# Limitation of Liability and User's Responsibility

The primary purpose of the B.C. Drainage Manual is to provide farmers as well as water management professionals and consultants with technical information on the design, installation and maintenance of agricultural drainage systems.

Individual chapters may rely on information that is presented in other chapters of the manual. There is a risk that downloading individual chapters may not present all of the required information in its entirety. A complete bound manual is available from the Irrigation Industry Association of BC.

While every effort has been made to ensure the accuracy and completeness of these materials, additional materials may be required to design and implement more advanced subsurface drainage systems. Advice of appropriate professionals and experts may provide additional local or site information that is not covered in this Manual.

All information in this publication and related materials are provided entirely “as is” and no representations, warranties or conditions, either expressed or implied, are made in connection with your use of, or reliance upon, this information. This information is provided to you as the user entirely at your risk.

The British Columbia Ministry of Agriculture, Fisheries and Food, and the Irrigation Industry Association of British Columbia, their Directors, agents, employees, or contractors will not be liable for any claims, damages or losses of any kind whatsoever arising out of the use of, reliance upon, this information.

# Table of Contents

<b>1 Introduction .....</b>	<b>1</b>
1.1 Drainage in B.C. ....	1
1.2 Manual Content .....	3
 <b>2 Soil .....</b>	 <b>5</b>
2.0 The Role of Soil .....	5
2.1 Soil Composition .....	5
2.2 Soil Profile .....	6
2.3 Soil Physical Properties .....	8
2.4 Soil Texture .....	8
2.4.1 Field Determination of Soil Texture .....	11
2.4.2 Particle Size Distribution .....	13
2.5 Soil Structure .....	16
2.5.1 Plant Roots .....	18
2.5.2 Soil Organisms and Organic Matter .....	20
2.5.3 Impacts of Clay .....	22
2.5.4 Soil Water - Wetting and Drying - Freezing and Thawing .....	22
2.5.5 Puddling and Crusting .....	22
2.6 Plasticity .....	23
2.7 Porosity and Aeration .....	24
2.8 Soil Compaction .....	25
2.8.1 Recognizing Soil Compaction .....	26
2.9 Temperature .....	29
2.10 Colour .....	30
2.11 Natural Soil Drainage Classes .....	31
 <b>3 Water .....</b>	 <b>33</b>
3.0 The Role of Water in Drainage .....	33
3.1 Hydrologic Cycle .....	33
3.2 Ground Water .....	35
3.3 Soil Water .....	36
3.4 Capillary Water .....	38
3.4.1 Capillary Rise .....	39
3.4.2 Water Retention .....	40
3.5 Water Table .....	41
3.6 Soil Permeability .....	42
3.6.1 Infiltration .....	43
3.6.2 Percolation .....	45
3.6.3 Hydraulic Conductivity .....	45

<b>4 Identifying Drainage Problems .....</b>	<b>47</b>
4.0 Need for Drainage .....	47
4.1 Critical Factors Affecting Drainage Need .....	47
4.1.1 Climate .....	48
4.1.2 Topography .....	48
4.1.3 Soil .....	49
4.2 When is drainage required? .....	51
4.3 Indicators of the Need for Drainage .....	53
4.3.1 Surface Ponding .....	53
4.3.2 High Water Table .....	55
4.3.3 Flooding .....	56
4.3.4 Soil Profile .....	57
4.3.5 Crop Response .....	59
4.3.6 Animal Indicators .....	60
 <b>5 Drainage Solutions .....</b>	 <b>63</b>
5.0 Improving Drainage .....	63
5.1 Cropping Practice Based Drainage Improvements .....	65
5.1.1 Cover Crops .....	65
5.1.2 Soil Amendment Use .....	66
5.1.3 Subsoiling .....	67
5.2 Surface Drainage .....	70
5.2.1 Ditches .....	70
5.2.2 Grassed Waterways .....	71
5.2.3 Land Grading .....	72
5.2.4 Land Clearing .....	73
5.2.5 Dyking .....	73
5.3 Subsurface Drainage .....	74
5.4 Simplified Soil Profile Based Drain Spacing Guide for B.C. ....	76
5.4.1 Generalized Soil Profile Descriptions .....	76
5.4.2 Estimated Drain Spacing Recommendations .....	80
5.4.3 Adjusting the Estimated Drain Spacing Guide .....	80
5.5 Cautions About Some Improvements .....	82
5.5.1 Acid Sulfate Soils .....	82
5.5.2 Peat Soils .....	83
5.5.3 Saline Soils .....	83
5.5.4 Subsoiling on Sloping land .....	84
 <b>6 Benefits of Drainage .....</b>	 <b>85</b>
6.0 Benefits of Drainage .....	85
6.1 Improved Trafficability .....	85
6.2 Crops .....	86
6.2.1 Variety .....	86
6.2.2 Rooting System .....	87
6.2.3 Growing Season .....	88
6.2.4 Yields .....	89
6.3 Soil and Water Conservation .....	91

