

Version 4.21 - July 1st, 2021

This release includes fixes for new bugs, a minor enhancement for interior and significant updates for coast appraisals in line with NDC procedures effective on April 1st, 2019.

Interior and Coast Appraisal Updates

- More informative error message when attachment files are greater than 10 Mb in size.

Coast Appraisal Updates

- ECAS43 – Attachments, for appraisals with effective dates on or after December 15th, 2020:
 - New arrangement and naming of zip file check boxes and individual attachments.
 - Added new Specified Operations attachments *Fibre Recovery Zone* and *Miscellaneous*.
 - Added new attachment type *Development Cost Distribution Agreement*.
 - Added new attachments *NDC Form#7* through to *NDC Form#20*.
 - Removed attachment types:
 - *Extended Amortization Detailed Agreement*
 - *Detailed Engineering – Bridge Repairs*
 - *Detailed Engineering – Engineering Info to Support NDC*.
 - All Specified Operation attachments now validate for corresponding entry on ECAS34-Specified Operations upon submission.
- ECAS40 – Non-Tabular Development Cost:
 - Added two new NDC Type codes:
 - *98-CAP-Appraisal Section Workaround*
 - *99-DDA-Development Distribution Amount*
 - Updated Road Name field to a drop-down list populated by the Road Name list on ECAS47 – Appraised Roads.
- ECAS32 – Control:
 - Improved TOA Eligible indicator logic to stay in sync with database.
 - Appraisal Data Office Checked button now visible to users with Region role.
- ECAS36 – Culverts:
 - Fixed bug with xml processing so that wooden culverts are assigned the correct value for appraisals on or after December 15th, 2020.

All these changes will be reflected in the Technical Specifications for ECAS.
