# Introduction

## General Description of the Province

British Columbia is located on Canada's Pacific coast, and has a land and freshwater area of 95 million hectares. It is Canada's third largest province and comprises 9.5 per cent of the country's total land area.

### *Geography*

The province is nearly four times the size of Great Britain, 2.5 times larger than Japan and larger than any American state except Alaska. BC's 7,022-kilometre coastline supports a large shipping industry through ice-free, deep-water ports. The province has about 8.5 million hectares of grazing land, 1.8 million hectares of lakes and rivers, and 950,000 hectares of agricultural land that is capable of supporting a wide range of crops.

### *Physiography*

BC is characterized by mountainous topography, but also has substantial areas of lowland and plateau country. The province has four basic regions, a northwesterly trending mountain system on the coast, a similar mountain system on the east, and an extensive area of plateau country between the two. The northeastern corner of the province is lowland, a segment of the continent's Great Plains.

The western system of mountains averages about 300 kilometres in width and extends along the entire BC coast and the Alaska panhandle. The Coast Mountains contain some of the tallest peaks in the province. The western system includes the Insular Mountains that form the basis of Vancouver Island and the Queen Charlotte Islands. These islands help to shelter the waters off the mainland coast of BC, which form an important transportation route for people and products.

The interior of the province is a plateau of rolling forest and grassland, 600 to 1,200 metres in average elevation. North of Prince George the interior becomes mountainous, but plateau terrain returns just south of the Yukon boundary in the area drained by the Liard River. The southern interior's water system is dominated by the Fraser River, which has a drainage area covering about one-quarter of the province. The Rocky Mountains, in the eastern mountain system, rise abruptly on the southern BC–Alberta boundary and are cut by passes that provide dramatic overland transportation routes into the province. The Rocky Mountain Trench lies immediately to the west of the Rockies. This extensive valley, the longest in North America, is a geological fault zone separating different earth plates. It is the source of many of BC's major rivers, including the Peace, Columbia and Fraser.

---

### *Climate and Vegetation*

Coastal BC has abundant rainfall and mild temperatures associated with a maritime climate. The Pacific coast has an average annual rainfall of between 155 and 440 centimetres, while the more sheltered coasts of eastern Vancouver Island and the mainland along the Strait of Georgia average between 65 and 150 centimetres. Canada's longest frost-free periods of over 180 days per year are enjoyed along the edges of the coastal zone and far inland along the Fraser River valley. Temperatures fall quickly up the steep slopes of the Coast Mountains. The predominant trees in this coastal region are the western hemlock, western red cedar and balsam (amabilis fir) in the wetter parts, and Douglas fir and grand fir in the drier areas.

BC's interior region has a mainly continental type of climate, although not as severe as that of the Canadian prairies. Considerable variation in climate occurs, especially in winter, as mild Pacific storms bring relief from cold spells. The southern interior has the driest and warmest climate of the province. In the valleys, annual precipitation ranges from less than 30 centimetres to 50 centimetres, while daily temperatures can average over 20 degrees Celsius in July and just under freezing in January. The climate becomes more extreme further north and precipitation increases. The frost-free period in the north is short and variable. Lodgepole pine is the dominant tree of commercial value in the interior.

The northeast region of the province is an extension of the western prairie region of Alberta. It has a continental climate that is more extreme than that of the northern interior region. However, it does have long hot summers and a frost-free period long enough to grow grain, forage and other crops.

### *Population*

British Columbia is the third largest Canadian province in terms of population, which was estimated at 4.2 million persons or about 13 per cent of Canadians on July 1, 2004. British Columbia's population grew at an average annual compound rate of 1.0 per cent between 1996 and 2004, slightly faster than the growth of the Canadian population as a whole.

Vancouver, a principal Canadian shipping, manufacturing and services centre, has the largest urban population in British Columbia and was the third largest metropolitan area in Canada with a population of 2,132,824 persons in 2004. Victoria, the capital of British Columbia, is located on Vancouver Island and its regional district had a population of 346,522 persons in 2004.

# Chapter One

## Economic Review<sup>1</sup>

---

<sup>1</sup> Reflects information available as of June 1, 2005.

## 2004 Overview

The British Columbia economy expanded by 3.9 per cent in 2004, after growing 2.5 per cent in 2003. The goods-producing sector outperformed the service sector due in large part to robust international demand for BC resources. Wood product manufacturing and residential building construction contributed more to the growth of the economy than any other industry.

**Chart 1.1 Canada and British Columbia economic growth**

Source: Statistics Canada; April 2005

Consumer spending on goods and services was strong in 2004. The housing sector also recorded another dramatic increase, propelled by continued low mortgage rates and high demand. The number of people employed in the province rose faster than the size of the labour force and as a result the unemployment rate fell to 7.2 per cent.

## External Environment

The global economy was very strong in 2004, growing at 5.1 per cent overall. The US economy was robust throughout the year, posting annual growth of 4.4 per cent. Developing countries expanded at a rate of 7.2 per cent in 2004, with countries such as China, Singapore, Hong Kong and India leading the world in growth.

### *United States Economy*

Economic developments in the United States during 2004 suggested the underlying momentum remained strong. The economy expanded by 4.4 per cent, supported by continued robust advances in household spending and strong business investment. Labour market conditions improved significantly overall and the unemployment rate fell 0.5 percentage points to 5.5 per cent.

The growing US trade deficit continued to affect the US current account balance in 2004. Real imports of goods and services expanded at a faster rate than exports and the trade deficit reached a record \$618 billion in 2004. The growing current account and government deficits put downward pressure on the US dollar.

## Canadian Economy

In Canada, real GDP advanced 2.8 per cent in 2004, up from the 2.0 per cent growth in the previous year. Final domestic demand increased 3.9 per cent, after rising 3.6 per cent in 2003. Economic growth slowed towards the end of the year, after picking up momentum in the second quarter.

Exports rose 5.0 per cent despite the continued strength in the Canadian dollar, and imports expanded by 8.1 per cent.

Nominal corporate profits surged 18.7 per cent during the year. This helped real business investment expand 6.9 per cent with big gains in residential and machinery and equipment investment.

Employment growth in Canada slowed to 1.8 per cent in 2004, compared to 2.4 and 2.3 per cent in 2002 and 2003 respectively. The construction sector hosted many of the new jobs during the year, while the manufacturing sector continued to be a point of weakness for employment.

Low interest rates and robust demand continued to drive the housing market in 2004, as the number of new housing starts expanded 6.9 per cent over the previous year's level. Retail sales increased 4.7 per cent, with much of the strength in furniture and home improvement stores. The slow pace of auto sales continued to hinder retail trade growth.

## International Economy

Overseas, economic conditions improved in Japan during the first half of the year, but slowed during the second. Japanese real GDP rose 3.6 per cent in 2004, its best performance in several years.

Elsewhere, the European economy expanded at 1.7 per cent. Despite the overall weakness in the European economy, the rate of expansion still improved upon the previous two years.

**Chart 1.2 External economic growth**

Source: International Monetary Fund; Global Insight

The International Monetary Fund estimates that world growth in real gross domestic product rose from 4.0 per cent in 2003 to 5.1 per cent in 2004. Rapidly expanding Asian economies are the leading cause for the high growth rate. China's economy grew by a vigorous 9.5 per cent in 2004, after expanding by 9.3 per cent in 2003. Economic growth in India came in at 7.3 per cent in 2004, and the Commonwealth of Independent States expanded by 8.2 per cent over the year.<sup>2</sup>

### *Financial Markets*

The Bank of Canada's overnight target rate fell from 2.50 to 2.00 through the first quarter of the year, stayed steady through the second and third quarters, then rose back up to 2.50 during the last quarter. The US federal funds target rate was held at its historical low of 1.00 per cent through the first half of 2004, then increased steadily through the last half, ending the year at 2.25 per cent.

The steady upward movement in US interest rates during the second half of the year reflected the Fed's improved views on labour markets and economic activity, and their stance on keeping inflation contained.

The value of the Canadian dollar continued to rise against a weakening US dollar throughout 2004. The loonie averaged 76.8 cents US last year, up 5.5 cents US from 2003. In November of 2004, the Canadian dollar noon-rate peaked at 84.9 cents US.

**Chart 1.3 Canadian dollar**

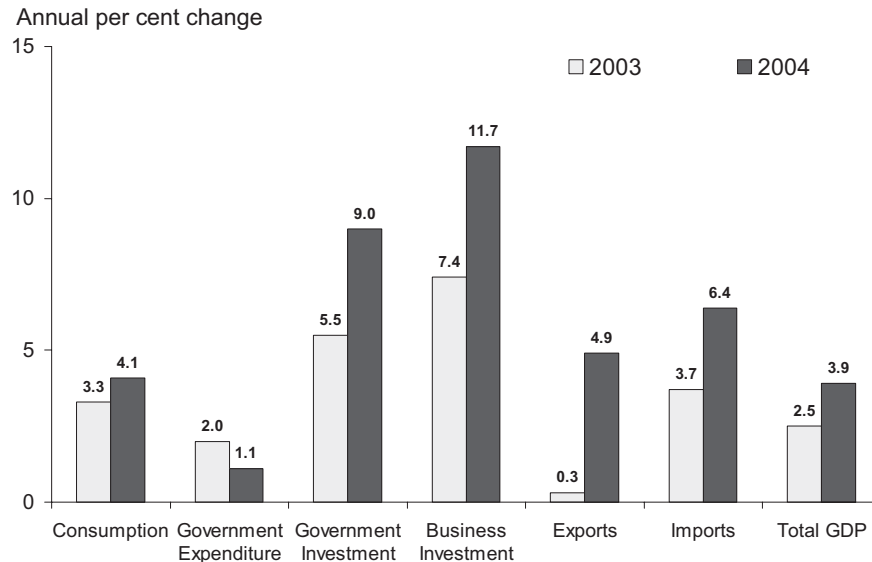

<sup>2</sup> The Commonwealth of Independent States includes Azerbaijan, Armenia, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Uzbekistan and Ukraine.

## British Columbia Economy

The British Columbia economy grew 3.9 per cent in constant dollar terms in 2004, following a 2.5 per cent increase in 2003. The strength in 2004 was observed in both BC's domestic and export markets.

**Chart 1.4 British Columbia real GDP by component**

Source: Statistics Canada

Real consumer spending was strong in 2004 with a sizable rise in the demand for goods, and continued strong demand for services. Residential investment expanded at 14.8 per cent for the second consecutive year, with annual housing starts increasing 25.8 per cent over the level observed in 2003.

With another surge in residential construction, strong foreign demand for BC wood products and high lumber prices, the province's wood product manufacturers had an exceptional year. The nominal value of shipments of BC wood products rose by 31.3 per cent to a total \$13.0 billion. Overall, BC manufacturing shipments grew by 13.5 per cent to a record \$42.2 billion in 2004.

Total employment rose 2.3 per cent while the labour force expanded by 1.3 per cent in 2004. This caused the annual unemployment rate to fall from 8.0 to 7.2 per cent.

Real business investment soared 11.7 per cent in 2004, due to a 14.8 per cent increase in residential construction and a 20.0 per cent surge in machinery and equipment investment. Despite exports rebounding to 4.9 per cent growth after weak 0.3 per cent growth the year before, imports continued to expand at a faster rate, which caused a further decline in BC's trade balance. The sharp rise in machinery and equipment investment led to some of the rise in imports due to capital purchases from other provinces and countries. Most of the expansion in government investment was due to infrastructure projects in the utilities and education sectors.

<sup>3</sup> GDP estimates are based on Statistics Canada's preliminary Provincial Accounts for 2004, released in April 2005. Further information on British Columbia's economic performance will be released in November 2005, when Statistics Canada releases revised GDP data for 2004 and previous years.

Investment figures for 2004 include spending on major capital projects across the province including:

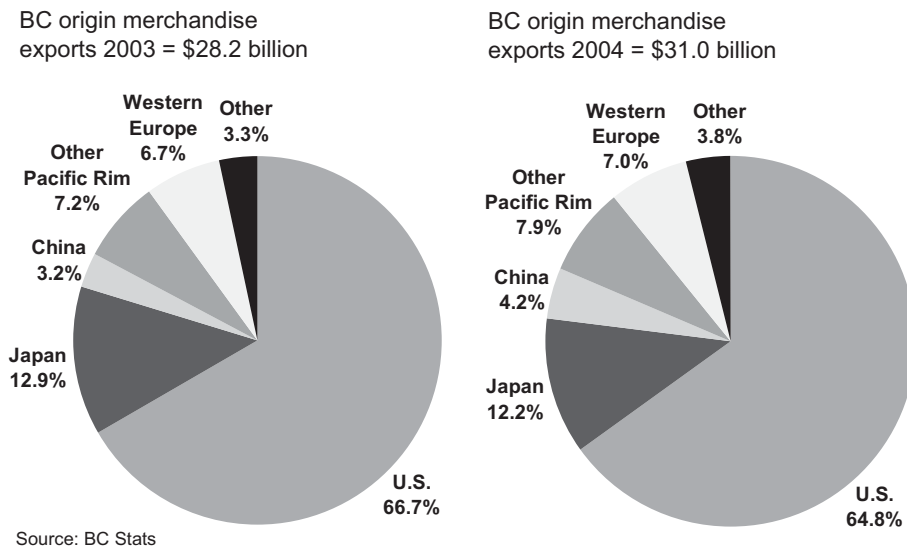

- SFU's Surrey Central City Campus;
- UBC's Life Sciences Centre;
- Abbotsford Regional Hospital and Cancer Centre;
- Sea-to-Sky Highway;
- Brilliant Dam power expansion;
- Vancouver convention centre expansion project.

## Exports

The value of BC's current dollar foreign merchandise exports rose 10.1 per cent in 2004. Exports to the US, the province's largest trading partner, increased 7.1 per cent, largely due to a rebound in the value of forestry exports. The value of exports to Japan rose 4.2 per cent, recovering from a 5.4 per cent drop in 2003. Exports to the Pacific Rim, excluding Japan, surged 27.4 per cent led by rapid growth in the value exports to China and Hong Kong. Exports to other Asian countries such as India and South Korea also saw significant gains during the year. Exports to Western Europe also rose 16.1 per cent. Appendix Table A1.7 provides further detail on exports by major market and commodity.

As a result, the US was the destination of a slightly smaller share of British Columbia exports in 2004, accounting for 64.8 per cent. Japan's share fell from 12.9 to 12.2 per cent. The Pacific Rim (excluding Japan; including China, Hong Kong, India, Taiwan, South Korea, etc) received 12.1 per cent of BC's exports, up from 10.5 per cent in 2003 (see Chart 1.5).

**Chart 1.5 Export shares by market, 2003 and 2004**

Strong external demand and high commodity prices were the main reasons for the boost in the value of exports in 2004. The high value of the Canadian dollar put some downward pressure on exports, but not enough to restrain the expansion led by demand and prices.

**Chart 1.6 Key commodity prices**

Source: Madison's Lumber Reporter and Ministry of Energy and Mines

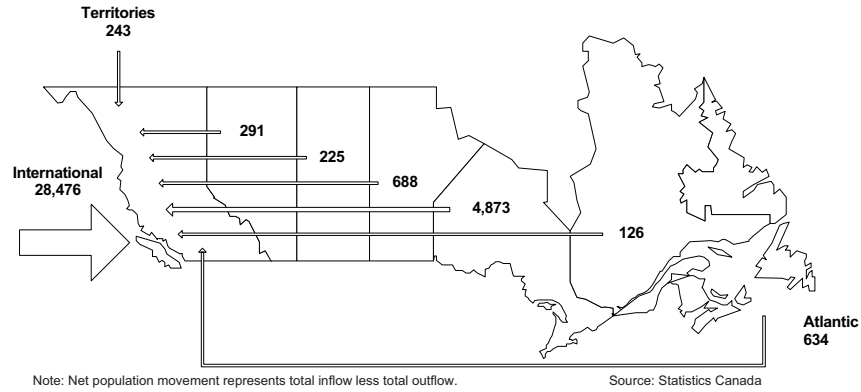

Current dollar metallic mineral product exports surged by 36.6 per cent to \$2.1 billion in 2004, which more than offset a 6.8 per cent drop in energy exports. The value of wood product exports rose 22.1 per cent to \$10.1 billion, while pulp and paper exports increased 5.8 per cent to \$5.0 billion. The key forest product prices increased significantly in 2004:

- Lumber prices averaged \$394 U.S. per thousand board feet in 2004, up significantly from \$270 U.S. in 2003.
- Pulp prices averaged \$616 U.S. per tonne in 2004, up from \$523 U.S. in the previous year.
- Newsprint prices also rose, averaging \$549 U.S. per tonne, compared to \$501 U.S. per tonne in 2003.

### *Population*

Historically, British Columbia's population has grown faster than Canada's due to net inflows of people from the rest of the country and a large number of immigrants from other countries. Between 1998 and 2002 however, the province's population growth slowed due to a net outflow of people to other parts of Canada. This trend was brought to an end in 2003, as BC gained 3,747 net migrants from other provinces. This continued in 2004, with an additional 7,080 interprovincial migrants. Including international migration, British Columbia welcomed 35,556 net migrants into the province in 2004.