6.3.1	Water Quality .....	91
6.3.2	Erosion Control .....	93
6.3.3	Cover Crops .....	94
6.3.4	Soil Organisms .....	94
6.3.5	Soil Compaction .....	95
6.4	Subirrigation .....	95
<b>7</b>	<b>Evaluation of Drainage Improvements .....</b>	<b>97</b>
7.0	Economic and Financial Considerations .....	97
7.1	Cost .....	97
7.2	Estimating Cost .....	98
7.3	Economic Analysis .....	99
7.4	Putting It All Together .....	102
<b>8</b>	<b>Drainage Planning Requirements .....</b>	<b>103</b>
8.0	Drainage Planning Requirements .....	103
8.1	Hydrologic Analysis .....	103
8.1.1	B.C. Climate .....	103
8.1.2	Frequency Analysis .....	104
8.1.3	Peak Runoff Estimation .....	105
8.1.3a	Rational Method .....	106
8.1.3b	SCS Method .....	111
8.2	Soil Investigation .....	117
8.2.1	Preliminary Survey .....	117
8.2.2	Soil Survey .....	117
8.2.3	Hydraulic Conductivity .....	117
8.3	Topographic Survey .....	129
8.3.1	Preliminary Assessment .....	129
8.3.2	Topographic Survey .....	129
8.3.3	Base Map and Drainage Plan .....	130
8.4	Fisheries and Environmental Requirements .....	133
<b>9</b>	<b>Surface Drainage Design .....</b>	<b>135</b>
9.0	Drainage Planning Requirements .....	135
9.1	Open Ditch Design .....	135
9.1.1	Design Flow Velocity .....	136
9.1.2	Channel Grade .....	137
9.1.3	Side Slope Stability .....	137
9.1.4	Channel Cross Section .....	137
9.1.5	Ditch Capacity .....	138
9.1.6	Design Considerations for Cold Climates .....	140
9.2	Grassed Waterways .....	141
9.2.1	Grass Seed Mixtures .....	141
9.2.2	Flow Velocity .....	142
9.2.3	Channel Cross Section .....	146
9.2.4	Stone Center Grassed Waterway .....	146

9.2.5	Grassed Waterway Capacity .....	147
9.3	Land Grading .....	150
9.3.1	Bedding System .....	150
9.3.2	Land Levelling .....	150
9.3.3	Recontouring .....	151
9.3.4	Terracing .....	151
9.4	Drainage Ditch Maintenance .....	152
9.4.1	Stream Bank Stabilization .....	154
9.4.2	Methods of Erosion Control .....	155

