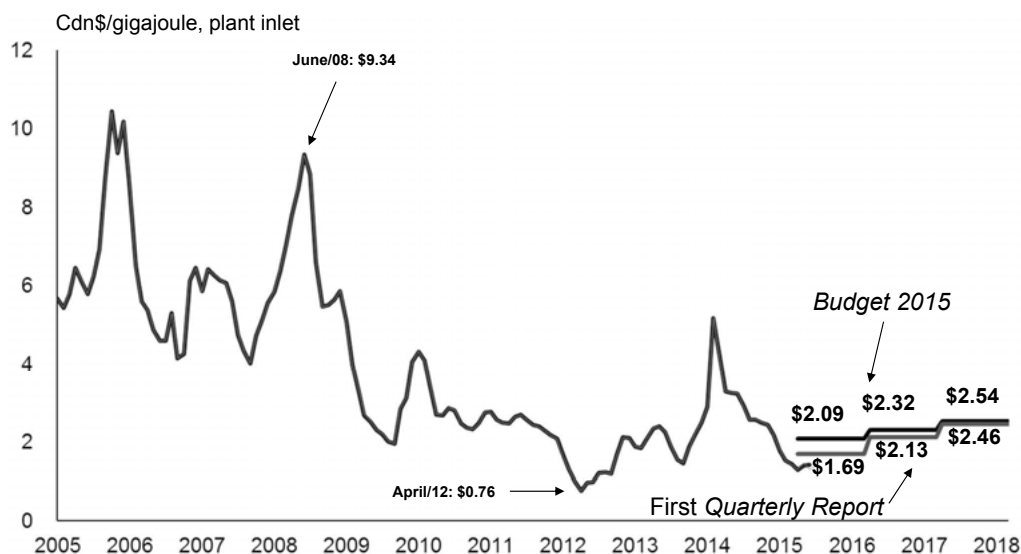

Table A3 Material Assumptions – Expense

Ministry Programs and Assumptions (\$ millions unless otherwise specified)	Budget Estimate	Updated Forecast	Plan 2016/17	Plan 2017/18	Sensitivities 2015/16
	2015/16				
<b>Advanced Education</b> .....	<b>1,961</b>	<b>1,961</b>	<b>1,975</b>	<b>2,002</b>	The number of student spaces may vary depending on the financial and other policies of post-secondary institutions.
Student spaces in public institutions ..... (# FTEs)	201,256	201,256	201,274	201,274	
<b>Children and Family Development</b> .....	<b>1,379</b>	<b>1,379</b>	<b>1,385</b>	<b>1,396</b>	Caseload is expected to remain stable between 15/16 and 17/18. A 1% increase in the cost per case or a 1% increase in the average caseload will affect expenditures by approximately \$2 million (excluding Delegated Aboriginal Agencies).
Average children-in-care ..... caseload (#)	8,250	8,250	8,250	8,250	
Average annual residential ..... cost per child in care (\$)	40,500	40,500	41,350	42,200	
<b>Education</b> .....	<b>5,498</b>	<b>5,498</b>	<b>5,591</b>	<b>5,648</b>	Enrolment figures are based on BC Stats and school district enrollment trends, to which the ministry has added forecasts for distributed learning, adult education and summer learning.  Summer Learning was affected by the teachers' job action in 2014/15, but is returning to full operation in 2015/16 and subsequent years.
Public School Enrolment (# of FTEs) .....	537,377	536,443	536,424	538,750	
School age (K–12) .....	515,380	514,730	514,936	517,247	
Distributed Learning (online) .....	11,743	11,743	11,518	11,533	
Summer .....	6,658	6,658	6,658	6,658	
Adults .....	3,596	3,212	3,212	3,212	
<b>Forests, Lands and Natural Resource Operations</b> .....	<b>608</b>	<b>925</b>	<b>631</b>	<b>637</b>	Targets can be impacted by changes to actual inventory costs incurred. There is a lag of approximately 1.5 years between when inventory costs are incurred and when they are expensed. Volume harvested can also impact targets. For example, if volume harvested is less than projected in any year, then capitalized expenses will also be reduced in that year.
BC Timber Sales .....	165	165	171	171	
Direct Fire Fighting .....	63	380	63	63	Over the past several years, Direct Fire Fighting costs have ranged from a low of \$19 million in 1997 to \$382 million in 2009.
<b>Health</b> .....	<b>17,444</b>	<b>17,444</b>	<b>17,934</b>	<b>18,471</b>	A 1% change in utilization or prices affects costs by approximately \$10 million.
Pharmacare .....	1,103	1,103	1,125	1,148	
Medical Services Plan (MSP) .....	4,117	4,117	4,285	4,451	A 1% increase in volume of services provided by fee-for-service physicians affects costs by approximately \$25 million.
Regional Services .....	11,949	11,949	12,245	12,590	
<b>Justice</b> .....	<b>1,142</b>	<b>1,142</b>	<b>1,148</b>	<b>1,154</b>	The number of criminal cases proceeded on by the provincial and federal Crown (including appeals to higher courts in BC), the number of civil and family litigation cases, the number of violation tickets disputed, and the number of municipal bylaw tickets disputes which would go to court for resolution.
New cases filed/processed ..... (# for all courts)	270,000	270,000	270,000	270,000	
<i>Crown Proceeding Act (CPA)</i> .....	25	25	25	25	The number and size of litigation brought against the province, as well as the effectiveness of mitigation strategies and legal defence.
Policing, Victim Services and Corrections ..	617	617	619	621	The volume and severity of criminal activity, the number of inmate beds occupied and the number of offenders under community supervision.