**Map 1.1 Net interprovincial and international migration in BC, 2004**

British Columbia's population is continuing to age. The baby boom generation is currently between their early 40s and late 50s (see chart 1.7). Over the next several years there will be a significant increase in the portion of the population that is retired. The bust generation (born from a period of lower birth rates) is currently in their mid 20s to early 30s, with the baby boom echo generation around 20 years old right now.

**Chart 1.7 British Columbia population by age and sex, 2004**

*Labour and Income Developments*

Annual average employment rose by 2.3 per cent, or 45,500 jobs, in 2004. Overall employment in goods-producing industries rose by 4.7 per cent, or 19,300 jobs. The number of people employed in the construction sector rose by 24,300 jobs, or 20.7 per cent. The manufacturing industry expanded by 2,700 jobs, or 1.3 per cent. These gains were partially offset by job losses in the primary industries, with the forestry industry accounting for the biggest decline with 6,100 fewer jobs than in 2003.

Overall employment in the service industries grew 1.6 per cent in 2004. The accommodation and food service industry added a considerable number of jobs to the economy, employing an additional 12,900 people compared to 2003. The number of people employed in finance, insurance and real estate rose by 4.1 per cent, or 5,200 positions over the year. The most significant job loss on the service side occurred in the education and wholesale trade sectors (see table A1.5 for more details).

The provincial labour force expanded by 1.3 per cent in 2004 after 2.2 per cent growth the year before.

**Table 1.1 British Columbia Population and Labour Market Statistics**

Source: Statistics Canada

### Prices and Wages

The British Columbia Consumer Price Index (CPI) increased by 2.0 per cent in 2004 after rising by 2.1 per cent in 2003. Tuition costs increased the most of the index's categories, rising an average 21.1 per cent in 2004 following the 23.1 per cent hike in 2003. Gasoline prices were up 10.6 per cent, and homeowners saw an average 15.5 per cent increase in homeowner's insurance premiums in 2004.

**Table 1.2 Price and Earnings Indices**

	Units	2000	2001	2002	2003	2004
Consumer Price Index (British Columbia)	(1992=100)	113.3	115.2	117.9	120.4	122.8
	(% change)	1.9	1.7	2.3	2.1	2.0

	(% change)	24.6	1.5	-4.0	11.2	32.9

Source: Statistics Canada

Wages, salaries and supplementary labour income increased 4.5 per cent in 2004, reflecting employment growth, and increases in average weekly earnings. This led to an increase in total personal income of 4.1 per cent. Corporate profits had a strong boost in 2004, rising 32.9 per cent due in part to high demand and prices for BC resources.

### Consumer Expenditure and Housing

Real consumer spending picked up to a 4.1 per cent growth rate through the year due to strong demand in both the goods and services sectors. Growth in the goods side was bolstered by the total value of retail sales rising 6.3 per cent in 2004, more than double the pace observed in 2003.

Housing starts soared in the province through the year as demand rose and mortgage interest rates remained at historical lows. For 2004, housing starts totaled 32,925 units, a 25.8 per cent increase from 2003.

As a result of the strong housing market, the value of residential building permits rose 30.0 per cent to \$5.9 billion. The continued housing sector boom resulted from a combination of several factors. Another year of strong employment growth, very low mortgage rates, the scarcity of dwellings available for rent or sale together created exceptional conditions that attracted consumers to the new home market. The value of non-residential building permits also rose 10.1 per cent to \$2.1 billion.

**Chart 1.8 Building permits by activity**

Source: Statistics Canada

### Industrial Structure and Performance

The province's rich endowment of natural resources and their development historically formed the backbone of British Columbia's economic structure. In the past, the economy was largely based on primary and secondary forest production. Other natural resource sectors, such as agriculture, mining (including oil and gas) and fishing (including aquaculture) also contributed significantly.

With abundant natural resource-based products and a population too small to support local production of a full range of manufactured goods and associated services, the province specialized in certain sectors, relying heavily on international and interprovincial trade for the exchange of goods and services. This meant that economic activity in many sectors was sensitive to developments in world markets and fluctuations in international commodity prices.

In recent years, a more diversified economy emerged, supported by many non-resource activities such as film, tourism, high-technology industries including software and biotechnology, and other value-added industries. The British Columbia economy matured into a more broadly based structure that became less vulnerable to changes in international markets for natural resources.

In 2004, growth in the goods-based sectors outpaced the services side. The forestry and logging industry expanded 15.9 per cent with strong foreign demand and high commodity prices. GDP in the construction sector grew 8.6 per cent in 2004, largely driven by a surge in residential construction. The manufacturing sector also saw strong growth in the year, with real GDP rising 7.8 per cent over the level achieved in 2003 (see Table A1.3 for further detail).

Service-producing industries still generated about three quarters of the total provincial gross domestic product in 2004. Industries within the service sector include: transportation, communications and storage; wholesale and retail trade; finance, insurance and real estate; community, business and personal services; and public administration and defense.

### High Tech

The high technology sector is a leading performer in British Columbia's economy, outperforming other sectors in revenue, employment, and wage and salary growth in most years. The global meltdown in high tech in 2001 also affected British Columbia's high technology industries. The sector has been recovering from the slowdown, with stronger growth in both 2003 and 2004.

Real GDP generated by the high tech sector rose by 3.5 per cent in 2004 to \$3.7 billion, compared to 3.9 per cent growth for the provincial economy as a whole. Revenues expanded by 5.3 per cent, and wages and salaries were up 2.7 per cent. The total number of people working in the province's high tech sector increased slightly to 45,038 jobs in 2004 (see Table A1.14 for further detail).

**Chart 1.10 Trends in high technology sector in BC**

*Tourism*

The tourism industry was hit hard in 2003 from the rapid appreciation of the Canadian dollar and other shocks (such as forest fires and SARS) that kept travelers away. The number of visitors entering the province in 2004 rose 1.5 per cent, marking the first increase in entries since 2000. Total room revenues increased by 7.1 per cent over the year.

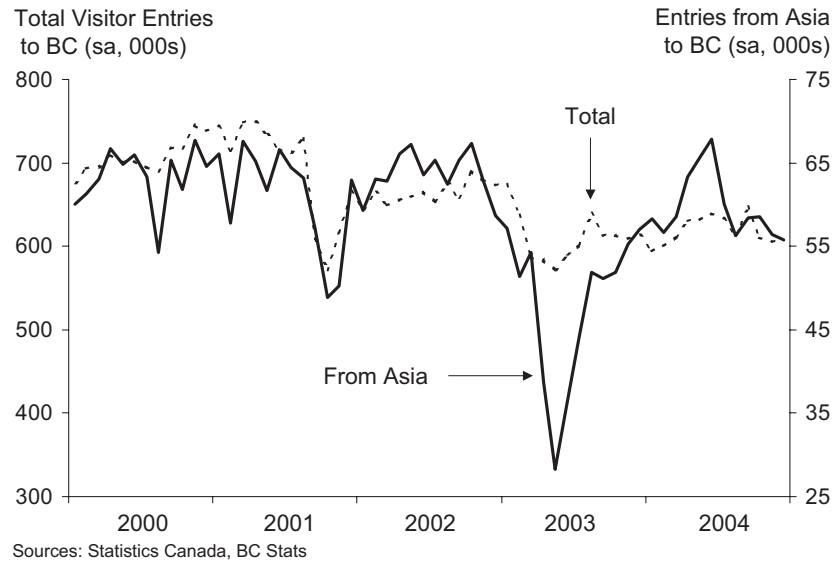

**Chart 1.11 BC Tourism industry**

The number of visitors from Asia suffered a significant decline in 2003 following the SARS outbreak. However, visitor entries from Asia swiftly rebounded, rising 23.9 per cent in 2004.

**Chart 1.12 Visitor entries from Asia**

## Revitalizing the Economy

British Columbia is committed to building a strong and vibrant economy characterized by new investment, new job opportunities and a higher standard of living for British Columbians. Some aspects of the strategy that have been implemented are discussed in this section.

### *Deregulation*

As part of the deregulation initiative, more than 143,000 net regulatory requirements were eliminated between June 2001 and June 2004, providing greater flexibility and making the province an attractive location to do business.

The province is already reaping the benefits of deregulation. Key achievements include:

- Streamlined liquor licensing and related administration to improve public safety and reduce red tape for businesses;
- Amended the Workers' Compensation Act to be more flexible and responsive to the needs of workers and employers;
- Reviewed over 3,000 fees and licenses across government, many affecting small businesses. Forty-three per cent have been eliminated, consolidated or devolved;
- Introduced a new Securities Act to replace the existing overly prescriptive securities law requirements with a more streamlined and results-based approach to securities regulation;

- Modernized and streamlined real estate legislation that will ensure that the real estate sector can more quickly respond to changes in the marketplace in order to serve consumers better; and
- Passed a new BC Safety Act that modernized the BC safety system by streamlining its regulatory environment and reducing the number of regulations, creating flexibility to achieve safety objectives at lower costs.

### *Transportation Infrastructure Plan*

The government continues to make progress on last year's multi-year transportation infrastructure plan. Major capital projects are underway across the province.

An effective highway system is reliable and allows goods and services to move through the province efficiently. Rehabilitation, such as repaving, extends the life of our existing provincial highways and bridges and keeps maintenance costs to reasonable levels.

The government is presently engaged in several infrastructure capital projects including the *Sea to Sky* highway improvement project, the Okanagan Lake Bridge and oil and gas roads in Northeastern BC.

### *Forestry Policy Reform*

The forest industry remains a cornerstone of the British Columbia economy. In 2003, legislation was passed that fundamentally changed the way the forest sector is managed. These changes include the reallocation of timber rights and market-based policy reforms to forest tenure and revenue administration. The objective is to create a more competitive, dynamic forest industry that will contribute sustainable well-paying jobs to BC's economy.

Progress was made in moving to a market-based stumpage system with the launch of market-based pricing in the coastal region on February 29, 2004. The Forest and Range Practices Act and its regulations were brought into force on January 31, 2004. The Act creates a streamlined, science-based, results-oriented regulatory approach to conserve forest and range resources, protect human health and key habitats and to ensure effective enforcement.

To address the mountain pine beetle epidemic in British Columbia, the Chief Forester increased the Allowable Annual Cut by 4.9 million cubic meters in the Price George, Lakes and Quesnel timber supply areas.

### *Energy Plan*

In 2003 the government unveiled a new energy plan designed to capitalize on BC's competitive advantage in energy. The plan set out to ensure continued low electricity rates and public ownership of BC Hydro, secure and reliable energy supply, more private sector opportunities and environmental responsibility and no nuclear power sources.

---

The government is developing an Alternative Energy Strategy to complement the Energy Plan. The strategy will embody initiatives to advance emerging new energy resources, encourage innovation in energy technology and continue BC's leadership in energy efficiency and conservation.

### *Oil and Gas*

BC's potential oil and gas reserves are immense. In May 2003, the government announced the Oil and Gas Development Strategy to promote all-season oil and gas activity, attract industry investment, and generate revenue. During 2004, there was an increase in both natural gas production and the number of wells drilled, and the government is working towards infrastructure initiatives such as the Alaska Highway Gas Pipeline and the development of an oil pipeline from Edmonton to the mid-coast of BC.

### *Competitive Tax Regime*

Beginning in 2001, the government initiated various changes to ensure BC's tax regime was competitive. After cutting personal income taxes by 25 per cent, the tax levels for British Columbia families are among the lowest in the country.

A substantial investment has also been made in restoring BC's business tax climate. The province's ability to attract and retain investment has dramatically improved due to a lower corporate income tax rate, the elimination of the general corporation capital tax, a sales tax exemption for production machinery and equipment, and sector specific tax reductions.

### *Conclusion*

British Columbia's economy grew 3.9 per cent in 2004, due to robust growth in both the domestic and external markets. The goods-producing industries outperformed the service-producing industries with strong demand for BC resources and high commodity prices. Wood product manufacturing and residential building construction led BC's economic growth in 2004. Real business investment jumped 11.7 per cent due to gains in both residential and machinery and equipment investment.

The number of people employed in the province rose 2.3 per cent in 2004, marking another strong year for jobs in BC. The province's annual unemployment rate dropped to 7.2 per cent, matching the Canadian rate, after being higher than the national average for the previous six years.

<sup>1</sup> As at July 1. Data take into account adjustments made for net census undercount in 1991 and 1996, and non-permanent residents.

<sup>2</sup> Data prior to 1997 are not available.

<sup>3</sup> Retail sales data have been revised from 1991 to 2004 and are now classified under the North American Industry Classification System (NAICS 2002).

<sup>4</sup> Data prior to 1998 not available.

<sup>5</sup> Data prior to 1993 are not available.

# Chapter Two

## Financial Review

## 2004/05 Overview

The provincial government ended the 2004/05 fiscal year with a record surplus of \$2.6 billion, \$2.5 billion higher than the budgeted surplus of \$100 million and an improvement of \$3.9 billion as compared to the previous year. The surplus reflected robust economic performance in both domestic and export sectors, improved natural resources revenue, higher than anticipated federal transfers, and sound financial management on the spending side. The record surplus also enabled a \$1.9 billion reduction in debt.

<sup>1</sup> Comparative figures have been restated to reflect government accounting policies in effect at March 31, 2005.

<sup>2</sup> Percentage change between 2004/05 actual and 2003/04 actual.

This is the third year in a row that the provincial government's actual results have significantly improved on its budget targets. British Columbia's consistent achievement of fiscal targets; solid economic performance, resulting, in part, from regulatory reform and tax reductions; transparent budgeting and reporting practices; and low taxpayer-supported debt to GDP ratio resulted in the province receiving debt rating upgrades from all three of the province's bond rating agencies – Moody's Investors Services, Standard & Poor's, and Dominion Bond Rating Service.

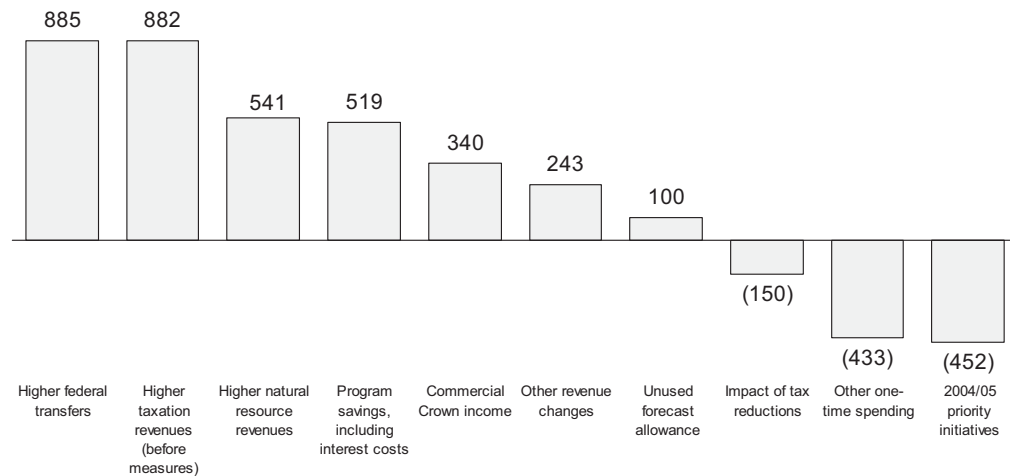

As well, 2004/05 is the first year that the province fully consolidated information from schools, universities, colleges and health authorities into its budget, quarterly reports and financial statements. As a result, for the first time in nine years, the Auditor General provided an unqualified opinion on the 2004/05 financial statements and commended British Columbia for being a leader in complying with generally accepted accounting principles (GAAP) and the inclusiveness of its budget and financial reports. Further information on compliance with GAAP can be found in the Appendix to this chapter. As well, the impact of the SUCH sector on the government's financial statements is discussed in a topic box on page 52.

The \$2.6 billion surplus included:

- taxpayer-supported program and agency revenue of \$30.8 billion, \$2.4 billion higher than budget and a 13.4 per cent improvement over the previous year;

**Chart 2.1 2004/05 Surplus – Major Changes From Budget**

\$ millions

- taxpayer-supported program and agency expense of \$30.7 billion, \$366 million higher than budget and a 1.1 per cent increase compared to the previous year; and
- commercial Crown corporation net income of \$2.4 billion, \$340 million higher than budget and a 28.0 per cent improvement over the previous year.

As is shown in Chart 2.1, the 2004/05 surplus was \$2.5 billion higher than budget due to a number of factors.

During 2004/05, taxation revenue increased by \$882 million mainly due to the province's robust economic growth. Major increases included corporate income tax, due to higher assessments for 2003, and property transfer tax, reflecting a strong housing market. The increase was partially offset by a reduction in the provincial sales tax rate to 7.0 per cent from 7.5 per cent in October 2004 and other tax reductions introduced in *Budget 2005* with a combined total impact of \$150 million.

Natural resource revenue was \$541 million higher than budget, reflecting strong global demand for energy and mineral products, and a robust US housing market, resulting in higher commodity prices and increased Crown forest harvest volumes.

Federal transfers to the province were \$885 million higher than the projection in the February 17, 2004 budget mainly due to changes to the equalization program and increased health and social transfers, including the additional \$148 million health care funding announced after the budget<sup>1</sup>.

<sup>1</sup> Subsequent to the February 17, 2004 budget, a further federal contribution to the First Ministers' Accord on Health Care Renewal (Health Accord) and the new 2004 Public Health and Immunization Trust was finalized, resulting in a \$148 million increase to revenue and spending targets. These amounts were included in the May 2004 *Supply Act* in addition to the original budget amounts for revenue from federal transfers and Ministry of Health Services spending. The additional funding was also included as part of the budget total in the 2004/05 *Quarterly Reports*. In this report, the budget figures reflect the presentation in the original estimates tabled on February 17, 2004 and do not include the additional funding.

