Introduction

General description of the Province	British Columbia is located on Canada's Pacific coast, and has a land and freshwater area of 95 million hectares. It is Canada's third largest province and comprises 9.5 per cent of the country's total land area.
Geography	The province is nearly four times the size of Great Britain, 2.5 times larger than Japan and larger than any American state except Alaska. British Columbia's 7,022-kilometre coastline supports a large shipping industry through ice-free, deep-water ports. The province has about 8.5 million hectares of grazing land, 1.8 million hectares of lakes and rivers, and 950,000 hectares of agricultural land that is capable of supporting a wide range of crops.
Physiography	British Columbia is characterized by mountainous topography, but also has substantial areas of lowland and plateau country. The province has four basic regions, a northwesternly trending mountain system on the coast, a similar mountain system on the east, and an extensive area of plateau country between the two. The northeastern corner of the province is lowland, a segment of the continent's Great Plains.
	The western system of mountains averages about 300 kilometres in width and extends along the entire British Columbia coast and the Alaska panhandle. The Coast Mountains contain some of the tallest peaks in the province. The western system includes the Insular Mountains that form the basis of Vancouver Island and the Queen Charlotte Islands. These islands help to shelter the waters off the mainland coast of British Columbia, which form an important transportation route for people and products.
	The interior of British Columbia is a plateau of rolling forest and grassland, 600 to 1,200 metres in average elevation. North of Prince George the interior becomes mountainous, but plateau terrain returns just south of the Yukon boundary in the area drained by the Liard River. The southern interior's water system is dominated by the Fraser River, which has a drainage area covering about one-quarter of the province. The Rocky Mountains, in the eastern mountain system, rise abruptly on the southern British Columbia-Alberta boundary and are cut by passes that provide dramatic overland transportation routes into the province. The Rocky Mountain Trench lies immediately to the west of the Rockies. This extensive valley, the longest in North America, is a geological fault zone separating different earth plates. It is the source of many of British Columbia's major rivers, including the Peace, Columbia and Fraser.
Climate and Vegetation	Coastal British Columbia has abundant rainfall and mild temperatures associated with a maritime climate. The Pacific coast has an average annual rainfall of between 155 and 440 centimetres, while the more sheltered coasts of eastern Vancouver Island and the mainland along the Strait of Georgia average between 65 and 150 centimetres. Canada's longest frost-free periods of over 180 days per year are enjoyed along the edges of the coastal zone and far inland along the Fraser River valley. Temperatures fall quickly up the steep slopes of the Coast Mountains. The predominant trees in this coastal region are the western hemlock, western red cedar and balsam (amabilis fir) in the wetter parts, and Douglas fir and grand fir in the drier areas.
	The interior region of British Columbia has a mainly continental type of climate, although not as severe as that of the Canadian prairies. Considerable

variation in climate occurs, especially in winter, as mild Pacific storms bring relief from cold spells. The southern interior has the driest and warmest climate of the province. In the valleys, annual precipitation ranges from less than 30 centimetres to 50 centimetres, while daily temperatures can average over 20 degrees Celsius in July and just under freezing in January. The climate becomes more extreme further north and precipitation increases. The frost-free period in the north is short and variable. Lodgepole pine is the dominant tree of commercial value in the interior.

The northeast region of the province is an extension of the western prairie region of Alberta. It has a continental climate that is more extreme than that of the northern interior region. However, it does have long hot summers and a frost-free period long enough to grow grain, forage and other crops.

Chapter One Economic Review **2001 Overview** The British Columbia economy grew 0.9 per cent in 2001, down from 3.9 per cent in 2000. A recession in the US, the province's largest trading partner, combined with trade restrictions on lumber reduced exports and their contribution to growth. Commodity prices also fell as world demand slowed.

Monetary stimulus from lower interest rates helped to offset the reduction in demand.

Consumer spending remained robust through the year, despite falling employment. The housing sector also recorded an increase in 2001 from an historic low in 2000. The total number of jobs in the province peaked in March then declined through the year. The labour force continued to grow and as a result the unemployment rate rose.

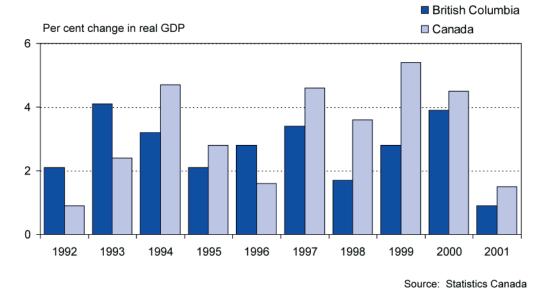

Chart 1.1 Canadian and British Columbia economic growth

ExternalWorld output grew 2.5 per cent in 2001, down from 4.7 per cent in 2000,Environmentaccording to the International Monetary Fund. The US-led global recession was
mild and relatively brief compared to previous recessions. Economic activity in
Canada and Europe slowed as US demand for goods was reduced. In Japan,
the economy turned down for the third time in a decade.

InternationalThe US economy, the province's largest trading partner, was already beginning
to slow from the rapid pace of growth of the last five years when the events
of September 11 pushed it further into recession. As a result of the terrorist
attacks in the US, travel, trade and financial markets came to a standstill.

Real GDP declined in the third quarter then posted a positive result in the fourth quarter. The National Bureau of Economic Research declared that March 2001 was the start of the US recession. For the year, the US economy grew 1.2 per cent, down from 4.1 per cent in 2000. The recession was brief and mild by historical standards in part because of continued spending by consumers.

In the US, employment fell and the unemployment rate climbed from 4.2 per cent in January to 5.8 per cent in December. Despite the weaker employment situation, consumer spending showed continued growth through the year, supported by falling interest rates and cuts to personal income taxes. Mortgage refinancing at lower interest rates increased consumers' buying power. In the fall, sales of new motor vehicles skyrocketed as consumers took advantage of zero per cent financing incentives. In addition, housing construction increased 2.2 per cent with the number of new houses reaching 1.6 million units.

The economic slowdown was mostly felt in the manufacturing and high tech sectors. Industrial production fell 3.7 per cent. Business profits declined and investment dropped as production fell well below capacity. The high tech sector also experienced a meltdown in share prices with many firms going bankrupt.

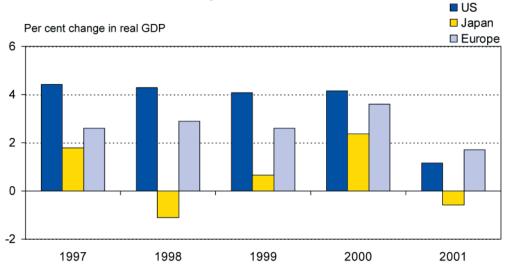

Chart 1.2 External economic growth

Japan's economy contracted 0.6 per cent in 2001 following growth of 2.4 per cent in 2000. Japan entered its third recession of the past decade due to both internal and external factors, including falling consumer confidence, the global slowdown, and structural problems in the banking sector.

With the contraction of the Japanese economy over the last decade, the country's role as the engine of growth in the Asia-Pacific region and a major trading partner for British Columbia, has diminished. Japan is the destination for just over one-tenth of the province's merchandise exports, compared to almost one-third ten years ago, and as a result, developments in Japan's economy now have a smaller impact on the BC economy.

Europe was affected to a lesser extent by the US recession. As a result, Europe posted the strongest economic growth of the province's trading partners, growing 1.7 per cent in 2001, down from 3.6 per cent in 2000.

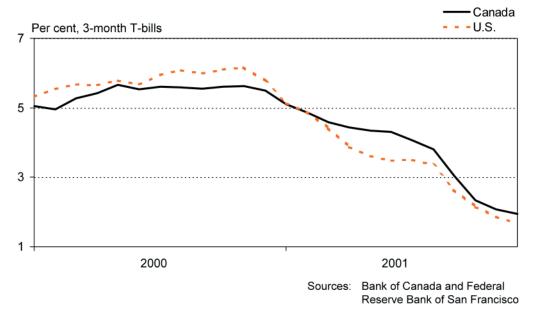

Source: International Monetary Fund

Financial Markets

Monetary easing by the US Federal Reserve and central banks around the globe helped to mitigate the impact of the slowdown. The US Federal Reserve began to lower the intended federal funds rate in January and, over the course of 2001, lowered interest rates by 475 basis points. The Bank of Canada followed by reducing the key overnight interest rate from 5.5 per cent in January to 2.25 per cent in December.

Following September 11, the Federal Reserve and the Bank of Canada injected liquidity into the financial system to support continued consumer and business spending.

The value of the Canadian dollar fell against the US dollar. For the year, the currency averaged 64.6 cents US, down 2.7 cents US from 2000.

The CanadianThe Canadian economy slowed in 2001, alongside slower economic growth in
the US. The economy contracted in the third quarter before recording positive
growth in the final quarter of the year. As in the US, consumer spending
contributed to growth in the economy, while non-residential investment
declined. The Canadian economy expanded 1.5 per cent in 2001, down from
4.5 per cent in 2000.

Some sectors of the economy were hit harder than others. Manufacturing recorded the largest annual decline in output, followed by agriculture, forestry, fishing and trapping, as well as transportation and warehousing. The impact on specific sectors in some cases reflected lower commodity prices, for example in the forest sector, or was related to the decline in business investment as in high tech manufacturing. Other industries grew in 2001, including construction, mining, oil and gas extraction, retail and wholesale trade, and most other service sector industries.

Labour market developments reflected the economic slowdown. The unemployment rate rose from 6.9 per cent in January to 8.0 per cent in

December. Although employment grew 1.1 per cent for the year, most of the job growth occurred late in the year.

Total wages and salaries increased 4.4 per cent in 2001, reflecting growth in employment and average weekly wages. Personal income rose 3.8 per cent. Inflation was a modest 2.6 per cent, down from 2.7 per cent in 2000.

Although consumer confidence fell following the terrorist attacks on September 11, wage gains, low interest rates and personal income tax reductions contributed to growth in retail sales and housing construction. The value of retail sales increased 4.4 per cent in 2001. Housing starts totalled 162,733 units, up 7.3 per cent from 2000. Most provinces recorded increased residential construction activity in 2001.

- **British Columbia** Economy British Columbia has a relatively small open economy, trading in competitive world markets. British Columbia has a diverse geography, population and economy. The following section describes 2001 economic performance in terms of the components of real gross domestic product (GDP), underlying population trends and characteristics as well as recent developments in the labour market, capital investment and trade. The provincial economy is also described in terms of industrial structure with developments by industry highlighted.
- Real GDPThe British Columbia economy grew 0.9 per cent in 2001, down from
3.9 per cent in 2000. Real GDP as shown in Chart 1.4 is the sum of consumer,
investment, and government spending, as well as, net exports (exports
less imports) and an adjustment in inventories. Consumer spending, which
accounts for two-thirds of GDP, contributed to overall growth as did
investment.

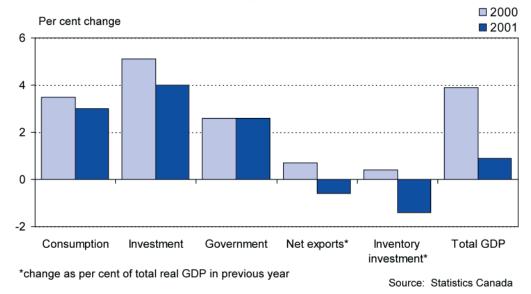

Chart 1.4 British Columbia GDP by component

On the trade side, net exports reduced growth in 2001. Both exports and imports shrank due to weaker external demand for BC products and domestic demand for imports. The brief recession in the US and Canada reduced

demand for British Columbia exports. In addition, demand from Japan was weak. In August, the US Department of Commerce imposed preliminary countervailing and anti-dumping duties on Canadian exports of softwood lumber. As a result of these factors, real exports (adjusted for price changes), fell 6.3 per cent in 2001. Imports fell by 4.7 per cent.

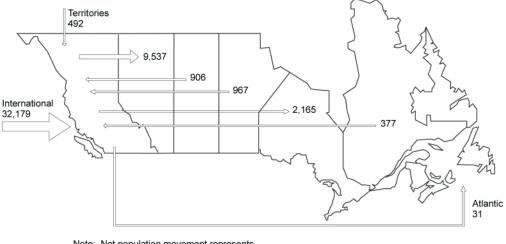

Consumer demand was met by drawing down inventories in 2001. The change in inventories reduced real economic growth by 1.4 per cent.

PopulationPopulation growth contributes to demand for consumer goods and services
and housing and is one factor in determining the size of the labour force.
British Columbia's population as of December 31, 2001 was 4,108,031, an
increase of 0.9 per cent, or 35,485 persons from a year earlier.

Components of
Population ChangeDuring 2001, there was a net population inflow from international sources of
32,179 persons. There was also a net population outflow to the rest of Canada
of 8,991 persons, the fourth consecutive year that British Columbia has lost
population to the other provinces.

In 2001, net migration accounted for 65.3 per cent of the growth in the province's population, natural increase accounted for the rest.

Note: Net population movement represents total inflow less total outflow.

British Columbia's population represents 13.2 per cent of Canada's total population. This is an increase from the 12.1 per cent share in December 1991, and reflects an average annual compound increase in population of 1.8 per cent. The national annual increase during the same period was 1.0 per cent.

Age Structure of
the PopulationThe age structure of British Columbia is shaped largely by the post-war baby
boom and the subsequent drop in birth rates. The effects of the baby boom
can easily be seen in the bulge in population between the ages of 30 and 54.
This age group accounted for 39.7 per cent of the population in 2001 (see
Chart 1.5)

Labour Force Characteristics

British Columbia has a skilled and knowlegeable workforce. In 2001, 51.1 per cent of the workforce had a university degree, post-secondary certificate or diploma, up from 39.1 per cent 10 years earlier. Over half of the workforce is between the ages of 25 and 44, although the share of 45 to 64 year olds has increased since 1991, reflecting the aging of the province's population.

Table 1.2 British Columbia Employment and Labour Force Characteristics

Labour and Income Developments

The decline in British Coumbia's forest sector, as well as lower demand for the province's exports, resulted in a decline in goods sector employment in 2001. Service-sector employment grew but was not enough to offset the losses in the primary and manufacturing sectors. Overall, employment fell by 0.3 per cent or 6,700 jobs.

While overall employment declined in 2001, there was also a shift between full-time and part-time employment consistent with slowing economic growth in the province. Full-time employment fell and part-time employment grew as the economy slowed.

Other significant labour market and income developments for 2001 included:

- the labour force grew by 0.2 per cent or 3,500 people.
- service sector employment was up 1.0 per cent, or 15,700 jobs while goods sector employment fell 5.4 per cent, or 22,400 jobs (see Chart 1.10 and Chart 1.11 for detail of these sectors).

	• both paid private and public sector employment recorded declines in 2001.
	• self-employment fell by 1.6 per cent, or 5,700 jobs.
	• the Mainland/Southwest region recorded a 10,000-person increase in employment in 2001 while Vancouver Island/Coast region recorded a 20,500-person decline. Employment was flat in the other five regions.
	• the participation rate, the number of people actively seeking work as a share of the population over 15 years of age, fell to 64.1 per cent, the second consecutive annual decline.
	• the unemployment rate averaged 7.7 per cent in 2001, up from 7.2 per cent in 2000.
Prices and Wages	Both prices and wages recorded modest increases in 2001. The British Columbia consumer price index (CPI) increased 1.7 per cent, compared to 1.9 per cent in 2000. The change in 2001 was due to higher prices for food, health and personal care, alcohol and tobacco and shelter contributed to inflation. Excluding food and energy, consumer prices were 1.0 per cent higher on average than 2000.
	Wage increases reached in collective agreements averaged 2.7 per cent for 33 agreements covering 165,550 employees. This was up from 1.6 per cent in 2000 but below the Canadian average of 3.2 per cent in 2001.
Consumer Expenditure and Housing	Consumer spending remained relatively robust through the year, as the effects of a slowing economy were offset by lower federal and provincial tax rates and low interest rates. The total value of retail sales rose 6.0 per cent in 2001, following a 6.3 per cent increase in 2000. New motor vehicles, food and drugs, general merchandise, and other auto-related stores contributed most of the increase.
	Housing starts in the province gradually picked up through the year as mortgage interest rates declined. For 2001, housing starts totalled 17,234 units, a 19.5 per cent increase from an historic low in 2000.
	As a result of improving housing demand and flat prices, the value of residential building permits rose 17.8 per cent to \$2.8 billion. The value of non-residential building permits rose just 1.7 per cent to \$2.1 billion. The growth in non-residential building permits was entirely due to an increase in institutional and government building permits as both commercial and industrial building permits declined.