## **10 Subsurface Drainage Design ..... 159**

10.1	Subsurface System Design .....	159
10.1.1	Layout .....	159
10.1.2	Drainage Coefficient .....	161
10.1.3	Drain Depth .....	163
10.1.4	Drain Spacing .....	165
10.1.5	Drain Grade .....	172
10.1.6	Drain Length .....	173
10.1.7	Drain Capacity .....	173
10.1.8	Drain Size .....	173
10.2	Interception Drains .....	177
10.2.1	Layout .....	177
10.2.2	Spacing and Depth .....	179
10.3	Drain Envelopes and Filters Design .....	181
10.3.1	Geotextile filters .....	181
10.3.2	Gravel and Sand Filters .....	182
10.3.3	Gravel Envelopes .....	185
10.3.4	Wood Wastes .....	185
10.4	Special Structures .....	187
10.4.1	Surface Inlets .....	187
10.4.2	Blind Inlets .....	190
10.4.3	Breathers and Relief Wells .....	191
10.4.4	Sediment Traps and Junction Boxes .....	192
10.5	Gravity Outlets .....	193
10.5.1	Open Ditches .....	193
10.5.2	Existing Subsurface Drainage System .....	196
10.6	Pump Outlet Design .....	197
10.6.1	Pump Location .....	197
10.6.2	Pump Capacity .....	198
10.6.3	Total Dynamic Head .....	199
10.6.4	Pump Type and Power Unit .....	200
10.6.5	Water Storage to Limit Pump Cycling .....	201
10.6.6	Pump Selection and Setup .....	201
10.7	Iron Ochre .....	206
10.7.1	Formation of Iron ochre .....	206
10.7.2	Evaluating Risk .....	208
10.7.3	Design considerations .....	209
10.7.4	Maintenance Considerations .....	210
10.8	Materials .....	211

10.8.1 Drainpipe Materials .....	211
10.8.2 Geotextile Filters .....	212
10.8.3 Fittings .....	212
10.9 Drainage Equipment .....	214
10.9.1 Backhoe .....	214
10.9.2 Trenchers .....	215
10.9.3 Trenchless Plow .....	216
10.9.4 Land Leveller .....	217
10.10 Installation .....	218
10.10.1 Responsibilities and Permits .....	218
10.10.2 Field Conditions .....	219
10.10.3 Depth and Grade Control .....	219
10.10.4 Laying Pipe .....	220
10.10.5 Outlet Installation .....	222
10.10.6 Installation in Soft or Sensitive Clays .....	222
10.11 Maintenance .....	224
10.11.1 Inspection of Subsurface Drains .....	224
10.11.2 Hazards to Subsurface Drainage Systems .....	225
10.12 Repairs of Subsurface Drains .....	226
10.12.1 Ponding .....	226
10.12.2 Blowout .....	227
10.12.3 Trench Washout .....	227
10.12.4 Erosion at Drain Outlet .....	228
10.12.5 Blocking of Drains by Sediment .....	229
10.12.6 Drains Blocked by Roots .....	229
10.12.7 Collapsing of Drainpipes by Heavy Loading .....	230
<b>11 Controlled Drainage and Subirrigation .....</b>	<b>231</b>
11.0 Controlled Drainage and Subirrigation .....	231
11.1 General Definitions .....	231
11.2 Applicability .....	233
11.2.1 Topographic requirements .....	233
11.2.2 Soil Requirements .....	233
11.3 Design .....	234
11.3.1 Water Table Design Depth .....	234
11.3.2 Drain Spacing for Subsurface Irrigation .....	238
11.3.3 Water Requirements .....	240
11.3.4 Size of Pipes .....	240
11.3.5 Water Quality .....	242
11.4 Water Table Control Structures .....	242
11.4.1 Installation .....	244
11.5 Environmental Benefits .....	244
<b>Appendix A. Rainfall Intensity Curves .....</b>	<b>245</b>
<b>Appendix B. Manning's n Values .....</b>	<b>257</b>
<b>Appendix C. Head Loss Tables .....</b>	<b>259</b>
<b>Appendix D. Conversion Tables .....</b>	<b>263</b>
<b>Bibliography .....</b>	<b>265</b>
<b>Index .....</b>	<b>269</b>

# List of Figures

Figure 1.1	Total Length of Subsurface Drains Installed Between 1946 and 1996 .....	2
Figure 2.1	Drained, Silt Loam Soil .....	6
Figure 2.2	Soil Profile .....	7
