

Christmas Tree Permit FAQ

What should I do before cutting a tree?

- Make sure you have chosen the best tree and the size you want.
- Try to leave the bottom one or two branches on the stump of the tree, which may grow into another Christmas tree for future cutting.
- Do not cut a big tree only to use the top portion. This is a waste of a future tree and the bottom portion remaining creates a fire hazard.

What should I do after cutting a tree?

- Leave the area as clean as possible.
- Do not leave lower boles and branches of cut trees alongside roads or in the ditches. Lop them close to the ground and scatter.
- Do not transport your tree outside the province.

Careful cutting of Christmas Trees without unnecessary waste will ensure continuous crops of Christmas Trees for future generations.

Thank you for your co-operation.

The staff and management at Campbell River Natural Resource District wish you and your family a safe and joyous holiday season and a healthy and prosperous New Year!