Table A3 Material Assumptions – Expense (continued)

Ministry Programs and Assumptions (\$ millions unless otherwise specified)	Budget Estimate	Updated Forecast	Plan 2016/17	Plan 2017/18	Sensitivities 2015/16
	2015/16				
<b>Social Development and Social Innovation .....</b>	<b>2,594</b>	<b>2,594</b>	<b>2,646</b>	<b>2,659</b>	The expected to work caseload is sensitive to fluctuations in economic and employment trends in the service sector. A 1% change in Temporary Assistance will affect expenditures by approximately \$3.2 million annually.
Temporary Assistance ..... annual average caseload (#)	40,700	40,700	38,300	35,700	
Disability Assistance ..... annual average caseload (#)	94,500	94,500	98,600	98,600	
Adult Community Living: Developmental Disabilities Programs					The adult community living caseload is sensitive to an aging population and to the level of service required. For example, residential care is significantly more costly than day programs. A 1% increase in the caseload can increase expenditures by between \$7.6 and \$7.9 million annually.
Average caseload (#) .....	17,200	17,200	17,990	18,760	
Average cost per client (\$) .....	44,900	44,900	44,210	43,860	
Personal Supports Initiative					
Average caseload (#) .....	1,020	1,020	1,230	1,440	
Average cost per client (\$) .....	20,890	20,890	20,400	20,330	
<b>Transportation and Infrastructure .....</b>	<b>844</b>	<b>857</b>	<b>844</b>	<b>846</b>	The number and severity of natural disasters.
<i>Emergency Program Act (EPA) .....</i>	15	28	15	15	
<b>Tax Transfers .....</b>	<b>975</b>	<b>1,040</b>	<b>1,017</b>	<b>1,031</b>	These tax transfers are now expensed as required under generally accepted accounting principles.
Individuals .....	459.0	483.0	464.0	464.0	
Low Income Climate Action .....	195.0	195.0	195.0	195.0	
Early Childhood Tax Benefit .....	146.0	146.0	146.0	146.0	
Sales Tax .....	50.0	50.0	50.0	50.0	
Small Business Venture Capital .....	25.0	25.0	25.0	25.0	
BC Senior's Home Renovation .....	2.0	2.0	2.0	2.0	
Other tax transfers to individuals .....	40.8	64.8	45.8	45.8	
Family Bonus Program.....	0.2	0.2	0.2	0.2	
Corporations .....	516.0	557.0	553.0	567.0	
Film and Television .....	80.0	80.0	80.0	80.0	
Production Services .....	252.5	320.0	292.5	302.5	
Scientific Research & Experimental Development .....	68.0	52.3	65.0	69.0	
Interactive Digital Media .....	50.0	40.0	50.0	50.0	
Mining Exploration .....	50.0	50.0	50.0	50.0	
Other tax transfers to corporations .....	15.5	14.7	15.5	15.5	
2015/16 tax transfer forecasts incorporates adjustments relating to prior years.					
<b>Management of Public Funds and Debt ...</b>	<b>1,267</b>	<b>1,189</b>	<b>1,238</b>	<b>1,275</b>	Full year impact on MoPD on interest costs of a 1% change in interest rates equals \$33.8 million; \$100 million increase in debt level equals \$2.2 million.
Interest rates for new provincial borrowing:					
Short-term .....	1.29%	0.68%	0.93%	1.35%	
Long-term .....	3.52%	2.67%	3.21%	3.57%	
CDN/US exchange rate (cents) .....	117.8	127.2	125.2	120.7	
<b>Service delivery agency net spending .....</b>	<b>6,042</b>	<b>6,123</b>	<b>5,922</b>	<b>6,181</b>	
School districts .....	325	326	255	193	
Post-secondary institutions .....	3,017	3,099	3,060	3,221	
Health authorities and hospital societies ...	709	716	566	720	
BC Transportation Financing Authority .....	1,106	1,088	1,186	1,202

