BC Major Projects Inventory is published quarterly by the
Ministry of Jobs, Tourism and Skills Training.

Not all major projects in British Columbia are included in
the MPI. For inclusions, projects must be made known to
the publisher.

By definition confidential project information is not
included.

While information sources are checked regularly, the
Government of British Columbia and its contractors are not
responsible for any errors or omissions in this publication.

Definitions of Key Terms

Proposed – project is in planning or permitting stages,
remediation, demolition, excavation or site servicing may
occur at this stage.

On Hold – Project is delayed but still may go ahead or is
cancelled and will be removed from the MPI in the following
issue.

Construction Started – foundations have started, includes
excavation for road projects.

Completed – construction is substantially complete,
landscaping or deficiency inspection may still occur.

Public – projects that have funding from municipal,
provincial or federal governments and may include private
funding.

Clean Energy – describes projects that are clean energy
producers, such as wind power or hydroelectric.

Green Building – projects that are planned to Leadership
in Energy and Environmental Design (LEED) or Green
Globes sustainable building standards.

About the Major Projects Inventory

The BC Major Projects Inventory (MPI) contains summary information on major projects in the Province of British Columbia, Canada, that are over \$15 million (Cdn.) capital cost, or \$20 million in the Lower Mainland–Vancouver area. As of June 2010, the information in this published version of the BC Major Projects Inventory is prepared by Rene Corcoran, although it is now owned and published by the Province of British Columbia.

Sources of MPI Information

Information sources include print and electronic media, developers, architects, general contractors, and government agencies (provincial, regional, municipal) as well as occasional site visits. Projects that are under consideration or proposed to be funded by the Provincial government may be listed where there is public information about such projects. The description may indicate the status of Provincial funding applications, if it is known.

Project Location

Projects are listed within the eight regions: Vancouver Island/Coast, Mainland/Southwest (Vancouver area), Thompson/Okanagan, Kootenay, Cariboo, North Coast, Nechako, and Northeast. Maps showing the location of the regions and main population centres are included in the MPI. Projects are also listed according to the nearest population centre, which could be an unincorporated centre or a local government, (e.g., a municipality).

Updates

New projects are added to the database every quarter. Projects already in the database are updated, at minimum, every six months unless there is no expected change in status for a longer period of time. Projects may be shown as updated with no change in information—this means that the information shown is still valid according to the verifying source.

Estimated Costs

Cost estimates are general estimates from the information sources used.

Start and Finish Dates

Start and finish dates for proposed projects are based on estimates from the sources used, or in some cases, on reasonable assumptions. These dates are revised as new information becomes available.

Project Status

Projects are listed by status: proposed, under construction, completed, or on hold. Notes on other status indicators are also included in the project description. Projects that are on hold for longer than two years are normally removed from the publication (although retained in our database). Cancelled projects are noted in the project descriptions as cancelled, then removed from the next issue of the MPI.

Sustainable Building Design

As a new feature, the MPI has begun identifying sustainable building design and construction projects within that have been registered and certified under a recognized green building rating system (e.g., LEED®, Green Globes). Certification provides greater assurance that a building will be an environmentally responsible, energy efficient, profitable, and healthy place to live, work and play. This designation has been added to the project description to promote awareness of the benefits of green buildings.

Highlights of the June 2013 Issue

This issue of the BC Major Projects Inventory lists 34 new proposed projects over \$15 million for the second quarter of 2013, with available capital cost estimates totaling approximately \$22.9 billion in potential new capital investment, if all the projects proceed.

Thirty-eight major projects started construction in the second quarter, with an estimated value of \$1.9 billion. The largest project started was the \$300 million Little Mountain Housing Redevelopment in Vancouver. Construction also started on the \$100 million Low Level Road Re-Alignment in Vancouver.

Nineteen projects completed construction in the second quarter, with an estimated capital cost of approximately \$1.1 billion; the largest project is the \$500 Port Royal Planned Community in New Westminster, followed by the \$70 million Rolston Residential Tower and Yale Hotel in Vancouver.

All capital costs are estimates, and therefore, subject to changes, especially in the early stages of a project proposal. Some capital costs are not included because they were not available at press time or the developer/owner requested that no capital cost be shown.

The capital cost of all major projects currently under construction in BC is estimated at \$83.6 billion, down from \$85.7 billion reported in the first quarter of 2013. Many major project proposals listed are in very preliminary stages and are not approved for construction, therefore capital cost estimates should be viewed with caution. The available capital cost of proposed projects is estimated at approximately \$194.9 billion, up from \$163.9 billion in the previous quarter. Approximately \$19.9 billion of projects are judged to be 'on hold' for the time being.