The \$340 million improvement to Commercial Crown corporation net income was primarily due to the completion of the BC Rail Investment Partnership with CN in July 2004 and better than expected results from ICBC, partially offset by lower than expected BC Hydro results.

Prudent spending management resulted in government-wide program savings of \$330 million and interest cost reductions of \$189 million, including interest costs of taxpayer-supported Crown agencies and the SUCH sector. These savings, plus the revenue increases noted above, enabled the provincial

**Table 2.2 Operating Statement – Changes from Budget 2004**

(\$ millions)	Changes	Updated Forecast
<b>2004/05 forecast surplus – Budget 2004 Fiscal Plan (February 17, 2004)</b> .....		<b>100</b>
<b>Revenue increases (decreases):</b>		
Tax measures – post February 2004.....	(150)	
First Ministers' Accord on health care renewal.....	148	
Personal income tax – mainly higher tax base (before tax measures).....	75	
Corporate income tax – higher 2003 BC tax assessments and 2004 instalments from the federal government.....	362	
Social service tax – strong business and personal expenditures (before tax measures).....	120	
Property transfer tax – strong housing market.....	172	
Other tax revenue – mainly corporation capital, insurance premium.....	153	
Energy and mineral sources – effect of higher prices.....	278	
Forests revenue – higher prices and harvest volumes .....	364	
Equalization – impact of new framework.....	577	
Other federal transfers.....	160	
All other taxpayer supported sources .....	142	
Commercial Crown corporation income:		
BC Hydro – reflects impact of low water levels in reservoirs and BCUC decision, partially offset by Alcan settlement .....	(148)	
BC Rail – gain on BC Rail/CN transaction delayed from 2003/04 .....	199	
ICBC – primarily higher premium revenue and investment income, and lower claims costs .....	347	
Other Crown corporation changes – primarily lower BC Lottery Corporation net income .....	(58)	
<b>Total revenue changes</b> .....		<b>2,741</b>
<b>Less expense changes:</b>		
First Ministers' Accord on health care renewal .....	(148)	
Disbursement of BC Rail investment partnership gain .....	(169)	
Priority initiatives funded through Supplementary Estimates .....	(452)	
Transportation infrastructure funding paid to the BCTFA .....	(750)	
Additional forest fire and flood related costs .....	(116)	
Education – change in accounting for contributions in support of First Nations .....	52	
Lower expenses for Free Crown Grants and leases .....	129	
Interest costs – mainly reduced debt levels .....	123	
Other changes – primarily ministry savings .....	297	
<b>CRF expense changes</b> .....	<b>(1,034)</b>	
Taxpayer-supported Crown agencies:		
Transfers received by the BC Transportation Financing Authority (BCTFA) from the CRF.....	750	
Other taxpayer-supported Crown agency net spending changes .....	41	
School districts – net spending increase .....	(139)	
Universities – net spending increase .....	(62)	
Colleges – lower net spending .....	49	
Health authorities – lower net spending .....	102	
Increase in spending recovered from external entities .....	(73)	
<b>Total expense changes</b> .....		<b>(366)</b>
Forecast allowance not required .....		<b>100</b>
<b>Net change</b> .....		<b>2,475</b>
<b>Actual surplus – 2004/05 Public Accounts</b> .....		<b>2,575</b>

government to initiate priority spending initiatives totaling \$452 million and absorb additional forest fire- and flood-related costs of \$116 million. Other one-time spending included \$148 million related to the additional federal Health Accord transfers and a \$169 million distribution from the gain resulting from the completion of the BC Rail Investment Partnership.

The 2004/05 budget also included a \$100 million forecast allowance that was not required since the budget target was exceeded.

Chart 2.1 and Table 2.2 summarize the major changes from the 2004/05 budget.

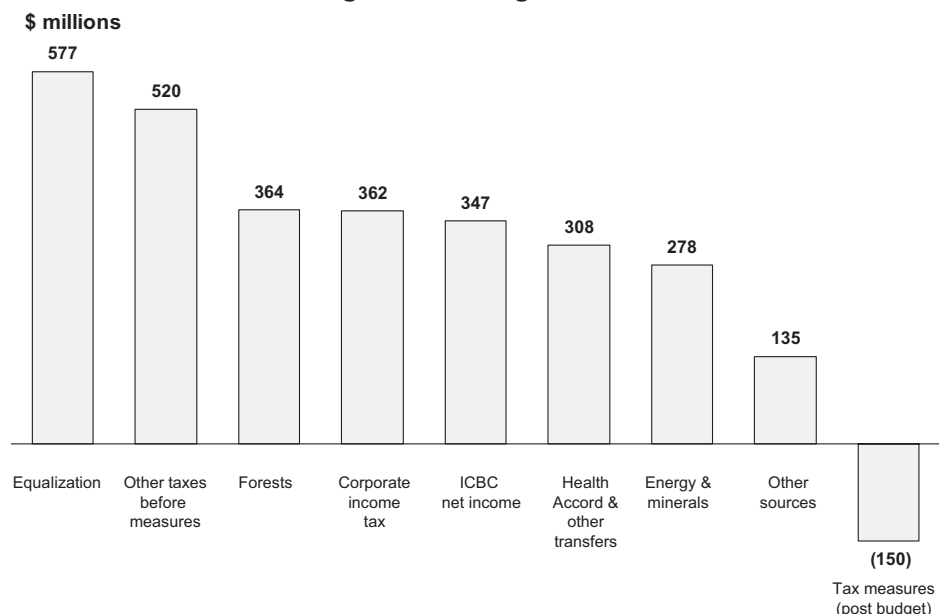

The 2004/05 surplus was a \$3.9 billion improvement over the \$1.3 billion deficit recorded in 2003/04 (see Table 2.1), primarily due to higher revenue from taxation and natural resources, increased federal transfers and improved commercial Crown corporation net income. Overall, revenue increased by \$4.2 billion over the previous year. This improvement was accompanied by a \$526 million increase in health and education spending, including spending by taxpayer-supported Crown agencies and the SUCH sector, partially offset by \$203 million in spending reductions in other areas. The overall annual increase in spending was \$323 million.

The 2004/05 surplus was \$1.1 billion higher than the third quarter forecast released with the 2005/06 budget on February 15, 2005. Further details on changes from the February 2005 updated forecast are provided in Appendix Table A2.3.

## Revenue

In 2004/05, revenue totaled \$33.2 billion, \$2.7 billion higher than budget and 14.4 per cent higher than 2003/04 reflecting improved income and economic growth, strong commodity prices, new federal/provincial arrangements for health and equalization entitlements and higher ICBC net income, offsetting \$150 million of tax measures introduced after the February 17, 2004 budget.

<sup>1</sup> Budget amounts and prior year comparative figures have been restated to reflect government's organization and accounting policies as of March 31, 2005.

<sup>2</sup> Percentage change between 2004/05 actual and 2003/04 actual.

<sup>3</sup> An additional \$148 million federal Health Accord and Immunization Trust funding was approved subsequent to the February 17, 2004 provincial budget. While this funding was authorized in the May 20, 2004 *Supply Act* and treated as part of the budget in three *Quarterly Reports*, this report reflects the original estimates tabled on February 17, 2004.

<sup>4</sup> Excludes inter-entity transactions between health authorities and hospital societies.

Major changes from budget include:

- Revenue in 2004/05 included an additional \$148 million health care contribution due to the First Ministers' Accord on Health Care Renewal and new Public Health and Immunization funding finalized after budget.
- Revenue from taxation sources was \$732 million above budget mainly due to higher revenues from personal and corporate income, property transfer, corporation capital and insurance premium taxes. In 2004/05, revenue included the impacts of the sales tax rate reduction to 7.0 per cent from 7.5 per cent (October 2004) and other measures announced in the February 2005 budget totaling \$150 million.
- Personal income tax revenue was up \$75 million mainly due to a higher tax base for 2003 and 2004, partly offset by \$30 million of tax measures introduced in *Budget 2005*.
- Stronger 2003 BC corporate profit growth resulted in a \$217 million gain from higher 2003 tax-year assessments. An additional \$145 million increase was primarily due to an improved 2004 outlook for national corporate profits that resulted in higher instalment payments from the federal government.
- Social service tax revenue was on budget as the impact of higher 2003/04 and 2004/05 spending, reflecting stronger income and economic growth, was offset by the \$120 million effect of reducing the sales tax rate to 7.0 per cent from 7.5 per cent (effective October 21, 2004).
- Property transfer tax revenue was \$172 million above budget and 17 per cent higher than 2003/04 due to the robust housing market throughout the year due in part to lower mortgage rates, increased migration and the cumulative effect of federal and provincial income tax cuts. In 2004/05, the budget forecast assumed a moderation in residential house prices, compared to the 9.0 per cent increase that actually occurred.
- Revenues from other taxes were up \$153 million mainly due to increased audit recoveries of corporation capital tax, higher insurance premium taxes mainly resulting from stronger 2003/04 results, and higher collections of tobacco, fuel, hotel room and property taxes, consistent with stronger income and economic growth.
- Revenue from energy and mineral sources was up \$278 million as the effects of strong global demand for energy and mineral products resulted in higher prices for natural gas, oil and minerals. The plant inlet natural gas price averaged \$5.72 per gigajoule in 2004/05, compared to \$4.65 assumed at budget. The effects of increased prices were partly offset by lower natural gas production (2.8 per cent annual growth compared to 8.1 per cent assumed at budget) and reduced drilling rights acquisitions (552 thousand hectares disposed at auctions compared to the budget assumption of 954 thousand hectares).
- Forests revenue was \$364 million above budget and up 34 per cent from the previous year as demand from a strong US housing market resulted in higher lumber prices and increased Crown harvest volumes. In 2004, the spruce-pine-fir 2X4 lumber price averaged US\$394 per thousand board feet compared to US\$300 assumed at budget and Crown harvest volumes totaled 70.9 million cubic metres in 2004/05, 7.4 million cubic metres higher than budget and up 15 per cent from 2003/04 levels.

## Changes to the Equalization Revenue System

### Summary

Fundamental changes to the Equalization program were confirmed at a First Ministers' meeting held in Ottawa on October 26, 2004. For British Columbia, these changes resulted in \$577 million more in Equalization revenue for 2004/05 and prior years than was forecast in *Budget 2004* and the 2003/04 *Public Accounts*. As well, while BC's 2005/06 entitlement of \$590 million is confirmed, amounts for subsequent years have not been finalized pending recommendations of an independent panel.

### The New Equalization Framework

Starting in 2005/06, total Equalization entitlements for all (Equalization-recipient) provinces combined will be set in advance for the subsequent five-year period. This is a significant departure from the current Equalization program, since the total size of the program will no longer be based on the size of relative provincial disparities.

Another significant departure was the decision to eliminate the ongoing system of updates and revisions of Equalization entitlements for 2002/03 through 2005/06. In the past, a system of updates and revisions meant that final Equalization entitlements for a given fiscal year would not be known until 30 months after the end of that fiscal year. Under the new framework, Equalization entitlements for 2002/03 through 2005/06 have already been finalized, thereby eliminating the uncertainty that arose from the previous system of continuous revisions. Entitlements for 2006/07 and beyond, however, remain undetermined pending federal policy decisions.

### Higher Equalization Revenue for 2004/05 and Prior Years

To determine (final) Equalization entitlements for 2004/05 and prior years, an individual floor for each province was established,

to ensure that combined entitlements for 2001/02 through 2004/05 would not fall below the level estimated in February 2004. The February 2004 official federal estimates of BC Equalization entitlements for 2001/02 through 2004/05 totaled \$1,312 million, whereas in October 2004, the total was \$1,064 million. As a result, BC received a "floor payment" of \$248 million (\$1,312 million minus \$1,064 million).

This floor payment was added to the official October 2004 federal estimates of Equalization entitlements for BC for 2001/02 through 2004/05. An additional one-time Equalization top-up was provided to Equalization-recipient provinces in the federal 2004 budget; this provided an additional \$38.6 million in Equalization revenue to BC.

The following table shows the change in Equalization revenues since *Budget 2004* and the 2003/04 *Public Accounts*. In respect of prior years, final Equalization entitlements are \$259 million higher than the *Public Accounts* amounts (which were based on the previous formula/system). For 2004/05, the higher base, floor payment and one-time top-up total \$721 million, \$319 million higher than the \$402 million *Budget 2004* estimate (which, again, was based on the previous formula). In total, 2004/05 revenue is \$577 million higher than originally forecast.

#### Equalization Revenue Calculations

\$millions	Budget 2004 and 2003/04 Public Accounts	Final Entitlements	Change
<b>Prior Years</b>			
2001/02.....	195.3	239.7	44.4
2002/03.....	-	70.5	70.5
2003/04.....	176.1	319.9	143.8
Total Prior Years.....	<b>371.4</b>	<b>630.1</b>	<b>258.7</b>
<b>2004/05</b>			
Base.....	402.0	433.9	31.9
Floor Payment.....	-	248.1	248.1
One-time Top-up.....	-	38.6	38.6
Total 2004/05.....	<b>402.0</b>	<b>720.6</b>	<b>318.6</b>
<b>Total Including Prior Years..</b>	<b>773.4</b>	<b>1,350.7</b>	<b>577.3</b>

- A higher than forecast equalization entitlement of \$577 million was due to the revised methodology used to calculate entitlements established at the First Ministers' Meeting (FMM) on October 26, 2004. BC entitlements for 2001/02 to 2005/06 are now finalized, and all prior year changes are included in this figure. Previously, final entitlements would not be known with certainty until 30 months after year-end. The revised methodology fundamentally changed the previous procedures. (See the topic box on page 45 for further information.)
- Other federal transfers (excluding equalization, additional health accord, and public health and immunization funding) were \$160 million above budget. This included \$49 million of health transfers for increased prior year entitlements and \$111 million higher funding in support of post-secondary institutions, health authorities and other ministry program costs.

### Commercial Crown Corporation Income

Commercial Crown corporations recorded a combined net income of \$2.4 billion as compared to a budgeted net income of \$2.1 billion.

Major changes from budget included:

- BC Hydro's \$240 million operating income, before deferral account transfers, was \$148 million lower than the projection in *Budget 2004*. The decrease from budget was primarily due to a \$93 million decrease in electricity trade revenue and a \$194 million increase in energy costs. Energy trade revenue declined mainly due to lower margins for forward energy prices. Low water inflows into hydro dam reservoirs (10 per cent below normal) and higher than anticipated domestic demand resulted in increased energy purchases. These reductions to net income were partially offset by the \$137 million payment of an arbitration award by Alcan Inc. to Powerex for indemnities Alcan issued as part of a power sales arrangement with Enron Power Marketing Inc.

BC Hydro's results also reflect the BC Utilities Commission decision with respect to BC Hydro's rate application, which included a 7.23 per cent interim increase effective April 1, 2004 and a second increase of 1.67 per cent in the Fall of 2004. The BCUC decision reduced these increases to 4.85 per cent. The lower rate increase was offset by domestic energy revenue being slightly higher than budget due to higher domestic demand.

- At \$779 million, the Liquor Distribution Branch net income was a \$19 million improvement over budget reflecting a 4.2 per cent increase in sales over budget and a \$7.1 million increase in other income. The additional revenue was partially offset by a 6.6 per cent increase in product costs and discounts and a \$3.9 million increase in operating costs, primarily from additional interest and bank charges due to higher credit card transaction volumes.
- BC Lotteries earnings of \$811 million (after transfers to the federal government) were \$31 million lower than budget. Gaming revenue was \$83 million lower than expected, reflecting the maturity of the lottery and bingo markets and delays in opening new casinos and community gaming centres. The reduction was partially offset by lower operating costs.

BC Lotteries' impact on the provincial government's bottom line is partially offset by a \$184 million distribution of gaming revenue to third parties, including \$135 million to charities, \$45 million to local governments, and \$4 million in support of the horseracing industry. Of the \$627 million retained by the province, \$147 million was dedicated to the Health Special Account and the remainder to general revenue. Amounts provided to the Health Special Account are used to fund the administration, operation and delivery of health care, health research, health promotion and health education services.

- On government's fiscal year basis, BC Rail's results were \$149 million higher than the budget forecast, primarily due to the completion of the BC Rail Investment Partnership transaction with CN in July 2004. *Budget 2004* had projected the completion date in the previous fiscal year. Instead the \$199 million gain from the CN transaction was booked in the 2004/05 fiscal year.

For the year ended December 31, 2004, BC Rail reported net income of \$195 million – \$16 million less than its plan for the year. The \$199 million gain from the CN transaction was \$36 million less than earlier projections, primarily due to the deferral of the operating lease revenue for the right of way and rail bed assets. As well, BC Rail increased its environmental liability by \$30 million and wrote down its assets by \$14 million to match their recoverable value. These reductions were partially offset by a \$45 million decrease in the costs for repaying BC Rail debt and \$19 million in other improvements, primarily due to the operating income from the industrial freight division prior to its transfer to CN as part of the partnership transaction.

- On government's fiscal year basis, ICBC's results were \$347 million ahead of the budget forecast. The change from budget was due to a combination of higher revenue and lower claims and operating costs.

