FIGURE 44
ALCOHOL-RELATED DEATHS BY LOCAL HEALTH AREA
BRITISH COLUMBIA, 2005-2009

Notes to Table 41
*Statistical testing indicates that observed deaths are significantly different from the expected deaths (p<0.05, two tailed).
+Denotes significance based on less than five deaths. Coding practices from 1995 to 1999 may have produced over-counting of alcohol-related mortality. With the introduction of ICD-10 in 2000, more specific codes are available. Currently produced data should not be used in combination with data produced prior to 2000.

Note: Refer to Figure 1 to clarify geographical location of LHAs.