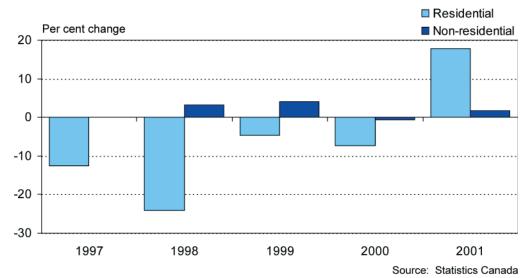

Chart 1.6 Building permits by activity

Capital Investment

Total investment in the province rose 7.1 per cent to \$22.5 billion in 2001 (see Table 1.3). Public sector investment rose 9.8 per cent. Private sector investment, which accounts for just over 75 per cent of total investment, rose 6.4 per cent. Residential investment was up 8.2 per cent reflecting low mortgage interest rates and rising housing starts through the year. Non-residential investment rose 5.5 per cent, due to both an increase in non-residential construction and an increase in machinery and equipment investment. Private non-residential construction was up 10.4 per cent in 2001.

Table 1.3 British Columbia Capital Investment, 2001

	Const	ruction	Machinery an	nd Equipment	Total

Source: Statistics Canada

Investment figures for 2001 include spending on major capital projects across the province including:

- investment in the oil and gas sector in the northeast of the province, such as an ethanol plant in Prince George and Duke Energy's gas processing plant near Chetwynd;
- several hydroelectric power projects in the Lillooet River system by Cloudworks Energy Inc. and BC Hydro's Seven Mile power plant near Trail;

- large hotel and residential construction projects in Vancouver, such as the Hotel Georgia (\$100 million) and multi-tenant buildings in the phased \$500-million Tech Park developments at False Creek Flats; and,
- major highway projects in the province, the largest of which involved the northern section of the Island Highway.

Other major projects under construction in 2001 included several public sector projects (SkyTrain expansion), bridge repair work (Lions Gate Bridge) as well as residential projects. Victoria International Airport underwent a major renovation and the Vancouver International Airport upgraded its domestic terminal.

ExportsThe value of foreign merchandise exports fell 6.4 per cent in 2001. Exports to
the US, the province's largest trading partner, fell 3.4 per cent, as declines in
pulp, zinc, and machinery and equipment exports were offset by increased
exports of most other commodities. The value of exports to Japan plummeted
19.2 per cent, led by declines in pulp, lumber, newsprint and metals. Exports
to the Pacific Rim, excluding Japan, fell 19.9 per cent reflecting the general
economic slowdown in the region. Exports to the European Union fell
18.1 per cent. Appendix Table A1.6 provides detail on exports by major market
and commodity.

As a result, the US was the destination of an even greater share of British Columbia exports in 2001, accounting for 69.9 per cent. Japan's share fell to 12.7 per cent (see Chart 1.7).

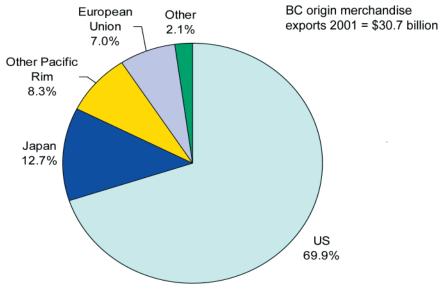

Chart 1.7 Exports by market, 2001

Source: Statistics Canada

Prices of most natural resource commodities fell in 2001 reflecting the global industrial slowdown. Metal and mineral prices fell steadily through the year. In

general, forest product prices fell as the US and Canadian economies slowed. Energy prices rose sharply in the fall of 2000 and remained high in early 2001 before returning to normal prices (see Chart 1.8).

On August 9, the US imposed a 19.3 per cent preliminary coutervailing duty on lumber shipments from Canada, and in October 2001 added a preliminary antidumping duty of close to 13 per cent. This in effect reduced the value received by British Columbia lumber mills for their shipments to the US market.

- Lumber prices averaged \$248 US per thousand board feet in 2001, down from \$255 US in 2000. Prices for spruce-pine-fir 2X4's climbed steadily in the first half of 2001 reflecting the increasing demand from growth in US residential construction.
- Pulp prices averaged \$541 US per tonne in 2001, down significantly from \$681 US in 2000. Prices fell steadily during the year as global demand slowed.
- Newsprint prices lagged pulp, averaging \$589 US per tonne, up slightly from \$564 US in the previous year. Newsprint prices rose during the first half of the year then fell during the second half of 2001.

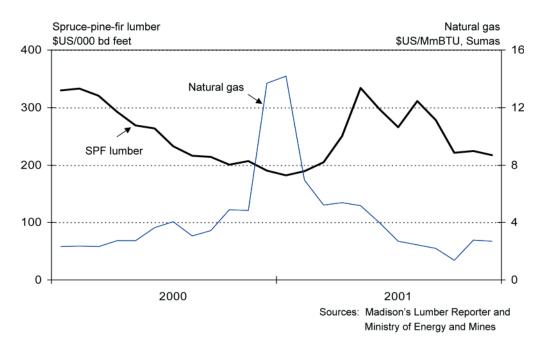

Chart 1.8 Key commodity prices

Industry Review

The share of the non-resource sector has been climbing during the past number of years (see Chart 1.9). Activities such as non-resource manufacturing (biotech, electronic communications, areospace) as well as service sector activities have been growing in terms of employment and their share of GDP. Appendix Table A1.3 shows historical real gross domestic product by industry.

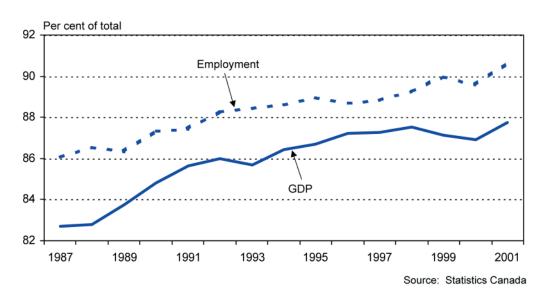

Chart 1.9 Non-resource industries in British Columbia

In 2001, an increase in service sector employment was more than offset by a decrease in employment in the goods-producing industries. Goods sector employment fell reflecting layoffs in the forest sector, as well as reductions in paper manufacturing employment.

Goodsproducing Industries

There are seven standard industry groups within the goods-producing sector: manufacturing, forestry, mining, agriculture, fishing, construction and utilities. These industries together generated 25.5 per cent of British Columbia's estimated GDP in 2001 and employed 20.2 per cent of the province's 1.9 million workers in 2001. Output in the goods-producing sector shrank 3.9 per cent in 2001 and employment fell 5.4 per cent.

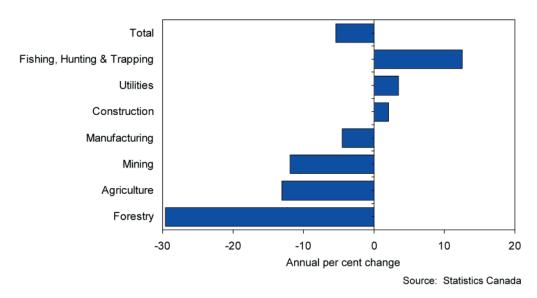

Chart 1.10 Goods sector employment, 2001

Financial and Economic Review — July 2002

Manufacturing	Within the goods sector, the largest industry is manufacturing, which accounts for just over half of the jobs. About half of manufacturing is non-resource based, and includes clothing, metal, computer and electronic products and transportation equipment. Manufacturing output, adjusted for price changes, fell 8.2 per cent in 2001.
	Employment in manufacturing declined 4.5 per cent in 2001, reflecting the economic slowdown in North America and Asia. Both resource and non-resource based manufacturing lost jobs in 2001. Employment declines were recorded in paper, printing and related support activities, primary metal, and transportation equipment manufacturing. Food, clothing, wood products, fabricated metal product and furniture manufacturing recorded increased employment.
	The value of manufacturing shipments fell 9.7 per cent in 2001, mainly due to lower value of wood, paper and allied shipments. Appendix Table A1.12 provides a breakdown of the nominal value of manufacturing shipments by industry.
Forestry	The province's forest sector, which includes logging and silviculture, suffered a major setback in 2001 with the expiration of the US-Canada softwood lumber agreement on March 31, 2001 and the subsequent US-imposed preliminary coutervailing and anti-dumping duties on August 9, 2001. As a result of the combined duties of about 32 per cent, a lack of demand from Japan and the need to remain competitive, the province's lumber industry entered a period of restructuring.
	Employment in forestry, logging and support activities fell by almost 30 per cent or 11,000 jobs in 2001. With just 26,100 people employed in this sector, forestry and logging was at its lowest level of employment in more than 11 years.
	British Columbia's timber harvest was 72.0 million cubic metres in 2001, a 6.5 per cent decline from 2000. About 70 per cent of the harvest occurs in the Interior, with Coastal forests providing the remainder. Appendix Table A1.8 provides detailed information on timber scaled by species of wood, production and prices. More information on the province's forestry sector can be found on the Ministry of Forest web site (www.gov.bc.ca/for/).
Mining	Most of British Columbia lies within the Western Cordillera, a geological formation known to contain a wide variety of valuable minerals. The province is a major producer of coal and natural gas, as well as metals such as gold, silver, lead, zinc, copper and molybdenum. The northeast of British Columbia produces commercial quantities of oil and gas. Other areas contain significant volumes of sedimentary rocks which may also be productive in future. Coalbed methane reserves can be found throughout the province.
	Overall employment in the mining sector declined in 2001 as a decrease in mining (excluding oil and gas) more than offset increased employment in other activities (including support activities for mining and oil and gas extraction).

	The value of metal production fell 10.1 per cent in 2001, due to lower values
	for zinc, copper, gold, lead and silver (see Appendix Table A1.9).
	The province recorded a significant increase in activity in the mining, oil and gas sector in 2001 as high natural gas prices early in the year spurred exploration activity in the northeast. The Ladyfern discovery — Canada's riches in 15 years — is in northeast British Columbia, the second largest natural gas producing region in Canada. The resource potential is made up of 50 trillion cubic feet of natural gas and up to 265 million barrels of oil remain to be discovered or recovered.
	The province sold a record \$440 million of oil and gas rights and saw record levels of drilling activity with 850 oil and gas wells drilled in 2001. A record 30 billion cubic metres of gas were produced, up significantly from 2000. The value of natural gas to pipeline increased 34 per cent to \$5.2 billion (see Appendix Table A1.10). Investment by the oil and gas industry increased 23 per cent over 2000 to \$4.3 billion.
	In the coal mining industry over 26 million tonnes were produced with almost all of it for export. Average coal prices rose from 2000 levels. In 2001 the total value of coal production rose by 34 per cent to over \$1 billion.
	More information on the province's mining sector is available on the government web site (www.gov.bc.ca/em/).
Agriculture	In 2001, farm cash receipts were up 7.8 per cent from 2000, with the increase split equally between livestock and crops. Employment in agriculture was 25,900 persons, a 13.1 per cent decline from 2000, and the industry accounted for just 1.3 per cent of the province's total employment.
	For more information on the agriculture sector, refer to the ministry web site (www.gov.bc.ca/agf/).
Fishing, Hunting and Trapping	Employment in the fishing, hunting and trapping sector rose to 5,400 persons in 2001 from 4,800 persons the previous year. This is a relatively small sector of the provincial economy in terms of employment and GDP.
парршg	Increased focus on value-added processing of all species resulted in a higher wholesale value for British Columbia seafood. Exports of fish totaled \$965 million in 2001, a 7.8 per cent increase from 2000.
	More information on British Columbia's fisheries is available at: www.bcfisheries.gov.bc.ca.
Construction	The province's construction industry benefitted from increased housing construction activity as well as institutional construction in 2001. Employment in this industry rose 2.1 per cent in 2001, and accounted for about 6 per cent of total employment.
Utilities	The utilities sector includes electric power and gas distribution establishments (natural gas production is included in the mining, oil and gas sector), as well as water systems and other utilities such as waste disposal. These industries employed about 11,700 people in 2001, slightly higher than 2000.

Most of the electrical production is consumed within the province, with the remainder exported to the US. In 2001, exports of electricity totalled \$1.4 billion. In 2001, hydro generation was down from 2000 levels due to low water levels. As a result, the province's export trade in electricity was resourced through electricity imports which were resold to the US market (see Appendix Table A1.13).

Service-British Columbia's service sector accounts for about three-quarters of provincial
output. The sector grew 2.4 per cent in 2001, more than offsetting the decline
in the goods-producing sector.

Service sector employment, which accounts for 80 per cent of total provincial employment, rose by a net 15,700 jobs or 1.0 per cent in 2001. Most service sector industries recorded higher levels of employment except in transportation and warehousing, finance, insurance and real estate, and public administration. Employment in high tech related industries (computer system design services, architectural, engineering and design services and management, scientific and technical services which are included in professional, scientific and technical services in Chart 1.11) increased by 6.5 per cent in 2001.

Chart 1.11 Service sector employment, 2001

Retail and Wholesale Trade

During 2001 nearly one in six workers in British Columbia, or 309,500 people, were employed in a retail or wholesale business, making the sector the province's second-largest employer. Most of the employment in the wholesale and retail sector is in the retailing industry (240,900), while wholesalers employ about one quarter as many people.

Wholesale trade primarily involves the purchase of merchandise for resale, to retailers as well as to industrial, commercial, institutional, farm or professional business users. Wholesale trade fell 1.6 per cent to \$37.1 billion in 2001.

Retail trade is a diverse group, ranging from outlets selling big-ticket items such as motor vehicles, to supermarkets and department stores. Employment in retail trade increased 2.0 per cent in 2001, mainly due to more people

working for motor vehicle and parts dealers. Low interest rates and affordable financing deals encouraged the sale of new motor vehicles, which grew 2.9 per cent in 2001. The value of retail sales rose 6.0 per cent in 2001, to total almost \$38 billion.

Transportation The transportation and warehousing industry employed 106,900 people in 2001 — about 5.5 per cent of the workforce. Transportation industries — air, rail, water, truck, bus and other transportation services - account for most of the employment in this sector. Warehousing and storage employment was up slightly.

> Truck and air transportation are the largest subsectors and both recorded declines in 2001. Employment in air transportation fell almost 20 per cent with the earlier merger of Canadian Airlines with Air Canada, the reduction in air travel following September 11 and the Canada 3000 bankruptcy. Passenger traffic at Vancouver International Airport totalled 7.9 million people, down 5.3 per cent from 2000.

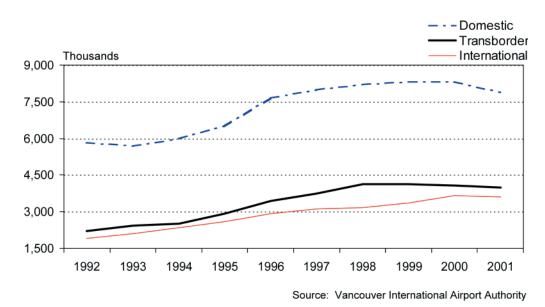

Chart 1.12 Passenger Traffic at Vancouver International Airport

Rail, water, transit and ground passenger transportation employment increased in 2001. The Port of Vancouver handled 72.9 million tonnes of cargo in 2001, down 4.8 per cent from 2000. While container traffic fell one per cent from 2000, cruise ship activity increased in 2001. The number of revenue passengers rose one per cent to 1.06 million people on 332 voyages.