ICBC reported a net income of \$389 million for the calendar year ended December 31, 2004, a \$337 million improvement over their budgeted net income of \$52 million. Premium revenue was \$64 million higher than budget due to higher premium volumes and ICBC maintaining its market share for optional coverage. Higher returns on investment portfolios resulted in a \$65 million increase in investment income. Claims costs were \$161 million lower than budget, reflecting improving claims trends and adjustments to prior year claims. Lower operating costs, including commissions and premium taxes, of \$45 million and a \$2 million gain from the sale of residual assets resulted in additional improvements to the bottom line.

Five-year financial statements for the above Crown corporations are presented in Appendix Tables A2.11 to A2.15.

## Expense

Taxpayer-supported program and agency expense, when shown on an entity basis (see Table 2.4), is comprised of:

- net government spending from the consolidated revenue fund (CRF), which reflects the appropriations of ministries and legislative offices;

plus,

- CRF program costs that are recovered directly from outside entities (ministry appropriations are approved net of these contributions);

plus,

- the amount that spending by Crown agencies and the SUCH sector exceeds the transfers they receive from the CRF (i.e. net spending). Internal transfers are eliminated to avoid double counting of expense.

For 2004/05, program and agency expense totaled \$30.7 billion, \$366 million higher than the *Budget 2004* estimate and a 1.1 per cent increase over the previous year. The increase over budget reflects \$1,034 million in additional CRF spending and a \$73 million increase in recovered expenses, partially offset by a \$741 million reduction in net spending by taxpayer-supported Crown agencies and the SUCH sector.

To comply with generally accepted accounting principles, expense is presented on a function basis that represents the broad categories under which government programs fall (see Appendix Table A2.8). Function reporting facilitates multi-year comparison of government spending in various areas such as health and education. Each function may encompass spending by a number of ministries, Crown agencies and SUCH sector entities.

### *Consolidated Revenue Fund expense*

The February 17, 2004 budget for CRF spending was \$25.0 billion as reflected in the 2004/05 *Estimates*, which included a \$240 million provision in the Contingencies (All Ministries) and New Programs Vote. Additional authorizations of \$1.6 billion were made during 2004/05 through *Supplementary Estimates* and various other statutes for a total spending authorization of \$26.6 billion. Actual expenditures totaled \$26.0 billion.

The additional authorizations were mainly for priority initiatives (see Table 2.5) and a \$750 million transfer to the BC Transportation Financing Authority (BCTFA) to reduce debt and to fund the transportation infrastructure plan. As BCTFA is a Crown agency, the transfer had no effect on total expense due to its elimination from total expense as described above.

In addition to the priority initiatives listed above, the province invested \$169 million of the gain from the BC Rail Investment Partnership in northern and First Nations communities:

- \$135 million for the Northern Development Initiative;
- \$15 million for the BC Rail First Nations Benefits Trust;

**Table 2.5 Priority Initiatives Funded Through Supplementary Estimates**

	(\$ millions)
Advanced Education – matching research funds.....	10
Agriculture, Food and Fisheries – BSE and avian flu response, competitiveness..	27
Community, Aboriginal and Women's Services – local infrastructure.....	66
Energy and Mines – geo-science centre.....	25
Forests – Forest Revitalization trust, compensation, reforestation.....	112
Human Resources – costs arising from rate increase.....	10
Public Safety and Solicitor General – police equipment.....	3
Small Business and Economic Development – 2010 venues, infrastructure, Arts and Culture Endowment.....	163
Sustainable Resource Management – contaminated sites remediation.....	28
Water, Land and Air Protection – parkland acquisition.....	8
<b>Total priority initiatives funded through Supplementary Estimates .....</b>	<b>452</b>

- \$13 million to *Legacies Now*; and
- \$6 million in Asia Pacific Market Outreach initiatives and fuel cell research.

Ministry of Health Services expenditures included \$148 million to fund regional health expenditures under the federal Health Accord and Immunization Trust. Excluding these costs, the ministry ended the year under spent by \$100 million primarily due to a prior period accounting adjustment.

Ministry of Forests expenditures were \$98 million higher than budget mainly due to \$110 million in additional direct fire-fighting costs, for which the ministry has statutory spending authority, partially offset by other program savings. Similarly, the Ministry of Public Safety and Solicitor General was able to absorb an additional \$6 million in flood relief costs due to cost management in other areas.

Several ministries finished the year below budget.

- Ministry of Education expenditures were \$56 million lower primarily due to a change in accounting treatment regarding federal funding for first nations students.
- Ministry of Attorney General expenditures were \$10 million lower primarily due to lower than expected expenditures under the *Crown Proceeding Act* and treaty negotiations, partially off-set by costs related to the Pickton, Air India and Eron trials.
- Ministry of Children and Family Development actual expenditures were \$31 million lower primarily due to a prior period accounting adjustment.
- Ministry of Provincial Revenue actual expenditures were \$6 million lower due to hiring delays and reduced amortization expense.
- Ministry of Sustainable Resource Management actual expenditures were \$128 million lower, primarily due to below budget spending in the Crown Land Special Account.

- Expenses for the Management of Public Funds and Debt were \$123 million below a budgeted \$800 million due to lower than anticipated debt levels and interest rates.
- Other ministry cost management savings totaled \$24 million.

A total of \$135 million was accessed from the Contingencies (All Ministries) and New Programs Vote (see Table 2.6), leaving \$105 million unspent.

**Table 2.6 Pressures Allocated to Contingencies**

	(\$ millions)
Agriculture, Food and Fisheries – BSE assistance and avian flu response .....	8
Attorney General – Pickton, Air India and other trials .....	9

Energy and Mines – Vancouver Island Gas Pipeline Assistant Agreement.....	11
Finance – Southeast Asian tsunami relief .....	8
Management Services – alternative service delivery and other operations .....	8
Public Safety and Solicitor General – disaster relief costs .....	8
Small Business and Economic Development – Olympic security, tourism .....	5
Sustainable Resource Management – BC Trust for Public Lands and site cleanup .....	10
Transportation – grants to small communities.....	6
Water, Land and Air Protection – Living Rivers.....	5
<b>Total pressures allocated to contingencies .....</b>	<b>135</b>

### *Other Expenses<sup>2</sup>*

CRF spending is shown net of recoveries from external entities. Recoveries are obtained for items such as interest costs for loans issued under the Fiscal Agency Loan program and medical services provided to non-residents. As well, during the year, the federal government or other entities may decide to partner with a ministry on delivery of a short-term program where the ministry delivers the service and the external entity provides the funding. Under GAAP, the financial statements must disclose separately the revenue and spending related to recoveries.

In 2004/05, CRF spending funded by recoveries from external entities was \$73 million higher than budget, primarily reflecting increased activity in a number of ministries for minor programs cost-shared with the federal government. This spending was offset by an equal increase in revenue.

Taxpayer-supported Crown agencies and SUCH sector entities provide a number of services to the public. These agencies and entities are primarily funded by the provincial government, but may also have outside sources of revenue.

<sup>2</sup> Revenue and spending of taxpayer-supported Crown corporations and SUCH sector organizations are combined with CRF revenue and expenses in Tables 2.3 and 2.4. Revenues and expenses for individual taxpayer-supported Crown corporations and SUCH sector organizations are provided in Appendix Table A2.10.

Some of the services provided by taxpayer-supported Crown agencies are highway construction (BC Transportation Financing Authority), property management (BC Buildings), property assessment (BC Assessment Authority), social housing (BC Housing Management Commission), transit services (BC Transit), and legal services (Legal Services Society).

The SUCH sector entities are school districts, universities, colleges, health authorities and hospital societies. These organizations are the primary providers of health and education services to British Columbians.

As both the taxpayer-supported Crown corporations and the SUCH sector organizations receive most of their funding from ministry budgets, their impact on total government spending is the amount by which their total spending exceeds any grants and transfers made to these organizations by the ministries and special offices. The spending in excess of grant funding is supported by the organizations' outside sources of revenue.

At \$378 million, net spending by taxpayer-supported Crown corporations and agencies (i.e. spending in excess of transfers from the CRF) in 2004/05 was \$791 million lower than in the *Budget 2004* fiscal plan (see Table 2.2). The reduction was primarily due to the BC Transportation Financing Authority receiving an additional \$750 million from the CRF for purposes of debt reduction and funding for the transportation infrastructure plan. Spending increases by other taxpayer-supported Crowns also were offset by increased transfers from the CRF.

Net spending by SUCH sector organizations was \$2,532 million in 2004/05 – \$50 million higher than budget (see Table 2.2). The increase mainly reflects the inclusion of spending related to school-generated funds. Net spending by post secondary institutes was relatively stable compared to budget, as a net spending increase by universities was offset by a net spending decrease by colleges. The shift was due to the elevation of two colleges to university status during the year.

Further information on the impact that the inclusion of the SUCH sector has on government's financial statements is discussed in the topic box on page 52.

## Impact of Including the SUCH Sector on the Summary Statements

### Overview

Expanding the government reporting entity to include SUCH organizations requires full consolidation of the financial results of those organizations into the provincial government's budget and financial reports.

**Chart 1 Net Operating Impact of SUCH**

As noted in Chart 1, the positive impact of the SUCH sector on the province's bottom line in 2004/05 would have been mirrored in the previous four years had it been included in the government reporting entity.

While the SUCH sector organizations receive a significant proportion of their funding from the provincial government, they also have direct revenue that helps fund their operations. This includes direct contributions from the federal and municipal governments as well as own-source revenue, such as fees for student residences and tuition, charges to non-residents for health services, and sales from ancillary cafeteria services and retail outlets. Including direct SUCH sector revenue added approximately \$2.9 billion to total provincial government revenue in 2004/05.

Spending by the SUCH sector organizations reflects the costs incurred to deliver health and education programs on behalf of the province, in keeping with statutory obligations. These programs are funded by a combination of government grants and direct revenue. SUCH sector organizations also deliver enhancements to the government-mandated programs, or provide other related services. The impact on total provincial government spending reflects SUCH entity spending that exceeds the grant funding provided to them. In 2004/05, this amounted to \$2.5 billion.

**Table 1 Financial Impact of SUCH**

	2000/01	2001/02	2002/03	2003/04	Budget 2004/05	Actual 2004/05
<b>Before Inclusion of SUCH</b>

Taxpayer-supported debt.....	24,892	27,167	29,057	29,539	31,605	28,132
<b>After Inclusion of SUCH</b>						
Revenue.....	29,804	28,020	27,659	29,060	30,492	33,233
Expense.....	(28,439)	(30,668)	(30,396)	(30,335)	(30,292)	(30,658)
Surplus/(Deficit) before joint trusteeship .....	1,365	(2,648)	(2,737)	(1,275)	200	2,575
Taxpayer-supported capital spending .....	2,542	2,070	1,876	2,045	1,943	2,322
Taxpayer-supported debt.....	25,109	27,534	29,425	30,028	32,115	28,657
<b>Net Fiscal Plan Impact of SUCH</b>						
Revenue (direct revenue).....	1,864	2,196	2,307	2,482	2,606	2,927
Expense (in excess of grant funding).....	(1,730)	(2,020)	(1,772)	(2,131)	(2,482)	(2,532)
Surplus/(Deficit) before joint trusteeship .....	134	176	535	351	124	395
Taxpayer-supported capital spending .....	356	656	737	1,057	318	955
Taxpayer-supported debt.....	217	367	368	489	510	525

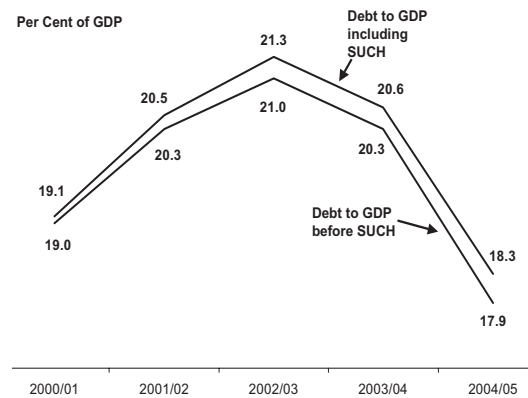

The year-over-year changes in net operating impact reflect both decisions on own source revenue as well as timing impacts for program implementation. For example, increases in direct revenue from 2001/02 to 2004/05 are due, in part, to additional fee revenue and higher demand for ancillary services.

SUCH organizations acquire capital infrastructure and equipment both for delivery of their primary service to the public and for ancillary support services, including commercial operations. The province provides annual capital grants towards the acquisition of primary service delivery capital. The SUCH sector enhances the government funding and funds other capital spending mainly from capital donations from other groups or by borrowing in the financial markets. The net impact of the SUCH sector on taxpayer-supported capital spending is the non-government funded capital spending by the SUCH sector.

SUCH sector organizations either borrow from the government through its fiscal agency loan program or directly from the financial markets. The net impact of the SUCH sector on taxpayer-supported debt is the debt borrowed by SUCH sector organizations from external markets (see Table 1). SUCH sector debt is used primarily to finance the construction of post-secondary institutions, hospitals and long-term care facilities. Chart 2 illustrates the impact of the additional debt on taxpayer-supported debt to GDP ratios.

Although the assets of the SUCH sector are reflected on government's balance sheet, some of the assets owned by these organizations have external restrictions on their use and therefore cannot be used to meet government's general obligations. Examples include endowment funds of post-secondary institutions, and assets owned by denominational hospitals that are used in the delivery of provincial health care services.

**Chart 2 Taxpayer-supported Debt Impact of SUCH**

### 2004/05 In Review

In *Budget 2004*, the SUCH sector was projected to have a \$124 million positive impact on government's bottom line, adding \$2,606 million to revenue and \$2,482 million to expense. At \$395 million, the actual result was \$271 million higher than the budgeted impact, primarily due to a \$321 million increase in direct revenue, partially offset by a \$50 million increase in net spending - mostly by school districts.

At \$177 million, the school district net operating impact was \$116 million higher than budget. Direct revenue increased by \$255 million, mainly due to the inclusion of school-generated funds, such as cafeteria and vending machines sales, and tuition charged to out-of-province students. The revenue increase was partially offset by a \$139 million increase in net expenses (expenses in excess of grant funding), mainly due to spending related to school generated funds.

The universities net operating impact was \$123 million, a \$70 million improvement over budget. A \$132 million increase in direct revenue was primarily due to higher than anticipated federal transfers and additional fee revenue. Net expenses increased by \$62 million, as higher salary costs were partially offset by an increase in government transfers.

Table 2 2004/05 Impacts

	Schools		Universities		Colleges		Health Authorities	
	Budget	Actual	Budget	Actual	Budget	Actual	Budget	Actual

<b>Net debt impact</b> .....	30	17	325	337	38	37	117	134

Colleges had a \$68 million positive impact on government's bottom line, compared to a budget \$1 million negative impact. The improvement was mainly due to higher fee revenue and an increase in government transfers.

At \$27 million, the health authorities net operating impact was \$16 million higher than budget. Higher spending of \$184 million, primarily resulting from the Health Accord, was offset by a \$286 million increase in government transfers, resulting in an overall \$102 million reduction in net expense. This improvement was partially offset by an \$86 million reduction in direct revenue, primarily due to lower recoveries of medical costs from out-of-province patients.

In *Budget 2004*, the SUCH sector was projected to fund \$318 million in capital spending from sources outside of government. Actual self-funded spending was \$637 million higher than budget due

to \$531 million in additional spending and a \$106 million reduction in capital funding provided by ministries. The reduction in capital funding was primarily due to the impact of project delays on final transfer payments.

Education spending was up \$330 million, reflecting additional land and equipment purchases by school districts and the expansion of existing projects by post secondary institutes.

Health spending increased by \$201 million due to the commencement of construction on the Academic Ambulatory Care Centre and the expansion of existing capital projects and equipment purchases.

The SUCH sector net debt impact was slightly higher than the projection in *Budget 2004*, reflecting the repayment by universities of funds borrowed from government, an increase in borrowing by health authorities, and a reduction in school district debt.

## Full-Time Equivalents (FTEs)

Staff utilization for ministries and taxpayer-supported agencies is measured in full-time equivalents. (SUCH sector employees are excluded.) FTEs are calculated by dividing the total hours of employment paid for in a given period by the number of hours an individual, full-time person would normally work in that period. In 2004/05, FTEs were 419 below budget and 3,079 lower than the previous year (see Table 2.7).

Ministry and special offices utilization was 301 FTEs lower than budget, primarily due to lower than anticipated staffing levels in a number of ministries. Similarly, actual FTE utilization for taxpayer-supported Crown corporations and agencies was 118 FTEs lower than budget, reflecting minor workforce adjustments in a number of organizations.

The reduction in ministry and special offices FTEs as compared to the previous year (1,825 FTEs) is mainly due to reduced requirements for forest fire fighting and the completion of the three-year expenditure reduction plan by March 2004.

The reduction in Crown corporation and agency FTEs from the previous year (1,254 FTEs) reflects the impacts of transferring the Forensic Psychiatric Institute to Providence Health Care, restructuring BC Building Corporation's property management department, and transferring the Pacific National Exhibition to the City of Vancouver.

