

**Residential Tenancy Branch  
Alliance Management Office Report  
May 27, 2009**

**1. Initiative Overview**

The Residential Tenancy Branch (RTB) answers inquiries and resolves disputes between landlords and tenants pursuant to the B.C. *Residential Tenancy Act* and the B.C. *Manufactured Home Park Tenancy Act*. The RTB administers and supports a formal dispute resolution process.

The RTB electronic integrated systems project was initiated to meet public demand and increase service levels within budgetary constraints. RTB's original business processes involved significant manual paper handling by customers and staff, and required that a landlord or tenant apply for a hearing in person at an RTB office or a Service BC location. A contract was entered into with TELUS Communications Inc. and TELUS Services Inc. (collectively TELUS) in order to take advantage of technological solutions. The TELUS solution provides greater public convenience, more efficient use of staff time, and improved response to public demand for service.

**Scope of services**

The key components of the business and technical solution delivered by TELUS are:

- An improved RTB **public website** which provides:
  - Information about landlords' and tenants' rights;
  - A web-based Application for Dispute Resolution form for landlords or tenants to request a dispute resolution hearing. The system allows credit card payment over the Internet.
  
- A **Case Management System** that automates and streamlines the filing, scheduling and tracking of cases and reduces paper processing by staff.
  
- A **Call Centre** system which:
  - Provides standardized information through a series of touch-tone menus;
  - Queues and prioritizes incoming phone calls requiring a dialogue with an Information Officer.
  
- A **Teleconferencing System** which:
  - Allows hearings to be conducted by conference calls;
  - Identifies parties attending a conference call hearing;
  - Is integrated with the RTB Case Management System.
  
- An **Internet Fax Service** which manages Applications for Dispute Resolution and additional information for dispute resolution hearings arriving via fax.

- **Training and knowledge management;** and,
- **Ongoing maintenance and support** of the tools.
- For a more detailed description of the project please refer to Project Summary found at <http://www.lcs.gov.bc.ca/asd/alliance/summaries.asp>

The RTB staff will continue to be employed by the Province. Under the agreement, TELUS will operate and enhance the solution over a ten-year period ending in 2015.

## **2. Status Update**

### **What's New?**

- **Call Centre Anywhere System Upgraded**

The RTB utilizes Call Centre Anywhere (CCA) application to provide recorded information via its 24x7 information line, and manage incoming calls of its clients. In 2008/09 TELUS upgraded CCA to version 7.1. During the upgrade, RTB and TELUS redesigned and upgraded the call centre's prompt structure to provide callers with more options, and information about landlord and tenant rights and responsibilities. The new version of CCA enhances management reporting capability and is more compatible with current BC government IT standards.

- **Call Centre Anywhere Data Centre Moved to Vancouver**

In 2008/09, TELUS moved CCA's data centre from Calgary to Vancouver. This was a prerequisite of the above mentioned upgrade of CCA, and utilizing Oracle as its data base.

- **Conference Call Hearing System Enhancements**

Upgrading the Conference Call Hearing system with a new feature in 2008/09 allowed Dispute Resolution Officers to end hearings and close sessions without referring to an operator.

Technological advances have also allowed the RTB to receive instant reports of conference call hearings via government email accounts.

- **Remedy Software Tool Upgraded**

Remedy (now the Service Management Business Unit of BMC Software) is the technological base of the RTB's Case Management System (CMS). In 2007, RTB and TELUS enhanced Remedy's supportability and compatibility with Windows Vista, which is BC government's future platform. TELUS recommended Remedy version 7.1. The Remedy upgrade project started in 2008 and completed on May 2, 2009.

- **Enhanced Scheduling System**

The current process of scheduling a dispute resolution hearing is a time-consuming, manual process. In 2008/09, the RTB provided TELUS with the requirements for enhancing the scheduling system. TELUS is exploring the technical requirements of agreed upon solution. This project started in 2008, for completion in 2009.

**Challenges:**

- **Call Centre Anywhere (CCA) system's compatibility with Windows Vista**

The Province is in the process of upgrading all government workstations with Windows Vista before the end of 2009. RTB has just learned that the vendor has not accepted any official commitment to support CCA in Windows Vista environment. RTB and TELUS have been exploring options to find an appropriate solution.

- **Budgetary limitations**

The economic downturn has limited the Province's ability to support system upgrades. The existing budget is now half of what it was originally, owing to CPI portions of the contract. This will significantly affect RTB's ability to make the system respond to business needs.

### **3. Contract Objectives**

The Master Service Agreement signed on January 31, 2005, includes the following objectives:

- To ensure minimal impact on personnel and business operations during the initial transition period;
- To make RTB services more flexible, sophisticated and efficient than before;
- To reduce costs in delivering RTB services and realize further cost reductions in the future;
- To establish service levels and to set measurements of performance;
- To protect the privacy and personal information of clients, stakeholders and RTB employees;
- To foster a co-management relationship which is flexible enough to allow for changes to the services provided by TELUS and to make adjustments as a result of unforeseen circumstances;

- To introduce enhancements to the services that allow clients and stakeholders to be more self-reliant;
- To allow the Province to exceed clients' expectations for the delivery of RTB services, and to continually seek improvements;
- To develop new or enhanced business processes to accommodate fluctuations in RTB service volumes;
- To have TELUS offer information regarding "best practices" by monitoring and evaluating new and available technologies and services.

Collectively, the Province and TELUS have delivered results that demonstrated some progress toward the identified objectives (Appendix A). Activities that support these objectives will be ongoing over the duration of the alternative service delivery relationship.

#### **4. Service Commitments**

RTB is committed to providing timely dispute resolution services. A longstanding performance measure in its annual service plan has been to hear 92% of disputes within six weeks of receiving an application.