Real output in the transportation and warehousing sector fell by 4.7 per cent in 2001, following growth of 4.5 per cent in 2000.

Employment in the finance, insurance, real estate and leasing sector totaled 116,200 in 2001, down 2.8 per cent from 2000. The number of jobs in the this sector peaked in 1997 and has declined since. This sector includes chartered banks, credit unions and other financial institutions, insurance carriers and agencies, real estate brokers, investment dealers, stock exchanges and operators of commercial and residential buildings.

Finance. Insurance, **Real Estate** and Leasing

and

Warehousing

Professional,

Scientific and

Technical

Services

Real output in the finance, insurance and real estate sector grew 3.3 per cent in 2001, up from 2.4 per cent in 2000. Appendix Table A1.14 and A1.15 contain more information on these industries.

This sector includes legal, accounting, architectural and design services, as well as computer system design, management, scientific and technical services and advertising services. Employment in this sector totalled 141,000 persons in 2001, up from 136,400 in 2000.

Appendix Table A1.17 provides details on activity in the province's high technology sector. An annual profile of the high technology industry can be found at: www.bcstats.gov.bc.ca.

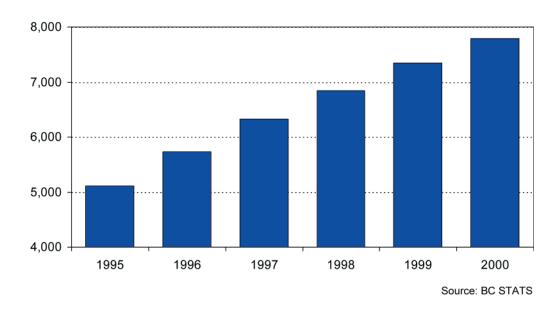

Chart 1.13 High technology sector establishments

Management, Administrative and Other Support	Management, administrative and other support includes employment, business, travel, security services as well as waste management. Employment in this sector grew 2.8 per cent in 2001. The growth occurred mainly in security services which recorded a 28.1 per cent increase, or 2,700 persons as security in the travel industry and other areas was increased after September 11.
Information, Culture and Recreation	Information, culture and recreation is comprised of publishing industries, motion picture and sound recording industries, broadcasting and telecommunications, information services and data processing as well as recreation, amusement and gambling industries. In 2001, there were 106,200 people employed in this sector, up from 99,300 in 2000. The increase was mainly due to employment growth in broadcasting and telecommunications which added 4,700 jobs in 2001. Employment in amusement, gambling and recreation industries added 2,700 jobs in 2001 to total 27,300 people or about one-quarter of the jobs in this group of industries.
Education	The level of employment in educational services was relatively flat in 2001 as decreases in primary and secondary educational support were offset by increases in post-secondary, university and other school support. This category

	includes private-sector training institutions, many specializing in computer or high-tech programs such as Compucollege, CDI, Northwest Digital and the Information, Technology Institute. In 2001, there were 135,700 people employed in the education sector, up slightly from 2000.
Health and Social Services	The health and social services industry includes publicly-operated hospitals, doctors and dentist offices, as well as homes for people requiring medical or other care, medical labs, day care centres and pre-schools, and other types of social services.
	In 2001, there were 203,800 people employed in this sector up slightly from 2000. Increases in the number of people working in hospitals and nursing and residential care facilities, were offset by decreases in the number of people working in ambulatory health care services and social assistance.
Public Administration	Public administration is comprised of local, provincial, federal government ministries and agencies as well as correctional facilities, courts, the military, law enforcement and fire-fighting agencies. In 2001, there were 88,800 people employed in this sector, down from 89,700 in 2000.
Conclusion	Further information on British Columbia's economic performance will be released in November 2002, when Statistics Canada releases updated GDP data for 2001 and previous years.

Note: Industry account data are measured at basic prices. GDP at basic prices equals GDP at market prices less indirect taxes net of subsides on products. Constant dollar totals for years prior to 1997 do not sum to the published total because they include an adjustment which compensates for changes in the base year used to calculate real GDP.

Chapter Two Financial Review

Introduction ¹	This chapter presents information on the financial results for the government and its Crown corporations and agencies and includes:
	• an overview of the government's summary financial statements (summary accounts) for 2001/02. These statements combine the financial results of the government and its Crown corporations and agencies;
	• details on revenue and expenditure of the consolidated revenue fund (CRF) for 2001/02 (the government's central operating account);
	• financial results of major Crown corporations for 2001/02; and
	• details on capital spending, borrowing activity and debt of the government and its Crown corporations and agencies.
2001/02 Overview	The provincial government recorded a \$1,233-million summary accounts deficit in 2001/02, an improvement of \$267-million compared to the July 30, 2002 budget estimate of a \$1.5-billion deficit. (Unless otherwise indicated, all references to budget in this chapter will be to the July 30 estimate.) Without a \$500-million forecast allowance, the summary accounts deficit would have been \$233 million above budget.

¹ Restated to be consistent with the presentation used for 2001/02.

² Includes \$161 million in restructuring exit costs.

¹ Financial information presented in this chapter is based on *2001/02 Public Accounts* information. Figures are consistent with the government's organization and accounting policies effective March 31, 2002, and for comparative purposes, information for prior years has been restated where practical. For additional information on the government's accounting policy, see Appendix 2.

Table 2.2 Summary of Changes from the July 30 Budget 2001/02

	Ch	ange	Final Results
		(\$ millions)
Summary accounts deficit - July 30 Budget 2001/02			໌ (1,500
Consolidated revenue fund (CRF) changes:			
Revenue changes:			
- Prior-year personal income tax assessment adjustments	323		
- Higher personal income tax base partially offset by lower economic growth and the			
effect of a federal error in remittances for 2000 and 2001	117		
- Higher corporate income tax payments mainly due to higher assessments for prior year	368		
- Lower sales tax revenue	(129)		
- Other taxes	65		
- Natural resources - lower energy prices and forest harvest volumes	(686)		
- Other miscellaneous sources - higher revenue from MSP premiums, asset dispositions			
and other sources, partially offset by lower investment earnings and higher			
allowances for doubtful accounts			
- Equalization entitlement, partly offset by lower CHST			
- Higher Crown corporation and federal cost-sharing contributions	32	225	
Spending changes:			
- Skeena Cellulose Inc.			
- Ministry of Health Services additional spending	(202)		
- Additional government restructuring costs	(81)		
- Ministry of Attorney General savings	47		
- Ministry of Community, Aboriginal and Women's Services savings	41		
- Ministry of Forests savings	41		
- Ministry of Human Resources savings	33		
- Ministry of Children and Family Development savings	27		
- Other ministry savings	55		
- Contingencies savings	179		
- Lower debt interest	62	(105)	12
Crown corporation changes:			
Taxpayer-supported:			
- BC Ferries - additional asset write-downs partially offset by higher operating income	(26)		
- Forest Renewal BC - higher loss	(72)		
- 552513 British Columbia Ltd. (Skeena Cellulose Inc.) - higher operating loss and asset	. ,		
write-downs	(83)		
- Effect of government loan guarantees and other payments for Skeena Cellulose Inc	220		
- Other changes and adjustments	32	71	
Self-supported commercial:			
- BC Hydro - lower net income and increased transfer from rate stabilization account	(117)		
- BC Rail - lower net income including restructuring costs	(173)		
- ICBC - operating loss, asset write-downs and restructuring costs			
- Other changes and adjustments		(550)	(47
Deficit before forecast allowance and joint trusteeship			(1,85
Forecast allowance			50
Joint trusteeship - increase in one-time benefit based on updated actuarial			
valuation information			12
Summary accounts deficit - 2001/02 Public Accounts			(1,23
			(1,23

The final deficit amount included:

- a CRF shortfall of \$1.7 billion; and
- combined Crown corporation net losses of \$1 billion (after dividends paid to the CRF);

partially offset by:

• a \$1.5-billion one-time positive adjustment from implementing joint trusteeship for the Teachers' Pension Plan and Municipal Superannuation Plan.

Excluding the impact of the one-time pension adjustment, the summary accounts had a \$2.7-billion deficit.

CRF revenue for the year was \$225 million more than budgeted primarily due to higher-than-expected personal and corporate income taxation revenue which offset weaker revenue from natural resources.

CRF expenditures were \$105 million above budget as additional spending for assistance to Skeena Cellulose Inc., Ministry of Health Services and government restructuring was partially offset by expenditure savings in other programs.

Combined Crown corporation net losses (after adjustments) of \$1 billion included a one-time, \$256-million transfer to the CRF to reflect the wind-up of Fisheries Renewal BC and Forest Renewal BC. Excluding this transfer, the combined net loss was \$746 million, \$479 million higher than expected, mainly due to lower net income of BC Hydro and significant costs in BC Rail and the Insurance Corporation of British Columbia.

Table 2.2 summarizes the major changes from the 2001/02 budget.

The summary accounts deficit of \$1.2 billion contrasts with a \$1.4 billion surplus recorded in 2000/01 (see Table 2.1). The change primarily resulted from a 4.4-per-cent decrease in CRF revenue, an 11-per-cent increase in CRF spending, and weaker Crown corporation results, in part due to the effect of some one-time restructuring costs and asset write-downs during 2001/02.

The 2001/02 summary accounts deficit was \$731 million lower than the third quarter forecast released with the 2002/03 budget presented on February 19, 2002. This reflects:

- \$272 million of additional CRF revenue due to better-than-expected performance in last quarter revenue from taxation, natural resources, fees and other sources, and federal government and Crown corporation contributions;
- a \$363-million reduction in CRF spending due to 14 ministries not fully spending their budgets (including Children and Family Development; Community, Aboriginal and Women's Services; Forests; and Human Resources) and lower spending in other areas including reduced debt interest costs;

- a \$26-million improvement in Crown corporation finances reflecting, in part, better year-end results for Forest Renewal BC and BC Hydro; and
- a \$70 million forecast allowance that was not utilized.

Further details on changes from the February 2002 revised forecast are provided in Appendix Table A2.4.

Consolidated
Revenue FundIn 2001/02, CRF revenue totalled \$23 billion, \$225 million above budget and
down 4.4 per cent from 2000/01. Higher revenue from taxation, Medical
Service Plan premiums, miscellaneous sources, asset dispositions and
contributions from Crown corporations and the federal government was
partially offset by lower natural resource revenue and higher allowances for
doubtful accounts. Tables 2.3, 2.4 and Appendix Table A2.6a provide further
details.

An additional \$838 million of dedicated revenue was collected on behalf of, and transferred to, certain Crown corporations, agencies and other external public bodies in 2001/02. Dedicated revenues, except for amounts collected on behalf of other government jurisdictions, are included in the operating results of Crown corporations. Appendix Table A2.6b provides details of the dedicated revenue transfers.

Revenue changes include:

- Personal income tax was \$440 million above budget and down 9.9 per cent from 2000/01. Higher-than-assumed final assessments for the 2000 tax year resulted in \$323 million of additional revenue. The remainder of the variance reflects the resultant effect of the higher tax base in 2001, partly offset by the effects of lower economic growth and a federal government error in remittances for 2000 and 2001.
- Corporation income tax was \$368 million above budget and up 44 per cent from 2000/01. Federal assessment delays resulted in an additional \$333 million of entitlements for the 1999 and 2000 tax years. A higher federal government estimate of the national tax base in 2001 resulted in cash entitlements being \$35 million above budget.
- Social service tax was \$129 million below budget and 2.3 per cent lower than 2000/01 reflecting a weakening of the underlying tax base.
- Other taxes were \$65 million above budget. The effects of stronger tobacco tax collections (in part due to an increase in rates announced on February 19, 2002), property transfer tax and remittances for corporation capital and insurance premium taxes were partly offset by weaker revenue from fuel, property and hotel room taxes, and higher allowances for doubtful accounts.
- Natural gas, petroleum, and minerals revenue was \$514 million below budget and down 30 per cent from 2000/01 mainly due to lower natural gas prices which more than offset the effect of higher volumes. In 2001/02, the average natural gas producer price was 44 per cent below budget and 45 per cent lower than the previous year.
- Forests revenue was \$41 million below budget and 3.8 per cent lower than 2000/01 mainly due to lower-than-budgeted harvest volumes, especially in the Small Business Forest Enterprise Program (1.8 million cubic metres

	2,798	2,855	2,797	2.1
Total Revenue	22,737	22,962	24,013	(4.4)

¹ Figures based on 2001/02 Public Accounts information. Figures exclude dedicated revenue totalling \$838 million, collected on behalf of, and transferred to, British Columbia Transit, British Columbia Ferry Corporation, BC Transportation Financing Authority, Greater Vancouver Transportation Authority (*Translink*), Forest Renewal BC, British Columbia Oil and Gas Commission, Tourism British Columbia and other entities. These revenues are included as part of the operations of Crown corporations and agencies with the exception of *Translink* and certain other public bodies that are not part of the provincial government's summary accounts. Further information is provided in Appendix Table A2.6b.

² CRF revenue for 2000/01 has been restated to reflect a \$52-million reduction in personal income tax revenue due to a federal error in the calculation of personal income tax remittances to BC resulting from capital gains refunds associated with mutual fund trusts for the 2000 tax year. The federal government's errors relating to 1999 and prior years have not been recorded as the amounts and resolution are under verification and legal review. Revenue has also been restated for other minor corrections.

³ Additional revenue of \$146 million was distributed to charities and local governments.

lower than budget). Overall harvest volumes were 2.9 million cubic metres or 4.8 per cent below budget and 11 per cent lower than 2000/01.

- Columbia River Treaty electricity sales were \$115 million below budget due to significantly lower prices in the U.S. in 2001/02. Average U.S. electricity prices for the year were 40 per cent below budget and more than 60 per cent lower than the previous year.
- Other revenue was \$84 million above budget as higher revenue from Medical Services Plan premiums, fines, miscellaneous sources and disposal of some forestry harvesting rights was partly offset by lower revenue from Crown Land sales and leases, investment earnings, and higher allowances for doubtful accounts.
- Contributions from government enterprises were \$26 million above budget mainly due to higher contributions from the Liquor Distribution Branch and BC Lottery, partly offset by lower contributions from BC Hydro and BC Buildings.
- Contributions from the federal government were \$57 million above budget mainly due to unexpected equalization payments received from the federal government, partly offset by a reduced Canada health and social transfer (CHST) entitlement. In 2001/02, BC received equalization payments of \$226 million in part due to a methodological change by Statistics Canada in estimating property tax bases. However, as defined by formula, the new equalization entitlement resulted in a reduction of CHST cash transfers from the federal government.

Consolidated
Revenue FundExpenditure totalled \$24.9 billion in 2001/02, \$105 million above budget
and 10.9 per cent higher than 2000/01. Excluding \$161 million of one-time
restructuring exit costs, expenditure totalled \$24.8 billion, or 10.2 per cent
higher than the previous year.

Major variances from budget include:

- \$307 million for debt guarantee payments and other costs made on behalf of Skeena Cellulose Inc. as a result of an agreement signed in 1998;
- \$202 million of additional spending in the Ministry of Health Services mainly due to higher compensation costs; and
- \$81 million of additional spending for government restructuring funded from supplementary estimates (which, combined with \$80 million from ministry budgets and contingencies, totals \$161 million in restructuring costs);

partially offset by

- \$244 million lower spending in ministries and other areas;
- \$179 million of unused contingencies vote funding; and
- \$62 million of reduced debt interest costs.

In 2001/02, five ministries – Health Services, Education, Advanced Education, Human Resources, and Children and Family Development — accounted for about 80 per cent of total provincial government expenditure. Interest payments on the government's direct operating debt accounted for about 3 per cent of expenditure.

