

Appendix One

Statistical Summaries by Health Authority,
Health Service Delivery Area, Local Health
Area and Community

British Columbia, 2011

Preamble to Appendix 1

BC is a large, geographically diverse province. The majority of the population is concentrated in the south-western corner of the province, with the majority of the remaining population concentrated in the major cities of Kelowna, Kamloops, Prince George, and Nanaimo, or along the border with the United States. Large areas of the province are sparsely populated. Health care services tend to be concentrated in the areas of greater population, especially in the metropolitan areas of Vancouver and Victoria.

Appendix 1 provides summary details of the 2011 vital statistics for Health Authorities, HSDAs, LHAs, and incorporated communities. The LHAs are the lowest level of data aggregation; they are the building blocks upon which the HSDA and Health Authority information is aggregated. Information presented in this appendix includes the number of live births, stillbirths, and deaths by gender, and the number of marriages. Live births and stillbirths are assigned to geographic areas based on usual residence of the mother. Deaths are assigned to geographic areas based on the usual residence of the decedent. Marriages are assigned to geographic areas based on the place where the marriage ceremony was performed and include non-residents.

Population estimates, average age, and life expectancy at birth were obtained from BC STATS, Ministry of Labour and Citizens' Services.

	T		4,573,321	43,991	31,776	21,831	441	40.8	82.0

Note: Live births, stillbirths and deaths are assigned to communities based on the postal code of usual residence. Marriages are assigned according to the place where the marriage ceremony was performed, and include non-residents. Totals for gender include cases with unknown gender. Population estimates and average age (2011) and life expectancy (2007-2011) from BC STATS, Ministry of Labour and Citizens' Services.
 † C=City, T=Town, VL=Village, DM=District Municipality, IGD= Indian Government District, IM=Island Municipality, RGM=Regional Municipality.
 Some health communities span the boundaries of more than one LHA. When this occurs, the community is shown under the LHA containing the larger portion of the population.
 HSDA 32 Vancouver Total may include unspecified Vancouver addresses.
 *This may be too small a population size to estimate Life Expectancy with any confidence.
 **Local Health Areas 51, 87, 94 have been combined to have a common life expectancy as they individually include regions too small for calculation.
 "X" means that the value has been suppressed for reasons of data quality.