**Table 2.7 Full-Time Equivalents (FTEs) Utilization**

	Budget 2004/05	Actual 2004/05	Actual 2003/04	Annual Change <sup>1</sup> (per cent)
Ministries and special offices (CRF).....	27,160	26,859	28,684	(6.4)
Taxpayer-supported Crown corporations and agencies.....	3,940	3,822	5,076	(24.7)
<b>Total FTEs</b> .....	<b>31,100</b>	<b>30,681</b>	<b>33,760</b>	<b>(9.1)</b>

<sup>1</sup> Percentage change between 2004/05 actual and 2003/04 actual.

## Provincial Capital Spending

Capital spending is required to build, acquire or replace assets such as roads, schools, post-secondary facilities, hospitals and related major equipment.

Capital spending does not flow directly to the government's annual surplus or deficit. Instead, as required by generally accepted accounting principles, capital costs are spread out over the useful lives of the related assets through annual amortization expenses. These amortization expenses are charged annually against the surplus. However, the cash requirements for capital projects have an immediate impact on provincial debt.

Capital spending in 2004/05 totaled \$3.2 billion, \$248 million above budget. Education and health facilities accounted for 47 per cent of total spending, power generation and transmission projects for 22 per cent, and transportation projects for 18 per cent (see Chart 2.3 and Table 2.8).

**Table 2.8 Capital Spending**

<sup>1</sup> Joint ventures of the Columbia Power Corporation and Columbia Basin Trust.

<sup>2</sup> Includes BC Housing Management Commission, Provincial Rental Housing Corporation, BC Buildings, Ministry of Attorney General, Ministry of Public Safety and Solicitor General, Ministry of Children and Family Development and BC Transit.

<sup>3</sup> Includes ICBC Properties Ltd.

Taxpayer-supported capital spending includes schools, hospitals, post-secondary facilities and transportation projects, plus minor capital spending by ministries and other minor taxpayer-supported agencies. In 2004/05, spending of \$2.3 billion was \$379 million above budget mainly due to updated planning assumptions and an increased scope for existing health and education projects.

**Chart 2.3 Capital Spending, 2004/05**

Education spending was up \$330 million, reflecting additional land and equipment purchases by school districts and the expansion of existing projects by post secondary institutes.

Health spending increased by \$242 million due to the commencement of construction on the Academic Ambulatory Care Centre and Abbotsford Regional Hospital and Care Centre projects, and the expansion of existing capital projects and equipment purchases.

Other taxpayer-supported capital spending was \$193 million lower than budget, reflecting lower ministry minor capital purchases, delayed spending for the Vancouver Convention and Exhibition Centre project and the reversion of Columbia River power projects to self-supported status.

Self-supported commercial Crown corporation capital spending includes projects undertaken by BC Hydro, BC Rail, ICBC and for Columbia River power projects. Spending for these agencies totaled \$860 million, \$131 million below budget mainly due to cancellation of BC Hydro's Georgia Strait [Pipeline] Crossing and Vancouver Island [Power] Generation projects (GSX/VIGP) and lower building improvement costs for the Surrey Central City mall. Lower spending was partially offset by the reversion of Columbia River power project expenditures to self-supported status and additional spending for gaming equipment.

Table 2.9 shows a summary of capital spending changes since the 2004/05 budget.

**Table 2.9 Capital Spending – Changes from Budget 2004**

(\$ millions)	Change	Final Results
<b>Capital spending – Budget 2004</b>		<b>2,934</b>

<sup>1</sup> Only projects that have been approved by Treasury Board and/or Crown corporation boards as at March 31, 2005 are included in this table. Ministry service plans may include projects that still require final approval.

<sup>2</sup> Total expenditures since commencement of each project.

<sup>3</sup> Represents sum of annual budgeted provincial expenditures to complete each project.

<sup>4</sup> Amounts shown exclude interest costs incurred during construction.

<sup>5</sup> Individual components were completed starting in December 2000 and will continue to be completed before the end of the overall project.

<sup>6</sup> Amount represents the provincial portion of this cost-shared project with the federal government. Total project budget is \$65 million.

<sup>7</sup> A joint venture of the Columbia Power Corporation and the Columbia Basin Trust.

<sup>8</sup> The base building was substantially completed in January 2003; however, work to prepare space for new tenants is still required.

<sup>9</sup> Amount represents the provincial portion of this cost-shared project with the federal government and the tourism industry.

## Provincial Debt

The government and its Crown corporations borrow to finance their own operations (for example, when revenues fall short of expenses), to finance construction of capital projects or other investments, to refinance maturing debt and to finance working capital needs.

**Chart 2.4 Provincial Debt Components**

<sup>1</sup>Amount includes debt to finance deficits, ministry minor capital spending and operating activities. It also includes ferry infrastructure debt and a portion of roads infrastructure debt incurred up to 1994/95.

Provincial debt decreased \$1.9 billion to total \$35.8 billion at March 31, 2005, or 22.9 per cent of provincial GDP (see Chart 2.4, Table 2.11 and Appendix Table A2.18). Approximately \$30 billion or over 80 per cent of total debt reflects investments in capital assets – schools, hospitals, roads, transportation, utilities, and other forms of provincial infrastructure. The remaining \$6 billion represents accumulated borrowing to fund public services.

**Table 2.11 Provincial Debt Summary**<sup>1, 2</sup>

(\$ millions)	Budget 2004/05	Actual 2004/05	Actual 2003/04	Annual Change (per cent)
<b>Taxpayer-supported debt</b>

<b>Total provincial debt.....</b>	<b>39,395</b>	<b>35,826</b>	<b>37,767</b>	(5.1)

<sup>1</sup> Debt is after deduction of sinking funds and unamortized discounts, and excludes accrued interest. Government direct and fiscal agency accrued interest is reported in the government's accounts as an accounts payable.

<sup>2</sup> Includes debt and guarantees incurred by the government on behalf of school districts, universities, colleges and health authorities/hospital societies (SUCH), and debt directly incurred by these entities.

<sup>3</sup> Restated to reflect a change in accounting policy for the defeasance of debt (budget estimate is reduced by \$57 million).

<sup>4</sup> Includes taxpayer-supported Crown corporations and agencies, other fiscal agency loans, student assistance loan guarantees, loan guarantees to agricultural producers, guarantees issued under economic development and home mortgage assistance programs, and loan guarantee provisions.

**Table 2.12 Debt – Changes from Budget 2004**

Debt forecast allowance not needed.....		<b>(100)</b>
<b>Provincial debt at March 31, 2005 – 2004/05 <i>Public Accounts</i></b>		<b>35,826</b>

Total debt was \$3.6 billion below budget reflecting significantly improved government operating results, reduced working capital requirements and non-utilization of the forecast allowance.

### *Taxpayer-supported Debt*

Taxpayer-supported debt decreased by \$1.4 billion to total \$28.7 billion at year-end (18.3 per cent of GDP). This was \$3.5 billion below budget, mainly reflecting:

- lower borrowing requirements for government's consolidated revenue fund due to significantly better-than-expected operating results, early repayment of the BC Ferry Services loan receivable, lower ministry minor capital spending, and reduced working capital requirements;

- reduced working capital requirements for education and health facilities, and assumption by the provincial government of certain capital-related debt issues for health facilities;
- reduced borrowing requirements by the BC Transportation Financing Authority reflecting additional cash contributions by the provincial government to help finance the transportation investment plan;
- the impact of restoring Columbia River power projects to commercial status; and
- clarification of the accounting treatment of an indemnity to CN related to tax attributes in the BC Rail partnership agreement.

### *Self-supported Debt*

Self-supported debt totaled \$7.2 billion at March 31, 2005 (4.6 per cent of GDP). Debt at year-end was down \$570 million from the previous year and \$11 million below plan mainly reflecting:

- lower capital spending and other reduced working capital requirements for BC Hydro;

partially offset by

- the impact of restoring Columbia River power projects to commercial status.

Table 2.12 shows a summary of debt changes from the 2004/05 budget.

Although the summary accounts surplus was \$2.6 billion, total provincial debt only decreased \$1.9 billion. This was due to numerous factors including non-cash items included in the deficit (primarily amortization costs and deferred revenues from the federal government), timing differences between accrued revenue/expenses and actual cash receipts/disbursements, and changes in working capital items such as accounts receivable and accounts payable. Table 2.13 provides a reconciliation between the summary accounts deficit and the total provincial debt decrease.

**Table 2.13 Reconciliation of Summary Surplus to Debt Decrease – 2004/05**

Increase in deferred revenue.....	(1,169)
Other balance sheet and working capital changes.....	(11)
<b>Total provincial debt decrease</b> .....	<b>(1,941)</b>

## Statement of Financial Position

The provincial government's statement of financial position (commonly referred to as a balance sheet) summarizes the consolidated assets and liabilities of central government, Crown corporations and agencies, and the SUCH sector. In accordance with generally accepted accounting principles, the government's financial position is presented on a net liabilities basis<sup>3</sup> (see Table 2.14).

**Table 2.14 Net Liabilities and Accumulated Deficit**

(\$ millions)	Budget 2004/05	Actual 2004/05	Actual 2003/04 <sup>1</sup>	Annual Change <sup>2</sup>
Financial assets .....	23,355	24,880	24,381	499
Less: liabilities .....	(52,283)	(51,760)	(52,900)	1,140
<b>Net liabilities</b> .....	<b>(28,928)</b>	<b>(26,880)</b>	<b>(28,519)</b>	<b>1,639</b>
Less: non-financial assets .....	23,814	23,730	22,794	936
<b>Accumulated deficit</b> .....	<b>(5,114)</b>	<b>(3,150)</b>	<b>(5,725)</b>	<b>2,575</b>

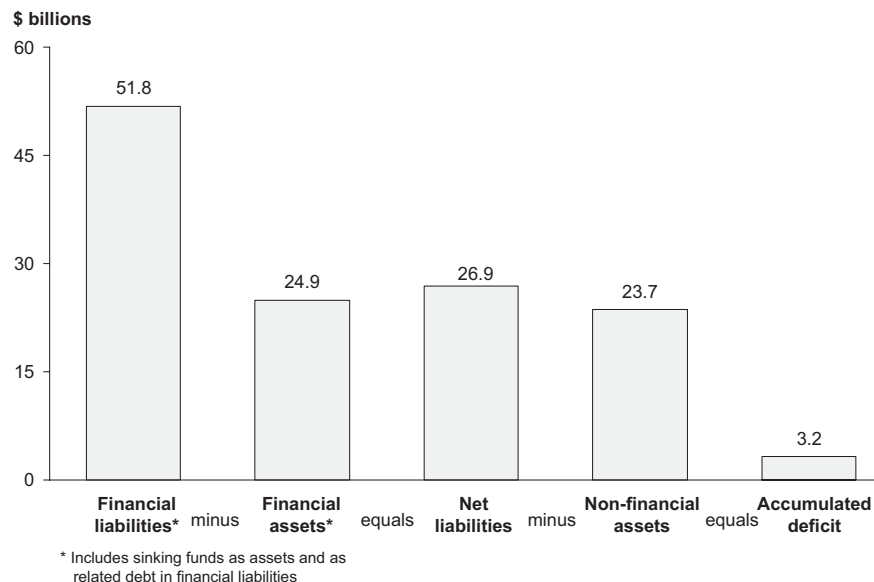

<sup>1</sup> Comparative figures have been restated to reflect government accounting policies in effect at March 31, 2005.

<sup>2</sup> Change between 2004/05 actual and 2003/04 actual.

Net liabilities represent the difference between government's financial assets and its liabilities, and is a key measure of the future revenue required to pay for past transactions and events.

By the end of 2004/05, the province's financial assets had increased by \$499 million to \$24.9 billion, mainly due to an \$878 million increase in cash and temporary investments. Financial liabilities had decreased by \$1,140 million to \$51.8 billion mainly due to the \$1.9 billion reduction in debt partially offset by a \$1.2 billion increase in deferred revenue. The increase in deferred revenue primarily reflects the increase in federal funding arrangements for which the federal government has paid the cash in advance.

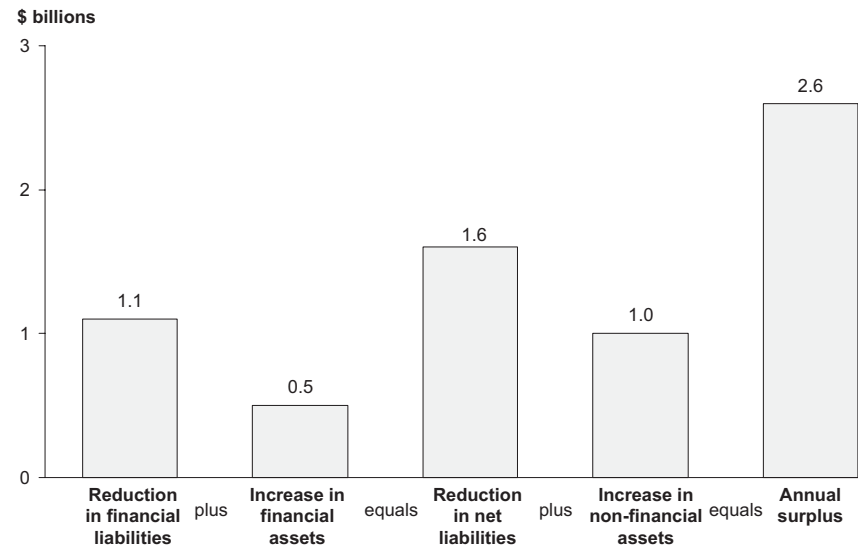

**Chart 2.5 Statement of Financial Position**

<sup>3</sup> Other jurisdictions refer to this as the "net debt" basis. In British Columbia, the term "net liabilities" is used to avoid confusion with provincial borrowing in financial markets, which is referred to as "debt".

The financial position of government at March 31, 2005 and the changes from the previous year are summarized in Charts 2.5 and 2.6. Further data on the statement of financial position and annual changes can be found in Appendix Tables 2.5 and 2.5a. A topic box on the trends over the last seven years for key indicators of the province's financial condition, following recommendations of the Canadian Institute of Chartered Accountants, is on page 64.

**Chart 2.6 2004/05 Changes in Financial Position**

## Review of the Province's Financial Condition

### Introduction

In 1997 the Canadian Institute of Chartered Accountants (CICA) published a report on the Indicators of Government Financial Condition. In the report, the CICA identified seven ratio indicators that apply to provincial governments and grouped them into three categories:

- **Sustainability** – the ability to maintain existing programs and meet existing creditor requirements without increasing the debt burden on the economy. The indicators in this group are the net liabilities to gross domestic product (GDP) ratio and the change in net liabilities relative to GDP.
- **Flexibility** – the degree to which a government can increase financial resources to respond to rising commitments, by either expanding its revenues or by increasing its debt burden. The indicators in this group are public debt charges as a percent of revenue, annual growth in capital assets, and the own-source revenue to GDP ratio. Own-source revenue is defined as revenue raised by the province within its jurisdiction and is calculated as total revenue less federal transfers.
- **Vulnerability** – the degree to which a government becomes dependent on, and therefore vulnerable to, sources of funding or costs outside its control or influence. The indicators in this group are federal government transfers as a percent of revenue and unhedged foreign currency debt as a percent of overall debt.

The BC Auditor General has recommended that the provincial government provide an analysis of BC's financial condition using these indicators. These indicators are still under assessment, and they may be replaced or

supplemented with other indicators that are more relevant to the users of the province's financial statements.

### Sustainability

Net liabilities to GDP<sup>1</sup> is a broader application of the familiar debt to GDP ratio. It incorporates not only debt, but also other obligations such as accounts payable and liabilities arising out of collective agreements. It also recognizes that the province has financial assets that could be used to retire debt and these other obligations should the need arise.

Net liabilities reflect the cumulative financial liability for all historical deficits, plus the acquisition of capital assets (e.g. hospitals, schools, roads, etc.) Chart 1 shows that, in 2004/05, net liabilities, as a percentage of GDP is the lowest it has been since 2000/01.

**Chart 1 Net liabilities to GDP ratio**

The annual change in net liabilities is equal to the annual surplus or deficit, plus the change in net assets for the year. The change in net liabilities as a percentage of GDP indicates the magnitude of the change in relation to the size of the economy. Chart 2 illustrates the trend towards improved sustainability as the change in the net liabilities to GDP ratio shrank significantly in 2003/04 and was negative in 2004/05, due to a reduction in net liabilities.

<sup>1</sup> The CICA, and other jurisdictions, refer to this measure as net debt to GDP. In BC, the term "net debt" has been applied to borrowing from financial markets.

**Chart 2 Change in net liabilities as a per cent of GDP**

Net liabilities increased significantly in 2001/02 and 2002/03 as the provincial government incurred deficits. In 2003/04, the increase in net liabilities was much less due to the reduction in the deficit. Net liabilities decreased in 2004/05 for the first time since 2000/01 as the government posted a significant surplus.

**Flexibility**

Debt charges as a percent of revenue is an indicator of how much of a “bite” debt interest costs take out of provincial government revenue. Having to use a significant portion of revenue to service a debt burden limits government spending on program delivery. As is seen in Chart 3 the proportion of revenue used to pay debt charges has decreased over the last seven years. This is mainly due to lower interest rates on borrowing over the period.

**Chart 3 Debt charges as a per cent of revenue**

\* Based on the “interest bite” calculations shown in the Key Debt Indicators table.