Table 2.4Comparison of Main Revenue Assumptions and Actual Results -
Consolidated Revenue Fund (\$ millions unless otherwise indicated)

Table 2.4 Comparison of Main Revenue Assumptions and Actual Results Consolidated Revenue Fund (\$ millions unless otherwise indicated) — Continued

Revenue Source and Factors	July 30 Budget Assumption	Actual Result ¹	Budget Variance
Medical Services Plan (MSP) premiums	\$904M	\$955M	+ \$51M
Other fees and licences	\$694M	\$685M	- \$9M
Investment earnings	\$70M	\$64M	- \$6M
Fines, penalties and other miscellaneous	\$220M	\$259M	+ \$39M
Commissions and allowances for doubtful accounts	- \$62M	- \$95M	- \$33M
Asset dispositions	0	\$42M	+ \$42M
2001 population growth	0.9%	0.9%	

Higher MSP premium revenue mainly reflects accounts for prior years, partly offset by higher allowances for doubtful account collections. The budget assumed a decline in revenue from fines and miscellaneous year-end recoveries - actual revenue increased. Asset disposition revenue reflects the recognition of the value of timber rights under a legal settlement agreement.

Total Other Revenue	\$1,826	\$1,910	+ \$84
Liquor Distribution Branch (LDB)	\$616M	\$637M	+ \$21M
British Columbia Hydro and Power Authority (BC Hydro)	\$346M	\$332M	- \$14M
British Columbia Lottery Corporation (BCLC)	\$429M	\$449M	+ \$20M
British Columbia Buildings Corporation (BCBC)	\$16M	\$15M	- \$1M
Columbia Power Corporation	\$2M	\$2M	0
Other	\$2M	\$2M	0

LDB and BCLC net income/contributions were up due to higher-than-expected sales growth. BC Hydro dividend was down mainly reflecting weaker revenue from export trade as U.S. electricity prices fell more than expected resulting in lower export trade margins.

Total Contributions from Government Enterprises	\$1,411	\$1,437	+ \$26
Canada health and social transfer (CHST)	\$2,620	\$2,445	- \$175
2001/02 national cash	\$17,300M	\$17,300M	
2001/02 national tax points (based on national tax bases			
and equalization entitlement)	\$15,569M	\$16,339M	
BC entitlement share (based on share of national population)	13.22%	13.18%	
BC gross entitlement (cash and tax)	\$4,345M	\$4,433M	+ \$88M
less BC tax points (based on BC tax bases)	- \$1,713M	- \$1,758M	- \$45M
less BC equalization tax points	0	- \$132M	- \$132M
Obligation for prior years	- \$12M	- \$98M	- \$86M

A higher BC gross entitlement (cash and tax) reflects BC's share (based on population) of higher national tax points due to stronger national tax base growth. This was partially offset by the effect of higher BC tax points due to stronger BC tax base growth. An unexpected entitlement to equalization resulted in equalization tax points reducing CHST cash entitlement (as required under the CHST formula). A higher obligation for prior years was mainly due to BC's equalization entitlement in respect of 1999/00.

¹ Revenue figures based on 2001/02 Public Accounts.

Economic factors/actual results based on the Budget 2002 forecast/estimates (February 19, 2002) where actual data is not yet available.

Expenditure results by ministry are shown in Table 2.5.

During 2001/02, the government obtained supplementary estimates to authorize additional spending to restructure Skeena Cellulose Inc., higher spending in the Ministry of Health Services and additional costs for government restructuring. In total the contingencies vote funded \$181 million of ministry spending pressures during the year. Legislation in various programs also provided statutory authority to pay for additional costs.

Because of favourable developments including underspending, the full amount of the supplementary estimates was not needed and requirements from the contingencies vote were significantly reduced.

Significant areas of spending and changes from budget included:

- Ministry of Advanced Education operated within its amended budget (following an allocation from contingencies). Contingencies funding provided \$44 million for government restructuring costs including a lease buy-out for TechBC. In addition, higher spending for student financial assistance was partially offset by lower interest costs for capital-related debt. Compared to the previous year, spending rose 1.9 per cent mainly due to increased funding for student financial assistance. Total funded post-secondary full-time equivalent student spaces increased to 155,068 in 2001/02 from 150,043 in the previous year (up 3.4 per cent).
- Ministry of Attorney General was \$47 million below its amended budget (following an allocation from contingencies). Lower costs for settlements under the *Crown Proceeding Act* and First Nation treaty arrangements more than offset additional spending for government restructuring and legal aid services funded from the contingencies vote.
- Ministry of Children and Family Development was \$27 million below budget mainly due to lower-than-expected compensation costs in the community social services sector resulting from cost containment strategies and changes to public sector provincial labour legislation.
- Ministry of Community, Aboriginal and Women's Services was \$41 million below budget. Spending was below budget mainly in the child care, women's services, multiculturalism and immigration, community transition and Homeowner Protection Office programs.
- Ministry of Education was essentially on budget. Higher spending for public and independent schools was offset by lower interest costs for capital-related debt. In 2001/02, public school full-time enrolment declined 0.5 per cent from 2000/01, while independent school enrolment rose 0.8 per cent.
- Ministry of Forests was \$41 million below budget mainly due to lower-thanexpected costs of forest fire suppression.
- Ministry of Health Services was \$202 million above budget. During the year, the ministry received approval for a supplementary estimate of \$230 million primarily to address compensation pressures in part due to an arbitration ruling for doctors. However, the full amount of the supplementary estimates was not required due to underspending at year-end. During the year, spending for acute and continuing care was \$149 million above budget to

¹ Figures based on 2001/02 *Public Accounts* information.

² Actual figures for 2000/01 and budget figures for 2001/02 have been restated to reflect the government's organization and accounting policy effective March 31, 2002. 2000/01 actual expenditure has been increased by \$2 million due to changes in accounting for tangible capital assets

³ Charges to the Contingencies vote of \$181 million in 2001/02 (\$51 million in 2000/01) have been allocated to individual ministry spending.

⁴ Percentage change between 2001/02 actual and 2000/01 actual (figures based on unrounded figures shown in the 2001/02 Public Accounts).

⁵ Restructuring exit costs of \$161 million are funded from contingencies, ministry budgets and supplementary estimates (see Appendix Tables A2.10a and A2.10b).

⁶ Other Appropriations include: Commissions on Collection of Public Funds and Allowances for Doubtful Revenue Accounts, Environmental Assessment Office, Environmental Boards and Forest Appeals Commission, Forest Practices Board, Public Sector Employers' Council, Seismic Mitigation, Insurance and Risk Management, and Unclaimed Property

⁷ Reflects spending for other appropriations partially offset by a \$634-million expenditure reduction due to pension valuation and accounting policy changes.

finance service and compensation pressures and to assist health authorities with paying down debt. The Medical Services Plan was up \$104 million mainly due to the tentative compensation settlement with physicians. These increases were partially offset by lower-than-budgeted spending for public and preventive health, capital-related debt interest costs and other areas. Ministry spending was up 10.4 per cent from 2000/01, reflecting significant increases in most areas.

- Ministry of Human Resources was \$33 million below budget mainly due to lower-than-expected average income assistance spending and other program savings. The average monthly assistance caseload of 155,354 was essentially on budget and 1.6 per cent lower than in 2000/01.
- Ministry of Management Services (responsible for the Public Service Employee Relations Commission and cross-government pension costs) operated within its amended budget (following an allocation from contingencies). As part of government restructuring, the ministry received \$33 million from contingencies to fund employee severance, extended health and dental benefit, and employee leave liability payments.
- Ministry of Public Safety and Solicitor General operated within its amended budget (following an allocation from contingencies). The ministry received \$25 million from contingencies to fund restructuring costs in the corrections program, higher spending for policing, and for expenditures under the *Criminal Injury Compensation Act* and the *Emergency Program Act*. These increases were partially offset by savings in other program areas.
- Ministry of Transportation was \$5 million below its amended budget (following an allocation from contingencies). The ministry received \$40 million from contingencies primarily for the amortization of Rapid Transit Project 2000 Ltd. deferred charges and *SkyTrain* start-up costs. Only \$35 million of the contingencies amount was needed. During 2001/02, the ministry undertook \$180 million of capital construction and \$142 million of highway rehabilitation, primarily on behalf of the BC Transportation Financing Authority.
- Management of Public Funds and Debt (debt interest) was \$62 million below budget due to significantly lower-than-assumed borrowing requirements and short-term interest rates. These were partially offset by additional costs resulting from a weaker Canada/U.S. exchange rate. Government operating debt was \$353 million below budget while average short-term interest rates were 1.2 percentage points lower than assumed. Lower operating debt and interest costs also contributed to a 14-per-cent drop in interest costs compared to the previous year.
- BC Family Bonus was \$17 million below budget due to lower utilization. Expenditure was 29 per cent lower than 2000/01 due to lower requirements in response to federal changes to the National Child Benefit System.
- As a result of a 1998 agreement with respect to Skeena Cellulose Inc., additional CRF spending of \$307 million was provided within a \$340-million supplementary estimate obtained at the end of 2001/02. Costs included debt guarantee payments, provisions for writing down government's investment, and for recognizing environmental and other related liabilities. As a result, there was a partially-offsetting improvement in Crown corporation balances

(see Crown corporation results). Skeena Cellulose Inc. was sold to NWBC Timber and Pulp Ltd. in April 2002 and is no longer a property of the government or its Crown corporations.

• Government restructuring — Beginning in July 2001, the government commenced core reviews of all of its programs, including the operations of Crown corporations and agencies.

In 2001/02, one-time restructuring exit costs totalling \$429 million were incurred by the government and its Crown corporations to help prepare for achieving service plan targets. These costs included:

	\$ mill	ions
CRF: Funded by ministry budgets		
and contingencies	80	
Funded by supplementary estimates	81	
	161	
Taxpayer-supported Crown corporations	63	
Total taxpayer-supported		224
Self-supported commercial Crown corporations		205
Total restructuring exit costs		429

Further details on government restructuring are provided in Appendix Tables A2.10a and A2.10b.

• Pension Plan Joint Trusteeship — The introduction of joint trusteeship for the Teachers' Pension Plan and the Municipal Superannuation Plan in 2001/02 resulted in a \$1.5-billion one-time positive adjustment to eliminate the unfunded pension plan liability relating to these plans. The adjustment was \$126 million larger than expected due to updated actuarial information for these plans. This gain is not recorded as part of the government's revenue or expenditure (see Table 2.1), but as an adjustment to the summary accounts deficit.

Taxpayer-Supported Crown Corporations and Agencies

Crown Corporation Results

Combined taxpayer-supported net losses (after adjustments) of \$518 million were \$185 million higher than budget. This largely reflects the transfer of \$256 million of remaining Forest Renewal BC and Fisheries Renewal BC assets to government. As noted in the three-year fiscal plan, the Forest Renewal BC function is continued in the Forest Investment Vote. Also included in overall net losses is the positive effect of government assistance to 552513 British Columbia Ltd. (Skeena Cellulose Inc.). Excluding these amounts, net losses were \$149 million worse than planned.

Major changes from budget included:

• BC Ferries was \$26 million below budget as a further \$40-million writedown of the *PacifiCat* ferries was partially offset by a \$14-million improvement in operating results.

- Forest Renewal BC net losses were \$72 million higher than budget due to lower stumpage revenue and higher costs related to the wind-up of the corporation.
- 552513 British Columbia Ltd. (Skeena Cellulose Inc.) 552513's share of Skeena's operating loss for 2001/02 was \$69 million, \$16 million higher than budget. As well, the provincial government sold its share in Skeena Cellulose Inc. in early 2002 for a net loss of \$154 million. The total summary impact in 2001/02 was a \$223 million loss, \$170 million higher than budget.

The following summarizes government's involvement with Skeena Cellulose.

	(\$ millior	ns)

Total losses in 2001/02		(223)
Accumulated losses since 1997/98		(57)
Total cost to government of Skeena involvement		(280)

Commercial Crown Corporations and Agencies

Self-supported commercial Crown corporations recorded a combined net loss of \$484 million compared to a budgeted net income of \$66 million. The change was primarily due to lower net income for BC Hydro and significant costs for BC Rail and ICBC.

Major changes from budget included:

- BC Hydro's net income (before rate stabilization transfers) was \$258 million, or \$117 million below budget. Electricity trade sales were 23 per cent lower than expected due to weaker electricity prices in the U.S.
- For the year ended December 31, 2001, BC Rail reported a net loss of \$107 million after including restructuring costs of \$100 million. These costs included severance payments, facility closures and lease obligations. Further restructuring costs of \$65 million occurred in the January-to-March 2002 period and are included in the government's fiscal year as part of accounting adjustments.
- ICBC reported a net loss of \$251 million for the year ended December 31, 2001 after including \$40 million in restructuring costs and a \$100-million provision for an expected reduction in the value of the corporation's property investments which include the Surrey City Centre development.

Excluding restructuring and valuation provisions, ICBC showed an operating loss of \$111 million compared to the budget forecast of \$35 million net income. The change from budget was mainly due to a 4.1-per-cent increase in claims.

Five-year financial statements for selected major Crown corporations are presented in Appendix Tables A2.11 to A2.19.

¹ Restated to be consistent with the presentation used for 2001/02.

² Differs from results shown in Appendix Table A2.14 due to timing differences.

³ Includes BC Pavilion Corporation, BC Assessment Authority, BC Securities Commission, Oil and Gas Commission and other Crown corporations and agencies.

⁴ Primarily includes the amortization of the cost of highways transferred to the BC Transportation Financing Authority in 1998/99, and a \$67 million net write-down of 552513 British Columbia Ltd.'s balance sheet as a result of the disposal of Skeena Cellulose Inc.

⁵ Primarily reflects adjustments to account for differences between the fiscal year ends of the government and BC Rail and ICBC, and transfers of BC Lottery revenue to charities and local governments. The 2001/02 adjustment includes \$65 million of additional restructuring costs incurred by BC Rail during the January - March 2002 period.

Provincial
Capital
Spending

Capital spending is required to build, acquire or replace assets such as roads, schools, universities, hospitals and related major equipment.

Capital spending is not recorded all at once as part of the government's annual surplus or deficit. Rather, generally accepted accounting principles recommend that such costs be spread out over their useful lives through annual amortization expenses to recognize the estimated wear and tear of government assets (see Appendix Table A2.1).

Table 2.7 summarizes capital expenditures for 2001/02.

Capital spending in 2001/02 totalled \$2.3 billion, \$595 million below budget:

- Taxpayer-supported capital spending includes schools, hospitals, universities and transportation projects plus minor capital purchases by ministries and other minor taxpayer-supported agencies. In 2001/02, spending of \$1.4 billion was \$468 million below budget due to reduced spending for health, education and transportation projects.
- Self-supported commercial Crown corporation capital spending includes projects undertaken by BC Hydro, BC Rail, ICBC and for Columbia Basin power projects. Spending for these agencies totalled \$894 million and was \$127 million below budget mainly due to reduced spending by BC Hydro and ICBC.

Further details on changes from budget are provided in Table 2.8.

Table 2.9 Major Capital Projects (Total Costs Greater Than \$50 million)

¹ Total expenditures since commencement of each project.

² Represents sum of annual budgeted expenditures to complete each project.

³ Adjusted for inflation. Budget in 1993 dollars is \$1.2 billion.

⁴ Final paving on the bridge occurred in the first half of 2002, but the project was substantially completed in December 2001.

⁵ Funds for these projects are fully recovered from the Greater Vancouver Transportation Authority (*TransLink*).

⁶ Project components were completed starting in December 2000 and will continue over the next three years.

⁷ In service as of December 1999. Additional costs will be incurred, but the project is substantially completed.

⁸ Burrard generating station upgrade includes installation of Selective Catalytic Reduction (SCRs) systems on all 6 generating units. SCRs reduce emissions from the units and were required to meet the air quality standards for the Greater Vancouver Regional District.

⁹ Joint venture with a private sector partner. Amount shown represent BC Hydro's 50 per cent share of the costs; however, only partial funding has been approved to date.

¹⁰ Initial planning, preliminary field work and engineering design costs. Physical construction will begin at a later date.

¹¹ In May 2002, a proposed private sector partnership to develop this project was terminated. The total budget and revised forecast amounts have been increased to reflect BC Hydro's 100 per cent ownership of the project.

¹² A joint venture of the Columbia Power Corporation and the Columbia Basin Trust.

