

## B.C. Invasive Plant Candidates for Eradication (EDRR Candidates)

The following invasive plant species are not present in BC or are present but extremely limited in extent, and pose a significant threat to BC's environment, economy and/or human health. These species have been identified as a result of an extensive review that considered their regulation and status in BC and bordering jurisdictions, presence elsewhere in similar environments to those that occur in BC, and listing under federal regulations. These species are proposed candidates for eradication province wide (EDRR candidates) under the B.C. Invasive Species Early Detection Rapid Response (EDRR) Program.