The annual growth in capital assets (i.e. capital spending less disbursements and depreciation) is an indicator of whether the provincial government is maintaining its infrastructure, a large portion of which is necessary for program delivery and sustained economic growth (e.g. education and health care facilities, highways, hydro-electric generation). A negative change indicates that government is wearing out its assets faster than it is renewing or expanding them. The change in assets is also impacted by asset write-downs and alternative service delivery initiatives.

The lower growth rate in capital assets in 2001/02 and 2002/03 reflects the write-down of the *PacifiCat* ferries and the winding down of construction on the Vancouver Island Highway and sky train Millennium Line projects. The impact of these events reduced the annual growth in assets by 1.3 per cent in each of the two fiscal years.

In 2003/04, the decline reflects the transfer of ferry assets to the new BC Ferry Services Inc., which further reduced assets by 2.5 per cent. Despite these adjustments, the province has increased its capital stock in six of the last seven years (see Chart 4).

**Chart 4 Annual growth in capital assets**

Own-source revenue to GDP is an indicator of how much revenue the provincial government raises in the form of taxes, fees and other revenue in order to fund its activities. Own-source revenue excludes transfers from

the federal government. Since the 1998/99 fiscal year, the government has reduced its impact (see Chart 5), giving it more fiscal room to react to changing situations in the future.

**Chart 5 Own-source revenue to GDP ratio**

Own-source revenue peaked in 2000/01 primarily due to the impact of the energy price spike in 2000 on natural resource revenue. A decline in energy prices in 2001 led to a subsequent decline in government revenue. The tax measures introduced in the July 30, 2001 *Economic and Fiscal Update* significantly reduced the ratio of own-source revenue to GDP in 2002/03. Subsequent increases in the ratio in 2003/04 and 2004/05 reflect the impact of an improving BC economy on taxation and natural resource revenue.

Although it is not a CICA indicator, the provincial government also monitors its expense to GDP ratio as a measure of the flexibility it has in managing costs. The smaller the footprint the government leaves on the economy, the less impact a change would have on the overall financial well-being of British Columbians.

Government expense (i.e. the direct expenses of government plus the net spending of taxpayer-supported Crown agencies and the SUCH sector) as a proportion of the economy has declined steadily since 2001/02, and is at its lowest point in the last seven years (see Chart 6).

This decrease occurred despite increases in government spending, primarily on health care and education, as the economy grew faster than spending over the period and spending declined in other areas.

**Chart 6 Expense to GDP ratio**

### Vulnerability

The provincial government receives transfers from the federal government in support of social programs. In recent years, social transfers for health and childcare have increased significantly. As well, the provincial government began receiving payments under the federal equalization program.

The overall trend is that federal transfers are an increasing percentage of overall government revenue (see Chart 7). This leaves the government more exposed to the potential impact from federal funding cutbacks, and stresses the importance of obtaining a federal commitment to maintain transfer payments over the long term. The year-over-year fluctuations in this ratio are an indicator of the recent volatility of this revenue source.

**Chart 7 Federal transfers as a per cent of revenue**

The provincial government's debt includes debt borrowed in foreign currencies. In order to protect itself from the impact of foreign exchange rate fluctuations on interest costs for this debt, the government uses financial derivative instruments such as currency swaps and forward contracts as a "hedge" around these costs.

Not all foreign currency debt is protected in this manner. Some commercial Crown corporations with significant revenue derived from US sources, such as BC Hydro, have a natural hedge for their \$US-denominated debt resulting from their operations. Over the last seven years, the government has reduced its exposure, especially for debt owed by commercial Crown corporations (see Chart 8).

### Summary

**Chart 8 Unhedged foreign currency debt as a per cent of debt**

No single indicator gives a complete financial picture of an organization; rather, they should be reviewed as a group. Over the last seven years, the provincial government has improved its net indebtedness relative to BC's economy while expanding the capital assets that are necessary for program delivery.

Falling interest rates have reduced the "bite" that debt interest costs have on revenue. As well, the government has reduced the amount of revenue it takes from the provincial economy in percentage terms. These factors give the government greater flexibility to react to future events. The provincial government also has moved to reduce the risk to the bottom line inherent in foreign-denominated debt.

While the positive trends are partially offset by the increasing importance of federal transfer revenue, overall the financial condition of the province has shown improvement at the end of 2004/05.

In order to ensure that its debt is sustainable and to enhance its financial flexibility, the provincial government intends to maintain a downward trend for its taxpayer-supported debt to GDP ratio, and to manage expenditure commitments within available revenues.

## Credit Rating

A credit rating is an evaluation of a borrower's ability to pay interest and to repay principal. A credit rating affects the borrower's debt servicing costs and the investor's rate of return since an investor will demand a higher interest rate on a higher-risk, lower-rated security. BC's improved fiscal outlook and its record for meeting annual budget targets has prompted upgrades from 3 rating agencies within the same year.

The ratio of taxpayer-supported debt relative to gross domestic product is a measure often used by investors and credit rating agencies when analyzing a province's ability to manage its debt load. British Columbia's taxpayer-supported debt to gross domestic product ratio is one of the lowest in Canada, translating into a strong credit rating and lower debt service costs.

More information on BC's upgrades, along with inter-provincial comparisons, is provided in the topic box on page 70.

## Debt Indicators

Table 2.15 provides a historical summary of financial indicators that are used to depict the province's debt position, recent borrowing trends and the impact of debt on fiscal operating results.

**Table 2.15 Key Debt Indicators – 2000/01 to 2004/05 <sup>1</sup>**

	2000/01	2001/02	2002/03	2003/04	Budget 2004/05	Actual 2004/05

Taxpayer-supported <sup>7</sup> .....	28,516	27,456	26,680	27,966	29,737	32,407
Total debt (\$ millions)						
Total provincial.....	33,788	36,082	36,877	37,767	39,395	35,826
Taxpayer-supported <sup>8</sup> .....	25,109	27,534	29,425	30,028	32,115	28,657
Provincial GDP (\$ millions) <sup>9</sup> .....	131,333	134,060	138,368	145,500	147,161	156,481
Population (thousands at July 1) <sup>10</sup> .....	4,039	4,078	4,115	4,152	4,185	4,196

<sup>1</sup> Figures for prior years and the 2004/05 budget have been restated to conform with the presentation used for 2005 and to include the effects of changes in underlying data and statistics.

<sup>2</sup> The ratio of debt to population (e.g. debt at March 31, 2005 divided by population at July 1, 2004).

<sup>3</sup> The ratio of debt outstanding at fiscal year end to provincial nominal gross domestic product (GDP) for the calendar year ending in the fiscal year (e.g. debt at March 31, 2005 divided by 2004 GDP).

<sup>4</sup> The ratio of interest costs (less sinking fund interest) to revenue. Figures include capitalized interest expense in order to provide a more comparable measure to outstanding debt.

<sup>5</sup> Weighted average of all outstanding debt issues.

<sup>6</sup> Includes revenue of the consolidated revenue fund (excluding dividends from enterprises) plus revenue of all government organizations and enterprises.

<sup>7</sup> Excludes revenue of government enterprises, but includes dividends from enterprises paid to the consolidated revenue fund.

<sup>8</sup> Excludes debt of commercial Crown corporations and agencies and funds held under the province's warehouse borrowing program.

<sup>9</sup> GDP for the calendar year ending in the fiscal year (e.g. GDP for 2004 is used for the fiscal year ended March 31, 2005).

<sup>10</sup> Population at July 1st within the fiscal year (e.g. population at July 1, 2004 is used for the fiscal year ended March 31, 2005).

## Provincial Credit Ratings

Bond rating agencies provide independent and globally consistent opinions about the credit worthiness of a debt issuer. The rating measures the risk of default on debt issued by a rated entity.

Each year, BC's economic and financial outlook, fiscal policy and debt position are evaluated by three credit rating agencies – Moody's Investors Service, Standard & Poor's and Dominion Bond Rating Service. Each agency assigns a rating to the province following their evaluation. A credit rating affects the borrower's debt servicing costs as investors will demand a higher interest rate on a higher-risk, lower-rated security.

The following table shows the relative inter-provincial credit ratings. In November 2004, Standard & Poor's upgraded BC's credit rating to AA from AA-, while Moody's Investors Service improved the province's credit rating to Aa1 (equivalent to AA+ using Standard & Poor's scale) from Aa2 in March 2005 and Dominion Bond Rating Service increased its rating to AA from AA (Low).

**Interprovincial Comparison of Credit Ratings, June 2005**

Province	Rating Agency <sup>1</sup>		
	Moody's Investors Service	Standard & Poor's	Dominion Bond Rating Service
British Columbia.....	Aa1	AA	AA
Alberta.....	Aaa	AAA	AAA
Saskatchewan.....	Aa3	AA-	A (High)
Manitoba.....	Aa2	AA-	A (High)
Ontario.....	Aa2	AA	AA
Quebec.....	A1	A+	A
New Brunswick.....	Aa3	AA-	A (High)
Nova Scotia.....	A2	A	A (Low)
Prince Edward Island.....	A2	A	A (Low)
Newfoundland.....	A3	A-	BBB (High)

<sup>1</sup> The rating agencies assign letter ratings to borrowers. The major categories, in descending order of credit quality are: AAA/Aaa; AA/Aa; A; BBB/Baa; BB/Ba; and B. The "1", "2", "3", "high", "low", "+", and "-" modifiers show relative standing within the major categories. For example, AA+ exceeds AA and Aa2 exceeds Aa3.

Moody's analysis of the province recognized that BC has a "well-structured fiscal framework, low debt burden compared to Canadian provincial peers and low interest costs relative to revenue". Moody's also credited the government for implementing a "prudent fiscal framework focusing on the structural realignment of revenues and expenses, the reprioritization of program

spending and regulatory reforms to stimulate economic growth".

### Low debt burden compared to Canadian peers...

Per cent of GDP, at March 31, 2005 (estimated)

Source: Moody's Investors Service Inc., based on May 2005 estimates

### ...and low interest costs relative to revenue

Per cent of provincial revenue, at March 31, 2005 (estimated)

Source: Moody's Investors Service Inc., based on May 2005 estimates

Standard & Poor's echoed these comments while noting the province's four-year track record of meeting or exceeding budgetary targets and the government's strong management with improved transparency in budgetary reporting.

Dominion Bond Rating Service's rating considerations included as strengths the province's established fiscal credibility, an improving economic outlook and competitive personal tax rates.

Three rating upgrades within the same year recognize BC's improved economic and fiscal outlook, its record for meeting annual budget targets and the low taxpayer-supported debt burden relative to other provincial jurisdictions. The government will build upon these successes by continuing to promote a strong, vibrant and competitive economy; maintaining balanced budgets while protecting funding for health care and education; and ensuring debt remains affordable for future generations of British Columbians.

# Appendix 2

## Financial Review

## Government's Financial Statements

### *Government Reporting Entity*

The provincial government conducts its activities through:

- ministries;
- Crown corporations and agencies; and
- the SUCH sector (school districts; universities; colleges, university colleges and institutes; and health authorities and hospital societies).

The accounts relating to the ministries and other direct activities of government are contained in the Consolidated Revenue Fund (CRF), whose financial results are reported as a separate entity in the *Public Accounts*. The CRF comprises all money over which the legislature has direct power of appropriation. The operations of Crown corporations and agencies and the SUCH sector entities are recorded in their own financial statements, which are subject to audit by the Auditor General or by private-sector auditors. The relationship between the Crown corporations and the legislature is guided by governance agreements between the Crown corporation boards and their responsible ministers. The relationship between the SUCH sector entities and the legislature is set out in statute.

According to generally accepted accounting principles (GAAP) for senior governments as established by the Public Sector Accounting Board (PSAB) of the Canadian Institute of Chartered Accountants, the province's financial reporting consolidates the financial results of all these entities into a single set of financial statements. The provincial government publishes its financial statements annually in the *Public Accounts*.

### *Compliance with GAAP*

British Columbia's *Budget Transparency and Accountability Act* (BTAA) requires all financial documents produced by the province under that legislation to fully comply with GAAP starting with the 2004/05 fiscal year. Compliance with this requirement began with the February 2004 Budget and is completed in the 2004/05 *Public Accounts*.

Under GAAP, taxpayer-supported entities<sup>1</sup> are consolidated with the CRF on a line-by-line basis for both the income statement and balance sheet. Self-supported entities are disclosed on a modified equity basis – i.e. their net income is reported as revenue and their retained earnings as an investment.

Where the accounting policies of taxpayer-supported Crown corporations and agencies and the SUCH sector entities differ from those used by the central government in preparing its own consolidated revenue fund financial

<sup>1</sup> Crown corporations and agencies may be classified as either taxpayer-supported or self-supported. Crown corporations and agencies are considered self-supported if:

- the majority of their operating revenue comes from non-government sources; and
- their operating revenue is sufficient to cover operating and debt service costs, without the need for government grants or other forms of assistance.

Crown corporations and agencies that do not meet these criteria are classified as taxpayer-supported. (All SUCH sector entities are considered taxpayer-supported.)

statements, the Crown corporation and agency and SUCH sector entity financial statements are adjusted to conform to government’s accounting policies.

Revenue and expenditure are recorded on an accrual basis of accounting except when the accruals cannot be determined with a reasonable degree of certainty or when their estimation is impracticable, as is the case with corporation income tax that is recorded on a cash basis. Assets are recorded to the extent that they represent financial claims by government upon outside parties; are items held for resale, prepaid expenses, deferred charges, or prepaid capital advances; or are tangible capital assets. Similarly, liabilities are recorded only if they represent actual or probable financial claims against the government.

**Financial Statement Presentation**

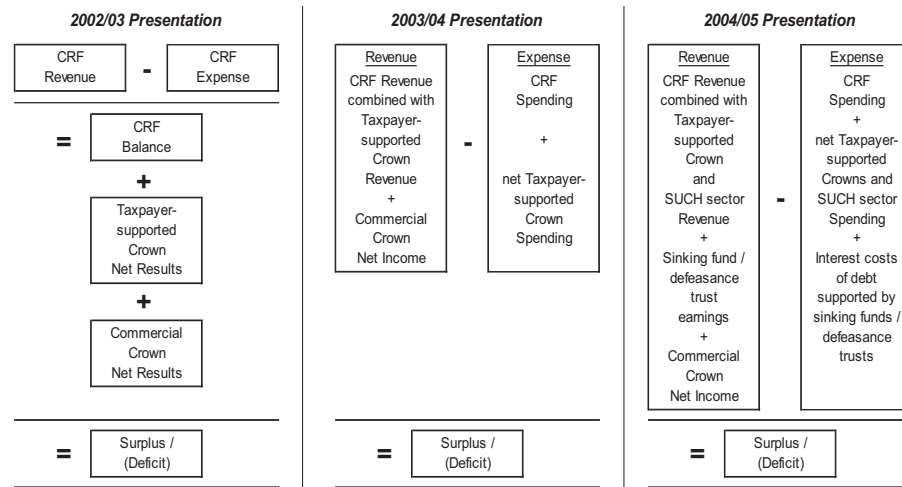

The 2004/05 financial statements reflect the process of government adopting a GAAP approach to disclosing the revenue and expenses of the government reporting entity in the *Estimates, Budget and Fiscal Plan* and *Quarterly Reports*.

In 2002/03 and previous years, the consolidated revenue fund, taxpayer-supported Crown corporations and agencies, and self-supported Crown corporations were shown separately on a net basis. The SUCH sector entities were excluded.

In 2003/04, the presentation was changed to a full consolidation format that disclosed the total revenue and total expenses of government. The new presentation maintained CRF ministry expenses (which are detailed in the *Estimates* for legislative approval) as a key element of the expense statement. In addition to showing expenses by major accountability area, a separate expense statement on a by-function basis was also provided in order to meet GAAP reporting requirements. However, the financial statements still did not include the SUCH sector, and debt was shown net of sinking funds.

For 2004/05, the financial statements, including the budget and quarterly reports, are fully GAAP compliant, as reflected in the unqualified opinion of the Auditor General. The SUCH sector is fully consolidated with the rest of

**Chart A2.1 Changes in Accounting Presentation**

government, and debt is disclosed at gross levels, including debt offset by sinking funds and defeasance trusts. Similarly, the income statement includes sinking fund and defeasance trust earnings as revenue and the interest cost of the debt at gross, before the earnings offset. The change in presentation does not affect the bottom line or net assets, only how revenue and expenses are shown in the financial statements.

In this appendix, unless otherwise noted, current and historical operating results are presented in accordance with the province's accounting policies effective March 31, 2005.

## The Annual Financial Cycle<sup>2</sup>

The BTAA outlines the province's reporting requirements during the financial cycle and imposes specific reporting deadlines or release dates for these publications. In particular, fixed dates for presentation of the Throne Speech and budget, as well as dates for quarterly and annual reports, are set by law.

Under the BTAA, the provincial government focuses its budgeting and reporting on a summary accounts basis. The BTAA requirements include reporting on the advice of the Economic Forecast Council; presentation of the annual *Estimates, Budget and Fiscal Plan, Quarterly Reports, and Public Accounts* in accordance with GAAP by 2004/05; publication of *Quarterly Reports* with revised forecasts; annual three-year service plans and service plan reports for each ministry and government organization; and an annual three-year government strategic plan and report.

Chart A2.2 summarizes the annual financial process of the province. This process consists of four main stages.