Provincial Debt The government and its Crown corporations borrow to finance their own operations (for example, when revenues fall short of meeting expenditures), to finance construction of capital projects or other investments, to refinance maturing debt and to finance working capital needs.

Provincial debt is reported using two classifications:

• Taxpayer-supported debt includes debt for government operating and capital purposes, and debt of Crown corporations and agencies that require a subsidy from the provincial government.

Table 2.10Provincial Debt Summary 1For the Fiscal Years Ended March 31

	July 30 Budget 2002	Actual 2002	Variance ²	Actual 2001
		(\$ millions)		
Taxpayer-supported debt				
Provincial government direct operating ^{3, 4}	14,142	13,789	(353)	12,113
Education facilities	5,605	5,517	(88)	5,263
Health facilities	2,021	1,920	(101)	1,780
Highways, ferries and public transit	4,784	4,639	(145)	4,191
Other ⁵	1,668	1,310	(358)	1,651
Total taxpayer-supported debt	28,220	27,175	(1,045)	24,998
Self-supported debt				
Commercial Crown corporations and agencies	7,458	7,674	216	7,570
Warehouse borrowing program	600	1,067	467	1,312
Total self-supported debt	8,058	8,741	683	8,882
Forecast allowance	500	-	(500)	-
Total provincial debt	36,778	35,916	(862)	33,880

¹ Debt is after deduction of sinking funds and unamortized discounts, and excludes accrued interest. Government direct and fiscal agency accrued interest is reported in the government's accounts as an accounts payable.

² 2001/02 actual less 2001/02 budget.

³ A change in accounting policy resulted in vehicle leases being recorded as capital costs rather than operating expenditures. Government operating debt has been restated to include the vehicle lease obligations of \$44 million in 2000/01 and \$50 million in 2001/02.

⁴ In March 2002, debt of 552513 British Columbia Ltd. (Skeena Cellulose Inc.) was assumed by the provincial government (\$260 million) and by the minority shareholder (\$94 million) in preparation for returning Skeena Cellulose Inc. to the private sector.

⁵ Includes government services Crown corporations and agencies, other fiscal agency loans, student assistance loans, loan guarantees to agricultural producers, guarantees issued under economic development and home mortgage assistance programs, and loan guarantee provisions.

> • Self-supported debt includes debt of commercial Crown corporations and the warehouse borrowing program. Commercial Crown corporation debt is generally used to finance capital since enough revenue is earned through the sale of services at commercial rates to cover operating expenses, interest costs, and principal repayments. Warehouse borrowing is used to take advantage of market opportunities to borrow in advance of requirements. These funds are invested until they are needed by the government or its Crown corporations and agencies.

Provincial debt totalled \$35.9 billion at March 31, 2002, or 27.5 per cent of provincial GDP (see Table 2.10). Total debt was \$862 million below budget as improved government operating results, reduced capital spending and non-utilization of the forecast allowance was partially offset by additional requirements for commercial Crown corporations and a reduced draw-down of the warehouse borrowing program.

Taxpayer-supported Debt

Taxpayer-supported debt increased by \$2.2 billion to total \$27.2 billion at year-end (20.8 per cent of GDP). This was \$1 billion below budget, mainly reflecting:

- lower borrowing requirements for government's consolidated revenue fund due to better-than-expected operating results and higher-than-expected federal cash instalments for collections of provincial income taxes;
- reduced capital spending for education, health and transportation projects; and
- transfer of Skeena Cellulose-related debt to the minority shareholder in preparation for returning the company to the private sector.

Self-supported Debt

Self-supported debt totalled \$8.7 billion at March 31, 2002 (6.7 per cent of GDP). Debt at year-end was \$141 million lower than the previous year but \$683 million above plan mainly reflecting:

- weaker-than-expected operating results of BC Hydro; and
- a higher-than-expected year-end balance for the warehouse borrowing program.

Table 2.8 shows a summary of debt changes from the 2001/02 budget. Appendix Table A2.5 provides a reconciliation between the summary accounts deficit of \$1.2 billion and the total provincial debt increase of \$2 billion.

Credit Rating A credit rating is an evaluation of a borrower's ability to pay interest and to repay principal. A credit rating affects the borrower's debt servicing costs and the investor's rate of return since an investor will demand a higher interest rate on a higher-risk, lower-rated security. Table 2.11 provides an interprovincial comparison of credit ratings.

The ratio of taxpayer-supported debt relative to gross domestic product is a measure often used by investors and credit rating agencies when analyzing a province's ability to manage its debt load. British Columbia's taxpayer-supported debt is one of the lowest in Canada, and this translates into a strong credit rating and lower debt service costs.

Province	Rating Agency ¹					
	Moody's Investors Service	Standard and Poor's	Dominion Bond Rating Service			
	Aa2	AA-	AA (Low)			
British Columbia	Aaa	AAA	AAA			
Alberta	Aa3	A+	А			
Saskatchewan	Aa3	AA-	А			
Manitoba	Aa3	AA	AA			
Ontario	A1	A+	А			
Quebec	A1	AA-	А			
New Brunswick	A3	A-	BBB (High)			
Nova Scotia	A2	Not Rated	A (Low)			
Prince Edward Island Newfoundland	A3	A-	BBB			

Table 2.11 Interprovincial Comparison of Credit Ratings, June 2002

¹ The rating agencies assign letter ratings to borrowers. The major categories, in descending order of credit quality are: AAA/Aaa; BB/Ba; and B. The "1", "2", "3", "high", "low", "+", and "-" modifiers show relative standing within the major categories. For example, AA+ exceeds AA and Aa2 exceeds Aa3.

Debt Indicators

A number of financial indicators are used to help the public understand provincial borrowing and its fiscal impact. Table 2.12 provides a historical summary of financial indicators. More comprehensive information on the debt of government and its Crown corporations and agencies is provided in the *Debt Statistics Report*. This document, which is also available on the government's web site, provides a variety of information to help readers assess the province's debt position.

Table 2.12Key Debt Indicators

For Fiscal Years Ended March 31

	1998	1999	2000	2001	July 30 Budget 2002	Actual 2002

Taxpayer-supported	7.6	7.6	7.4	7.5	7.2	6.6
Background Information:						
Revenue (\$ millions)						
Total provincial ⁵	30,593	31,294	33,679	40,618	38,624	37,764
Taxpayer-supported ⁶ Total debt (\$ millions) ⁷	23,525	23,285	24,784	27,690	25,898	26,183
Total provincial	30,355	32,261	34,478	33,880	36,778	35,916
Taxpayer-supported ⁸ Provincial GDP	22,151	23,204	25,181	24,998	28,220	27,175
(\$ millions) ⁹	114,601	115,604	120,608	127,564	130,190	130,396
Population (thousands at July 1) ¹⁰	3,960	3,997	4,028	4,059	4,099	4,096

¹ The ratio of debt to population (e.g. debt at March 31, 2002 divided by population at July 1, 2001).

² The ratio of debt outstanding at fiscal year end to provincial nominal gross domestic product (GDP) for the calendar year ending in the fiscal year (e.g. debt at March 31, 2002 divided by 2001 GDP).

³ The ratio of interest costs (less sinking fund interest) to revenue. Figures include capitalized interest expense in order to provide a more comparable measure to outstanding debt.

⁴ Weighted average of all outstanding debt issues.

⁵ Includes revenue of the consolidated revenue fund plus revenue of all Crown corporations and agencies.

⁶ Excludes revenue of commercial Crown corporations and agencies.

⁷ A change in accounting policy resulted in vehicle leases being recorded as capital costs rather than operating expenditures. Government operating debt has been restated to include the vehicle lease obligations as follows: 1998/99 - \$27 million, 1999/00 - \$26 million, 2000/01 - \$44 million and 2001/02 - \$50 million.

⁸ Excludes debt of commercial Crown corporations and agencies (including non-guaranteed debt) and funds held under the province's warehouse borrowing program.

⁹ GDP for the calendar year ending in the fiscal year (e.g. GDP for 2001 is used for the fiscal year ended March 31, 2002).

¹⁰ Population at July 1st within the fiscal year (e.g. population at July 1, 2001 is used for the fiscal year ended March 31, 2002).

Appendix 2

Government's Financial Statements

The government conducts its activities through ministries, Crown corporations and agencies, and what is known as the SUCH sector (school districts, universities, colleges, and health care facilities and organizations). Information on the combined financial results of the government and its Crown corporations and agencies is presented in the government's summary financial statements, or summary accounts, which are published as part of the annual *Public Accounts*. The *Public Accounts* also provide supplemental information on the SUCH sector and its impact on the summary accounts. In 2001/02, the effect of the SUCH sector on government's summary statements was positive and it reduced the deficit from \$1,233 million to \$1,008 million.

Consolidated Revenue Fund

The accounts relating to the government's direct activities are contained in the consolidated revenue fund. In 2000/01, the consolidated revenue fund included the general fund with its various special accounts, and one special fund — the natural resource community fund. The consolidated revenue fund comprises all money over which the legislature has the power of appropriation (see Chart A2.1).

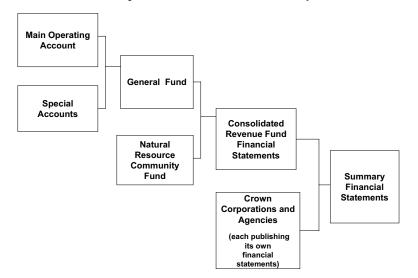

Chart A2.1 Summary Financial Statements Components - 2001/02

The financial results of the consolidated revenue fund are reported as a separate entity in the *Public Accounts*. Revenue and expenditure are recorded on an accrual basis of accounting, with certain limited exceptions. Assets are recorded to the extent that they represent financial claims by the government upon outside parties; are items held for resale, prepaid expenses, deferred charges, or prepaid capital advances; or are tangible capital assets acquired. Similarly, liabilities are recorded only if they represent actual or probable financial claims against the government.

Crown corporations and agencies

Crown corporations and agencies may be classified as either taxpayer-supported or self-supported. Taxpayer-supported Crown corporations and agencies may sell services directly to the public, but their revenue may not cover operating expenses and debt servicing payments. In these cases, the government provides some grants or other forms of assistance to them, including the dedication of provincial revenue. This category also includes Crown corporations whose primary purpose is to provide services to the government. Self-supported Crown corporations and agencies do generate sufficient revenue to cover operating and debt service costs, and may pay dividends to the provincial government. The operations of Crown corporations and agencies are recorded in their own financial statements, which are subject to audit by the Auditor General or by private-sector auditors. As individual Crown corporations and agencies publish their own financial statements, only summarized financial information is provided in the *Public Accounts*.

Summary Accounts

The financial results of the consolidated revenue fund and the Crown corporations and agencies are combined into the summary accounts. Where the accounting policies of taxpayer-supported Crown corporations and agencies differ from those used by the central government in preparing its own consolidated revenue fund financial statements, the Crown corporation and agency financial statements are adjusted to conform to government's accounting policies unless they are following the norms for their industry.

Currently, as is the practice of other jurisdictions in the rest of Canada, the summary accounts do not include the financial results of the SUCH sector, although the government publishes SUCH sector financial information in supplemental schedules to the *Public Accounts*. The government has passed legislation requiring that financial statements fully conform to generally accepted accounting principles (GAAP) beginning with fiscal year 2004/05. Therefore, appropriate SUCH sector financial results will be fully combined with the summary accounts financial statements beginning in 2004/05.

In this appendix, current and historical operating results are presented for the government's summary accounts in accordance with the government's accounting polices effective March 31, 2002.

The Financial Cycle

The *Budget Transparency and Accountability Act* (BTAA) outlines government's reporting requirements during the financial cycle and imposes specific reporting deadlines or release dates for these publications. Under the BTAA, the provincial government currently focuses its budgeting and reporting on a summary accounts basis. The BTAA requirements include reporting on the advice of the Economic Forecast Council, presentation of the annual *Estimates* and *Quarterly Reports* on the summary accounts basis, publication of *Quarterly Reports* with revised forecasts, presentation of the *Public Accounts*, and annual performance plans for each ministry and government organization.

The BTAA is augmented by the *Balanced Budget and Ministerial Accountability Act* (BBMAA), which requires ministries and major Crown corporations to prepare three-year service plans that outline their objectives and budgets. At the end of each fiscal year, ministers' performances are assessed based on whether their ministries achieved their service plan targets and stayed within budget. Financial penalties — 10 per cent of ministerial salaries — are assessed against those ministers who fail to meet their targets; and a further 10 per cent of ministerial salaries are lost if government fails to meet its annual surplus or deficit target. The BBMAA also specifies that the government must balance its budget beginning in the 2004/05 fiscal year. As these provisions of the BBMAA are effective April 1, 2002, they do not apply to the 2001/02 fiscal year.

Chart A2.2 summarizes the annual financial process of the provincial government. This process consists of four main stages.

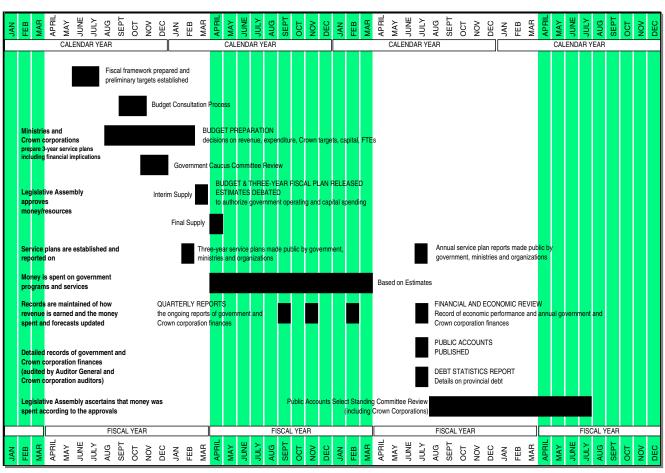

Chart A2.2 Financial Planning and Reporting Cycle

- *Planning and Budget Preparation* —Treasury Board reviews longer-term estimates of revenue, expenditure, capital and debt, and establishes a preliminary fiscal plan within the framework of the government's overall strategic plan. Preliminary high level targets are provided to ministries and preliminary benchmarks to Crown corporations who prepare three-year service plans, including operating and capital budgets, for review by Treasury Board. Treasury Board makes decisions on budget allocations (for ministries) and net income benchmarks (for Crown corporations) based on government revenue forecasts, spending and capital priorities and debt targets within the context of the fiscal plan. As input to this process, a consultation paper is made public by September 15th of each year that invites public comment on issues that need to be addressed in the fiscal and service plans, and a committee of the legislature holds public hearings throughout the province.
- *Implementation and Reporting* The government's revenue, expenditure and capital plans for the next three fiscal years, as well as other information on the government's finances, are presented to the Legislative Assembly by the Minister of Finance in a budget document called the *Budget and Three-Year Fiscal Plan.* The service plans and a report on major capital projects (those whose cost exceed \$50 million) must also be tabled. Throughout the year, the authorized funding as specified in the *Estimates* and ministry service plans is spent on programs and services. Crown corporations follow approved service plans under direction of their own Boards of Directors. *Quarterly Reports* are published by legislated dates to provide regular public updates on the government's finances.

- *Evaluation* At the end of the fiscal year, the *Public Accounts* are prepared by the Comptroller General and examined by the Auditor General to ensure that the financial statements fairly present the government's financial position. The *Public Accounts* are augmented by the *British Columbia Financial and Economic Review*, which provides an overview of annual and historical financial and economic results. The government also issues the *Debt Statistics Report* to provide detailed information on the debt of the government and its Crown corporations and agencies, and various indicators on debt performance and management.
- *Accountability* The *Public Accounts* are presented to the Legislative Assembly, and the Public Accounts Committee (a committee of the Legislative Assembly) examines them to ensure that government spending was in accordance with what was approved. In addition, ministries and most Crown corporations are required to publish by August 31st service plan reports on results for the previous fiscal year.