<sup>1</sup> Revenue as a per cent of GDP is calculated using nominal GDP for the calendar year ending in the fiscal year (e.g. 2015/16 revenue divided by nominal GDP for the 2015 calendar year).

<sup>2</sup> Per capita revenue is calculated using July 1 population (e.g. 2015/16 revenue divided by population on July 1, 2015).

<sup>3</sup> Revenue is converted to real (inflation-adjusted) terms using the consumer price index (CPI) for the corresponding calendar year (e.g. 2015 CPI for 2015/16 revenue).

<sup>1</sup> Expense as a per cent of GDP is calculated using nominal GDP for the calendar year ending in the fiscal year (e.g. 2015/16 expense divided by nominal GDP for the 2015 calendar year).

<sup>2</sup> Per capita expense is calculated using July 1 population (e.g. 2015/16 expense divided by population on July 1, 2015).

<sup>3</sup> Expense is converted to real (inflation-adjusted) terms using the consumer price index (CPI) for the corresponding calendar year (e.g. 2015 CPI for 2015/16 expense).

<sup>1</sup> Full-time equivalents (FTEs) are a measure of staff employment. FTEs are calculated by dividing the total hours of employment paid for in a given period by the number of hours an individual, full-time person would normally work in that period. This does not equate to the physical number of employees. For example, two half-time employees would equal one FTE, or alternatively, three FTEs may represent two full-time employees who have worked sufficient overtime hours to equal an additional FTE.

<sup>2</sup> The ministry 2011/12 FTE total includes a reduction of about 3,200 FTEs reflecting the shift of BC Ambulance Service oversight from the Ministry of Health to the Provincial Health Services Authority.

<sup>3</sup> Service delivery agency FTE amounts do not include SUCH sector staff employment.

<sup>4</sup> Population per FTE is calculated using July 1 population (e.g. population on July 1, 2015 divided by 2015/16 FTEs).

Debt (\$ millions)											
Total provincial .....	38,014	41,885	45,154	50,193	55,816	60,693	62,920	64,764	66,848	69,047	6.9
Taxpayer-supported <sup>7</sup> .....	26,402	29,968	31,821	34,659	38,182	41,068	41,880	42,325	42,874	43,445	5.7
Provincial nominal GDP (\$ millions) <sup>8</sup> .....	203,951	195,966	205,996	217,460	222,565	229,685	239,114	246,592	256,823	267,907	3.1
Population (thousands at July 1) <sup>9</sup> .....	4,349	4,411	4,466	4,499	4,543	4,583	4,631	4,689	4,744	4,804	1.1

<sup>1</sup> The ratio of debt to population (e.g. 2015/16 debt divided by population at July 1, 2015).

<sup>2</sup> The ratio of debt outstanding at fiscal year end to provincial nominal gross domestic product (GDP) for the calendar year ending in the fiscal year (e.g. 2015/16 debt divided by 2015 nominal GDP).

<sup>3</sup> The ratio of interest costs (less sinking fund interest) to revenue. Figures include capitalized interest expense in order to provide a more comparable measure to outstanding debt.

<sup>4</sup> Weighted average of all outstanding debt issues.

<sup>5</sup> Includes revenue of the consolidated revenue fund (excluding dividends from enterprises) plus revenue of all government organizations and enterprises.

<sup>6</sup> Excludes revenue of government enterprises, but includes dividends from enterprises paid to the consolidated revenue fund.

<sup>7</sup> Excludes debt of commercial Crown corporations and agencies and funds held under the province's warehouse borrowing program.

<sup>8</sup> Nominal GDP for the calendar year ending in the fiscal year (e.g. Nominal GDP for 2015 is used for the fiscal year ended March 31, 2016). 2014 GDP is a Ministry of Finance estimate.

<sup>9</sup> Population at July 1st within the fiscal year (e.g. population at July 1, 2015 is used for the fiscal year ended March 31, 2016).