- *Planning and Budget Preparation* — Treasury Board reviews longer-term estimates of revenue, expense, capital and debt, and establishes a preliminary fiscal plan within the framework of the government's overall strategic plan. Preliminary high-level targets are provided to ministries and received from Crown corporations. Ministries and Crown corporations prepare three-year service plans, including performance measures and targets, and operating and capital budgets, for review by Treasury Board and/or government Caucus committees. Treasury Board makes decisions on budget allocations for ministries and assesses Crown corporation net income benchmarks based on government revenue forecasts, spending and capital priorities, and debt targets within the context of the fiscal plan. Included as inputs into this process are a consultation paper published by September 15<sup>th</sup> that invites public comment on issues that need to be addressed in the fiscal and service plans, and province-wide public hearings held by a committee of the legislature. A report outlining the results of the budget consultation process is made public by November 15<sup>th</sup> of each year.
- *Implementation and Reporting* — The government's revenue, expense and capital plans for the next three fiscal years, as well as other information on the government's finances, are presented to the Legislative Assembly by the Minister of Finance in a budget document called the *Budget and Fiscal Plan*.

<sup>2</sup> Reflects the financial cycle for normal years. The cycle for 2005/06 is different because of an election held in May 2005. As a result, the *Estimates* will be re-tabled in the Legislature in September 2005 along with the first *Quarterly Report* for 2005/06. Debate and final supply will be concluded in the Fall session of the Legislature. At the same time, the 2006/07 process starts in September 2005 with the release of the *Budget Consultation Paper* for the 2006/07 budget.

**Chart A2.2 Financial Planning and Reporting Cycle Overview**

The financial plan for the next fiscal year is included in the document called the *Estimates*, which describes the individual appropriations to be voted on by the Legislative Assembly. The service plans and a report on major capital projects (those where government contribution exceeds \$50 million) must also be tabled. Throughout the year, the authorized funding as specified in the *Estimates* and ministry service plans is spent on programs and services. Crown corporations follow approved service plans under the direction of their own Boards of Directors. *Quarterly Reports*, including full-year forecasts, are published by legislated dates to provide regular updates to the public on the government's finances.

- **Evaluation** — At the end of the fiscal year, the *Public Accounts* are prepared by the Comptroller General and examined by the Auditor General to ensure that the financial statements fairly present the government's financial position. The *Public Accounts* are augmented by the *British Columbia Financial and Economic Review*, which provides an overview of annual and historical financial and economic results. In addition, annual service plan reports are made public that compare actual results with ministry and Crown corporation performance targets.
- **Accountability** — The *Public Accounts* are presented to the Legislative Assembly and are reviewed by two committees of the Legislative Assembly

(the Select Standing Committee on the *Public Accounts* and the Select Standing Committee on Crown corporations). At the same time, the *Ministerial Accountability Report* is published detailing the individual and collective financial performance of cabinet ministers, and the performance and revenue results achieved by the Ministers of State and the Minister of Provincial Revenue. In addition, when the *Public Accounts* are tabled, ministries and most Crown corporations release their service plan reports detailing results for the previous fiscal year. A report on the government's strategic plan is also presented.

## Unfunded Pension Liabilities

The province contributes to four defined benefit pension plans for most of its employees. These pension plans are managed under joint trusteeship arrangements with the plan members. Under joint trusteeship, the provincial government has no formal claim on plan surpluses or assets. As a result, government's balance sheet does not contain any liabilities for pensions other than MLA pensions, which are not part of a joint trusteeship arrangement.

In the event that a plan is determined to be in a deficit position, the pension boards, by agreement, are required to address the deficit through contribution adjustments or other measures. As a result, it is expected that any unfunded pension liability in the future would be short-term in nature. No unfunded liability exists for the future indexing of pensions, as the obligation is limited to the amount of available assets in separate inflation accounts.

The estimated financial positions of each plan (based on extrapolations of the most recent actuarial valuations) as at March 31, 2005 are shown in Table A2.1.

Actuarial valuations are performed on the pension plans every three years. The pension plans and the dates of their last actuarial valuation are:

**Table A2.1 Pension Plan Balances**

(\$ millions)	Pension Plan					Total	2003/04
	Public Service	Municipal	Teachers'	College	Other		
Accrued benefit obligation .....	(9,488)	(10,357)	(11,102)	(1,425)	(309)	(32,681)	(29,932)
Pension fund assets .....	11,756	10,610	10,870	1,650	323	35,209	33,074
<b>Subtotal .....</b>	<b>2,268</b>	<b>253</b>	<b>(232)</b>	<b>225</b>	<b>14</b>	<b>2,528</b>	<b>3,142</b>
Unamortized actuarial gain (loss) .....	-	915	711	176	(4)	1,798	972
<b>Accrued net asset .....</b>	<b>2,268</b>	<b>1,168</b>	<b>479</b>	<b>401</b>	<b>10</b>	<b>4,326</b>	<b>4,114</b>

- Public Service Pension Plan, March 31, 2002;
- Municipal Pension Plan, December 31, 2003;
- Teachers' Pension Plan, December 31, 2002; and
- College Pension Plan, August 31, 2003.

Key actuarial assumptions used in the valuations are:

- Public Service Pension Plan – long-term annual rate of return on fund assets (ARR) 7.30 per cent, long-term annual salary increase (ASI) 4.80 per cent;
- Municipal Pension Plan – ARR 7.00 per cent, ASI 4.50 per cent;
- Teachers' Pension Plan – ARR 7.25 per cent, ASI 4.75 per cent; and
- College Pension Plan – ARR 7.20 per cent, ASI 4.70 per cent.

The pension plans are administered by the BC Pension Corporation. The audited financial statements of each pension plan, along with full descriptions, benefit formulas, inflation assumptions and funding polices may be found on the corporation's website at [www.pensionsbc.ca](http://www.pensionsbc.ca).

## Adjustments to the Accumulated Deficit

During 2004/05, a number of retroactive adjustments were made to the province's financial statements to reflect changes in accounting policy and to correct previously published information. Table A2.2 provides a summary of the changes that have been reviewed and approved by the Office of the Auditor General.

The main adjustment to the prior year accumulated deficit relates to the inclusion of the SUCH sector discussed earlier in this appendix. Inclusion of

**Table A2.2 Summary of Changes in Accumulated Deficit from the 2004/05 Public Accounts reported balance**

(\$ millions)	Change	Final Results
<b>Accumulated deficit on March 31, 2003 as reported in the 2003/04 Public Accounts</b> .....		<b>(8,015)</b>
<b>Opening balance adjustments due to accounting policy changes in 2004/05:</b>		
Inclusion of SUCH sector (including restatements) .....	4,247	
Deferral of bonus bid payments previously reported as revenue in year received .....	(934)	
Inclusion of debt previously considered defeased and the related trusts .....	7	
Inclusion of Leading Edge Endowment Fund Society .....	51	
BC Hydro restatement to comply with CICA guidelines on asset retirement obligation .....	229	
BC Buildings adjustment to deferred revenue from entities external to government .....	(26)	
BC Housing Management Commission impact of restatement of Canada Mortgage and Housing Corporation funds received accrual .....	(9)	<u>3,565</u>
<b>Accumulated deficit on March 31, 2003 as reported in the 2004/05 Public Accounts</b> .....		<b>(4,450)</b>
<b>2003/04 deficit:</b>		
<b>As reported in the 2003/04 Public Accounts</b> .....	(1,339)	
<b>Adjustments due to accounting policy changes in 2004/05:</b>		
Impact of including SUCH sector in the government reporting entity (including restatements).....	351	
Impact of deferral of bonus bid payments .....	(344)	
Social services tax accrual adjustment .....	23	
Impact of including debt previously considered defeased and related trusts .....	31	
Impact of including Leading Edge Endowment Fund Society .....	1	
BC Hydro restatement for change in asset retirement obligation accrual .....	13	
BC Rail accrual for asset retirement obligations as per new CICA guideline .....	(10)	
BC Housing Management Commission impact of restatement of Canada Mortgage and Housing Corporation funds received accrual .....	(6)	
BC Transportation Financing Authority correction to capitalize interest on highway project debt ..	5	<u>(1,275)</u>
<b>Accumulated deficit on March 31, 2004 as reported in the 2004/05 Public Accounts</b> .....		<b><u>(5,725)</u></b>

the SUCH sector reduced the 2003/04 accumulated deficit of the province by \$4.6 billion.

Another major restatement relates to bonus bid revenue received from the oil and gas industry for exploration and development rights. Previously, bonus bid payments were recorded as revenue in the year they were received. An analysis of the rights conveyed by the bonus bids showed that they have an average life of eight years, so the payments are now deferred and amortized to revenue over the average life of the bonus bid rights.

In 2004/05, BC Hydro adopted the new CICA (Canadian Institute of Chartered Accountants) standard on asset retirement obligations (AROs). BC Hydro had previously recorded a more generous provision for the site restoration liabilities. The new CICA standard reduced the liability and the 2003/04 accumulated deficit by \$242 million. The ARO standard was adopted also by BC Rail, which recorded a \$10 million liability. This was the initial accrual of this liability for BC Rail.

Adoption of GAAP means that defeasance trusts must be reported as assets and the defeased debt included in the debt balance. Due to the requirement for defeasance trusts to pay the interest costs of the related debt as well as the principal, the value of the trust is higher than the amount of debt being defeased. This had a \$38 million positive impact on the 2003/04 accumulated deficit.

Other restatements reflected a revision to the social services tax accrual for 2003/04, the inclusion of the Leading Edge Endowment Fund Society as part of the government reporting entity and some minor adjustments to the financial results of the BC Buildings Corporation, BC Housing Management Commission and the BC Transportation Financing Authority.

## Supplementary Schedules

The following tables provide multi-year financial information on the government of British Columbia including revenue, expense, debt and summarized operating results of major Crown corporations. Tables A2.4 and A2.20 provide summaries of changes to the income statement, capital spending and debt since the third *Quarterly Report* released on February 15, 2005. Tables A2.25 to A2.27 provide information on provincial taxes as of June 2005.

**Table A2.3 Operating Statement Update Since the Third Quarterly Report**

(\$ millions)	Changes	Updated Forecast
<b>Budget 2004 Fiscal Plan (February 17, 2004)</b> .....		<b>100</b>
Revenue increases up to the third <i>Quarterly Report</i> .....	2,234	
Expense increases up to the third <i>Quarterly Report</i> .....	(694)

<sup>1</sup> In order to comply with generally accepted accounting principles, revenue of school districts, post-secondary institutions and regional health authorities/societies is included in the government's reporting entity beginning in 2004/05. To conform with this presentation, prior years have been restated based on unaudited financial information in the *Public Accounts*.

<sup>2</sup> Includes revenue from corporation capital, insurance premium and hotel room taxes.

<sup>3</sup> Includes asset dispositions, reimbursements for health care and other services provided to external agencies, and other recoveries.

<sup>4</sup> Includes contributions for health, education, housing and social service programs, for transportation projects, and for coastal ferry services.

<sup>5</sup> Amounts represent earnings during government's fiscal year.

– growth rate (per cent).....	109.5	-7.5	-5.6	1.9	10.5

<sup>1</sup> Revenue has been restated to reflect the government's accounting policy at March 31, 2005. Figures exclude dedicated revenue collected on behalf of, and transferred to, the Greater Vancouver Transportation Authority (*Translink*) and other public bodies outside of the government reporting entity.

<sup>2</sup> Revenue as a per cent of GDP is calculated using GDP for the calendar year ending in the fiscal year (e.g. 2004/05 revenue divided by GDP for the 2004 calendar year). Totals may not add due to rounding.

<sup>3</sup> Per capita revenue is calculated using July 1 population (e.g. 2004/05 revenue divided by population on July 1, 2004).

<sup>4</sup> Revenue is converted to real (inflation-adjusted) terms using the consumer price index (CPI) for the corresponding calendar year (e.g. 2004 CPI for 2004/05 revenue). Totals may not add due to rounding.

**Table A2.16 Full-Time Equivalents (FTEs)<sup>1,2</sup> – 2000/01 to 2004/05**

	2000/01	2001/02	2002/03	2003/04	2004/05
Ministries and special offices (CRF).....	33,579	33,495	29,751	28,684	26,859
Taxpayer-supported Crown corporations and agencies...	8,450	8,447	7,814	5,076	3,822
<b>Total FTEs</b> .....	<b>42,029</b>	<b>41,942</b>	<b>37,565</b>	<b>33,760</b>	<b>30,681</b>

<sup>1</sup> Full-time equivalents (FTEs) are a measure of staff employment. FTEs are calculated by dividing the total hours of employment paid for in a given period by the number of hours an individual, full-time person would normally work in that period. This does not equate to the physical number of employees. For example, two half-time employees would equal one FTE, or alternatively, three FTEs may represent two full-time employees who have worked sufficient overtime hours to equal an additional FTE.

<sup>2</sup> FTE amounts do not include SUCH sector staff employment.

<sup>1</sup> Debt is after deduction of sinking funds and unamortized discounts, and excludes accrued interest. Government direct and fiscal agency accrued interest is reported in the government's accounts as an accounts payable. Figures for earlier years have been restated to conform with the presentation used for 2005 and to reflect changes in underlying data.

<sup>2</sup> Includes debt and guarantees incurred by the government on behalf of school districts, universities, colleges and health authorities/hospital societies (SUCH), and debt directly incurred by these entities.

<sup>3</sup> Effective April 1, 2003, the provincial coastal ferry system became independently operated by BC Ferry Services.

<sup>4</sup> In March 2002, the company's debt was assumed by the provincial government (\$260 million) and by the minority shareholder (\$94 million) as Skeena Cellulose Inc. was sold to the private sector.

<sup>5</sup> Includes the BC Housing Management Commission and the Provincial Rental Housing Corporation.

<sup>6</sup> A joint venture of the Columbia Power Corporation and Columbia Basin Trust. This debt has reverted to self-supported status.

<sup>7</sup> Includes other taxpayer-supported Crown corporations and agencies, student loan guarantees, loan guarantees to agricultural producers, guarantees issued under economic development and home mortgage assistance programs, and loan guarantee provisions.

<sup>8</sup> BC Rail debt was repaid after completion of the BC Rail investment partnership.

<sup>1</sup> Debt is after deduction of sinking funds, unamortized discounts and unrealized foreign exchange gains/(losses), and excludes accrued interest. Government direct and fiscal agency debt accrued interest is reported in the government's accounts as an accounts payable. Figures for 1998/99 onwards have been restated to conform with the presentation used for 2005 and to reflect changes in underlying data.

<sup>2</sup> Includes BC Buildings, BC Housing Management Commission, Provincial Rental Housing Corporation and other taxpayer-supported Crown corporations and loan guarantee provisions.

<sup>3</sup> Includes commercial Crown corporations and agencies and, beginning in 1995/96, funds held under the province's warehouse borrowing program.

**Table A2.25 Provincial Taxes (as of June 2005)**

Type and Statute Reference	Tax Base	Tax Rate	Characteristics and Exemptions
Income — <i>Income Tax Act</i>	Taxable Income (1) Corporate.  (2) Personal.	13.5% of taxable income (small business rate: 4.5%).  Tax rates of 6.05%, 9.15%, 11.7%, 13.7% and 14.7% corresponding to tax brackets of up to \$33,061, \$33,061 to \$66,123, \$66,123 to \$75,917, \$75,917 to \$92,185 and over \$92,185.	The Canada Revenue Agency administers BC's personal and corporate taxes under an agreement between the province and the federal government.  Corporate tax credits include the scientific research and experimental development tax credit, book publishing tax credit and the film tax credit. In addition, the political contributions tax credit, royalty tax credit, the mining exploration tax credit, logging tax credit and venture capital tax credits are available to both individuals and corporations.  BC provides a set of non-refundable credits equivalent to all federal non-refundable credits.  BC Family Bonus and BC Earned Income Benefit are combined with the federal government's Canada Child Tax Benefit in a single monthly payment to families. Tax credits for claims against personal income taxes include the refundable sales tax credit, mining flow-through share tax credit and employee venture capital tax credits.
Capital — <i>Corporation Capital Tax Act</i>	Net BC paid-up capital.	Banks, trust companies and credit unions with net paid-up capital: greater than \$1 billion — 3%; \$1 billion or less or headquartered in British Columbia 1%.	Associated groups of corporations with net paid-up capital of less than \$10 million are exempt from the tax. The tax rate is phased in for corporations with net British Columbia paid-up capital between \$10 million and \$10.25 million. There is a special flat fee for corporations above the exemption threshold but with net paid-up capital allocated to British Columbia below the threshold.
Real Property Transfers — <i>Property Transfer Tax Act</i>	Fair market value of property or interest in property transferred for presold strata units purchased at arm's length, total consideration for the strata unit.	1% on the first \$200,000 of value transferred and 2% on amounts in excess of \$200,000.	Exemptions include: transfers of principal residences, recreational residences and family farms to related individuals; transfers of property between spouses pursuant to written separation agreements or court orders; transfers of property to local governments, registered charities and educational institutions; transfers of property to veterans under the <i>Veterans' Land Act</i> (Canada); transfers of land to be protected, preserved, conserved or kept in a natural state; and transfers of leases less than 31 years in duration. A number of technical exemptions are also provided. Eligible first time home-buyers are exempt from tax on transfers of eligible properties.
Retail Sales — <i>Social Service Tax Act</i>	Purchase and lease price of tangible personal property, repair labour and legal services.	General rate is 7%. Liquor 10%. Passenger vehicles: under \$49,000 — 7%; \$49,000 to \$50,000 — 8%; \$50,000 to \$51,000 — 9%; over \$51,000 — 10%.	Collected through vendors and lessors registered under the act and paid by purchasers and lessees. The exemptions generally fall into four categories: (1) items considered to be basic necessities of life such as food and prescription and non-prescription drugs; (2) specified inputs for certain sectors to enhance competitiveness such as the exemption for machinery and equipment used in manufacturing and in the natural resource industries and the exemption of specified equipment used by <i>bona fide</i> farmers, fishers and aquaculturists; (3) safety-related equipment designed to be worn by a worker, such as high-visibility vests and steel-toed boots, and specified general safety equipment such as life jackets; (4) energy conservation materials and equipment such as insulation material for buildings, and eligible wind, solar and micro-hydro equipment.
Accommodation — <i>Hotel Room Tax Act</i>	Purchase price of accommodation.	8%. Local governments may apply to have the province levy an additional tax of up to 2% on their behalf.	Exemptions include accommodation rented for a period in excess of two months; lodging provided in hospitals and nursing homes; lodging supplied to employees by employers; lodging in industrial camps; lodging on ships or trains; hotel rooms not used for accommodation; charges of \$20 or less per day; charitable institutions; trailer parks and campsites; cabins without utilities and other amenities; and establishments with accommodation for less than four tenants.