Capitalization

Up until 1995/96, the provincial government recorded amounts spent to acquire tangible capital assets as expenditures in the year they were purchased — i.e. "expenditure basis" of accounting. In 1995/96, the government began recording these amounts on its balance sheet (capitalization) and replacing them, in the government's annual budgetary expenditures, with the amortization expense associated with the assets. This method of accounting is often referred to as the "expense basis" of accounting.

The provincial government also issues advances to the SUCH sector for investment in capital assets. Prior to 1997/98, these advances were categorized as loans. Beginning with the 1997/98 *Public Accounts*, these advances have been capitalized in the summary accounts balance sheet as prepaid capital advances. Prepaid capital advances are amortized in similar fashion to capital assets.

The following table illustrates the effect of capitalization accounting policy on the government's summary accounts surplus (deficit) for 1997/98 to 2001/02. The table shows that excluding the effect of capitalization, the 2001/02 deficit was \$1,476 million, compared to a \$423-million surplus in 2000/01. Additional information on the government's capitalization accounting policy is provided in the 2001/02 *Public Accounts*.

Table A2.1 Effects of Capitalization on the Summary Accounts

	1997/98 ¹	1998/99 ¹	1999/00 ¹	2000/01 1	2001/02
			(\$ millions)		
Surplus (deficit) excluding effects of capitalization	(298)	(1,318)	(803)	423	(1,476)
Adjustments to include capitalization policy:					
Less: Cost of capital asset investments during the year	1,147	1,689	1,900	2,028	1,414
Add: Disposals, amortization and asset valuation adjustments	(1,016)	(1,374)	(1,074)	(1,025)	(1,171)
Net adjustment	131	315	826	1,003	243
Surplus (deficit) after capitalization	(167)	(1,003)	23	1,426	(1,233)

¹ Restated to reflect the capitalization policies in effect as of 2001/02 and any corrections of errors.

The five-year summary accounts balance sheet and the relationship between the surplus/deficit and changes in debt is included in Appendix Table A2.5.

Unfunded Pension Liabilities

On April 5, 2001, joint trusteeship came into effect for the Teachers' Pension and Municipal Superannuation pension plans. This concluded the provincial government's devolution of pension plan sponsorship (the Public Service Pension Plan went into joint trusteeship in January 2001). Under joint trusteeship, the provincial government is no longer the sole sponsor of these plans. Instead, sponsorship is now placed with constituted pension boards made up of representatives from the government and plan members. The only pension plan that has the provincial government as its sole sponsor is the MLA Superannuation Plan.

Table A2.2	Unfunded	Pension	Liabilities
------------	----------	---------	-------------

	Valu	uarial uation (Surplus)		Public Accoun	ts Information	
Pension Plan	Initial Valuation	Latest Valuation ¹	Accounting Liability March 31, 2001	Annual Amortization	Plan Changes ²	Accounting Liability March 31, 2002 ³
			(\$ mill	ions)		
Public Service (joint trusteeship)	438	(567)	-	-	-	-
MLA Superannuation (sponsor)	7	6	13	(7)	-	6
Provincial 70%-Share of Municipal						
Superannuation (joint trusteeship)	740	(317)	149	-	(149)	-
Teachers' (joint trusteeship)	1,779	(42)	1,315	-	(1,315)	-
College (administration only)	(32)	(120)	n/a	n/a	n/a	n/a
Total	2,932	(1,040)	1,477	(7)	(1,464)	6

¹ The latest valuations reflect the province's 50% share of the accrued net assets as per the joint trusteeship arrangements with the pension plans. The amounts are based on extrapolations of the most recent actuarial valuations as follows:

- Public Service Pension Plan (March 31, 1999);

- Municipal Superannuation Plan (December 31, 1997);

- Teachers' Pension Plan (December 31, 2000); and,

- College Pension Plan (August 31, 1997).

² The \$7-million amortization of the MLA Superannuation Plan liability reflects a year-end estimation adjustment. No other amortization was recorded as joint trusteeship for the Municipal Superannuation and Teachers' Pension Plans was introduced in April 2001. The \$1,464-million plan change reflects the writing off of the accumulated surplus of these plans with the introduction of joint trusteeship and is recorded as an adjustment to the government's summary accounts bottom line (see Chapter 2, Table 2.1).

³ Under joint trusteeship, the province has no formal claim on the accrued net assets of the pension plans until such time as formal declarations are made by the Joint Trusteeship Boards to reduce or suspend employer contributions. Therefore, a valuation allowance has been provided to write down the value of the net assets to a net realizable value of zero at year end.

Based on actuarial valuations, the major public sector pension plans administered by the provincial government were all in a surplus position as of March 31, 2002. These surpluses totalled \$1,040 million, a change of almost \$4 billion from the unfunded liability of \$2,932 million calculated in the initial valuations in the early 1990's, primarily due to higher fund investment returns and lower inflation.

If a plan has an actuarial surplus at the time a joint trusteeship takes effect, the government eliminates the full amount of any liability on its balance sheet. Similarly, if the government has recognized all or a portion of a pension surplus on its balance sheet, that amount is also eliminated since, under joint trusteeship, the government does not have a claim on those surpluses. As the government had on its books a significant unamortized pension liability, primarily for the Teacher's Pension Plan, a large one-time benefit of removing most of this liability was recorded in 2001/02.

Accumulated Deficit

During 2001/02 numerous retroactive adjustments were made to the financial statements to reflect changes in accounting policy and to correct previously published information. The following is a brief summary of the changes.

	\$ mi	llions
Accumulated deficit on March 31, 2001 as reported in the 2000/01 <i>Public Accounts</i>		(3,472)
2000/01 accounting policy adjustments		(35)
Original 2000/01 surplus as reported in the 2000/01 Public Accounts	1,498	
2000/01 restated surplus as reported in the 2001/02 Public Accounts	1,426	72
Accumulated deficit on March 31, 2001 as per 2001/02 Public Accounts		(3,509)
2001/02 accounting policy adjustments		32
2001/02 deficit as reported in the 2001/02 Public Accounts		(1,233)
Accumulated deficit on March 31, 2002 as reported in the 2001/02 Public Accounts		(4,710)

The 2000/01 accounting policy adjustments and surplus restatements consisted of:

- the application of the government's capitalization accounting policy to land improvements, which, along with some other minor capital asset valuation adjustments, reduced the 2000/01 surplus by \$4 million and the opening accumulated deficit balance by \$85 million;
- the correction of an overpayment error by the Canada Customs and Revenue Agency relating personal income tax collections on behalf of the province, which decreased the 2000/01 surplus by \$52 million and increased the opening accumulated deficit balance by \$15 million; and
- a correction to the method used by the province for consolidating Canadian Blood Services, which decreased the 2000/01 surplus by \$16 million and increased the opening accumulated surplus balance by \$35 million.

The 2001/02 accounting policy adjustments consisted of:

- the province's proportional interest in valuation adjustments made by the Provincial Capital Commission (\$2 million) and Canadian Blood Services (\$20 million);
- the historical net earnings of the BC Racing Commission (\$4 million) as the province began including this agency in the summary accounts; and
- the cumulative prior year net impact of adjusting BC Rail's fiscal year end to match that of the province (\$6 million).

Summary accounts (deficit) surplus	(167)	(1,003)	23	1,426	(1,233)

¹ Based on 2001/02 *Public Accounts* information. For comparative purposes, figures for prior years have been restated for the presentation used in 2001/02.

² Figures for 1999/00 have been restated to reflect changes in various accounting estimates. CRF expenditure was increased \$3 million to reflect changes to the government's capitilization policy. CRF revenue was reduced \$14 million to correct a calculation error made by Canada Customs and Revenue Agency relating to personal income tax collections on behalf of the province. The federal government's errors relating to 1999 and prior years have not been recorded as the amounts and resolution are under verification and legal review.

³ Figures for 2000/01 have been restated to reflect changes in various accounting estimates. CRF revenue was reduced by \$53 million, mainly to correct a calculation error made by Canada Customs and Revenue Agency relating to personal income tax collections on behalf of the province. CRF expenditure was increased by \$2 million to reflect changes to the government's capitalization policy. Taxpayer-supported Crown corporation net losses increased by \$17 million, primarily to reflect a correction to the procedure used in the consolidation of Canadian Blood Services.

⁴ CRF revenue amounts exclude dedicated revenue collected on behalf of, and transferred to, Crown corporations and agencies and other entities. Further details on transferred revenue are shown in Appendix Table A2.6b.

⁵ Includes earnings/(losses) of British Columbia Transit, British Columbia Securities Commission, Okanagan Valley Tree Fruit Authority, Tourism British Columbia and other taxpayer-supported Crown corporations and agencies. 2000/01 has been restated to reflect a change in the consolidation method for Canadian Blood Services Inc.

⁶ Primarily reflects the amortization of the cost of highways transferred to the BC Transportation Financing Authority. The 1999/00 adjustment includes the effect of the \$70-million debt recision for the Vancouver Trade and Convention Centre. The 2001/02 adjustment includes a \$67-million net write-down of 552513 British Columbia Ltd.'s balance sheet as a result of the disposal of Skeena Cellulose Inc.

⁷ Includes earnings/(losses) of the Columbia Power Corporation and other commercial Crown corporations.

⁸ Primarily reflects adjustments to account for differences between the fiscal year ends of the government and BC Rail and ICBC, and transfers of BC Lottery revenue to charities and local governments. The 2001/02 adjustment includes \$65 million of additional restructuring costs incurred by BC Rail during the January - March 2002 period.

Table A2.4Summary of Changes from the 2001/02_______Third Quarterly Report Revised Forecast

	Ch	ange	Final Results
		(\$ millions)
Summary accounts deficit - third quarter revised forecast			(1,964
Consolidated revenue fund (CRF) changes:			
Revenue changes:			
- Higher personal and corporation income taxes	22		
- Higher corporation capital tax	28		
- Higher tobacco and other taxes	39		
- Higher natural gas royalties and bonus bid sales	51		
- Higher forests and other natural resource revenues	24		
- Asset disposition - transfer of forest rights	42		
- Other miscellaneous sources (e.g year-end recoveries, etc)	27		
- Higher Crown contributions	13		
- Higher federal contributions (flood relief, equalization entitlements)	26	272	
Spending changes:			
- Reduced Ministry of Health spending	118		
- Ministry of Attorney General savings 49			
- Ministry of Community, Aboriginal, and Women's Services savings			
- Ministry of Human Resources savings			
- Ministry of Children and Family Development savings			
- Other ministry savings	193		
Additional Ministry of Advanced Education spending	(43)		
Additional Ministry of Public Safety and Solicitor General spending	(20)		
Other ministry additional spending	(13)		
- Lower Skeena assistance costs (as a result of pending sale)	33		
Lower unallocated Contingencies pressures	58	000	005
- Lower debt interest	37	363	635
Crown corporation changes:			
Taxpayer-supported:			
 British Columbia Buildings Corporation - accounting policy adjustment, revenue recognition 	16		
British Columbia Ferry Corporation - asset write-downs partially offset by higher operating income	(23)		
- Forest Renewal BC - lower loss	19		
- 552513 British Columbia Ltd. (Skeena Cellulose Inc.) - improvement in			
net impact on summary accounts	6		
- Other changes and adjustments	12	30	
Self-supported commercial:	12	00	
British Columbia Hydro and Power Authority - higher net income including transfer to rate stabilization account	58		
-	00		
British Columbia Railway Company - additional restructuring costs (\$65 million), partially offset by lower operating loss	(44)		
 Insurance Corporation of British Columbia - final adjustments to match government fiscal year-end 	(15)		
- Other changes and adjustments	(3)	(4)	26
Forecast allowance - reduced allowance			70
Joint trusteeship - increase in one-time benefit based on updated actuarial valuation information			_

¹ For comparative purposes, figures for prior years have been restated to be consistent with the presentation used in 2001/02. Figures exclude dedicated revenue collected on behalf of, and transferred to, British Columbia Transit, British Columbia Ferry Corporation, BC Transportation Financing Authority, Greater Vancouver Transportation Authority (*Translink*), Forest Renewal BC, BC Oil and Gas Commission, and Tourism British Columbia. These revenues are included as part of the operations of Crown corporations and agencies, with the exception of *Translink* and certain other public bodies that are not part of the provincial government.

² CRF revenue has been restated for 1999/00 and 2000/01 to reflect a reduction in personal income tax revenue due to a federal error in the calculation of personal income tax remittances to BC resulting from capital gains refunds associated with mutual fund trusts for the 2000 tax year and one quarter of the 2001 tax year. The effect reduces revenue by \$14 million in 1999/00 and \$52 million in 2000/01. The federal government's errors relating to 1999 and prior years have not been recorded as the amounts and resolution are under verification and legal review. Revenue has also been restated for other minor corrections.

³ Revenue is shown net of home owner grants (basic and supplementary).

⁴ The British Columbia Lottery Corporation remitted additional funds to government which was distributed to charitable organizations and local governments.

¹ For 1998/99 and prior years, figures include motor fuel tax collected in the Vancouver and Victoria regional transit service areas. Effective April 1, 1999, figures include motor fuel tax collected in the Victoria regional transit area only (2.5 cents/litre on clear gasoline and motive fuel) as a result of the creation of *TransLink*.

² Includes motor fuel tax and a sales tax on short-term rentals of passenger vehicles. Beginning in 2000/01, figures are based on a transfer of 3.25 cents/litre on clear gasoline and motive fuel (up from 3 cents/litre effective April 1, 2000). The initial rate of 1 cent/litre (effective May 1, 1994) was increased to 2 cents/litre on July 1, 1997 and 3 cents/litre on June 1, 1999.

³ Includes incremental stumpage and royalty revenue resulting from changes to rates introduced under the provincial government's Forest Renewal Plan on and after May 1, 1994.

⁴ Includes 1 cent/litre of motor fuel tax for the period April 1, 1999 to September 30, 1999 and 1.25 cents/litre effective October 1, 1999.

⁵ Effective April 1, 1999, includes 8 cents/litre on clear gasoline and motive fuel (4 cents/litre of which was previously collected on behalf of BC Transit) and social services tax on parking in the Vancouver transit area. Effective April 1, 2001, the tax transferred increased to 9 cents/litre on clear gasoline and motive fuels.

⁶ Includes a 1.65-per-cent share of the revenue raised from the 8-per-cent provincial hotel room tax.

⁷ Includes fees collected under the Petroleum and Natural Gas Act and the Pipeline Act, and a levy assessed under the Oil and Gas Commission Levy Regulation.

⁸ Primarily reflects transfers of property tax revenue collected on behalf of local governments.

¹ Revenue has been restated to reflect the government's accounting policy at March 31, 2002. Figures exclude dedicated revenue collected on behalf of, and transferred to, Crown corporations and agencies, the Greater Vancouver Transportation Authority (*Translink*) and other public bodies.

² Revenue as a per cent of GDP is calculated using GDP for the calendar year ending in the fiscal year (e.g. 2001/02 revenue divided by GDP for the 2001 calendar year). Totals may not add due to rounding.

³ Per capita revenue is calculated using July 1 population (e.g. 2001/02 revenue divided by population on July 1, 2001).

⁴ Revenue is converted to real (inflation-adjusted) terms using the consumer price index (CPI) for the corresponding calendar year (e.g. 2001 CPI for 2001/02 revenue). Totals may not add due to rounding.

Total Expenditure	20,135	20,587	22,215	22,465	24,913

Expenditure by function has been restated to conform more closely to the presentation used by Statistics Canada. Figures are based on 2001/02 Public Accounts information. For comparative purposes, figures for previous years have been restated to be consistent with the presentation used in 2001/02.

 ² Certain prior years' comparative expenditure figures were increased reflecting a change in government's capitalization policy (2000/01 \$2 million, 1999/00 \$3 million).

³ 1999/00 includes one-time expenditures of \$1,183 million to record the forgiveness of \$1,080 million of debt owed by the British Columbia Ferry Corporation to the government, and write-downs of provincial investments in the Vancouver Trade and Convention Centre (trade and industry - \$70 million) and the Kemess mine (recreation and culture - \$33 million).

