About the Major Projects Inventory

The BC Major Projects Inventory (MPI) contains summary information on major projects in the Province of British Columbia, Canada, that are over \$15 million (Cdn.) capital cost, or \$20 million in the Lower Mainland–Vancouver area. As of June 2010, the information in this published version of the BC Major Projects Inventory is prepared by Rene Corcoran, although it is now owned and published by the Province of British Columbia.

Sources of MPI Information

Information sources include print and electronic media, developers, architects, general contractors, and government agencies (provincial, regional, municipal) as well as occasional site visits. Projects that are under consideration or proposed to be funded by the Provincial government may be listed where there is public information about such projects. The description may indicate the status of Provincial funding applications, if it is known.

Project Location

Projects are listed according to eight regions: Vancouver Island/Coast, Mainland/Southwest (Vancouver area), Thompson/Okanagan, Kootenay, Cariboo, North Coast, Nechako, and Northeast. Maps showing the location of the regions and main population centres are included in the MPI. Projects are also listed according to the nearest population centre, which could be an unincorporated centre or a local government, e.g., a municipality.

Updates

New projects are added to the database every quarter. Projects already in the database are updated, at minimum, every six months unless there is no expected change in status for a longer period of time. Projects may be shown as updated with no change in information—this means that the information shown is still valid according to the verifying source.

Estimated Costs

Cost estimates are general estimates from the information sources used.

Start and Finish Dates

Start and finish dates for proposed projects are based on estimates from the sources used, or in some cases, on reasonable assumptions. These dates are revised as new information becomes available.

Project Status

Projects are listed by status: proposed, under construction, completed, or on hold. Notes on other status indicators are also included in the project description. Projects that are on hold for longer than two years are normally removed from the publication (although retained in our database). Cancelled projects are noted in the project descriptions as cancelled, then removed from the next issue of the MPI.

Sustainable Building Design

As a new feature, the Major Projects Inventory has begun identifying sustainable building design and construction projects within the Inventory that have been registered and certified under a recognized green building rating system (e.g., LEED®, Green Globes). Certification provides greater assurance that a building will be an environmentally responsible, energy efficient, profitable, and healthy place to live, work and play. This designation has been added to the project description to promote awareness of the benefits of green buildings.

Highlights of the September 2012 Issue

This issue of the BC Major Projects Inventory lists 38 new proposed projects over \$15 million for the third quarter of 2012, with available capital cost estimates totaling approximately \$2.8 billion in potential new capital investment, if all the projects proceed.

Thirty-two major projects started construction in the third quarter, with an estimated value of \$2.9 billion. The largest project started was the \$801 million Ruskin Dam Safety and Powerhouse Upgrade in Mission. Construction also started on the \$475 million Highland Valley Copper Modernization Project near Logan Lake. Construction resumed on the \$500 million Kemano Tunnel Project in Kitimat.

Twenty-three projects completed construction in the third quarter, with an estimated capital cost of approximately \$2.2 billion; the largest project is the \$700 million Southeast False Creek Neighbourhood, followed by the \$400 million Bedford Landing Neighbourhood in Fort Langley.

All capital costs are estimates, and therefore, subject to changes, especially in the early stages of a project proposal. Some capital costs are not included because they were not available at press time or the developer/owner requested that no capital cost be shown.

The capital cost of all major projects currently under construction in BC is estimated at \$79.0 billion, up from \$77.9 billion reported in the second quarter of 2012. Many major project proposals listed are in very preliminary stages and are not approved for construction, therefore capital cost estimates should be viewed with caution. The available capital cost of proposed projects is estimated at approximately \$131.2 billion, down from \$133.6 billion in the previous quarter. Approximately \$19 billion of projects are judged to be 'on hold' for the time being.

Roberts Bank Container Expansion Program Terminal 2 and Deltaport 3rd Berth

Vancouver Fraser Port Authority Ph: (604) 665-9000
A container expansion program at Roberts Bank consists of two projects to increase capacity from the current 900,000 TEUs to 1.3 million TEUs: Terminal 2 and the Deltaport 3rd Berth Terminal Expansion. Terminal 2, with a cost of \$750 million, is a new container port at Roberts Bank, which involves filling and dredging, and would be located adjacent to the existing Deltaport Container Terminal. The Deltaport Terminal Expansion project, with a cost of \$400 million, involved constructing a third berth. Deltaport Constructors Ltd. were awarded the contract and completed construction in Jan 2010. The process initiated in Jun 2007 for the planning, building and operating of Terminal 2 is being re-evaluated due to market conditions. Preliminary project definition are underway with a seismic evaluation in Jul 2010 and a new Request for Proposals (RFP) for Container Capacity Preliminary Planning. In Jan 2008, the Fraser River Port Authority, North Fraser Port Authority and the Vancouver Port Authority, formed a single Canada Port Authority under the name Vancouver Fraser Port Authority.

Northern Gateway Pipeline Condensate Pipeline

Enbridge Pipelines Inc. Ph: (403) 231-3900
Proposed pipeline from Kitimat to Edmonton, Alberta to deliver 150,000 barrels/day of an ultra-light condensate (a mixture of petroleum by-products and chemicals) for blending with tar sands crude oil. The condensate line will be 20 inches in diameter and be laid at the same time as a crude oil pipeline from Edmonton to Kitimat (See project # 929 for the crude oil pipeline proposal). In 2006, Enbridge delayed the project construction start to focus on eastern pipeline projects but has reactivated the project in 2009. Aboriginal and public consultations are underway with open houses in communities along the proposed pipeline. Filing for regulatory review with the National Board of Energy and the Canadian Environmental Assessment Agency will include a government and public review process commencing in 2010, expected to continue into Late 2012. Subject to regulatory approval, construction is planned for Spring 2013 through Fall 2016. Project cost is estimated for BC portion.

Kitimat**Northern Gateway Pipeline Project - Crude Oil Pipeline**

Enbridge Pipelines Inc. Ph: (780) 420-5210
 Proposed 30in/400 kbpd, 1,200 km bitumen export pipeline from Edmonton, Alberta to deliver crude oil to the deep water port at Kitimat. The pipeline would deliver above 400,000 barrels/day to a tank farm for storage prior to shipping to California and the far east. Preliminary engineering and environmental overviews are completed. A second, parallel 20in/150-200kbpd, 1200 km import pipeline will also be built to ship condensate to the oilsands (see project id 1413). Approx 2000 construction jobs are expected. In 2006, Enbridge delayed the project construction start to focus on eastern pipeline projects but has reactivated the project in 2009. Aboriginal and public consultations are underway with open houses in communities along the proposed pipeline. Filing for regulatory review with the National Board of Energy and the Canadian Environmental Assessment Agency will include a government and public review process commencing in 2010, expected to continue into Late 2012. STATUS : PROPOSED**Atlin****New Polaris Gold Mine**

Canarc Resource Corp. Ph: (604) 685-9700
 Reactivation and expansion of a former underground gold mine approx 100 km south of Atlin and 60 km east of Juneau, Alaska. Re-modeling, metallurgical testing and engineering of a portion of the gold resources, necessary for a 65,000 opy high-grade underground gold mine, is underway. A scoping study identified the potential to develop a 65,000 oz/year to 100,000 oz./year high grade, underground gold mine over the next three years. New office and refurbished camp complex now on site. New mine resource estimate released on Feb 2007 and the mine plan is expected to complete in Spring 2007. A feasibility plan and environmental studies will be carried out prior to government permitting. Website: www.canarc.net