**Table A2.25 Provincial Taxes (as of June 2005) — Continued**

Tobacco — <i>Tobacco Tax Act</i>	By cigarette, cigar retail price, and weight on other tobacco products.	17.9 cents per cigarette and tobacco stick; 77% of retail price on cigars to a maximum tax of \$5 per cigar; 17.9 cents per gram of loose tobacco.	
Motor Fuel — <i>Motor Fuel Tax Act</i>	<p>Clear gasoline (unleaded gasoline only).</p> <p>Motive fuel.</p> <p>Alternative motor fuels.</p> <p>Coloured fuel, marine diesel fuel.</p> <p>Locomotive fuel. Jet and aviation fuel.</p> <p>Natural gas used in stationary engines.</p> <p>Natural gas used in pipeline compressors to transmit marketable gas.</p> <p>Natural gas used in pipeline compressors to extract and transmit raw gas from wells to processing plants.</p> <p>Natural gas used in compressors to re-inject sour gas into depleted wells.</p>	<p>14.5 cents per litre. Includes 6.75 cents per litre collected on behalf of the BC Transportation Financing Authority. Of the tax collected in the Greater Vancouver Regional District, 6 cents is collected on behalf of <i>TransLink</i>.</p> <p>15.0 cents per litre. Includes 6.75 cents per litre collected on behalf of the BC Transportation Financing Authority. Of the tax collected in the Greater Vancouver Regional District, 6 cents is collected on behalf of <i>TransLink</i>.</p> <p>Propane 2.7 cents per litre.</p> <p>3 cents per litre.</p> <p>3 cents per litre. 2 cents per litre.</p> <p>7% of price if purchased. 1.1 cents per 810.32 litres if used but not purchased. 1.9 cents per 810.32 litres.</p> <p>Exempt</p> <p>Exempt.</p>	<p>Tax generally applies to all fuels used in internal combustion engines. Qualifying persons with disabilities who own or lease a vehicle are entitled to refunds of provincial tax paid up to an annual maximum of \$500. In the Vancouver Regional Transit service area the province collects an additional 6 cents per litre tax on clear gasoline and motive fuel on behalf of <i>Translink</i> to help fund regional public and private transportation system costs. In the Victoria Regional Transit service area the province collects an additional 2.5 cents per litre on behalf of BC Transit to help fund the public transit system.</p> <p>Tax applies to diesel fuel or a combination of fuels including diesel fuels, but does not include alternative motor fuels or coloured fuels. Refunds of 0.5 cents per litre are available for motive fuel used in private passenger vehicles.</p> <p>Natural gas and 85% methanol blends are exempt from tax. Ethanol is exempt from tax when blended with gasoline or diesel fuel if the ethanol portion is at least 5% but less than 25%. Biodiesel is exempt from tax when blended with diesel fuel if the biodiesel portion is at least 5% and not more than 50%.</p> <p>Coloured fuel may only be used for specified primary production and industrial uses. <i>Bona fide</i> farmers are exempt from paying the tax when fuel is used for farming purposes. Tax applies to fuel specifically for use in locomotives. Jet fuel tax applies to fuel produced specifically for use in a turbine aircraft engine. Aviation fuel tax applies to fuel produced specifically for use in a non-turbine aircraft engine. Tax applies to natural gas used in stationary engines other than pipeline compressors.</p> <p>Tax applies to natural gas used in a stationary engine at a pipeline compressor station.</p>
	<p>Marine bunker.</p> <p>Marine gas oil.</p>	<p>Exempt</p> <p>Exempt</p>	<p>Exemption applies to bunker fuel, or a combination of bunker and other fuels used as fuel in a ship. Exemption applies to marine gas oil when used in primary gas turbine engines to propel passenger and cargo vessels.</p>

**Table A2.25 Provincial Taxes (as of June 2005) — Continued**

Natural resources — <i>Logging Tax Act</i>	Net income from logging in BC.	10% (fully recoverable against federal and provincial corporation and personal income tax).	Net income from logging after deducting non-forestry income and a processing allowance.
— <i>Mineral Land Tax Act</i>	Assessed value of freehold mineral land and production areas.	Undesignated mineral land — \$1.25 to \$4.94 per hectare. Designated production areas — \$4.94 per hectare.	Rates of tax set on sliding scale, dependent on size and designation of land.
— <i>Mineral Tax Act</i>	Cash flow from individual metal and coal mines (other than placer gold mines).  Volume of production of limestone, dolomite, marble, shale, clay, volcanic ash, diatomaceous earth, sandstone, quartzite and dimension stone.  Value of minerals sold by placer gold mines.	2% of net current proceeds (NCP). 13% of net revenue (NR).  \$0.15 per tonne removed from all quarries operated.  0.5% of value of minerals sold.	Tax calculated on a mine-by-mine basis. NCP tax paid on current operating cash flow until all current and capital costs, plus any investment allowance, are recovered. NR tax paid thereafter on cumulative cash flow. NCP tax creditable against NR tax.  An operator may deduct 25,000 tonnes from the total number of tonnes removed from all quarries operated by that operator. However the amount deducted from any one quarry by all operators of that quarry must not exceed 25,000 tonnes.
Insurance — <i>Insurance Premium Tax Act</i>	Direct premiums written.	4.4% for vehicle and property insurance; 2% for life, sickness, personal accident and loss of salary and wages insurance and 4 percent for other insurance.	Exemptions — benefit societies; mutual corporations with 50% of income from farm or 100% from religious, educational or charitable institutions; marine, except pleasure craft; approved medical or hospitalization plans.
Real property — <i>Taxation (Rural Area) Act</i>	Assessed value of land and improvements in rural areas (outside municipalities). Assessment determined under the <i>Assessment Act</i> .	Rates are set annually as a percentage of assessed value. For residential properties the rates are set to increase average residential rural taxes by the rate of inflation. For 2005, the rates are set so that total non-residential rural tax revenues increase by inflation plus new construction. For 2005, the rates are 0.05% for farms and managed forest land; 0.081% for residential; 0.164% for recreational property/non-profit organizations; 0.36% for light industry, business and other property not contained in any other class; 0.418% for utilities; 0.45% for major industry.	Some exemptions apply under various statutes.
Residential school tax — <i>School Act</i>	Assessed value of residential land and improvements. Assessment determined under the <i>Assessment Act</i> .	Rates are set annually to increase average gross residential taxes by the rate of inflation. The rates vary by school district. For 2005 rates range from about 0.189% to 0.9%; weighted average 0.28%.	Basic rates are calculated using a formula to moderate effects of varying average assessments on school district taxes. School districts may levy additional tax if authorized by local referendum. Amendments to the School Act in 2002 allow the Minister of Finance to apply different tax rates within a school district. Tofino is the only municipality with a rate that differs from the rest of the school district.
Non-residential school tax — <i>School Act</i>	Assessed value of non-residential land and improvements. Assessment determined under the <i>Assessment Act</i> .	Rates are set annually. For 2005, the rates are set so that total non-residential school tax revenues increase by inflation plus new construction. For 2005 the rates are 0.45% for recreational property/non-profit organizations; 0.23% for managed forest land; 0.68% for farms; 0.96% for light industry, business and other property not contained in any other class; 1.25% for major industry; 1.49% for utilities.	Some exemptions apply under various statutes.

<sup>1</sup> Rates shown are those known as of June 30, 2005 and that are in effect for 2005.

<sup>2</sup> British Columbia rates are those announced in the February 15, 2005 Budget.

<sup>3</sup> Manitoba has announced a reduction in its small business rate to 4.5 per cent and its general rate to 14.5 per cent in 2006. New Brunswick's small business rate is reduced to 2 percent and the small business threshold is increased to \$450,000 effective July 1, 2005; to 1.5 percent and the small business threshold is increased to \$475,000 effective July 1, 2006; and to 1 percent and the small business threshold is increased to \$500,000 effective July 1, 2007.

<sup>4</sup> Ontario has a deduction of \$7.5 million for all corporations; Manitoba has a \$5 million deduction and the higher rate applies to corporations with taxable capital in excess of \$10 million; Saskatchewan has a \$10 million deduction; Quebec has a \$600,000 deduction. Large Saskatchewan resource corporations are assessed a surcharge on the value of Saskatchewan resource sales. Ontario and Quebec have an additional surcharge or compensation tax on financial institutions.

<sup>5</sup> British Columbia has a two-person rate of \$96. British Columbia and Alberta offer premium assistance in the form of lower rates or an exemption from premiums for lower income individuals and families.

<sup>6</sup> Provinces with payroll taxes provide payroll tax relief for small businesses.

<sup>7</sup> The lower rate applies to premiums for life, sickness and accident insurance; the higher rate applies to premiums for property insurance including automobile insurance. In Ontario, Quebec and Newfoundland specific sales taxes also apply to insurance premiums, except those related to individual life and health.

<sup>8</sup> Tax rate is for regular fuel used on highways. The British Columbia rate includes 6.75 cents per litre dedicated to the BC Transportation Financing Authority. The rates do not include regional taxes. The Quebec and Prince Edward Island rates include estimated sales tax.

<sup>9</sup> Includes estimated provincial sales tax where applicable.

**Table A2.27 Summary of Major Tax Changes Announced in 2005*****Income Tax Act***

- The BC Tax Reduction, a non-refundable personal income tax credit, was introduced effective January 1, 2005.
- The Mining Exploration Tax Credit was extended to 2016.
- The Film Incentive BC tax credit was increased to 30 per cent from 20 per cent and the Production Services Tax Credit is increased to 18 per cent from 11 per cent.
- The corporate income tax small business threshold was increased to \$400,000 from \$300,000 effective January 1, 2005.

***Medicare Protection Act***

- The Medical Services Plan Premium Assistance program is enhanced.

***Social Service Tax Act***

- The provincial sales tax rate was reduced to 7 per cent from 7.5 per cent effective October 21, 2004.
- Effective February 16, 2005, tax refunds for alternative fuel vehicles were enhanced and converted to point of sale tax reductions. The increased tax reduction for hybrid passenger vehicles was phased out over 2 years beginning on April 1, 2008.
- A time limited exemption for energy efficient ENERGY STAR Qualified residential furnaces, boilers and air and ground source heat pumps was introduced.
- The passenger vehicle surtax threshold was increased to \$49,000 from \$47,000.

***Insurance Premium Tax Act***

- A tax exemption for health care insurance premiums received by non-profit extra-provincial health insurance corporations for medical service and health care plans contracted with BC residents was introduced retroactive to January 1, 1997.

***Home Owner Grant Act***

- The threshold value at which the home owner grant begins to be phased out was increased to \$685,000 from \$585,000 beginning in the 2005 tax year. The rate at which the grant is phased out was reduced to \$5 from \$10 for each \$1,000 of assessed value above the threshold.

***School Tax Act***

- Effective for 2005, the government introduced an exemption from school tax for specified improvements of eligible hydroelectric projects that began production after December 31, 2001. Eligible projects are run-of-river projects that have a long-term contract to sell energy to BC Hydro signed before January 1, 2005 and hydroelectric power projects that have EcoLogo™ certification under the Government of Canada's Environmental Choice™ program.

***Property Transfer Tax Act***

- Effective for registrations after February 15, 2005, the fair market value threshold for eligible residential property under the First-Time Home Buyers' program was increased to \$325,000 from \$275,000 in the Greater Vancouver Regional District, the Capital Regional District and the Fraser Valley Regional District and to \$265,000 from \$225,000 in the rest of the province.

**Appendix 3**  
**Constitutional**  
**Framework**

## Constitutional Framework

The structure of the British Columbia government is based on British parliamentary tradition and precedent. Prior to 1866, BC was composed of two British-controlled Crown colonies, one on Vancouver Island and a second on the mainland. In 1866, the *Union Proclamation* joined these two colonies to form the Crown Colony of British Columbia, and on July 20, 1871, BC entered into Confederation with Canada. Although the Colony of Vancouver Island had a parliamentary form of government as far back as 1856, the first fully elected government was not instituted in BC until the autumn after Confederation with Canada. Responsible government was achieved in late 1872, when the Lieutenant Governor acquiesced to an executive council that was responsible to the legislative assembly.

Upon entering Confederation, BC came under the authority of the *British North America Act, 1867 (BNA Act)*, a statute of the British parliament. Until 1982, the *BNA Act* defined the major national institutions and established the division of authority between the federal and provincial governments. In 1982, the *BNA Act* was renamed the *Constitution Act, 1867* and its amendments were incorporated into the *Constitution Act, 1982*. The *Constitution Act, 1982*, which also includes the Canadian Charter of Rights and Freedoms, is companion legislation to the *Canada Act, 1982*. With the passage of the *Canada Act, 1982*, the British Parliament ended its legal right to legislate for Canada. Canada, as a federal state, divides legislative powers between the federal and provincial governments.

## Provincial Government

BC's government is modeled after the British system. Functionally there are three main branches: the legislature, the executive and the judiciary.

### *Legislature*

Legislative powers in British Columbia are exercised by a single legislative chamber, which is elected for a term of four years. BC, the first province in Canada to legislate fixed election dates, requires an election on the second Tuesday in May every four years. An election may also be called if the government loses a vote of confidence in the legislative assembly.

The legislature consists of the Lieutenant Governor and 79 elected members of the legislative assembly. The legislative assembly represents the people of BC in the conduct of the province's affairs. The assembly is required by law to meet at least once a year with a normal session lasting several months. However, special sessions can last just a few days or many months, depending on the nature of the government's business.

The legislature operates on a fixed schedule – the second Tuesday in February each year is reserved for the Throne Speech and the third Tuesday in February each year is reserved for the Budget Speech.

*Executive*

The executive is composed of the Lieutenant Governor and the executive council. The Lieutenant Governor, the Queen's representative in British Columbia, holds a largely ceremonial place in the modern provincial government. By constitutional custom, the Lieutenant Governor is appointed by the Governor General of Canada for a term usually lasting five years.

The Lieutenant Governor, on the advice of the premier, appoints members of the executive council and is guided by the executive council's advice as long as it holds the confidence of the legislative assembly. Following a general election, the Lieutenant Governor calls upon the leader of the political party with the largest number of elected members to serve as premier and to form the provincial government.

The Lieutenant Governor, on recommendation of the premier, convenes, prorogues and dissolves the legislative assembly and gives Royal Assent to all measures and bills passed by the assembly before they become law.

The executive council, or cabinet, is headed by the premier and is composed of selected members of the ruling party. Ministers are the head of government ministries, and are usually members of cabinet.

Cabinet determines government policy and is held responsible by the legislative assembly for the operation of the provincial government. Deputy ministers are the chief operating officers of ministries and are appointed by cabinet. Deputy ministers are responsible for carrying out government policies and for managing the work of their ministries.

*Judiciary*

The judiciary performs functions that are central to the orderly operation of society. Judges hear and give judgment in criminal prosecutions and in actions arising from disputes between private citizens or between the government and private citizens. Judges apply both judge-made law, known as "common law," and laws made by the Parliament of Canada and provincial legislatures. The judiciary is increasingly called on to determine whether laws passed by governments conform to the values expressed in the Canadian Charter of Rights and Freedoms.

BC's judicial system is made up of the Provincial Court of British Columbia, the Supreme Court of British Columbia and the Court of Appeal of British Columbia. The Provincial Court includes Small Claims, Adult Criminal, Youth and Family divisions. The provincial government appoints Provincial Court judges, and the federal government appoints Court of Appeal and Supreme Court judges.

The federal judicial system includes the Tax Court of Canada, the Federal Court of Canada (Appeals division and Trial division) and the Supreme Court of Canada. The Federal Court of Canada hears cases in limited areas

of exclusively federal jurisdiction, for example, reviewing decisions made by federal tribunals such as the Canada Labour Relations Board. The Supreme Court of Canada is the court of final resort and hears selected appeals from the Federal Court of Appeal and provincial Courts of Appeal.

### *Provincial Government Jurisdiction*

Under Canada's constitutional framework, BC has ownership and jurisdiction over natural resources and is responsible for education, health and social services, municipal institutions, property and civil rights, the administration of justice and other matters of purely provincial or local concern.