⁴ Public transit expenditures are lower in 1999/00 due to the transfer of transit responsibilities for the Lower Mainland from British Columbia Transit to the Greater Vancouver Transportation Authority (*TransLink*) at the end of 1998/99. Funding for *TransLink* is provided by increased provincial transfers of revenue from fuel and sales taxes, increased access to the local property tax base, and other own-source fees and charges.

⁵ 2001/02 expense includes \$161 million fror restructuring exit costs.

- growth rate (per cent) ²	3.2	1.0	5.9	-1.5	7.4

¹ Expenditure has been restated to reflect the government's accounting policy at March 31, 2002.

² Excluding one-time expenditures in 1999/00 of \$1,183 million, 1999/00 growth rates would be -21.9% for transportation, -4.3% for natural resources and economic development, -12.4% for other, 2.1% for total spending, and 0.3% for real per capita; 2000/01 growth rates would be -1.0% for transportation, 15.2% for natural resources and economic development, 4.6% for other, 6.8% for total spending, and 3.9% for real per capita.

Note: Per capita expenditure is calculated using July 1 population (e.g. 2001/02 expenditure divided by population on July 1, 2001). Similarly, expenditure as a per cent of GDP is calculated using GDP for the calendar year ending in the fiscal year (e.g. 2001/02 expenditure divided by GDP for the 2001 calendar year). Expenditure is converted to real (inflation-adjusted) terms using the consumer price index (CPI) for the corresponding calendar year (e.g. 2001 CPI for 2001/02 expenditure).

1 Restructuring exit costs represent no future value to government.

Non-Exit:

² Non-exit restructuring costs result from the restructuring initiative but do have a future value to government.

3 Cross-Government staffing expense includes government-wide charges for enhanced pension eligibility (\$13 million), involuntary severance (\$5 million), severance for long-term disability employees (\$3.3 million), and other costs not attributable to a specific ministry.

¹ Differs from amounts reported in Table A2.6b (dedicated revenue) due to minor year-end accounting adjustments.

² Effective March 31, 1999, the provincial government transferred highway infrastructure assets to the Authority. Asset values are recorded on the Authority's balance sheet as a deferred capital contribution, and are amortized as income of the Authority with an offsetting adjustment to amortization expense.

³ The 1998 figure represents costs for emergency repairs to highways and bridges affected by slides and washouts. The 1999 expenditure represents the net book value of highways in the Lower Mainland that were transferred to the Greater Vancouver Transportation Authority.

Forecast allowance		-		-	500	-
Total provincial debt	30,355	32,261	34,478	33,880	36,778	35,916

¹ Debt is after deduction of sinking funds and unamortized discounts, and excludes accrued interest. Government direct and fiscal agency accrued interest is reported in the government's accounts as an accounts payable. Figures for earlier years have been restated to conform with the presentation used in 2001/02.

² A change in accounting policy resulted in vehicle leases being recorded as capital costs rather than operating expenditures. Government operating debt has been restated to include the vehicle lease obligations as follows: 1998/99 - \$27 million, 1999/00 - \$26 million, 2000/01 - \$44 million and 2001/02 - \$50 million.

³ Effective March 31, 2000, the provincial government assumed responsibility for the fiscal agency loans of the British Columbia Ferry Corporation Corporation (\$1,080 million) and 580440 British Columbia Ltd. (Vancouver Trade and Convention Centre) (\$70 million). Although this resulted in a change to debt composition, debt totals were not affected.

⁴ Represents government direct debt incurred for capital financing purposes.

⁵ Based on a revised outlook for world pulp prices and its potential impact on the finances of 552513 British Columbia Ltd. (Skeena Cellulose Inc.), the company's debt was reclassified from self-supported to taxpayer-supported in 2000/01. In March 2002, the company's debt was assumed by the provincial government (\$260 million) and by the minority shareholder (\$94 million) in preparation for returning Skeena Cellulose Inc. to the private sector.

⁶ Includes the British Columbia Housing Management Commission and the Provincial Rental Housing Corporation.

⁷ Includes the British Columbia Assessment Authority, the Pacific Racing Association, and other taxpayer-supported Crown corporations and agencies. Also includes loan guarantees to agricultural producers, guarantees issued under economic development assistance programs and loan guarantee provisions.

⁸ A joint venture of the Columbia Power Corporation and Columbia Basin Trust.

Table A2.23Historical Summary Accounts Surplus (Deficit)For Fiscal Years Ended March 31 1

¹ The provincial government began publishing summary financial statements in 1979/80. Figures for prior years are unavailable. For 1970/71 to 1978/79, the CRF surplus/(deficit) is used in place of the summary accounts surplus/(deficit).

² Does not include the \$256-million transfer to the CRF for the wind-up of Fisheries and Forest Renewal BC.

¹ Revenue has been restated to reflect the government's accounting policy at March 31, 2002. Further information is provided in footnotes to Table A2.3, and in the introduction to this appendix. Figures exclude dedicated revenue collected on behalf of, and transferred to, Crown corporations and agencies. These revenues are included as part of the operations of the Crown corporations and agencies. Figures are based on *Public Accounts* information.

² Beginning in 1989/90, other revenue has been restated to reflect a change in accounting policy to exclude sinking fund earnings from revenue.

³ Beginning in 1993/94, revenue has been restated to reflect a change in accounting policy to show allowances for doubtful collection of revenue accounts as deductions from revenue. Previously, these amounts were recorded as expenditures.

⁴ Beginning in 1995/96, other revenue has been restated to reflect a change in accounting policy to exclude from revenue and expenditure, non-cash exchanges of Crown land (of equivalent value) to third parties.

⁵ CRF revenue has been restated for 1999/00 and 2000/01 to reflect a reduction in personal income tax revenue due to a federal error in the calculation of personal income tax remittances to BC resulting from capital gains refunds associated with mutual fund trusts for the 2000 tax year and one quarter of the 2001 tax year. The effect reduces revenue by \$14 million in 1999/00 and \$52 million in 2000/01. The federal government's errors relating to 1999 and prior years have not been recorded as the amounts and resolution are under verification and legal review.

¹ Expenditure has been restated to reflect the government's accounting policy at March 31, 2002. Further information is provided in footnotes to Table A2.8. Figures are based on *Public Accounts* information.

² Other includes protection of persons and property, natural resources and economic development, general government and other expenditures.

³ Beginning in 1989/90, expenditure has been restated to report sinking fund earnings as a deduction from expenditure. Previously, these earnings were reported as revenue. The annual deficits are unchanged by this accounting policy change.

⁴ Beginning in 1990/91, the provincial government assumed full responsibility for contributions to school districts previously funded through residential school property taxes. As a result, some expenditures formerly financed by local school districts are included as expenditures of the government.

⁵ Responsibility for highway capital construction was transferred to the BC Transportation Financing Authority in 1993/94.

⁶ Certain prior years' comparative expenditure figures were increased reflecting a change in government's capitalization policy (2000/01 \$2 million, 1999/00 \$3 million).

⁷ 2001/02 expense includes \$161 million for restructuring exit costs.

Table A2.26 Historical Provincial Debt Summary For Fiscal Years Ended March 31 ¹

¹ Debt is after deduction of sinking funds and unamortized discounts, and excludes accrued interest. Government direct and fiscal agency accrued interest is reported in the government's accounts as an accounts payable. Figures for earlier years have been restated to conform with the presentation used in 2001/02.

² Includes the British Columbia Buildings Corporation, British Columbia Housing Management Commission, Provincial Rental Housing Corporation and other taxpayer-supported Crown corporations and agencies. Also includes loan guarantees to agricultural producers, guarantees issue under economic development assistance programs and loan guarantee provisions.

³ Includes commercial Crown corporations and agencies and, beginning in 1995/96, funds held under the province's warehouse borrowing program.
 ⁴ Prior to 1984/85 debt outstanding for the British Columbia Railway Company was classified as taxpayer-supported debt. Beginning in 1984/85 the

company was considered to be a commercial operation. ⁵ Prior to the establishment of the BC Transportation Financing Authority in the spring of 1993, capital financing for highways was provided through

provincial government direct operating debt.

⁶ A change in accounting policy resulted in vehicle leases being recorded as capital costs rather than operating expenditures. Government operating debt has been restated to include the vehicle lease obligations as follows: 1998/99 - \$27 million, 1999/00 - \$26 million, 2000/01 - \$44 million and 2001/02 - \$50 million.

⁷ Effective March 31, 2000, the provincial government assumed responsibility for fiscal agency loans of the British Columbia Ferry Corporation (\$1,080 million) and 580440 British Columbia Ltd. (Vancouver Trade and Convention Centre) (\$70 million)

⁸ Based on a revised outlook for world pulp prices and its potential impact on the finances of 552513 British Columbia Ltd. (Skeena Cellulose Inc.), the company's debt was reclassified from self-supported to taxpayer-supported in 2000/01.

⁹ In March 2002, Skeena Cellulose debt was assumed by the provincial government (\$260 million) and by the minority shareholder (\$94 million) in preparation for returning Skeena Cellulose Inc. to the private sector

Table A2.27	Provincial	Taxes (as	of July 2002)
-------------	------------	-----------	---------------

Type and Statute Reference	Tax Base	Tax Rate	Characteristics and Exemptions
Income — Income Tax Act			Both personal and corporate taxes are administered by the Canada Customs and Revenue Agency under an agreement between the province and the federal government.
			Corporate tax credits include the scientific research and experimental development tax credit, the logging tax credit and the film tax credit. In addition, the provincial political contributions tax credit, the provincial royalty tax credit, the mining exploration tax credit and venture capital tax credits are available to both individuals and corporations.
	(2) Personal	Tax rates of 6.05%, 9.15%, 11.7%, 13.7% and 14.7% corresponding to tax brackets of up to \$31,124,	Under the tax on income system, BC provides a set of non-refundable credits equivalent to all federal non-refundable credits.
		\$31,124 to \$62,249, \$62,249 to \$71,470, \$71,470 to \$86,785 and over \$86,785.	BC Family Bonus and BC Earned Income Benefit are combined with the federal government's Canada Child Tax Benefit in a single monthly payment to families. Tax credits for claims against personal and corporate income taxes include the refundable sales tax credit, refundable venture capital tax credit for individuals and non-refundable venture capital tax credit for corporations.
Capital — Corporation Capital Tax Act	Net BC paid-up capital for general corporations includes share capital, retained earnings and surpluses, liabilities and deferred credits less deductions for current accounts payable, specific investments and qualifying purchases of new capital assets. Special definition of net BC paid-up capital for banks, trust companies, credit unions and investment dealers.	General rate 0.15% effective from September 1, 2001 to August 31, 2002. Banks, trust companies and credit unions with net paid-up capital: greater than \$1 billion — 3%; \$1 billion or less or headquartered in British Columbia 1%.	Associated groups of corporations with net paid-up capital of less than \$5.0 million are exempt from the tax. Family farm, cooperative, non-profit and other specified corporations are also exempt. The tax rate is phased in for corporations with net British Columbia paid-up capital between \$5.0 million and \$5.25 million. There is a special flat fee for corporations above the exemption threshold but with net paid-up capital allocated to British Columbia below the threshold.
Real Property Transfers — Property Transfer Tax Act	Fair market value of property or interest in property transferred.	1% on the first \$200,000 of value transferred and 2% on amounts in excess of \$200,000.	Exemptions include: transfers of principal residences, recreational residences and family farms to related individuals; transfers of property between spouses pursuant to written separation agreements or court orders; transfers of property to local governments, registered charities and educational institutions; transfers of property to veterans under the <i>Veterans' Land Act</i> (Canada); transfers of land to be protected, preserved, conserved or kept in a natural state; and transfers of leases less than 31 years in duration. A number of technical exemptions are also provided. Eligible first time home-buyers are exempt from tax on transfers of eligible properties.

Type and Statute Reference	Tax Base	Tax Rate	Characteristics and Exemptions
Retail Sales — Social Services Tax Act	Purchase and lease price of tangible personal property, repair labour and legal services.	General rate is 7.5%. Liquor 10%. Passenger vehicles: under \$47,000 – 7.5%; \$47,000 to \$48,000 – 8%; \$48,000 to \$49,000 – 9%; greater than \$49,000 –10%.	Collected through vendors and lessors registered under the act and paid by purchasers and lessees. The exemptions generally fall into four categories: (1) items considered to be basic necessities of life such as food and prescription and non- prescription drugs; (2) specified inputs for certain sectors to enhance competitiveness such as the exemption for machinery and equipment used in manufacturing and in the natural resource industries and the exemption of specified equipment used by <i>bona fide</i> farmers, fishers and aquaculturists; (3) safety-related equipment designed to be worn by a worker, such as high-visibility vests and steel-toed boots, and specified general safety equipment such as life jackets; (4) energy conservation materials and equipment such as insulation material for buildings, and eligible wind, solar and micro-hydro equipment.
Accommodation — Hotel Room Tax Act	Purchase price of accommodation	8%. Eligible local governments may apply to have the province levy an additional tax of up to 2% in specified areas on their behalf.	Exemptions include accommodation rented for a period in excess of two months; lodging provided in hospitals and nursing homes; lodging supplied to employees by employers; lodging on ships or trains; hotel rooms not used for accommodation; charges of \$20 or less per day; charitable institutions; trailer parks and campsites; cabins without utilities and other amenities; and establishments with accommodation for less than four tenants.
Tobacco — <i>Tobacco Tax Act</i>	By cigarette, cigar retail price, and weight on other tobacco products.	15 cents per cigarette and tobacco stick; 77% of retail price on cigars to a maximum tax of \$5 per cigar; 15 cents per gram of loose tobacco.	
Motor Fuel — <i>Motor Fuel Tax Act</i>			Tax generally applies to all fuels used in internal combustion engines. Qualifying persons with disabilities who own or lease a vehicle are entitled to refunds of provincial tax paid up to an annual maximum of \$400. In the Vancouver Regional Transit service area the province collects an additional 6 cents per litre tax on clear gasoline and motive fuel on behalf of <i>Translink</i> to help fund regional public and private transportation system costs. In the Victoria Regional Transit service area the province collects (collected on behalf of) an additional 2.5 cents per litre on behalf of BC Transit to help fund the public transit system.

Table A2.27 Provincial Taxes (as of July 2002) — Col
--

Type and Statute Reference	Tax Base	Tax Rate	Characteristics and Exemptions
•	Clear gasoline (unleaded gasoline only).	11 cents per litre. Includes 3.25 cents per litre collected on behalf of the BC Transportation Financing Authority, and 1.25 cents per litre collected on behalf of the British Columbia Ferry Corporation. Of the tax collected in the Greater Vancouver Regional District, 5 cents is collected on behalf of <i>TransLink</i> .	
•	Motive fuel.	11.5 cents per litre. Includes 3.25 cents per litre collected on behalf of the BC Transportation Financing Authority, and 1.25 cents per litre on behalf of the British Columbia Ferry Corporation. Of the tax collected in the Greater Vancouver Regional District, 5 cents is collected on behalf of <i>TransLink</i> .	Tax applies to any fuel except unleaded gasoline, gasohol, natural gas, propane and butane used in a motor vehicle. Refunds of 0.5 cents per litre are available for motive fuel used in private passenger vehicles.
•	Alternative fuels.	Propane 2.1 cents per litre.	Natural gas, 85% ethanol and methanol blends are exempt from tax.
			Fuels using PuriNOx additive technology to blend at least 15% water and diesel motor fuel is also exempt from taxation until July 31, 2004.
•	Coloured fuel, marine diesel fuel.	3 cents per litre.	Coloured fuel may only be used for specified primary production and industrial uses. <i>Bona fide</i> farmers are exempt from paying the tax when fuel is used for farming purposes.
•	Locomotive fuel.	3 cents per litre.	Tax applies to fuel specifically for use in locomotives.
•	Jet and aviation fuel.	2 cents per litre.	Jet fuel tax applies to fuel produced specifically for use in a turbine aircraft engine.
			Aviation fuel tax applies to fuel produced specifically for use in a non-turbine aircraft engine.
•	Natural gas used in stationary engines.	7% of price if purchased. 1.1 cents per 810.32 if used but not purchased.	Tax applies to natural gas used in stationary engines other than pipeline compressors.
•	Natural gas used in pipeline compressors to transmit marketable gas.	1.9 cents per 810.32 litres.	Tax applies to natural gas used in a stationary engine at a pipeline compressor station.
	Natural gas used in pipeline compressors to extract and transmit raw gas from wells to processing plants.	Exempt.	
	Natural gas used in compressors to re-inject sour gas into depleted wells.	Exempt.	