Campbell River**John Hart Replacement**

BC Hydro Ph: (604) 623-4472 Toll Free: 1-866-647-3334
The purpose of the project is to replace the existing John Hart Generating Station. The existing six unit, 126 MW generating station, located on Vancouver Island near the community of Campbell River, has been in operation since 1947. The age and condition of the John Hart facility indicate the need for significant capital investment in the powerhouse and penstocks to ensure reliable generation from the facility in the long term and to mitigate seismic and environmental risks. The new facility will provide an additional 12 MW capacity (from 126 MW to 138 MW) and approximately 10 per cent additional "resource smart" energy from the same amount of water. BC Hydro applied to the BCUC for a Certificate of Public Necessity and Convenience (CPCN) for this project and this was approved by BCUC in February 2013.

Status: Proposed	Start: ?
Est. Cost (\$ million): 1149	Finish: Fall 2018

Delta**Roberts Bank Container Expansion Program Terminal 2 and Deltaport 3rd Berth**

Vancouver Fraser Port Authority Ph: (604) 665-9000

A container expansion program at Roberts Bank consists of two projects to increase capacity from the current 900,000 TEUs to 1.3 million TEUs: Terminal 2 and the Deltaport 3rd Berth Terminal Expansion. Terminal 2, with a cost of \$750 million, is a new container port at Roberts Bank, which involves filling and dredging, and would be located adjacent to the existing Deltaport Container Terminal. The Deltaport Terminal Expansion project, with a cost of \$400 million, involved constructing a third berth. Deltaport Constructors Ltd. were awarded the contract and completed construction in Jan 2010. The process initiated in Jun 2007 for the planning, building and operating of Terminal 2 is being re-evaluated due to market conditions. Preliminary project definition are underway with a seismic evaluation in Jul 2010 and a new Request for Proposals (RFP) for Container Capacity Preliminary Planning. In Jan 2008, the Fraser River Port Authority, North Fraser Port Authority and the Vancouver Port Authority, formed a single Canada Port Authority under the name Vancouver Fraser Port Authority.

Ruskin Dam Safety Improvement Right Abutment Remediation (Stage 1)

BC Hydro Ph: (604) 683-0140
Both static and seismic deficiencies have been identified in the earthen right abutment of the Ruskin Dam. These deficiencies pose an unacceptable safety risk to populations below the dam and require mitigation. Remediation to address this project has been broken out into two stages. Stage 1 addresses early attention actions to improve seepage protection with a reverse filter berm at the downstream toe of the right abutment. As well as improving drainage control below the dam, these measures will provide additional response time in the event of a failure of the reservoir liner. The balance of right abutment work is being undertaken in Stage 2 and includes anchoring of the existing upstream concrete gravity wall, reinforcement of the downstream retaining wall and the installation of a new seepage cut-off wall.

Revelstoke**Mica Gas SF6 Insulated Switchgear Replacement Project**

BC Hydro Ph: (604) 623-4472 Toll Free: 1-866-647-3334

This project is to replace the existing 500 kV SF6 GIS switchgear system at the Mica Generating Station and install additional SF6 GIS necessary to accommodate the future addition of Mica Units 5 and 6. When completed the system will use three 500 kV circuits to conduct the energy from the Mica underground powerhouse to the surface, where it transitions to transmission system. Replacement of the existing switchgear system will maintain the level of reliability of this key generating station and have the additional benefit of reducing SF6 (a greenhouse gas) leakage. The new switchgear system will also accommodate the future addition of the Mica Units 5 and 6 generators.

Kitimat

Northern Gateway Pipeline Condensate Pipeline

Enbridge Pipelines Inc. Ph: (403) 231-3900
Proposed pipeline from Kitimat to Edmonton, Alberta to deliver 150,000 barrels/day of an ultra-light condensate (a mixture of petroleum by-products and chemicals) for blending with tar sands crude oil. The condensate line will be 20 inches in diameter and be laid at the same time as a crude oil pipeline from Edmonton to Kitimat (See project # 929 for the crude oil pipeline proposal). In 2006, Enbridge delayed the project construction start to focus on eastern pipeline projects but has reactivated the project in 2009. Aboriginal and public consultations are underway with open houses in communities along the proposed pipeline. Filing for regulatory review with the National Board of Energy and the Canadian Environmental Assessment Agency will include a government and public review process commencing in 2010, expected to continue into Late 2012. Subject to regulatory approval, construction is planned for Spring 2013 through Fall 2016. Project cost is estimated for BC portion.

Kitimat

Northern Gateway Pipeline Project - Crude Oil Pipeline

Enbridge Pipelines Inc. Ph: (780) 420-5210
Proposed 30in/400 kbpd, 1,200 km bitumen export pipeline from Edmonton, Alberta to deliver crude oil to the deep water port at Kitimat. The pipeline would deliver above 400,000 barrels/day to a tank farm for storage prior to shipping to California and the far east. Engineering and environmental overviews are completed. A second, parallel 20in/150-200kbpd, 1200 km import pipeline will also be built to ship condensate to the oilsands (see project id 1413). In 2006, Enbridge delayed the project construction start to focus on eastern pipeline projects but reactivated the project in 2009. Regulatory review with the National Board of Energy and the Canadian Environmental Assessment Agency included a government and public review process. Aboriginal and public consultations held with open houses in communities along the proposed pipeline. Project cost is estimated for BC portion.