In 2007/08, RTB identified and prioritized disputes that were most critical to landlords and tenants. The prioritization continued in 2008/09. This resulted in applications for dispute resolution relating to:

- Early end to tenancy being heard within 1.5 weeks;
- Orders of possession being heard within 3 weeks; and,
- Emergency repairs, access and return of property being heard within 3.5 weeks;
- RTB also designed and delivered a special Direct Request process for Orders of Possession for Non-payment of Rent or Utilities. The process streamlines the caseload even more effectively;
- Finally, RTB designed and delivered an online database of decisions, so clients may view decisions on topics of interest.

RTB and TELUS continue to work together to provide the clients with a faster dispute resolution services by improving business processes and technological infrastructure.

## Appendix A – Contract Objectives: Reporting on Results

### Objective 1

To ensure minimal impact on personnel and business operations during the transition period

Activities (undertaken to achieve objective)	Results (Year-To-Date)
Train staff	Completed in May – August 2005. Successful and orderly transition accomplished without service interruptions.
Develop Transition Plan	
Fully test new system	

### Objective 2

To improve the RTB services by making them more flexible, sophisticated and efficient than before

Activities (undertaken to achieve objective)	Results (Year-To-Date)
Identify areas to improve and streamline the workflow of application for dispute resolution	<ul style="list-style-type: none"><li>• Implemented two application forms – one for landlords and one for tenants – both in paper and electronic format.</li><li>• Payment procedures modified to align paper and electronic applications.</li></ul>

### Objective 3

To reduce costs in delivering RTB services and realize further cost reductions in the future

Activities (undertaken to achieve objective)	Results (Year-To-Date)
Implement system	<p>Savings over funding levels before the system was introduced were:</p> <ul style="list-style-type: none"> <li>• \$1,500,000 (20.6%) in 2005/06;</li> <li>• \$1,000,000 (13.7%) in 2006/07;</li> <li>• \$100,000 (1.4%) in 2007/08.</li> <li>• \$150,000 in 2008/09.</li> </ul> <p>It was expected that the greatest savings would be related to the consolidation of operations in the first two years.</p> <p>As most RTB costs are based on demand for service, and demand continues to grow, overall savings are expected to be lower in future years. One important factor is the large increase in demand, which staff have been able to manage. Related savings have not been quantified.</p>

### Objective 4

To establish service levels and to set measurements of performance

Activities (undertaken to achieve objective)	Results (Year-To-Date)
<p>Service objectives were established in the contract for:</p> <ul style="list-style-type: none"> <li>• Hosting Services (Availability, Performance, Repair Time)</li> <li>• Application Trouble Resolution</li> <li>• Network Services (Availability)</li> <li>• Help Desk Services</li> </ul>	<p>All Service Levels and System Availability targets have been met to date.</p> <p>CICA Section 5100 Audit shared with RTB.</p>

### Objective 5

To protect the privacy and personal information of clients, stakeholders and RTB

employees

Activities (undertaken to achieve objective)	Results (Year-To-Date)
A Privacy Impact Assessment was completed prior to implementation of the system	Privacy has been protected: <ul style="list-style-type: none"> <li>• No issues have been raised;</li> <li>• No complaints have been received.</li> </ul>

### Objective 6

To foster a co-management relationship which is flexible enough to allow for changes to the services provided by TELUS and to make adjustments as a result of unforeseen circumstances

Activities (undertaken to achieve objective)	Results (Year-To-Date)
Governance structure established, with regular bi-weekly “working group” and quarterly “steering committee” meetings and updates	Regular biweekly working group and quarterly steering committee meetings have been held. Ad hoc steering committee meetings were held as required.
Relationship maintained through workshops and similar initiatives to improve joint understanding.	Joint workshops held, resulting in improvements to procedures and technological solutions.

### Objective 7

To introduce enhancements to the services that allows clients and stakeholders to be more self-reliant

Activities (undertaken to achieve objective)	Results (Year-To-Date)
Improvements to website <ul style="list-style-type: none"> <li>• Navigation</li> <li>• Information</li> </ul> Improvements to phone services <ul style="list-style-type: none"> <li>• Automated messages updated</li> <li>• Touch-tone menu material updated</li> </ul>	<ul style="list-style-type: none"> <li>• Improved web-based materials updated periodically;</li> <li>• Redesign of website architecture underway;</li> <li>• Improvements to phone-based information services completed.</li> </ul>

## Objective 8

To allow the Province to exceed clients' expectations for the delivery of the RTB services, and to continually seek improvements

Activities (undertaken to achieve objective)	Results (Year-To-Date)
Improved flexibility in dispute resolution hearings held by conference call  Continuous Improvement Project (CI) has been launched.	<ul style="list-style-type: none"><li>• Migration to call-in process, via conference bridge, from procedure where a Dispute Resolution Officer connected the parties to a hearing.</li><li>• RTB staff has identified changes to procedures that will result in processing improvements. Several involve TELUS solutions, but require funding.</li></ul>

## Objective 9

To develop new or enhanced business processes to accommodate fluctuations in the RTB service business volumes

Activities (undertaken to achieve objective)	Results (Year-To-Date)
The system has the ability to allow RTB to allocate resources where they are most needed.	<ul style="list-style-type: none"><li>• RTB manages phone queue and call-back systems. Wait time drastically reduced.</li></ul>

## Objective 10

To have TELUS offer information regarding "best practices" by monitoring and evaluating new and available technologies and services.

Activities (undertaken to achieve objective)	Results (Year-To-Date)
Enhance call centre operations	First stage of detailed review of call centre operations by TELUS consultants completed in March 2007. RTB has implemented appropriate suggestions.