 Table A2.27
 Provincial Taxes (as of July 2002) — Continued

Table A2.27 Provincial Taxes (as of July 2002) — Continued

Type and Statute Reference	Tax Base	Tax Rate	Characteristics and Exemptions
•	Marine bunker.	Exempt.	Exemption applies to bunker fuel, or a combination of bunker and other fuels used as fuel in a ship.
Race-meetings — <i>Horse Racing Tax Act</i>	Parimutuel betting pool.	7%.	Total provincial tax, net of commissions, is returned to the British Columbia Racing Commission to be spent on increased purses, maintenance of a breeders incentive fund, grants for breeders societies, operating race courses and horse racing meets, equine health research, and capital construction projects and related research costs.
Natural Resources — Logging Tax Act	Net income from logging in B.C.	10% (fully recoverable against federal and provincial corporation and personal income tax).	Net income from logging after deducting non-forestry income and a processing allowance.
Mineral Land Tax Act	Assessed value of freehold mineral land and production areas.	Undesignated mineral land — \$1.25 to \$4.94 per hectare. Designated production areas — \$4.94 per hectare.	Rates of tax set on sliding scale, dependent on size and designation of land.
Mineral Tax Act	Cash flow from individual metal and coal mines (other than placer gold mines).	2% of net current proceeds (NCP). 13% of net revenue (NR).	Tax calculated on a mine-by-mine basis. NCP tax paid on current operating cash flow until all current and capital costs, plus any investment allowance, are recovered. NR tax paid thereafter on cumulative cash flow. NCP tax creditable against NR tax.
	Volume of production of limestone, dolomite, marble, shale, clay, volcanic ash, diatomaceous earth, sandstone, quartzite and dimension stone.	\$0.15 per tonne removed from all quarries operated.	An operator may deduct 25,000 tonnes from the total number of tonnes removed from all quarries operated by that operator. However the amount deducted from any one quarry by all operators of that quarry must not exceed 25,000 tonnes.
	Value of minerals sold by placer gold mines.	0.5% of value of minerals sold.	
Insurance — Insurance Premium Tax Act	Direct premiums written.	4% for vehicle and general insurance; 2% for life, sickness, personal accident and loss of salary and wages insurance.	Exemptions — benefit societies; mutual corporations with 50% of income from farm or 100% from religious, educational or charitable institutions; marine, except pleasure craft; approved medical or hospitalization plans.
Real property — <i>Taxation (Rural Area) Act</i>	Assessed value of land and improvements in rural areas (outside municipalities). Assessment determined under the <i>Assessment Act</i> .	Rates are set annually. For 2002, the rates are 0.05% for farms and managed forest land; 0.102% for residential; 0.17% for recreational property/non- profit organizations; 0.37% for light industry, business and other property not contained in any other class; 0.42% for utilities; 0.45% for major industry and unmanaged forest land.	Some exemptions apply under various statutes.

Table A2.27 Provincial Taxes (as of July 2002) — Continued

Type and Statute Reference	Tax Base	Tax Rate	Characteristics and Exemptions
Residential school tax — <i>School Act</i>	Assessed value of residential land and improvements. Assessment determined under the Assessment Act.	Rates are set annually and vary by school district. For 2002 rates range from about 0.25% to 0.9%; weighted average 0.37%.	Basic rates are calculated using a formula to moderate effects of varying average assessments on school district taxes. School districts may levy additional tax if authorized by local referendum. Amendments to the <i>School Act</i> in 2002 allow the Minister of Finance to apply different tax rates within a school district. Tofino is the only municipality with a rate that differs from the rest of the school district.
Non-residential school tax — School Act	Assessed value of non- residential land and improvements. Assessment determined under the <i>Assessment Act.</i>	Rates are set annually. For 2002 the rates are 0.45% for recreational property/non- profit organizations; 0.23% for managed forest land; 0.68% for farms; 0.99% for light industry, business and other property not contained in any other class; 1.2% for unmanaged forest land; 1.25% for major industry; 1.5% for utilities.	Some exemptions apply under various statutes.

¹ Calculated for a two-income family of four with one spouse earning \$35,000 and the other \$20,000. Income taxes are based on basic personal credits, applicable provincial credits and typical major deductions.

² Alberta, Manitoba, Ontario and New Brunswick plan further reductions in their corporate income tax rates or increases in their small business thresholds in future years. Quebec's rate on investment income is 16.25 per cent. Other Quebec rates include a "youth fund" tax of 1.6 per cent.

³ The British Columbia non-financial rate applies to corporations with paid-up capital in excess of \$5 million. The tax on non-financial corporations will be eliminated effective September 1, 2002. The tax will be prorated for fiscal years straddling this date; Ontario's exemption of \$2 million was replaced by a deduction of \$5 million for all corporations effective January 1, 2002; Manitoba has a \$5 million exemption level and the higher rate applies to corporations with taxable capital in excess of \$10 million; Saskatchewan has a \$10 million deduction. Large Saskatchewan resource corporations are assessed a surcharge on the value of Saskatchewan resource sales. Ontario and Quebec have an additional surcharge or compensation tax on financial institutions. Quebec has announced that its capital taxes will be reduced by approximately 50 per cent by 2007.

⁴ British Columbia has a two-person rate of \$96 per month. British Columbia and Alberta offer premium assistance in the form of lower rates or an exemption from premiums for lower-income individuals and families.

⁵ Manitoba, Ontario and Newfoundland provide payroll tax relief for small businesses.

⁶ The lower rate applies to premiums for life, sickness and accident insurance; the higher rate applies to premiums for property insurance. The rate on automobile insurance is 4 per cent in British Columbia and Saskatchewan, and 3 per cent in Ontario. Sales tax applies to insurance premiums, except those related to individual life and health, in Ontario (8 per cent), Newfoundland (12 per cent) and Quebec (9 per cent). The sales tax is 5 per cent for auto insurance in Quebec and Ontario.

⁷ Tax rate is for regular unleaded fuel used on highways. The British Columbia rate includes 3.25 cents per litre dedicated to the BC Transportation Financing Authority, 1.25 cents per litre dedicated to the British Columbia Ferry Corporation and five cents per litre dedicated to *TransLink*, Vancouver's regional transportation authority. The rates do not include regional taxes. The Quebec rate includes estimated sales tax

⁸ The Quebec and Prince Edward Island tax rates are imposed on top of the federal goods and services tax.

⁹ The British Columbia rate includes 1.65 percentage points which are imposed on behalf of Tourism British Columbia.

¹⁰ Includes estimated provincial sales tax where applicable.

Table A2.29 Summary of Major Tax Changes Announced (from July 1, 2001 to June 30, 2002)

Income Tax Act

Personal:

Effective for the 2002 and subsequent tax years:

- The rates at which alternative minimum tax is charged and credited is changed to the ratio of BC's first tax bracket rate to the federal first tax bracket rate.
- The Overseas Employment Tax Credit rate is changed from 49.5 per cent to the ratio of BC tax to federal tax.
- The province's disability-related credits are increased.
- The BC Sales Tax Credit is increased to \$75 per adult, from \$50 per adult.

Corporate:

- The general corporate income tax rate was reduced to 13.5 per cent from 16.5 per cent effective January 1, 2002.
- Effective July 31, 2001, a mining flow-through share tax credit was introduced, which applies to personal and corporate income taxes.
- The maximum amount of taxable income to which the small business corporate income tax rate may be applied was increased to \$300,000 from \$200,000, effective April 1, 2002.

Corporation Capital Tax Act

- The corporation capital tax on non-financial corporations was phased out in two stages. Effective September 1, 2001, the rate was reduced to 0.15 per cent from 0.3 per cent. The tax will be eliminated effective September 1, 2002.
- An investment allowance for banks and trust companies was introduced.

Social Service Tax Act

- Effective July 31, 2001, a sales tax exemption was introduced for eligible machinery and equipment used in manufacturing, logging, mining and energy sector.
- Effective February 20, 2002, the exemption for non-generic parts used to repair or recondition exempt machinery and equipment was expanded to include all parts used for these purposes.
- On July 31, 2001, the threshold at which the surtax for passenger vehicles applies was raised to \$47,000 from \$32,000. Passenger vehicles valued at less than \$47,000 are taxed at a rate of 7.5 per cent; vehicles valued at \$47,000 or more but less than \$48,000 are taxed at 8 per cent; vehicles valued at \$48,000 or more but less than \$49,000 are taxed at 9 per cent and; vehicles valued at \$49,000 or more are taxed at 10 per cent.
- The general sales tax rate was increased to 7.5 per cent from 7 per cent as of February 20, 2002. The tax rates that apply to multi-jurisdictional vehicles will be increased on October 1, 2002 to reflect the increase in the general sales tax rate.
- A sales tax refund was made available for purchases made after June 30, 2002 using funds raised by Parent Advisory Councils. To qualify, the goods must be given to a school for a school use.
- Effective February 20, 2002, boats and travel trailers brought into the province by non-resident individuals for long-term personal use are exempt from tax.

School Act

- For 2002, the province increases average gross residential school taxes by 2 per cent. As usual, the province adjusted school property tax rates in response to changes in average assessed values in each school district. Some homeowners will experience an increase in their school taxes, while others will have offsetting reductions.
- The province amended the *School Act* to allow multiple residential tax rates within a single school district. In 2002, Tofino is the only municipality which has a tax rate that differs from the rest of its school district.
- For each of the eight non-residential property classes, a single, province-wide rate is set. Non-residential school tax rates are unchanged from last year. Individual property tax bills for non-residential property owners may rise or fall depending on changes in assessment.

Taxation (Rural Area) Act

• The province increased average gross residential rural area taxes by 2 per cent. The residential tax rate was increased to 0.104 per cent. Assessments, on average, were stable. Non-residential rates were not changed from last year.

Motor Fuel Tax Act

- Effective August 1, 2001, a tax exemption was provided for marine bunker fuel.
- Effective August 1, 2001, the domestic jet fuel tax rate was reduced to 2 cents per litre from 5 cents per litre and the non-jet aviation fuel tax rate was reduced to 2 cents per litre from 3 cents per litre.
- Effective August 1, 2001, a tax exemption was provided for PuriNOx motor fuel for three years. PuriNOx was an environmentally beneficial fuel that blends about 20% water with diesel motor fuel by means of a special blending technology.
- Effective April 1, 2002, the tax rate for clear gasoline and motor fuel collected in the Greater Vancouver transportation service region on behalf of *Translink* was increased by 2 cents per litre.

Tobacco Tax Act

• As of February 20, 2002, the tax rate on cigarettes was increased to \$30 from \$22 per carton of 200 cigarettes and the tax rate on fine-cut tobacco was increased to 15 cents from 11 cents per gram.

Appendix 3 Constitutional Framework

Constitutional Framework	The structure of the British Columbia government is based on British parliamentary tradition and precedent. Prior to 1866, British Columbia was composed of two British-controlled Crown colonies, one on Vancouver Island and a second on the mainland. In 1866, the Union Proclamation joined these two colonies to form the Crown Colony of British Columbia, and on July 20, 1871, British Columbia entered into Confederation with Canada. Although the Colony of Vancouver Island had a parliamentary form of government as far back as 1856, the first fully elected government was not instituted in British Columbia until the autumn after Confederation with Canada. Responsible government was achieved in late 1872, when the Lieutenant Governor acquiesced to an executive council that was responsible to the legislative assembly.
	Upon entering Confederation, British Columbia came under the authority of the <i>British North America Act, 1867 (BNA Act)</i> , a statute of the British parliament. Until 1982, the <i>BNA Act</i> defined the major national institutions and established the division of authority between the federal and provincial governments. In 1982, the <i>BNA Act</i> was renamed the <i>Constitution Act, 1867</i> and its amendments were incorporated into the <i>Constitution Act, 1982</i> . The <i>Constitution Act, 1982</i> , which also includes the Canadian Charter of Rights and Freedoms, is companion legislation to the <i>Canada Act, 1982</i> . With the passage of the <i>Canada Act, 1982</i> , the British Parliament ended its legal right to legislate for Canada. Canada, as a federal state, divides legislative powers between the federal and provincial governments.
Provincial Government	British Columbia's government is modelled after the British system. Functionally there are three main branches: the legislature, the executive and the judiciary.
Legislature	Legislative powers in British Columbia are exercised by a single legislative chamber, which is elected for a term of up to five years. The legislature consists of the Lieutenant Governor and 79 elected members of the legislative assembly. The legislative assembly represents the people of British Columbia in the conduct of the province's affairs. The assembly is required by law to meet at least once a year with a normal session lasting several months. However, special sessions can last just a few days or many months, depending on the nature of the government's business.
	The Legislature will reconvene on Tuesday morning at 10:00 a.m., October 7, 2002. The Legislature operates on a fixed schedule - the second Tuesday in February each year will be reserved for the Throne Speech and the third Tuesday in February each year will be reserved for the Budget Speech. During the third session of the 37th Parliament, the Legislature will be in session from February 12, 2002 to May 30, 2002 and from October 7, 2002 to November 28, 2002.
Executive	The executive is composed of the Lieutenant Governor and the executive council. The Lieutenant Governor is the Queen's representative in British Columbia and holds a largely ceremonial place in modern provincial

government. By constitutional custom, the Lieutenant Governor is appointed by the Governor General of Canada for a term usually lasting five years.

The Lieutenant Governor, on the advice of the premier, appoints members of the executive council and is guided by the executive council's advice as long as it holds the confidence of the legislative assembly. Following a general election, the Lieutenant Governor calls upon the leader of the political party with the largest number of elected members to serve as premier and to form the provincial government.

The Lieutenant Governor, on recommendation of the premier, convenes, prorogues and dissolves the legislative assembly and gives Royal Assent to all measures and bills passed by the assembly before they become law.

The executive council, or cabinet, is headed by the premier and is composed of selected members of the ruling party. Ministers are the head of government ministries, and are usually members of cabinet.

Cabinet determines government policy and is held responsible by the legislative assembly for the operation of the provincial government. Deputy ministers are the chief operating officers of ministries and are appointed by cabinet. Deputy ministers are responsible for carrying out government policies and for managing the work of their ministries.

Judiciary The judiciary performs functions that are central to the orderly operation of society. Judges hear and give judgement in criminal prosecutions and in actions arising from disputes between private citizens or between the government and private citizens. Judges apply both judge-made law, known as "common law," and laws made by the Parliament of Canada and provincial legislatures. The judiciary is increasingly called on to determine whether laws passed by governments conform to the values expressed in the Canadian Charter of Rights and Freedoms.

> The British Columbia judicial system is made up of the Provincial Court of British Columbia, the Supreme Court of British Columbia and the Court of Appeal of British Columbia. The Provincial Court includes Small Claims, Adult Criminal, Youth and Family divisions. Provincial Court judges are appointed by the provincial government. Court of Appeal and Supreme Court judges are appointed by the federal government.

> The federal judicial system includes the Tax Court of Canada, the Federal Court of Canada (Appeals division and Trial division) and the Supreme Court of Canada. The Federal Court of Canada hears cases in limited areas of exclusively federal jurisdiction, for example, reviewing decisions made by federal tribunals such as the Canada Labour Relations Board. The Supreme Court of Canada is the court of final resort and hears selected appeals from the Federal Court of Appeal and provincial Courts of Appeal.

ProvincialUnder Canada's constitutional framework, the province has ownership andGovernmentjurisdictionJurisdictionand social services, municipal institutions, property and civil rights, the
administration of justice and other matters of purely provincial or local
concern.
